PREFACE

The Scotts Hill Municipal Code contains the codification and revision of the ordinances of the Town of Scotts Hill, Tennessee. By referring to the historical citation appearing at the end of each section, the user can determine the origin of each particular section. The absence of a historical citation means that the section was added by the codifier. The word "modified" in the historical citation indicates significant modification of the original ordinance.

The code is arranged into titles, chapters, and sections. Related matter is kept together, so far as possible, within the same title. Each section number is complete within itself, containing the title number, the chapter number, and the section of the chapter of which it is a part. Specifically, the first digit, followed by a hyphen, identifies the title number. The second digit identifies the chapter number, and the last two digits identify the section number. For example, title 2, chapter 1, section 6, is designated as section 2-106.

By utilizing the table of contents and the analysis preceding each title and chapter of the code, together with the cross references and explanations included as footnotes, the user should locate all the provisions in the code relating to any question that might arise. However, the user should note that most of the administrative ordinances (e.g. Annual Budget, Zoning Map Amendments, Tax Assessments, etc...) do not appear in the code. Likewise, ordinances that have been passed since the last update of the code do not appear here. Therefore, the user should refer to the town's ordinance book or the town recorder for a comprehensive and up to date review of the town's ordinances.

Following this preface is an outline of the ordinance adoption procedures, if any, prescribed by the town's charter.

The code has been arranged and prepared in loose-leaf form to facilitate keeping it up to date. MTAS will provide updating service under the following conditions:

- (1) That all ordinances relating to subjects treated in the code or which should be added to the code are adopted as amending, adding, or deleting specific chapters or sections of the code (see section 8 of the adopting ordinance).
- (2) That one copy of every ordinance adopted by the town is kept in a separate ordinance book and forwarded to MTAS annually.

(3) That the town agrees to pay the annual update fee as provided in the MTAS codification service charges policy in effect at the time of the update.

When the foregoing conditions are met MTAS will reproduce replacement pages for the code to reflect the amendments and additions made by such ordinances. This service will be performed at least annually and more often if justified by the volume of amendments. Replacement pages will be supplied with detailed instructions for utilizing them so as again to make the code complete and up to date.

The able assistance of Linda Dean, the MTAS Sr. Word Processing Specialist who did all the typing on this project, and Sandy Selvage, Administrative Services Assistant, is gratefully acknowledged.

ORDINANCE ADOPTION PROCEDURES PRESCRIBED BY THE
TOWN CHARTER

SECTION 11. The Mayor and Board of Aldermen shall, in the passing or enacting of all ordinances, observe the following;

Each ordinance shall be submitted and passed on one (1) reading at a regular meeting of the Board called for the purpose shall receive the affirmative vote of a majority of the Board present and be signed by the Mayor before the same shall become effective. The Mayor shall sign all ordinances which have received the affirmative vote of the majority of the Board present, within twenty-four (24) hours after the time of the passage of the ordinance, and in case of the inability of the Mayor to sign such ordinance, it shall become the duty of the Vice-Mayor to sign the same. When an ordinance is introduced, it shall be the duty of the Recorder or Secretary to note on said ordinance the name of the person introducing the same, the date of its passage, and date approved by the Mayor or Vice-Mayor. The ordinance shall be divided into appropriate sections, shall be in brief, intelligible form, and shall, after passage, be recorded in a well-bound book or printed or typewritten upon durable paper, and a copy thereof, whether printed or typewritten, as ordered by the Board and certified by the Recorder or Secretary, shall be received in evidence by Courts of this State as competent evidence of the provisions of such ordinance.

All ordinances shall commence as follow: "BE IT ORDAINED BY THE MAYOR AND BOARD OF ALDERMEN OF THE TOWN OF SCOTTS HILL, TENNESSEE AS FOLLOWS:" (Charter § 11)

ORD-1

ORDINANCE NO. 2004-01

AN ORDINANCE ADOPTING AND ENACTING A CODIFICATION AND REVISION OF THE ORDINANCES OF THE TOWN OF SCOTTS HILL TENNESSEE.

WHEREAS some of the ordinances of the Town of Scotts Hill are obsolete, and

WHEREAS some of the other ordinances of the town are inconsistent with each other or are otherwise inadequate, and

WHEREAS the Board of Mayor and Aldermen of the Town of Scotts Hill, Tennessee, has caused its ordinances of a general, continuing, and permanent application or of a penal nature to be codified and revised and the same are embodied in a code of ordinances known as the "Scotts Hill Municipal Code," now, therefore:

BE IT ORDAINED BY THE MAYOR AND BOARD OF ALDERMEN OF THE TOWN OF SCOTTS HILL, TENNESSEE AS FOLLOWS:

Section 1. Ordinances codified. The ordinances of the town of a general, continuing, and permanent application or of a penal nature, as codified and revised in the following "titles," namely "titles" 1 to 20, both inclusive, are ordained and adopted as the "Scotts Hill Municipal Code," hereinafter referred to as the "municipal code."

Section 2. Ordinances repealed. All ordinances of a general, continuing, and permanent application or of a penal nature not contained in the municipal code are hereby repealed from and after the effective date of said code, except as hereinafter provided in Section 3 below.

Section 3. Ordinances saved from repeal. The repeal provided for in Section 2 of this ordinance shall not affect: Any offense or act committed or done, or any penalty or forfeiture incurred, or any contract or right established or accruing before the effective date of the municipal code; any ordinance or resolution promising or requiring the payment of money by or to the town or authorizing the issuance of any bonds or other evidence of said town's indebtedness; any appropriation ordinance or ordinance providing for the levy of taxes or any budget ordinance; any contract or obligation assumed by or in favor of said town; any ordinance establishing a social security system or providing coverage under that system; any administrative ordinances or resolutions not in conflict or inconsistent with the provisions of such code; the

ORD-2

portion of any ordinance not in conflict with such code which regulates speed, direction of travel, passing, stopping, yielding, standing, or parking on any specifically named public street or way; any right or franchise granted by the town; any ordinance dedicating, naming, establishing, locating, relocating, opening, paving, widening, vacating, etc., any street or public way; any ordinance establishing and prescribing the grade of any street; any ordinance providing for local improvements and special assessments therefor; any ordinance dedicating or accepting any plat or subdivision; any prosecution, suit, or other proceeding pending or any judgment rendered on or prior to the effective date of said code; any zoning ordinance or amendment thereto or amendment to the zoning map; nor shall such repeal affect any ordinance annexing territory to the town.

Section 4. Continuation of existing provisions. Insofar as the provisions of the municipal code are the same as those of ordinances existing and in force on its effective date, said provisions shall be considered to be continuations thereof and not as new enactments.

Section 5. Penalty clause. Unless otherwise specified in a title, chapter or section of the municipal code, including the codes and ordinances adopted by reference, whenever in the municipal code any act is prohibited or is made or declared to be a civil offense, or whenever in the municipal code the doing of any act is required or the failure to do any act is declared to be a civil offense, the violation of any such provision of the municipal code shall be punished by a civil penalty of not more than five hundred dollars (\$500.00) and costs for each separate violation; provided, however, that the imposition of a civil penalty under the provisions of this municipal code shall not prevent the revocation of any permit or license or the taking of other punitive or remedial action where called for or permitted under the provisions of the municipal code or other applicable law. In any place in the municipal code the term "it shall be a misdemeanor" or "it shall be an offense" or "it shall be unlawful" or similar terms appears in the context of a penalty provision of this municipal code, it shall mean "it shall be a civil offense." Anytime the word "fine" or similar term appears in the context of a penalty provision of this municipal code, it shall mean "a civil penalty."¹

When a civil penalty is imposed on any person for violating any provision of the municipal code and such person defaults on payment of such penalty, he may be required to perform hard labor, within or without the workhouse, to the

extent that his physical condition shall permit, until such civil penalty is discharged by payment, or until such person, being credited with such sum as may be prescribed for each day's hard labor, has fully discharged said penalty.

Each day any violation of the municipal code continues shall constitute a separate civil offense.

Section 6. Severability clause. Each section, subsection, paragraph, sentence, and clause of the municipal code, including the codes and ordinances adopted by reference, is hereby declared to be separable and severable. The invalidity of any section, subsection, paragraph, sentence, or clause in the municipal code shall not affect the validity of any other portion of said code, and only any portion declared to be invalid by a court of competent jurisdiction shall be deleted therefrom.

Section 7. Reproduction and amendment of code. The municipal code shall be reproduced in loose-leaf form. The board of mayor and aldermen, by motion or resolution, shall fix, and change from time to time as considered necessary, the prices to be charged for copies of the municipal code and revisions thereto. After adoption of the municipal code, each ordinance affecting the code shall be adopted as amending, adding, or deleting, by numbers, specific chapters or sections of said code. Periodically thereafter all affected pages of the municipal code shall be revised to reflect such amended, added, or deleted material and shall be distributed to town officers and employees having copies of said code and to other persons who have requested and paid for current revisions. Notes shall be inserted at the end of amended or new sections, referring to the numbers of ordinances making the amendments or adding the new provisions, and such references shall be cumulative if a section is amended more than once in order that the current copy of the municipal code will contain references to all ordinances responsible for current provisions. One copy of the municipal code as originally adopted and one copy of each amending ordinance thereafter adopted shall be furnished to the Municipal Technical Advisory Service immediately upon final passage and adoption.

Section 8. Construction of conflicting provisions. Where any provision of the municipal code is in conflict with any other provision in said code, the provision which establishes the higher standard for the promotion and protection of the public health, safety, and welfare shall prevail.

Section 9. Code available for public use. A copy of the municipal code shall be kept available in the recorder's office for public use and inspection at all reasonable times.

ORD-4

Section 10. Date of effect. This ordinance shall take effect from and after its final passage, the public welfare requiring it, and the municipal code, including all the codes and ordinances therein adopted by reference, shall be effective on and after that date.

4-301. Purpose. It is the responsibility of the Town of Scotts Hill to provide employees a place of employment which is free from recognized hazards that may cause death or serious physical harm. In providing services to the citizens of the Town of Scotts Hill, employees may come in contact with life-threatening infectious diseases which can be transmitted through job related activities. It is important that both citizens and employees are protected from the transmission of diseases just as it is equally important that neither is discriminated against because of basic misconceptions about various diseases and illnesses.

The purpose of this policy is to establish a comprehensive set of rules and regulations governing the prevention of discrimination and potential occupational exposure to Hepatitis B Virus (HBV), the Human Immunodeficiency Virus (HIV), and Tuberculosis (TB). (Ord. #A-6, July 1992)

4-302. Coverage. Occupational exposures may occur in many ways, including needle sticks, cut injuries or blood spills. Several classes of employees are assumed to be at high risk for blood borne infections due to their routinely increased exposure to infectious material from potentially infected individuals. Those high risk occupations include but are not limited to:

- (1) Paramedics and emergency medical technicians;
- (2) Occupational nurses;
- (3) Housekeeping and laundry workers;

- (4) Police and security personnel;
- (5) Firefighters;
- (6) Sanitation and landfill workers; and
- (7) Any other employee deemed to be at high risk per this policy and an exposure determination. (Ord. #A-6, July 1992)

4-303. Administration. This infection control policy shall be administered by the mayor or his/her designated representative who shall have the following duties and responsibilities:

- (1) Exercise leadership in implementation and maintenance of an effective infection control policy subject to the provisions of this chapter, other ordinances, the town charter, and federal and state law relating to OSHA regulations;
- (2) Make an exposure determination for all employee positions to determine a possible exposure to blood or other potentially infectious materials;
- (3) Maintain records of all employees and incidents subject to the provisions of this chapter;
- (4) Conduct periodic inspections to determine compliance with the infection control policy by municipal employees;
- (5) Coordinate and document all relevant training activities in support of the infection control policy;
- (6) Prepare and recommend to the board of mayor and aldermen any amendments or changes to the infection control policy;
- (7) Identify any and all housekeeping operations involving substantial risk of direct exposure to potentially infectious materials and shall address the proper precautions to be taken while cleaning rooms and blood spills; and
- (8) Perform such other duties and exercise such other authority as may be prescribed by the board of mayor and aldermen. (Ord. #A-6, July 1992)

4-304. Definitions. (1) "Body fluids" - fluids that have been recognized by the Center for Disease Control as directly linked to the transmission of HIV and/or HBV and/or to which universal precautions apply: blood, semen, blood products, vaginal secretions, cerebrospinal fluid, synovial fluid, pericardial fluid, amniotic fluid, and concentrated HIV or HBV viruses.

(2) "Exposure" - the contact with blood or other potentially infectious materials to which universal precautions apply through contact with open wounds, non-intact skin, or mucous membranes during the performance of an individual's normal job duties.

(3) "Hepatitis B Virus (HBV)" - a serious blood-borne virus with potential for life-threatening complications. Possible complications include: massive hepatic necrosis, cirrhosis of the liver, chronic active hepatitis, and hepatocellular carcinoma.

(4) "Human Immunodeficiency Virus (HIV)" - the virus that causes acquired immunodeficiency syndrome (AIDS). HIV is transmitted through

sexual contact and exposure to infected blood or blood components and perinatally from mother to neonate.

(5) "Tuberculosis (TB)" - an acute or chronic communicable disease that usually affects the respiratory system, but may involve any system in the body.

(6) "Universal precautions" - refers to a system of infectious disease control which assumes that every direct contact with body fluid is infectious and requires every employee exposed to direct contact with potentially infectious materials to be protected as though such body fluid were HBV or HIV infected. (Ord. #A-6, July 1992)

4-305. Policy statement. All blood and other potentially infectious materials are infectious for several blood-borne pathogens. Some body fluids can also transmit infections. For this reason, the Center for Disease Control developed the strategy that everyone should always take particular care when there is a potential exposure. These precautions have been termed "universal precautions."

Universal precautions stress that all persons should be assumed to be infectious for HIV and/or other blood-borne pathogens. Universal precautions apply to blood, tissues, and other potentially infectious materials. Universal precautions also apply to semen, (although occupational risk or exposure is quite limited), vaginal secretions, and to cerebrospinal, synovial, pleural, peritoneal, pericardial and amniotic fluids. Universal precautions do not apply to feces, nasal secretions, human breast milk, sputum, saliva, sweat, tears, urine, and vomitus unless these substances contain visible blood. (Ord. #A-6, July 1992)

4-306. General guidelines. General guidelines which shall be used by everyone include:

(1) Think when responding to emergency calls and exercise common sense when there is potential exposure to blood or other potentially infectious materials which require universal precautions.

(2) Keep all open cuts and abrasions covered with adhesive bandages which repel liquids.

(3) Soap and water kill many bacteria and viruses on contact. If hands are contaminated with blood or other potentially infectious materials to which universal precautions apply, then wash immediately and thoroughly. Hands shall also be washed after gloves are removed even if the gloves appear to be intact. When soap and water or handwashing facilities are not available, then use a waterless antiseptic hand cleaner according to the manufacturers recommendation for the product.

(4) All workers shall take precautions to prevent injuries caused by needles, scalpel blades, and other sharp instruments. To prevent needle stick injuries, needles shall not be recapped, purposely bent or broken by hand, removed from disposable syringes, or otherwise manipulated by hand. After

they are used, disposable syringes and needles, scalpel blades and other sharp items shall be placed in puncture resistant containers for disposal. The puncture resistant container shall be located as close as practical to the use area.

(5) The town will provide gloves of appropriate material, quality and size for each affected employee. The gloves are to be worn when there is contact (or when there is a potential contact) with blood or other potentially infectious materials to which universal precautions apply:

(a) While handling an individual where exposure is possible;

(b) While cleaning or handling contaminated items or equipment;

(c) While cleaning up an area that has been contaminated with one of the above;

Gloves shall not be used if they are peeling, cracked, or discolored, or if they have punctures, tears, or other evidence of deterioration. Employees shall not wash or disinfect surgical or examination gloves for reuse.

(6) Resuscitation equipment shall be used when necessary. (No transmission of HBV or HIV infection during mouth-to-mouth resuscitation has been documented.) However, because of the risk of salivary transmission of other infectious diseases and the theoretical risk of HIV or HBV transmission during artificial resuscitation, bags shall be used. Pocket mouth-to-mouth resuscitation masks designed to isolate emergency response personnel from contact with a victims' blood and blood contaminated saliva, respiratory secretion, and vomitus, are available to all personnel who provide or potentially provide emergency treatment.

(7) Masks or protective eyewear or face shields shall be worn during procedures that are likely to generate droplets of blood or other potentially infectious materials to prevent exposure to mucous membranes of the mouth, nose, and eyes. They are not required for routine care.

(8) Gowns, aprons, or lab coats shall be worn during procedures that are likely to generate splashes of blood or other potentially infectious materials.

(9) Areas and equipment contaminated with blood shall be cleaned as soon as possible. A household (chlorine) bleach solution (1 part chlorine to 10 parts water) shall be applied to the contaminated surface as a disinfectant leaving it on for at least 30 seconds. A solution must be changed and re-mixed every 24 hours to be effective.

(10) Contaminated clothing (or other articles) shall be handled carefully and washed as soon as possible. Laundry and dish washing cycles at 120° are adequate for decontamination.

(11) Place all disposable equipment (gloves, masks, gowns, etc...) in a clearly marked plastic bag. Place the bag in a second clearly marked bag (double bag). Seal and dispose of by placing in a designated "hazardous" dumpster. NOTE: Sharp objects must be placed in an impervious container and properly dispose of the objects.

(12) Tags shall be used as a means of preventing accidental injury or illness to employees who are exposed to hazardous or potentially hazardous conditions, equipment or operations which are out of the ordinary, unexpected or not readily apparent. Tags shall be used until such time as the identified hazard is eliminated or the hazardous operation is completed.

All required tags shall meet the following criteria:

(a) Tags shall contain a signal word and a major message. The signal word shall be "BIOHAZARD", or the biological hazard symbol. The major message shall indicate the specific hazardous condition or the instruction to be communicated to employees.

(b) The signal word shall be readable at a minimum distance of five (5) feet or such greater distance as warranted by the hazard.

(c) All employees shall be informed of the meaning of the various tags used throughout the workplace and what special precautions are necessary.

(13) Linen soiled with blood or other potentially infectious materials shall be handled as little as possible and with minimum agitation to prevent contamination of the person handling the linen. All soiled linen shall be bagged at the location where it was used. It shall not be sorted or rinsed in the area. Soiled linen shall be placed and transported in bags that prevent leakage.

The employee responsible for transported soiled linen should always wear protective gloves to prevent possible contamination. After removing the gloves, hands or other skin surfaces shall be washed thoroughly and immediately after contact with potentially infectious materials.

(14) Whenever possible, disposable equipment shall be used to minimize and contain clean-up. (Ord. #A-6, July 1992)

4-307. Hepatitis B vaccinations. The Town of Scotts Hill shall offer the appropriate Hepatitis B vaccination to employees at risk of exposure free of charge and in amounts and at times prescribed by standard medical practices. The vaccination shall be voluntarily administered. High risk employees who wish to take the HBV vaccination should notify their department head who shall make the appropriate arrangements through the Infectious Disease Control Coordinator. (Ord. #A-6, July 1992)

4-308. Reporting potential exposure. Town employees shall observe the following procedures for reporting a job exposure incident that may put them at risk for HIV or HBV infections (i.e., needle sticks, blood contact on broken skin, body fluid contact with eyes or mouth, etc...):

(1) Notify the Infectious Disease Control Coordinator of the contact incident and details thereof.

(2) Complete the appropriate accident reports and any other specific form required.

(3) Arrangements will be made for the person to be seen by a physician as with any job-related injury.

Once an exposure has occurred, a blood sample should be drawn after consent is obtained from the individual from whom exposure occurred and tested for Hepatitis B surface antigen (HBsAg) and/or antibody to human immunodeficiency virus (HIV antibody). Testing of the source individual should be done at a location where appropriate pretest counseling is available. Post-test counseling and referral for treatment should also be provided. (Ord. #A-6, July 1992)

4-309. Hepatitis B virus post-exposure management. For an exposure to a source individual found to be positive for HBsAg, the worker who has not previously been given the hepatitis B vaccine should receive the vaccine series. A single dose of hepatitis B immune globulin (HBIG) is also recommended, if it can be given within seven (7) days of exposure.

For exposure from an HBsAg-positive source to workers who have previously received the vaccine, the exposed worker should be tested for antibodies to hepatitis B surface antigen (anti-HBs), and given one dose of vaccine and one dose of HBIG if the antibody level in the worker's blood sample is inadequate (i.e., 10 SRU by RIA, negative by EIA).

If the source individual is negative for HBsAg and the worker has not been vaccinated, this opportunity should be taken to provide the hepatitis B vaccine series. HBIG administration should be considered on an individual basis when the source individual is known or suspected to be at high risk of HBV infection. Management and treatment, if any, of previously vaccinated workers who receive an exposure from a source who refuses testing or is not identifiable should be individualized. (Ord. #A-6, July 1992)

4-310. Human immunodeficiency virus post-exposure management. For any exposure to a source individual who has AIDS, who is found to be positive for HIV infection, or who refuses testing, the worker should be counseled regarding the risk of infection and evaluated clinically and serologically for evidence of HIV infection as soon as possible after the exposure. The worker should be advised to report and seek medical evaluation for any acute febrile illness that occurs within 12 weeks after the exposure. Such an illness, particularly one characterized by fever, rash, or lymphadenopathy, may be indicative of recent HIV infection.

Following the initial test at the time of exposure, seronegative workers should be retested 6 weeks, 12 weeks, and 6 months after exposure to determine whether transmission has occurred. During this follow-up period (especially the first 6 - 12 weeks after exposure) exposed workers should follow the U.S. Public Health service recommendation for preventing transmission of HIV. These include refraining from blood donations and using appropriate protection during

sexual intercourse. During all phases of follow-up, it is vital that worker confidentiality be protected.

If the source individual was tested and found to be seronegative, baseline testing of the exposed worker with follow-up testing 12 weeks later may be performed if desired by the worker or recommended by the health care provider. If the source individual cannot be identified, decisions regarding appropriate follow-up should be individualized. Serologic testing should be made available by the town to all workers who may be concerned they have been infected with HIV through an occupational exposure. (Ord. #A-6, July 1992)

4-311. Disability benefits. Entitlement to disability benefits and any other benefits available for employees who suffer from on-the-job injuries will be determined by the Tennessee Worker's Compensations Bureau in accordance with the provisions of Tennessee Code Annotated, § 50-6-303. (Ord. #A-6, July 1992)

4-312. Training regular employees. On an annual basis all employees shall receive training and education on precautionary measures, epidemiology, modes of transmission and prevention of HIV/HBV infection and procedures to be used if they are exposed to needle sticks or potentially infectious materials. They shall also be counseled regarding possible risks to the fetus from HIV/HBV and other associated infectious agents. (Ord. #A-6, July 1992)

4-313. Training high risk employees. In addition to the above, high risk employees shall also receive training regarding the location and proper use of personal protective equipment. They shall be trained concerning proper work practices and understand the concept of "universal precautions" as it applies to their work situation. They shall also be trained about the meaning of color coding and other methods used to designate contaminated material. Where tags are used, training shall cover precautions to be used in handling contaminated material as per this policy. (Ord. #A-6, July 1992)

4-314. Training new employees. During the new employee's orientation to his/her job, all new employees will be trained on the effects of infectious disease prior to putting them to work. (Ord. #A-6, July 1992)

4-315. Records and reports. (1) Reports. Occupational injury and illness records shall be maintained by the infectious disease control coordinator. Statistics shall be maintained on the OSHA-200 report. Only those work-related injuries that involve loss of consciousness, transfer to another job, restriction of work or motion, or medical treatment are required to be put on the OSHA-200.

(2) Needle sticks. Needle sticks, like any other puncture wound, are considered injuries for recordkeeping purposes due to the instantaneous nature

of the event. Therefore, any needle stick requiring medical treatment (i.e. gamma globulin, hepatitis B immune globulin, hepatitis B vaccine, etc...) shall be recorded.

(3) Prescription medication. Likewise, the use of prescription medication (beyond a single dose for minor injury or discomfort) is considered medical treatment. Since these types of treatment are considered necessary, and must be administered by physician or licensed medical personnel, such injuries cannot be considered minor and must be reported.

(4) Employee interviews. Should the town be inspected by the U.S. Department of Labor Office of Health Compliance, the compliance safety and health officer may wish to interview employees. Employees are expected to cooperate fully with the compliance officers. (Ord. #A-6, July 1992)

4-316. Legal rights of victims of communicable diseases. Victims of communicable diseases have the legal right to expect, and municipal employees, including police and emergency service officers are duty bound to provide, the same level of service and enforcement as any other individual would receive.

(1) Officers assume that a certain degree of risk exists in law enforcement and emergency service work and accept those risks with their individual appointments. This holds true with any potential risks of contacting a communicable disease as surely as it does with the risks of confronting an armed criminal.

(2) Any officer who refuses to take proper action in regard to victims of a communicable disease, when appropriate protective equipment is available, shall be subject to disciplinary measures along with civil and, or criminal prosecution.

(3) Whenever an officer mentions in a report that an individual has or may have a communicable disease, he shall write "contains confidential medical information" across the top margin of the first page of the report.

(4) The officer's supervisor shall ensure that the above statement is on all reports requiring that statement at the time the report is reviewed and initiated by the supervisor.

(5) The supervisor disseminating newspaper releases shall make certain the confidential information is not given out to the news media.

(6) All requests (including subpoenas) for copies of reports marked "contains confidential medical information" shall be referred to the town attorney when the incident involves an indictable or juvenile offense.

(7) Prior approval shall be obtained from the town attorney before advising a victim of sexual assault that the suspect has, or is suspected of having a communicable disease.

(8) All circumstance, not covered in this policy, that may arise concerning releasing confidential information regarding a victim, or suspected victim, of a communicable disease shall be referred directly to the appropriate department head or town attorney.

(9) Victims of a communicable disease and their families have a right to conduct their lives without fear of discrimination. An employee shall not make public, directly or indirectly, the identity of a victim or suspected victim of a communicable disease.

(10) Whenever an employee finds it necessary to notify another employee, police officer, firefighter, emergency service officer, or health care provider that a victim has or is suspected of having a communicable disease, that information shall be conveyed in a dignified, discrete and confidential manner. The person to whom the information is being conveyed should be reminded that the information is confidential and that it should not be treated as public information.

(11) Any employee who disseminates confidential information in regard to a victim, or suspected victim of a communicable disease in violation of this policy shall be subject to serious disciplinary action and/or civil/and/or criminal prosecution. (Ord. #A-6, July 1992)

CHAPTER 4

TRAVEL REIMBURSEMENT REGULATIONS

SECTION

- 4-401. Purpose.
- 4-402. Enforcement.
- 4-403. Travel policy.
- 4-404. Travel reimbursement rate schedule.
- 4-405. Administrative procedures.

4-401. Purpose. The purpose of this chapter and referenced regulations is to bring the town into compliance with Public Acts 1993, Chapter 433. This act requires Tennessee municipalities to adopt travel and expense regulations covering expenses incurred by "any mayor and any member of the local governing body and any board or committee member elected or appointed by the mayor or local governing body, and any official or employee of the municipality whose salary is set by charter or general law."

To provide consistent travel regulations and reimbursement, this chapter is expanded to cover regular town employees. It's the intent of this policy to assure fair and equitable treatment to all individuals traveling on town business at town expense. (Ord. #A-7, Sept. 1993)

4-402. Enforcement. The chief administrative officer (CAO) of the town or his or her designee shall be responsible for the enforcement of these travel regulations. (Ord. #A-7, Sept. 1993)

4-403. Travel policy. (1) In the interpretation and application of this chapter, the term "traveler" or "authorized travel" means any elected or appointed municipal officer or employee, including members of municipal boards and committees appointed by the mayor or the municipal governing body, and the employees of such boards and committees who are traveling on official municipal business and whose travel was authorized in accordance with this chapter. "Authorized traveler" shall not include the spouse, children, other relatives, friends, or companions accompanying the authorized traveler on town business, unless the person(s) otherwise qualifies as an authorized traveler under this chapter.

(2) Authorized travelers are entitled to reimbursement of certain expenditures incurred while traveling on official business for the town. Reimbursable expenses shall include expenses for transportation; lodging; meals; registration fees for conferences, conventions, and seminars; and other actual and necessary expenses related to official business as determined by the CAO. Under certain conditions, entertainment expenses may be eligible for reimbursement.

(3) Authorized travelers can request either a travel advance for the projected cost of authorized travel, or advance billing directly to the town for registration fees, air fares, meals, lodging, conferences, and similar expenses.

Travel advance requests aren't considered documentation of travel expenses. If travel advances exceed documented expenses, the traveler must immediately reimburse the town. It will be the responsibility of the CAO to initiate action to recover any undocumented travel advances.

(4) Travel advances are available only for special travel and only after completion and approval of the travel authorization form.

(5) The travel expense reimbursement form will be used to document all expense claims.

(6) To qualify for reimbursement, travel expenses must be:

(a) Directly related to the conduct of the town business for which travel was authorized, and

(b) Actual, reasonable, and necessary under the circumstances.

The CAO may make exceptions for unusual circumstances.

Expenses considered excessive won't be allowed.

(7) Claims of \$5 or more for travel expense reimbursement must be supported by the original paid receipt for lodging, vehicle rental, phone call, public carrier travel, conference fee, and other reimbursable costs.

(8) Any person attempting to defraud the town or misuse town travel funds is subject to legal action for recovery of fraudulent travel claims and/or advances.

(9) Mileage and motel expenses incurred within the town aren't ordinarily considered eligible expenses for reimbursement. (Ord. #A-7, Sept. 1993)

4-404. Travel reimbursement rate schedule. Authorized travelers shall be reimbursed according to the State of Tennessee travel regulation rates. The town's travel reimbursement rates will automatically change when the state rates are adjusted.

The municipality may pay directly to the provider for expenses such as meals, lodging, and registration fees for conferences, conventions, seminars, and other education programs. (Ord. #A-7, Sept. 1993)

4-405. Administrative procedures. The town adopts and incorporates by reference--as if fully set out herein--the administrative procedures submitted by MTAS to, and approved by letter by, the Comptroller of the Treasury, State of Tennessee, in June 1993. A copy of the administrative procedures is on file in the office of the town recorder.

This chapter shall take effect upon its final reading by the municipal governing body. It shall cover all travel and expenses occurring on or after July 1, 1993. (Ord. #A-7, Sept. 1993)

If the Town of Scotts Hill determines that sexual harassment has occurred, corrective action will be taken. This corrective action may include a reprimand, demotion, discharge, or other appropriate action. The Town of Scotts Hill will attempt to make the corrective action reflect the severity of the conduct.

If it is determined that no harassment has occurred or that there is not sufficient evidence that harassment occurred, this will be communicated to the employee who made the complaint, along with the reasons for this determination. (Ord. #A-8, _____)

It shall be unlawful for any person to cause a cross connection to be made, or allow one to exist for any purpose whatsoever, unless the construction and operation of same have been approved by the Tennessee Department of Public Health and the operation of such cross connection, auxiliary intake, bypass or interconnection is at all times under the direct supervision of the Water Operator of the Town of Scotts Hill. (Ord. #J-1, Sept. 1978)

18-104. Statement required. Any person whose premises are supplied with water from the public water supply and who also has on the same premises a separate source of water supply, or stores water in an uncovered or unsanitary storage reservoir from which the water stored therein is circulated through a piping system, shall file with the water operator a statement of the non-existence of unapproved or unauthorized auxiliary intakes, bypasses, or interconnections. Such statement shall also contain an agreement that no cross connection, auxiliary intake, bypass, or interconnection will be permitted upon the premises. (Ord. #J-1, Sept. 1978)

18-105. Inspections required. It shall be the duty of the Scotts Hill Public Water Supply to cause inspections to be made of all properties served by the public water supply where cross connections with the public water supply are deemed possible. The frequency of inspections and reinspection, based on potential health hazards involved, shall be established by the Water Operator of the Scotts Hill Public Water Supply and as approved by the Tennessee Department of Public Health. (Ord. #J-1, Sept. 1978)

18-106. Right of entry for inspections. The water operator or his authorized representative shall have the right to enter, at any reasonable time, any property served by a connection to the Scotts Hill Public Water Supply for the purpose of inspecting the piping system or systems thereof for cross connections, auxiliary intakes, bypasses, or interconnections. On request, the owner, lessee, or occupant of any property so served shall furnish to the inspection agency any pertinent information regarding the piping system or systems on such property. The refusal of such information or refusal of access, when requested, shall be deemed evidence of the presence of cross connections. (Ord. #J-1, Sept. 1978)

18-107. Correction of existing violations. Any person who now has cross connections, auxiliary intakes, bypasses, or interconnections in violation of the provisions of this chapter shall be allowed a reasonable time within which to comply with the provisions of this chapter. After a thorough investigation of existing conditions and an appraisal of the time required to complete the work, the amount of time shall be designated by the Water Operator of the Scotts Hill Public Water Supply.

The failure to correct conditions threatening the safety of the public water system as prohibited by this chapter and the Tennessee Code Annotated, § 68-221-711, within a reasonable time and within the time limits set by the Scotts Hill Public Water Supply, shall be grounds for denial of water service. If proper protection has not been provided after a reasonable time, the utility shall give the customer legal notification that water service is to be discontinued, and physically separate the public water supply from the customer's on-site piping system in such a manner that the two systems cannot again be connected by an unauthorized person.

Where cross connections, interconnections, auxiliary intakes, or bypasses are found that constitute an extreme hazard of immediate concern of contaminating the public water system, the manager of the utility shall require that immediate corrective action be taken to eliminate the threat to the public water system. Immediate steps shall be taken to disconnect the public water supply from the on-site piping system unless the imminent hazard(s) is (are) corrected immediately. (Ord. #J-1, Sept. 1978)

18-108. Use of protective devices. Where the nature of use of the water supplied a premises by the water department is such that it is deemed:

- (1) Impractical to provide an effective air-gap separation.
- (2) That the owner and/or occupant of the premises cannot, or is not willing, to demonstrate to the official in charge of the system, or his designated representative, that the water use and protective features of the plumbing are such as to propose no threat to the safety or potability of the water supply.
- (3) That the nature and mode of operation within a premises are such that frequent alterations are made to the plumbing.

(4) There is a likelihood that protective measures may be subverted, altered, or disconnected.

The Water Operator of the Scotts Hill Public Water Supply, or his designated representative, shall require the use of an approved protective device on the service line serving the premises to assure that any contamination that may originate in the customer's premises is contained therein. The protective device shall be a reduced pressure zone type backflow preventer approved by the Tennessee Department of Public Health as to manufacture, model, and size. The method of installation of backflow protective devices shall be approved by the Water Operator Public Water Supply prior to installation and shall comply with the criteria set forth by the Tennessee Department of Public Health. The installation shall be at the expense of the owner or occupant of the premises.

Personnel of the Scotts Hill Public Water Supply shall have the right to inspect and test the device or devices on an annual basis or whenever deemed necessary by the water operator or his designated representative. Water service shall not be disrupted to test the device without the knowledge of the occupant of the premises.

Where the use of water is critical to the continuance of normal operations or protection of life, property, or equipment, duplicate units shall be provided to avoid the necessity of discontinuing water service to test or repair the protective device or devices. Where it is found that only one unit has been installed and the continuance of service is critical, the water operator shall notify, in writing, the occupant of the premises of plans to discontinue water service and arrange for a mutually acceptable time to test and/or repair the device. The water supply shall require the occupant of the premises to make all repairs indicated promptly, to keep the unit(s) working properly, and the expense of such repairs shall be borne by the owner or occupant of the premises. Repairs shall be made by qualified personnel acceptable to the Water Operator of the Scotts Hill Public Water Supply.

If necessary, water service shall be discontinued (following legal notification) for failure to maintain backflow prevention devices in proper working order. Likewise, the removal, bypassing, or altering of the protective device(s) or the installation thereof so as to render the device(s) ineffective shall constitute grounds for discontinuance of water service. Water service to such premises shall not be restored until the customer has corrected or eliminated such conditions or defects to the satisfaction of the Scotts Hill Public Water Supply. (Ord. #J-1, Sept. 1978)

18-109. Unpotable water to be labeled. The potable water supply made available to premises served by the public water supply shall be protected from possible contamination as specified herein. Any water outlet which could be used for potable or domestic purposes and which is not supplied by the potable system must be labeled in a conspicuous manner as:

18-110. Violations. The requirements contained herein shall apply to all premises served by the Scotts Hill Water System whether located inside or outside the corporate limits and are hereby made a part of the conditions required to be met for the town to provide water services to any premises. Such action, being essential for the protection of the water distribution system against the entrance of contamination which may render the water unsafe healthwise, or otherwise undesirable, shall be enforced rigidly without regard to location of the premises, whether inside or outside the Scotts Hill corporate limits.

Any person who neglects or refuses to comply with any of the provisions of this chapter shall be deemed guilty of a misdemeanor and, upon conviction therefor, shall be fined not less than ten dollars (\$10) nor more than one hundred dollars (\$100), and each day of continued violation after conviction shall constitute a separate offense.
