

## Research [1]

MTAS provides research services for the benefit of municipal governments in Tennessee. Opportunities exist to partner with us and your fellow municipalities in surveys, our benchmarking program, the salary and benefit project, and other sponsored research collaborations. Many elements in this section of our website are fee-based.

### Research includes:

- Salary and Benefit Survey [2]: restricted access to an external database of compensation data
- Sponsored Research [3]: highlights of our sponsored research
- Survey Services [4]: connect with our librarians about a survey
- Research and Information Center [5]: learn more about our librarians and the services they provide
