PREFACE

The Oak Ridge Municipal Code contains the codification and revision of the ordinances of the City of Oak Ridge, Tennessee. By referring to the historical citation appearing at the end of each section, the user can determine the origin of each particular section. The absence of a historical citation means that the section was added by the codifier. The word "modified" in the historical citation indicates significant modification of the original ordinance.

The code is arranged into titles, chapters, and sections. Related matter is kept together, so far as possible, within the same title. Each section number is complete within itself, containing the title number, the chapter number, and the section of the chapter of which it is a part. Specifically, the first digit, followed by a hyphen, identifies the title number. The second digit identifies the chapter number, and the last two digits identify the section number. For example, title 2, chapter 1, section 6, is designated as section 2-106.

By utilizing the table of contents and the analysis preceding each title and chapter of the code, together with the cross references and explanations included as footnotes, the user should locate all the provisions in the code relating to any question that might arise. However, the user should note that most of the administrative ordinances (e.g. Annual Budget, Zoning Map Amendments, Tax Assessments, etc...) do not appear in the code. Likewise, ordinances that have been passed since the last update of the code do not appear here. Therefore, the user should refer to the city's ordinance book or the city recorder for a comprehensive and up to date review of the city's ordinances.

Following this preface is an outline of the ordinance adoption procedures, if any, prescribed by the city's charter.

The code has been arranged and prepared in loose-leaf form to facilitate keeping it up to date. MTAS will provide updating service under the following conditions:

(1) That all ordinances relating to subjects treated in the code or which should be added to the code are adopted as amending, adding, or deleting specific chapters or sections of the code (see section 7 of the adopting ordinance).

(2) That one copy of every ordinance adopted by the city is kept in a separate ordinance book and forwarded to MTAS annually.

(3) That the city agrees to pay the annual update fee as provided in the MTAS codification service charges policy in effect at the time of the update.

When the foregoing conditions are met MTAS will reproduce replacement pages for the code to reflect the amendments and additions made by such ordinances. This service will be performed at least annually and more often if
justified by the volume of amendments. Replacement pages will be supplied with detailed instructions for utilizing them so as again to make the code complete and up to date.

The able assistance of Linda Dean, the MTAS Sr. Word Processing Specialist who did all the typing on this project, and Dianna Habib, Administrative Services Assistant, is gratefully acknowledged.

ORDINANCE ADOPTION PROCEDURES PRESCRIBED BY THE CITY CHARTER

ARTICLE II

Section 11. Form of ordinance.

Any action of council having a regulatory or penal effect, relating to revenue or the expenditure of money, or required to be done by ordinance under this Charter, shall be done only by ordinance. Each ordinance shall relate to a single subject, which shall be expressed in a title that contains a summary of its contents. Each ordinance shall be approved as to form and legality by the city attorney, and upon adoption shall be further identified by a number. The enacting clause of each ordinance shall be: "Be it ordained by the Council of the City of Oak Ridge, Tennessee." Other actions may be accomplished by resolutions or motions. Each resolution or ordinance shall be in written form before being introduced.

Section 12. Passage, preservation and publication of ordinances.

Each ordinance, before being adopted, shall be read at least by title at two meetings not less than one (1) week apart, and shall take effect ten (10) days after its adoption, except that, where an emergency exists and the public safety and welfare requires it, an ordinance containing a full statement of the facts and reasons for the emergency may be made effective upon its adoption if approved by a majority of the members of the council on two (2) readings on successive days. At least the title of each ordinance, except an emergency ordinance, shall be published in the official city newspaper at least one (1) week before its adoption and within ten (10) days after its adoption, either separately or as part of the published proceedings of the council. The newspaper publication shall include locations where the ordinance is available for public review. The entire ordinance shall be published on the city's website at least one (1) week before its adoption and shall remain on the website for a minimum of 30 days after its adoption. The ordinance shall be available at the public library and at the office of the city clerk, and upon adoption shall become a permanent record in the office of the city clerk. Amendments of ordinances and resolutions or parts thereof shall be accomplished only by setting forth the complete section, sections, subsection, or subsections in their amended form. An ordinance may be repealed by reference to its number and title only and publication of the ordinance may be similarly limited.

All ordinances and their amendments shall be recorded by the city clerk in a book to be known as the "ordinance book," and it shall be the duty of the mayor and city clerk to authenticate such records by their official signatures. A separate record shall be maintained for resolutions. The original copies of all
ordinances, resolutions, and minutes of City Council meetings shall be filed and preserved by the city clerk.

If any portion of an ordinance or the application thereof to any person or circumstances shall be found to be invalid by a court, such invalidity shall not affect the remaining portions or application, provided such remaining portions are not determined by the court to be inoperable, and to this end ordinances are declared to be severable.

SECTION
2-201. Definition.
2-203. Terms of members.
2-204. Designation and term of chairperson and vice-chairperson.
2-205. Compensation.
2-206. Functions.
2-207. Meetings; quorum.
2-208. Powers.
2-209. Availability of city facilities and personnel to assist the board.
2-210. Attendance policy.
2-211. Deleted.

2-201. Definition. As used in this chapter, the term board shall mean the environmental quality advisory board created by this chapter. (1969 Code, § 2-101, as replaced by Ord. #14-2014, Oct. 2014)

2-202. Created; composition. There is hereby created an environmental quality advisory board for the city consisting of twelve (12) members who shall be appointed by the city council. Two (2) members of the board shall be high school students. All members shall have one (1) vote except the high school students shall share one (1) vote, either from a consensus if both are present at the meeting or individually if only one (1) student is present. If no consensus is possible, then no vote shall be recorded for the students. For clarification purposes, the board has eleven (11) possible total votes due to the student members sharing one (1) vote. (Ord. #15-98, May 1998, § 1, as replaced by Ord. #14-2014, Oct. 2014)

2-203. Terms of members. Of the members first appointed to the board, four (4) shall serve until September 30, 1974; three (3) until September 30, 1975; and three (3) until September 30, 1976. Thereafter all appointments to the board, with the exception of the high school student members, shall be for terms of three (3) years and all terms shall commence on October 1. The high school student members of the board shall serve two (2) year terms of office. Of the students first appointed after the adoption of this amendment, one (1) shall serve until May 31, 1999, and one (1) shall serve until

Advisory boards: art. III, § 5.
May 31, 2000. Thereafter, all appointments of high school student members shall be for two (2) years and all terms shall commence on June 1. If a successor has not been named at the expiration of a member's term, the member shall continue to serve until his or her successor is appointed. Whenever a vacancy occurs, an appointment shall be made for the remainder of the unexpired term.

As of April 1, 2011, all current members' terms (except for student members which shall remain unchanged) shall be extended through to the following December 31, and all subsequent terms shall commence on a date established by resolution of city council with the term lengths and staggered appointments remaining the same. (Ord. #15-98, May 1998, § 2, as amended by Ord. #3-11, March 2011, as replaced by Ord. #14-2014, Oct. 2014)

2-204. Designation and term of chairperson and vice-chairperson. The board shall elect from its membership a chairperson, vice-chairperson and secretary. (1969 Code, § 2-104, as replaced by Ord. #14-2014, Oct. 2014)

2-205. Compensation. Members of the board shall serve without compensation but may be reimbursed for all necessary expenses incurred in the course of their duties in accordance with the appropriations made by the city council. (1969 Code, § 2-105, as replaced by Ord. #14-2014, Oct. 2014)

2-206. Functions. The function of the board shall be to serve as an advisory body to the city council. When requested by city council, the board shall give advice and assistance in matters contributing to a quality environment; and further, upon request, it shall advise the city manager and the municipal planning commission on specific environmental matters. (1969 Code, § 2-106, as replaced by Ord. #14-2014, Oct. 2014)

2-207. Meetings; quorum. The board shall hold public meetings at such regular intervals and places at it may designate. Six (6) members of the board shall constitute a quorum. For purposes of a quorum, the student members count as only one (1) member because they share one (1) vote and cannot vote separately. For clarification purposes, if one (1) or both student members are present at a meeting, five (5) other members must be present for there to be a quorum of the board. All actions shall require the concurring vote of a majority of the members present at a duly constituted meeting, with the student members again counting as only one (1) member for the purposes of calculating a majority vote. For example, if eight (8) members are present at a meeting, including both student members, a majority for voting purposes is four (4) instead of five (5) because the students only count as one (1) regardless of whether one (1) or both are present at the meeting and regardless of whether or not there is a consensus for the student members' vote. (1969 Code, § 2-107, as replaced by Ord. #14-2014, Oct. 2014)
**2-208. Powers.** In the performance of its function, the board is authorized to adopt bylaws and rules of procedure for the conduct of its authorized activities; the board will recommend for approval and authorization by the city council a proposed annual work program involving studies for the preservation and improvement of the environment, it shall issue reports and findings on such studies. The board is further authorized to make specific recommendations on environmental questions referred by the city council, city manager, or municipal planning commission. (1969 Code, § 2-108, as replaced by Ord. #14-2014, Oct. 2014)

**2-209. Availability of city facilities and personnel to assist the board.** Subject to the approval of the city manager, the facilities and personnel of the city shall be made available to assist the board in carrying out its functions. (1969 Code, § 2-109, as replaced by Ord. #14-2014, Oct. 2014)

**2-210. Attendance policy.** Members of the board are subject to the attendance policy adopted by city council for boards and commissions. (1969 Code, § 2-110, as replaced by Ord. #14-2014, Oct. 2014)

**2-211. Deleted.** (1969 Code, § 2-111, as deleted by Ord. #14-2014, Oct. 2014)

7-104. Revisions. The following sections of the International Fire Code are hereby revised:

(1) Section 101.1. Insert: City of Oak Ridge, Tennessee for the name of the jurisdiction.

(2) Section 111.4. Insert: $0.00 for the first amount and $50.00 for the second amount.

(3) Section 507.5.1. Delete the text of this section in its entirety and replace with the following language:

(a) Fire hydrants, where required; Residential.
The maximum distance between fire hydrants, measured along street centerlines, shall be 450 feet.

(b) Fire hydrants, where required; Non-Residential.
On roadways, the maximum distance between fire hydrants, measured along street centerlines, shall be 1000 feet.
In addition, no point on the exterior of a commercial building may be more than 500 feet from an approved fire hydrant.
In addition, in buildings required to have a sprinkler fire protection system installed, one accessible hydrant (either public or private) will be located not more than 100 feet from the fire siamese connection. For buildings with a sprinkler system, there will be one accessible hydrant provided on each of two opposing sides of the building. The hydrant required for the sprinkler system may be counted as one of these hydrants. There shall be additional hydrants provided to meet the requirement of a maximum 500-foot distance between a hydrant and any part of the building first floor. The hydrant(s) will be situated not less than two feet and not more than 10 feet from the curb of an access road, parking area, or public road. If situated in a parking area, there will be an area of NO PARKING marked around the hydrant for an area of 15 feet on all sides.
Example: A non-residential building of a 20,000 square feet area, sprinklered, would need a minimum of two hydrants (one within 100 feet of the sprinkler siamese connection and one on the opposing side of the building).
Paved access of a minimum of 20 feet in width shall be required within 100 feet of two sides of each non-residential building. Paved access roads shall be required to be within ten feet of each required fire hydrant. Emergency access to each side of all buildings three or more stories in height shall be provided by means of an unobstructed area of at least 12 feet in width which would support the weight of a fire ladder truck. This area is not required to be a permanent roadway, but must be accessible during an emergency. Prior to completion of grading and landscaping design, the fire department should be consulted. (as added by Ord. #5-08, Jan. 2008, and replaced by Ord. #11-2012, Oct. 2012)

(4) The application shall disclose the person to be the on-premise manager responsible for the direct daily operations of the business. Such manager shall be subject to the same qualifications as the applicant.

(Ord. #3-01, June 2001, as amended by Ord. #15-06, Aug. 2006, and Ord. #8-2016, Aug. 2016)

8-704. Fees. All applications for the issuance of a new permit under chapters 6, 7, and 8 of this title, except for a Class E permit, shall be accompanied by a fee of two hundred fifty dollars ($250.00) for each class of permit sought, which fee shall be non-transferable and non-refundable, notwithstanding whether an application is approved or denied. Applications for Class E permit shall be accompanied by a non-transferable, non-refundable fee of twenty-five dollars ($25.00), notwithstanding whether an application is approved or denied. 8-705. Grounds for denial. (2) The city shall mail written notice to each permittee of the payment date of the annual privilege tax at least thirty (30) days prior to January 1. Notice shall be mailed to the address specified by the permittee on its permit application. If a permittee does not pay the tax by January 31, or within thirty (30) days after written notice of the tax was mailed, whichever is later, then the city shall notify the permittee by certified mail that the tax payment is past due. If a permittee does not pay the tax within ten (10) days after receiving notice of its delinquency by certified mail, then the board may suspend or revoke the permit or impose a civil penalty pursuant to § 8-712.

(3) At the time a new permit is issued to any business subject to this tax, the permittee shall be required to pay the privilege tax on a prorated basis for each month or portion thereof remaining until the next tax payment date.

Any permit issued under chapters 6, 7, and 8 of this title shall become invalid and void at 12:00 midnight of the date on which the permittee ceases to own the business for which such permit was issued. This provision shall not apply to temporary absences of the permittee, but shall apply when such permittee permanently ceases operations under the permit. Such permittee shall, within

Additionally, notice shall be placed in a newspaper of general circulation within the city at least ten (10) days prior to the date such certification shall be acted upon and shall state the name of the applicant and the name and address of the business.

(2) Such application shall be verified by oath and affidavit and shall contain the following:
   (a) A statement that the manager is a person of good character.

(b) No permit shall be revoked on the grounds the permittee or any person working for the permittee sold beer to a minor over the age of eighteen (18) years if such minor exhibited an identification, false or otherwise, indicating the minor's age to be twenty-one (21) or over, if the minor's appearance as to maturity is such that the minor might reasonably be presumed to be of such age and is unknown to such person making the sale. The permit may be suspended for a period not to exceed ten (10) days or a civil penalty up to two thousand five hundred dollars ($2,500.00) may be imposed pursuant to subsection (1)(a). However, this shall not be construed in any way to relieve the minor from liability for making such illegal purchase.

(c) Actions against permits for sales to minors that occur at establishments where the permit holder is a responsible vendor under the Tennessee Responsible Vendor Act of 20061 are governed by city code, § 8-904

(2) All violations other than sales of beer to minors. (i) Failure of the permittee to pay business tax, annual privilege tax or other taxes due to the city.

(j) Gambling devices, as defined by state law, are located on the premises.

(m) The permittee fails to pay the state beer barrelage tax imposed by Tennessee Code Annotated, § 57-5-201 or fails to pay the city and county wholesale beer tax imposed by Tennessee Code Annotated, § 57-6-103. The burden of proof shall be on the retail permittee to show that the taxes on beer in the permittee's possession have been paid by showing that the beer was purchased from a Tennessee beer wholesaler, which fact shall be shown by the permittee providing a bill of sale or invoice for the beer which shall include the name and address of the wholesaler, the name and address of the permittee, the number of containers of each brand of beer purchased by the permittee, and which shall be signed by the permittee.

(3) If a civil penalty is imposed as an alternative to suspension, the permittee shall have seven (7) days within which to pay the civil penalty before the suspension shall be imposed. If the civil penalty is paid within seven (7) days, the suspension shall be deemed withdrawn. However, the payment of the
The board may at any time accept the payment of a civil penalty, not to exceed the amounts set forth in subsections (1)(a) or (2), by a permittee charged with a violation of chapters 6, 7, or 8 of this title, which payment shall be an admission by the permittee of the violation so charged and shall be paid to the exclusion of any other penalty that the city or board may impose.

(5) A permittee shall be responsible for all violations of the provisions of chapters 6, 7, and 8 of this title, whether such violations were committed by permittee, the permittee's agents, managers and employees, or other persons on the premises.

(7) No permittee shall employ a person who has had a permit or manager certificate issued by the board which has been revoked within the last year if said employment involves the sale or distribution of beer.

(8) Where a permit is revoked, no new permit shall be issued to permit the sale of beer on the same premises until after the expiration of one (1) year from the date the revocation becomes final and effective. The board, in its discretion, may determine that issuance of a permit before the expiration of one (1) year from the date of revocation becomes final is appropriate, if the individual applying for such issuance is not the original holder of the permit or any family member who could inherit from such individual under the statute of intestate succession.

(9) Previous suspensions and other disciplinary actions taken by the board against a permittee may be considered by the board for determination of disciplinary action in any show cause hearing.

(10) In the event of a suspension or revocation, all beer remaining on the premises must be either confined in a locked area, shielded from public view or removed entirely from the premises.

(11) The decision of the board to either suspend or revoke must be posted at the main entrance to the establishment whose permit was suspended or revoked. The decision must remain posted during the entire length of the suspension or revocation.

(12) Should Tennessee Code Annotated, § 57-5-108 (a)(2)(A), as may be amended from time to time by the state legislature, authorize a municipal beer permit board to charge civil penalties in excess of those amounts stated in subsections (1) and (2) above, the civil penalties listed in subsections (1) and (2) shall automatically be raised to the higher amount permitted by state law. (3) The manager has been convicted of a crime of moral turpitude or of violating any law governing the possession, sale, manufacture, or transportation of intoxicating liquor, drugs or narcotics or has been convicted of driving under the influence (DUI). Provided, however, that if the on-premises manager also possesses a valid server permit issued by the Alcoholic Beverage Commission pursuant to Tennessee Code Annotated, §§ 57-3-701, et seq., a DUI conviction will not be grounds for revocation of the manager certificate.

(4) An employee of a permitted premises has been convicted of a crime of moral turpitude or of violating any law governing the possession, sale, manufacture, or transportation of intoxicating liquor, drugs or narcotics and after knowledge of such conviction by the manager, continues in his or her employment at the permitted premises.

No person shall operate any taxicab in the city, nor shall a permit for a taxicab be issued under chapters 2, 3, and 4 of this title, unless the taxicab is equipped with a standard taximeter, in good and workable condition, and designed to mechanically and accurately measure distance traveled, record the time the vehicle is waiting, and upon which there shall be indicated, by figures, the fare charged. All taximeters shall be so placed that the
face thereof, where the fare is registered, will be plainly visible to passengers within the vehicle. After sundown, the face of every taximeter shall be illuminated by a suitable light and so arranged as to reflect the fare indicated thereon. (1969 Code, § 23-6)

9-208. Unlawful to fail to pay fare. It shall be unlawful for any person to refuse to pay the legal fare charged by the operator of any taxicab in accordance with the provisions of chapters 2, 3, and 4 of this title, and any person who shall fail or refuse to pay such fare shall be guilty of a misdemeanor. (1969 Code, § 23-7.1)

9-209. Taxicab stands. The city manager shall, upon issuing a permit under chapters 2, 3, and 4 of this title, approve or designate, at his or her discretion, the taxicab stands at which taxicabs covered by the permit shall be required to stand while awaiting patronage, as well as call boxes appertaining thereto. The city manager is hereby authorized to limit the number of stands and to so regulate their location as to not unreasonably interfere with the right of adjacent landowners or tenants to ingress or egress. The space so allotted to any permittee shall not be used or trespassed upon by any other operator of taxicabs within the city. (1969 Code, § 23-8)

9-210. Indiscriminate solicitation of passengers prohibited. No operator of a taxicab shall indiscriminately solicit passengers upon the streets or other public ways of the city. (1969 Code, § 23-9)

9-211. Solicitation of utility passengers prohibited. No operator of any taxicab shall, in any manner whatever, directly or indirectly, solicit the patronage of those who have assembled for the purpose of becoming passengers upon any public utility authorized to transport passengers in the city. 9-212. Accident reports. All accidents arising from or in connection with the operation of taxicabs which result in death or injury to any person, result in damage to any vehicle, or result in damage to any property in an amount exceeding four hundred dollars ($400.00) shall be reported within seventy-two (72) hours from the time of the occurrence to the city manager on a form to be furnished by the city manager. Any taxicab damaged in an accident may not be returned to service until a safety inspection has been completed by an ASE-certified mechanic and has been approved for safe operation by said mechanic, with documentation of such delivered to the city manager. A taxicab
damaged in an accident, but still operable per the safety inspection without placing the driver or passengers at risk, must be repaired within two (2) weeks of the accident or removed from operation until repaired.

A taxicab driver operating a taxicab at the time of an accident involving bodily injury or death is required to report for a drug screen within twenty-four (24) hours from the time of occurrence at a testing site designated by the city manager. Failure to report for such a screen may result in revocation of the taxicab driver's license. (1969 Code, § 23-11, as replaced by Ord. #1-2017, Jan. 2017)

Public swimming pools include but are not limited to those which are for parks, schools, motels, camps, resorts, apartments, clubs, hotels, trailer coach parks, subdivisions and the like. Pools used for the purpose of providing swimming instructions for a consideration are included within the coverage of this chapter. Pools and portable pools located on the same premises with a 1, 2, 3, or 4 family dwelling and for the benefit of the occupants and their guests, natural bathing areas such as streams, lakes, rivers or human-made lakes are exempt from §§ 9-602 through 9-606 of this chapter.

with the requirements of this chapter. Permits shall not be transferrable with respect to persons or locations. Such a permit may be suspended by the city manager upon violation by the permit holder of any terms of this chapter, or for interference with the city manager in the performance of the city manager's duties, or may be revoked, after an opportunity for a hearing by the city manager, upon serious or repeated violations. (1969 Code, § 5-66)

9-603. Approval of plans and specifications. No person shall construct, install, provide, equip, or alter a swimming pool until the plans and specifications thereof have been submitted to and approved in writing by the city manager.

The city manager shall examine the plans and specifications using the Tennessee Department of Public Health minimum standards for public swimming pools as a guideline and determine whether the pool facilities, if constructed in accordance therewith, are or would be sufficient and adequate to protect the public health and safety. If the plans and specifications are not approved, the city manager shall notify the applicant of the deficiencies. The applicant may have plans and specifications amended to remedy the deficiencies and resubmit the documents for further consideration. All plans and specifications shall be approved by the city manager prior to beginning construction. (1969 Code, § 5-67)

9-604. Inspections. The city manager shall make periodic inspections of all public swimming pools. The city manager shall be permitted access to all areas of the swimming pool at any reasonable time and shall be permitted to make tests and collect samples required to determine the quality of the swimming pool water. (1969 Code, § 5-68)

9-605. Responsibility for closing pool. The city manager may order such closing if the operator neglects to do so, or during an epidemic of certain diseases in the community. (1969 Code, § 5-69)

9-606. Standards of compliance. A swimming pool shall be considered unsafe for use when one or more of the following conditions exist:

(1) Whenever the disinfectant residual is too low or absent; the free chlorine residual is less than 0.4 ppm, or bromine residual is less than 1.0 ppm during any five hour period when the pool is open for use.

(2) Whenever turbidity is great enough that a disc two (2) inches in diameter which is divided into quadrants in alternate colors of red and black is not discernable through fifteen (15) feet of water and the different colors are not readily distinguishable.
(3) Whenever the growth of algae is great enough to cause slipping hazards.

(4) When on two (2) successive samples collected twenty-four (24) hours apart, the coliform bacteria count exceed one organism of the coliform group per 100 ml of water or the total bacteria count exceeds 200 colonies per milliliter.

(5) Whenever the water level in the pool is too low or too high and prevents gutters or skimmers from functioning properly. If existing pools are not constructed with built in gutters or skimmer, other skimming methods may be approved which will remove extraneous floating matter, such as hair, lint, etc., from the pool.

(6) Whenever there are foreign objects, such as broken glass, in the pool which would impair the safety of the users.

(7) Whenever unapproved or unsafe chemicals or excessive quantities of otherwise proper chemicals are used.

(8) Whenever the surroundings such as the deck, shower areas and toilet rooms are insanitary or in disrepair.

(9) Whenever the pH of the swimming pool is less than 7.1 or greater than 7.6. (1969 Code, § 5-70)

9-607. Fencing required. Every outdoor swimming pool shall be completely surrounded by a fence or wall not less than four (4) feet in height, which shall be so constructed as not to have openings, holes, or gaps larger than four (4) inches in any dimension except for doors and gates; and if a picket fence is erected or maintained, the horizontal dimensions shall not exceed four (4) inches. A dwelling house or accessory building may be used as part of such enclosure.

All gates or doors opening through such enclosure shall be equipped with a self-closing and self-latching device for keeping the gate or door securely closed at all times when not in actual use, except that the door of any dwelling which forms a part of the enclosure need not be so equipped.

This requirement shall be applicable to all new swimming pools hereafter constructed, other than indoor pools, and shall apply to all existing pools which have a depth of eighteen (18) inches or more of water. No person in possession of land within the city, either as owner, purchaser, lessee, tenant or a licensee, upon which is situated a swimming pool having a depth of eighteen (18) inches or more, shall fail to provide and maintain such fence or wall as herein provided.

The city manager may make modifications in individual cases, upon a showing of good cause with respect to the height, nature or location of the fence, wall, gates or latches, or the necessity therefor, provided the protection as sought hereunder is not reduced thereby. The city manager may permit other protective devices or structures to be used so long as the degree of protection afforded by the substitute devices or structures is not less than the protection afforded by the wall, fence, gate and latch described herein. The city manager
shall allow a reasonable period within which to comply with the requirements of this section, but in no case more than six (6) months. (1969 Code, § 5-71)

9-608. **Penalty for violation.** Any person violating this chapter, upon conviction, shall be fined not less than five dollars ($5.00) nor more than fifty dollars ($50.00) or sentenced to city jail for not more than ninety (90) days, or both such fine and jail sentence in the discretion of the court. Each day that such violation continues shall constitute a separate offense. (1969 Code, § 5-72)

(4) The impoundment of an animal under this section shall not relieve the owner thereof from prosecution for permitting such animal to run at large in violation of § 10-109.

(5) The record of the owner, and not the particular animal, for one (1) year prior to the date of the current violation, shall be considered when calculating the number of offenses committed.

(6) Any unaltered animal that has been impounded three (3) times within any twelve (12) month period shall be spayed or neutered within thirty (30) days of release from the shelter. The owner must show proof of the procedure to the division of animal control.

An enclosure is unhealthy when its condition is likely to cause illness or injury to the animal. (Ord. #15-99, Aug. 1999, as replaced by Ord. #5-2018, April 2018)

10-119. **Abandonment.** It shall be unlawful for any person to abandon an animal that is under its ownership or care. If an animal is found abandoned, the animal may be impounded. Abandonment consists of:

1. Leaving an animal for a period in excess of twenty-four (24) hours without providing for someone to feed, water and check on the animal's condition.

2. Leaving an animal by a roadside or other area, or

3. Leaving an animal on either public or private property without the property owner's consent.

Any person convicted of violating this section shall be subject to a penalty of not less than two hundred dollars ($200) nor more than five hundred dollars ($500). Each animal abandoned is a separate violation. (Ord. #15-99, Aug. 1999)
10-120. Poisoning. It shall be unlawful for any person, other than a licensed veterinarian or a person under the direction of a veterinarian for humanitarian purposes to:

(1) Administer poison to any animal(s);
(2) Distribute poison in any manner whatsoever with the intent or for the purpose of poisoning any animal; or
(3) Knowingly leave a poisonous substance of any kind or ground glass in any place with the intent to injure an animal or in any location where it may be readily found and eaten by an animal.

The provisions of this section are not applicable to licensed exterminators using poisons as part of a pest control program or to persons using commercial insecticides and rodent baits to control insects and wild rodents. This section is also inapplicable to any measures taken under § 10-104 by the city manager. (Ord. #15-99, Aug. 1999)

10-121. Noisy animals prohibited. (1) No person owning or keeping any animal shall fail to prevent such animal from disturbing the peace of any other person by loud and persistent or loud and habitual barking, yelping, howling, braying, whinnying, crowing, calling or making any other noise, whether the animal is on or off the owner's premises.

(2) No person shall be charged with violating this section unless a written warning was given to the owner within the twelve (12) months preceding the alleged date of violation. Such warning is sufficient if it recites subsection (1) and states that a complaint was received. A warning is given if personally given to the owner or mailed first class to the owner.

(3) No person shall be convicted of violating this section unless two (2) or more witnesses testify to the noise, or unless there is other evidence corroborating the testimony of a single witness. (Ord. #15-99, Aug. 1999)

10-122. Animal on school grounds. It shall be unlawful for any owner, or any other person having an animal under his or her care or control to take, allow, or let such animal upon the grounds, property, or premises of any public school operated by the Oak Ridge School System unless such person shall first have obtained written permission from the superintendent of schools or the superintendent’s designee. This section is not applicable to any law enforcement animal. (Ord. #15-99, Aug. 1999)

10-123. Citation procedure for violations of this chapter. Whenever an animal control officer determines there has been a violation of any of the provisions in this chapter, in lieu of obtaining a warrant for the arrest of the offender, the animal control officer may prepare in quadruplicate a written notice to appear in city court containing the name and address of such person, the offense charged, and the time when such person shall appear in city court. The time specified for appearance shall not be less than five (5) days from the
date of the issuance to appear, unless the person cited agrees to a shorter time period. If the person so demands, the appearance in court shall be the first session of court following the citation. The cited person shall sign one (1) copy of the notice to appear. Signing the notice shall constitute the cited person's promise to appear on the date specified in the notice. One copy of the notice shall be delivered to the cited person. (Ord. #15-99, Aug. 1999)

10-124. Failure to obey animal control citation. No person shall violate his or her written promise to appear provided for in § 10-123, regardless of the disposition of the charge for which the citation was originally issued. (Ord. #15-99, Aug. 1999)

10-125. Acceptance of guilty pleas and penalties for animal control violations. The city court clerk is hereby authorized to accept pleas of guilty for violations of this chapter, to accept designated penalties in connection with such pleas, to issue receipts therefor, and to appear for such person in court for the purpose of entering pleas of guilty, all in accordance with such procedures as may be established by the judge of the city court. Such penalties shall be accepted upon the entry of any plea of guilty before the court clerk. The amount of such penalty to be accepted shall be so designated by rule of court promulgated by the judge of the city court; provided that no such penalty may be accepted for a sum less than the minimum penalty imposed by any section of this chapter for such offense. Any person given a citation for a violation of any provision of this chapter may post the penalty appropriate thereto, and notify the clerk of the city court that he or she will not appear for trial in which case the matter may be entered on the docket for trial. There shall be no cost assessed in cases in which a plea of guilty is entered under this section. (Ord. #15-99, Aug. 1999)

10-126. Collection and disposition of fees. All fees required by this chapter shall be collected as required and shall be deposited in the general fund. (Ord. #15-99, Aug. 1999)

10-127. Penalties. Any person violating any provision of this chapter, unless the penalty is specified in the section, shall be punished by a penalty not to exceed five hundred dollars ($500). Each day a violation exists shall be deemed a separate violation. (Ord. #15-99, Aug. 1999)
CHAPTER 2

Any animal capable of being infected with rabies which is rabid or believed to be rabid shall be immediately reported to the police department. Such animal shall be taken up and impounded if this can be accomplished with safety. If it is necessary for the city to destroy the animal to prevent further biting or for the safety of the community, every effort shall be made to avoid damage to the brain. (Ord. #15-99, Aug. 1999)

10-203. Quarantine of animals inflicting, or suspected of inflicting a bite or suspected of being rabid. (1) Any animal that is suspected of or
has bitten a human being, or is suspected of being infected with rabies, shall be quarantined at a facility designated by the city manager for no less than ten (10) days from the time the bite or scratch occurred. The owner shall be responsible for all quarantine fees and costs.

(2) No animal that is suspected of or has bitten a human being or is suspected of being infected by rabies shall be killed or destroyed or removed from the city unless authorized by the city manager.

(3) Only animals that appear to be without rabies shall be released from quarantine or impoundment.

(4) No person shall hide, kill, conceal or aid or assist in hiding, killing, or concealing any animal suspected of being infected with rabies or shall conceal or permit the same to be removed from the city for the purpose of preventing the quarantine.

(5) There shall be placed in a conspicuous place in plain view of all entrances to the place of quarantine a placard on which shall be printed, in letters not less than two (2) inches high, the words "Rabies--Quarantine." The place of quarantine shall be cleaned and disinfected to the satisfaction of the city manager. (Ord. #15-99, Aug. 1999)

**10-204. Quarantine of animals in contact with rabid animal.** All animals capable of being infected with rabies that have come in contact with a rabid animal shall be quarantined and vaccinated as follows:

(1) If no vaccination for rabies has been given within the previous twelve (12) months, the animal shall be vaccinated and quarantined for ninety (90) days.

Report required when person is bitten by an animal.** Whenever a person is bitten by an animal capable of being infected with rabies, prompt report of such bite shall be made to the police department. Such report shall be made by any physician attending the person bitten, or, if such person is at a hospital, the report shall be made by the person in charge. Such report shall contain all information required by the city manager. When a physician was not consulted or the person not taken to the hospital, the report shall be made by the person bitten or any other person with knowledge of the facts. (Ord. #15-99, Aug. 1999)

**10-206. (Ord. #15-99, Aug. 1999)

10-208. **Surrender and examination of carcasses of animals.** The carcass of any dead animal found within the city shall, upon demand, be surrendered to the division of animal control for examination if, in the opinion of the city manager, such examination is necessary or advisable. (Ord. #15-99, Aug. 1999)
CHAPTER 3

10-301. Definition.
10-304. Hearing on vicious dog declaration.
10-305. Appeal from vicious dog declaration.
10-306. Requirements for keeping a vicious dog.
10-308. Notice of impoundment.
10-309. Hearing on impoundment and/or destruction.

10-311. Change of status.
10-312. Change of ownership.

10-314. Right of entry.

10-301. Definition. "Vicious dog" means:
   (1) Any dog with a known propensity, tendency, or disposition to
        attack without provocation, to cause serious injury, or to otherwise
        threaten the safety of human beings or domestic animals; or
   (2) Any dog which, without provocation, has attacked or bitten a
        human being or domestic animal; or
   (3) Any dog owned or harbored primarily, or in part, for the purpose
        of dog fighting, or any dog trained for dog fighting.  (Ord. #15-99, Aug. 1999)

10-302. Procedure for declaring a dog vicious.  (1) An animal
   control officer, police officer or any adult person may request under oath that a
dog be classified as vicious as defined in § 10-301 by submitting a sworn, written
complaint.  Upon receipt of such complaint, the city manager shall notify the
owner of the dog, in writing, that a complaint has been filed and that an
investigation into the allegations as set forth in the complaint will be conducted.
(2) At the conclusion of an investigation, the city manager may:
   (a) Determine that the dog is not vicious and, if the dog is
       impounded, waive any impoundment fees incurred and release the dog to
       its owner; or
   (b) Determine that the dog is vicious and order the owner to
       comply with the requirements for keeping a vicious dog set forth in
       § 10-306, and if the dog is impounded, release the dog to its owner after
       the owner has paid all fees incurred for impoundment.  If all
       impoundment fees have not been paid within ten (10) days after a final
determination that the dog is vicious, the city manager may cause the dog to be humanely destroyed.
(3) Nothing in this chapter shall be construed to require a dog to be declared vicious prior to taking action under state law. (Ord. #15-99, Aug. 1999)

10-303. Notification of vicious dog declaration. (1) Within five (5) days after declaring a dog vicious, the city manager shall notify the owner by certified mail or personal delivery of the dog's designation as a vicious dog and of the requirements for keeping a vicious dog as set forth in § 10-306. The city manager shall also notify the division of animal control of the designation of any dog as a vicious dog.
(2) The notice shall inform the owner that he or she may request, in writing, a hearing to contest the city manager's finding and designation within five (5) days after delivery of the vicious dog declaration notice. (Ord. #15-99, Aug. 1999)

10-304. Hearing on vicious dog declaration. (1) The city manager shall hold a hearing within ten (10) days after receiving the owner's written request for such a hearing. The city manager shall provide notice of the date, time and location of the hearing to the owner by certified mail or personal delivery and to the complainant by regular mail.
(2) At a hearing, all interested parties shall be given the opportunity to present evidence on the issue of the dog's viciousness. Criteria to be considered in the hearing shall include but not be limited to the following:
   (a) Provocation,
   (b) Severity of attack or injury to a person or animal,
   (c) Previous aggressive history of the dog,
   (d) Observable behavior of the dog,
   (e) Site and circumstances of the incident, and
   (f) Statements from interested parties.
(3) A determination at the hearing that the dog is in fact a vicious dog as defined in § 10-301 shall subject the dog and its owner to the requirements of this chapter.
(4) Failure of the owner to request a hearing shall result in the dog being finally declared a vicious dog and shall subject the dog and its owner to the requirements of this chapter. (Ord. #15-99, Aug. 1999)

10-305. Appeal from vicious dog declaration. If the city manager determines that a dog is vicious at the conclusion of a hearing conducted under § 10-304, that decision shall be final unless the owner of the dog appeals the decision to circuit court. (Ord. #15-99, Aug. 1999)

10-306. Requirements for keeping a vicious dog. The owner of a vicious dog shall be subject to the following requirements:
(1) **Confinement.** All vicious dogs shall be securely confined indoors or in an enclosed and locked pen or structure upon the premises of the owner that is suitable to prevent the entry of children and is designed to prevent the dog from escaping. The pen or structure shall have minimum dimensions of five (5) feet in width and length by ten (10) feet in height and must have secure sides and a secure top attached to the sides. If no bottom is secured to the sides, the sides must be embedded into the ground no less than two (2) feet. All pens or structures must be kept clean and sanitary. The enclosure must provide shelter and protection from the elements and must provide adequate exercise room, light and ventilation. Under no circumstances may a vicious dog be confined by a fence, whether it is electronic, a similar underground wire system, or otherwise. Under no circumstances may more than one (1) dog be kept in any one pen or structure.

(2) **Indoor confinement.** No vicious dog may be kept on a porch, patio or in any part of a house or structure that would allow the dog to exit the structure on its own volition. In addition, no vicious dog may be kept in a house or structure when open windows or screen doors are the only obstacle preventing the dog from exiting the house or structure.

(3) **Number of vicious dogs per residence.** Only one (1) dog that has been declared vicious may be owned per residence.

(4) **Leash and muzzle.** The owner of a vicious dog shall not allow the dog to go outside its kennel, pen, or structure unless the dog is muzzled, under the physical control of a capable adult, and restrained by a leash not more than four (4) feet in length, which shall be bright yellow in color, and of sufficient strength to control the dog. The muzzle must not cause injury to the dog or interfere with its vision or respiration, but must prevent the dog from biting any human being or animal.

(5) **Signs.** The owner of a vicious dog shall display, in a prominent place on the owner’s premises, a clearly visible warning sign reading “Beware of Vicious Dog.” The sign shall be readable from the driveway entrance or street. The owner shall also display a sign with a symbol warning children of the presence of a vicious dog. Similar signs shall be posted on the dog’s kennel, pen or structure. The sign shall be at least twelve (12) inches by twelve (12) inches in size.

(6) **Insurance.** The owner of a vicious dog shall obtain public liability insurance of at least one hundred thousand dollars ($100,000), per dog, insuring the owner for any damage or personal injury that may be caused by the owner's vicious dog. The policy shall contain a provision requiring the city to be notified immediately by the agent issuing the policy in the event that the policy is cancelled, terminated or expired. The owner must provide proof of the insurance to the division of animal control. If there is a lapse in insurance or a cancellation, the owner shall be in violation of this title.

(7) **Compliance; consequences for failure to comply.** (a) For the safety and welfare of the general public, an owner of a vicious dog must comply
with the requirements for keeping a vicious dog within the following timeframe:

(i) **Immediate.** Immediately upon the owner's receipt of the declaration notice, the owner shall comply with the confinement requirements set forth in § 10-306(1) and (2). The owner may continue to keep the vicious dog confined indoors or may, at the owner's option, confine the vicious dog outdoors provided the requirements of § 10-306(1) are met at all times while the vicious dog is confined outdoors.

(ii) **Within twenty-four (24) hours.** The requirements set forth in § 10-306(4) and (5) must be met within twenty-four (24) hours of the owner's receipt of the declaration notice.

(iii) **Within five (5) days.** The requirement set forth in § 10-306(3) and (6) must be met within five (5) days of the owner's receipt of the declaration notice.

(iv) Should an owner of a vicious dog choose to contest the city manager's finding and designation of his or her dog as vicious and said owner has not complied with the requirements of this section within the allotted timeframe, the vicious dog shall be delivered to the animal shelter for safe-keeping until the contest hearing is heard. The owner shall be responsible for any and all boarding fees for the vicious dog, veterinarian or other professional services which the vicious dog needs as determined by staff the animal control officers or the animal shelter's veterinarian, and for any and all damage to city property caused by the vicious dog.

(b) Failure of an owner to comply with any of the requirements for keeping a vicious dog, or failure of an owner to continue compliance with said requirements, shall result in the vicious dog being apprehended by the division of animal control or the police department. Said vicious dog shall remain in the custody and control of the division of animal control until such time as the owner can prove, to the city's satisfaction, compliance with the requirements for keeping a vicious dog or until the conclusion of five (5) working days, whichever occurs first. If the vicious dog remains impounded at the conclusion of five (5) working days, said vicious dog shall become the property of the city and may be destroyed. (Ord. #15-99, Aug. 1999, as amended by Ord. #20-02, Nov. 2002)

**10-307. Impoundment.** When a dog has severely attacked a human being or domestic animal, and a police officer or animal control officer witnessed the attack or witnessed the injuries caused by the attack, such dog shall be impounded. (Ord. #15-99, Aug. 1999)
10-308. **Notice of impoundment.** Within five (5) days of impoundment of a dog under § 10-307, the division of animal control shall notify the dog’s owner, if known, in writing of the impoundment. (Ord. #15-99, Aug. 1999)

10-309. **Hearing on impoundment and/or destruction.** (1) The owner of an impounded dog shall have the right to file, within five (5) days after receiving notice, a written request for a hearing before the city manager to contest the impoundment.

(2) Upon request by the owner for a hearing pursuant to subsection (1), a hearing shall be held within ten (10) days after the request for a hearing. Notice of the date, time and location of the hearing shall be provided by certified mail or delivered personally to the dog’s owner.

(3) The city manager shall issue a decision after the close of the hearing and shall notify the owner in writing of the decision.

(4) After considering all of the relevant evidence, the city manager may request the district attorney general to petition the circuit court to order the destruction of the impounded dog, or may release the dog to its owner conditional on the owner complying with the requirements for keeping a vicious dog as set forth in § 10-306.

(5) If state law changes and permits a municipality to order the destruction of a dog as a result of an attack on a person or other animal, then the city manager shall automatically have the power to order the destruction of said dog under subsection (4) without going through circuit court. (Ord. #15-99, Aug. 1999)

10-310. **Exceptions.** (1) This chapter shall not apply to any dog used by the police department or law enforcement agencies.

(2) No dog shall be declared vicious for injury or damage sustained by a person who was entering the owner’s property to commit a burglary, robbery, assault, willful trespass or other tort or crime.

(3) No dog shall be declared vicious for injury or damage sustained by a person who was teasing, tormenting, abusing, assaulting, or otherwise provoking the dog.

(4) No dog shall be declared vicious solely because it bites or attacks:

(a) A person assaulting its owner, excluding a police officer attempting to subdue or effect the arrest of a subject; or

(b) An unrestrained animal that attacks it or its young while it is restrained in compliance with this title. (Ord. #15-99, Aug. 1999)

10-311. **Change of status.** The owner of a vicious dog shall notify the division of animal control:

(1) Immediately if the vicious dog is unconfined and on the loose, or has attacked a human being or domestic animal without provocation;
(2) If the owner has moved outside of the city limits and shall give the owner's new address; or
(3) If the dog has died. (Ord. #15-99, Aug. 1999)

10-312. Change of ownership. (1) If the owner of a vicious dog sells, gives away, or otherwise transfers custody of the vicious dog, the owner shall, within three (3) days, provide the division of animal control with the name, address, and telephone number of the new owner.
(2) The previous owner shall notify the new owner of the dog's designation as a vicious dog and, if the new owner resides within the city limits, of the requirements and conditions for keeping a vicious dog set forth in § 10-306.
(3) If the new owner resides within the city limits, the new owner must obtain the required enclosure prior to the acquisition of the vicious dog or confine the dog indoors.
(4) The new owner must fully comply with the provisions of this chapter, including obtaining liability insurance, prior to the acquisition of the vicious dog. (Ord. #15-99, Aug. 1999)

10-313. Dog fighting, spectator. No person shall knowingly be a spectator at a dog fight. (Ord. #15-99, Aug. 1999, as replaced by Ord. #17-06, Sept. 2006)

10-314. Right of entry. It shall be the duty and authority of the chief of police or the chief of police's authorized representative to enter onto any premises, public or private, to make inspections for the purpose of carrying out the provisions of this title. (Ord. #15-99, Aug. 1999)
CHAPTER 4

DOG PARKS

SECTION
10-401. Dog park, off-leash area.
10-402. Requirements.
10-403. Rules.
10-404. Violations.
10-405. Implied consent.

10-401. Dog park, off-leash area. The city has the authority to designate areas as dog parks. Dogs are permitted to be off-leash within the confines of any city-owned dog park area without being in violation of the city's leash (animal at large) law provided the provisions of this chapter are followed at all times. (as added by Ord. #06-2013, July 2013)

10-402. Requirements. It is unlawful for any person to fail to follow the requirements for use of the dog park as set forth below and each and every violation per dog may be treated as a separate offense:
(1) A person shall not bring any animal into the dog park other than a dog. This prohibition is not applicable to a service animal in performance of, or in training for, its duties to provide assistance to a person with disabilities.
(2) A person having charge, custody, care or control of a dog shall not bring a dog to the dog park that has been declared vicious by any governmental entity.
(3) A person having charge, custody, care or control of a dog shall not bring a dog in heat into the dog park.
(4) A person having charge, custody, care or control of a dog shall only bring a dog(s) to the dog park if the dog is healthy and properly vaccinated.
(5) Current proof of rabies vaccination (ex. rabies tag) must be attached to the vaccinated dog's collar at all times, and may be inspected by any city employee or city dog park volunteer at any time while entering, inside, or exiting the dog park.
(6) If the dog park has a designated area for small dogs, no dogs over twenty (20) pounds may be in the small dog area.
(7) All dogs must be leashed when entering and exiting the dog park, and the person having charge, custody, care or control of the dog must keep the leash in their possession at all times inside the dog park.
(8) The person having charge, custody, care or control of the dog must promptly remove and dispose of any waste deposited by their dog. Trash receptacles will be available within the dog park.
(9) The person having charge, custody, care or control of the dog must repair any damage caused by their dog including filling in holes dug by the dog.

(10) The person having charge, custody, care or control of the dog must immediately remove the dog if the dog shows signs of aggression toward people or other dogs within the dog park.

(11) Weapons are not permitted within the dog park.

(12) Dogs may not be left in the dog park unattended. (as added by Ord. #06-2013, July 2013)

10-403. Rules. In addition to the requirements set forth in this chapter, the city has the authority to establish and post rules and regulations pertaining to use of the dog park. Dog park rules will be posted at the main entrance to the dog park and on the city's website and must be followed. (as added by Ord. #06-2013, July 2013)

10-404. Violations. A person in violation of the requirements set forth in this chapter and/or the posted rules for the dog park may be banned from the dog park for a designated or indefinite time period. In addition, a person in violation of the requirements of this chapter may be cited for the violation(s) in city court. (as added by Ord. #06-2013, July 2013)

10-405. Implied consent. Use of the dog park shall constitute implied consent of the owner and any person have charge, custody, care or control of the dog to strictly follow the requirements and rules set forth in this chapter, and shall constitute a waiver of liability to the city, its officials, officers, and employees, an assumption of all risks, and an agreement and undertaking to protect, indemnify, defend and hold harmless the city, its officials, officers, and employees for any injury or damage to persons or property during any time that the dog is in the dog park. (as added by Ord. #06-2013, July 2013)

10-406. Responsibility and liability. The provisions of this chapter do not relieve the owner or person have charge, custody, care, or control of a dog from the responsibility to maintain proper control over the dog nor shall the provisions of this chapter be construed to relieve such person from any liability for any damages arising out of his or her use of the dog park. (as added by Ord. #06-2013, July 2013)
CHAPTER 5
KEEPING OF HENS

SECTION
10-501. Domesticated female chickens (hens); generally.
10-502. Permit required.
10-503. Fees.
10-504. Number and type allowed.
10-505. Slaughter prohibited.
10-506. Fenced enclosures and henhouses.
10-507. Food storage and removal.
10-508. Application for permit.
10-509. Approval of permit.
10-510. Denial, suspension, or revocation of permit.
10-511. Other provisions.
10-512. Penalty.
10-513. Severability.

10-501. Domesticated female chickens (hens); generally. Notwithstanding the provisions of city code § 10-114, keeping or possessing of livestock, the keeping or possessing of female domesticated chickens (hereinafter referred to as "hens") in residential areas (except for RG-1) is governed by this chapter.

The purpose of this chapter is to provide standards for the keeping of hens on residentially zoned property. It is intended to enable residents to keep or possess a small number of hens while limiting the potential adverse impacts on the surrounding property owners and neighborhood. The city recognizes that adverse neighborhood impacts may result from the keeping of hens as a result of noise; odor; unsanitary animal living conditions; unsanitary waste storage and removal; the attraction of predators, rodents, or parasites; and non-confined animals leaving the owner's property. This chapter is intended to create permitting standards and requirements that ensure that hens do not adversely impact the neighborhood surrounding the property on which the hens are kept. The provisions of this chapter are not applicable to property zoned as RG-1, Residential, Open Space and Reserved Districts, under the city's zoning ordinance. (as added by Ord. #6-2016, July 2016)

10-502. Permit required. An annual permit is required for the keeping of hens. Additionally, a building permit is required for the construction of a henhouse and pen.

(1) The annual permit fee to keep hens is personal to the permittee and may not be assigned. In addition, the permit authorizes the keeping of hens only upon the property described in the permit. The permittee must occupy the
residence on the property where the hens are to be kept as the permittee's personal, primary residence. An applicant for a permit must either own the property or have written permission from the property owner to be eligible for a permit. If the property is governed by a homeowner's association, the applicant must also provide written permission of the homeowner's association to be eligible for a permit. Only one (1) permit is allowed per permittee and only one (1) permit is allowed per property. In the event the permittee is absent from the property for longer than thirty (30) days, the permit automatically shall terminate and become void. The issuance of a permit does not create a vested right to renewal of the permit beyond the stated term thereof.

(2) The first permit year shall extend from the date of issuance through December 31, 2017. Thereafter the permit year shall be January 1 through December 31. (as added by Ord. #6-2016, July 2016)

(1) Up to six (6) hens may be allowed. No roosters shall be allowed. The provisions of this chapter apply regardless of how many dwelling units are located on the property. In the case of multi-family residential complexes without individually owned backyards, the maximum number of hens allowed is six (6) per complex.

(2) Only hens are allowed. There is no restriction on domestic chicken breeds; however, fowl and poultry other than hens are not allowed. (as added by Ord. #6-2016, July 2016)

10-505. Slaughter prohibited. The slaughtering of chickens is prohibited. (as added by Ord. #6-2016, July 2016)

10-506. Fenced enclosures and henhouses. (1) Hens must be kept in a fenced enclosure at all times. The fenced enclosure must be either (a) covered, or (b) at least forty-two inches (42") high. In the event the fenced enclosure is not covered, all hens must be wing-clipped to prevent escape. Hens shall be secured within the henhouse during non-daylight hours.

(2) In addition to the fenced enclosure, hens shall be provided with a covered, predator resistant henhouse.

(3) A minimum of two (2) square feet per hen shall be provided for henhouses and a minimum of six (6) square feet per hen for fenced enclosures.

(4) Fenced enclosures and henhouses must be properly ventilated, clean, dry, and odor-free, and kept in a neat and sanitary condition at all times in a manner that will not disturb the use or enjoyment of neighboring lots due to noise, odor, or other adverse impact.
The henhouse and fenced enclosure must provide adequate ventilation and adequate sun and shade, and must be constructed in a manner to resist access by rodents, wild birds, and predators, including dogs and cats.

Henhouses shall be enclosed on all sides and shall have a roof and doors. Access doors must be able to be shut and locked at night. Opening windows and vents must be covered with predator-resistant and bird-resistant wire of less than one inch (1") openings.

The materials used in making the henhouse and fence shall be uniform for each element of the structure such that the walls are made of the same material, the roof has the same shingles or other covering, and any windows or openings are constructed using the same materials. The henhouse shall be well-maintained.

Henhouses shall be located and constructed in compliance with the city's zoning ordinance pertaining to accessory buildings or structures.

Neither the henhouse nor the fenced enclosure may be located less than ten feet (10') from any abutting property line. This distance requirement is not appealable to the Board of Zoning Appeals (BZA) for a variance.

Henhouses and the fenced enclosures shall not be permitted in front yards. (as added by Ord. #6-2016, July 2016)

10-507. Food storage and removal. All stored food for the hens must be kept either indoors or in a weather-resistant container designed to prevent access by animals. Uneaten food shall be removed daily. (as added by Ord. #6-2016, July 2016)

10-508. Application for permit. Every applicant for a permit to keep hens shall:

(1) Complete and file an application on a form prescribed by the animal control division of the police department.

(2) Deposit the prescribed permit fee with the animal control division of the police department at the time the application is filed. Any material misstatement or omission shall be grounds for denial, suspension, or revocation of the permit. (as added by Ord. #6-2016, July 2016)

10-509. Approval of permit. The animal control division of the police department shall issue a permit if the applicant has demonstrated compliance with the criteria and standards of this chapter. (as added by Ord. #6-2016, July 2016)

10-510. Denial, suspension, or revocation of permit. The animal control division of the police department shall deny a permit if the applicant has not demonstrated compliance with all provisions of this chapter. A permit to keep hens may be suspended or revoked by the animal control division of the police department where there is a risk to public health or safety or for any
violation of or failure to comply with any of the provisions of this chapter or with the provisions of any other applicable ordinance or law. Any denial, suspension, or revocation of a permit shall be in writing and shall include notification of the right and procedure for appeal to the city manager. (as added by Ord. #6-2016, July 2016)

10-511. Other provisions. (1) In addition to the standards set forth in this chapter, the permittee must follow all other applicable rules for the keeping of animals included in the city code.

(2) The provisions of this chapter do not supersede any deed restrictions. (as added by Ord. #6-2016, July 2016)

10-512. Penalty. In addition to any other enforcement action which the city may take, violation of any provision of this chapter shall be a civil violation and a fine not to exceed fifty dollars ($50.00) may be imposed. Each day that a violation continues will be treated as a separate offense. (as added by Ord. #6-2016, July 2016)

10-513. Severability. In the event that any portion of this chapter shall be declared by any competent court to be invalid for any reason, such decision shall not be deemed to affect the validity of any other portion of this section. (as added by Ord. #6-2016, July 2016)

(3) A citation issued under this section shall demand the person cited to appear in court at a stated time, and it shall state the name and address of the person cited, the name of the issuing officer and the offense charged. Nor shall anything in this section prohibit a private club not in fact open to the public, which as an incident to its primary purpose

The imposition of one penalty for any violation shall not excuse the violation or permit it to continue, and all such persons shall be required to correct or remedy such violations or defects within a reasonable time. When
not otherwise specified, each day that prohibited conditions are maintained shall constitute a separate offense.

(ii) In Sections 903.2.4, 903.2.7, and 903.2.9 (requiring sprinkler systems to be installed at a square footage threshold), replace the number 12,000 with the number 10,000, and replace the number 24,000 with the number 20,000.

(ii) Sprinkler system in large additions to buildings. Any new addition, which is more than ten thousand (10,000) square feet, connected to an existing building of any size, shall be equipped with an approved automatic fire sprinkler system. The new addition shall either:

(A) Be separated from the existing building by two-hour or greater construction; or

(B) Have the sprinkler system extend to cover the existing construction as well as the new addition.

(iii) Sprinkler system in small additions to buildings. Any new addition of more than five thousand (5,000) square feet but less than ten thousand (10,000) square feet that does not increase the size of the complete facility (existing plus new addition) to more than ten thousand (10,000) square feet shall be equipped with a complete automatic fire detection system or fire sprinkler system. The new addition with the automatic fire detection or fire sprinkler system installed shall either:

(A) Be separated from the existing building by two-hour or greater construction; or
(B) Have the fire detection or fire sprinkler system extend to cover the existing construction as well as the new addition.

(iv) Sprinkler system in additions to unsprinklered buildings. Any new addition that will increase the size of the complete facility (existing building plus new addition) to more than ten thousand (10,000) square feet shall either:

(A) Be separated from the existing construction by a non-penetrated, four-hour fire wall and have an automatic fire detection system installed in the new addition and the existing building; or

(B) Be separated from the existing construction by a two-hour or greater fire wall, and have an automatic fire detection system installed in both the new addition and the existing building; or

(C) Be separated from the existing construction by a two-hour or greater fire wall, and have an automatic fire sprinkler system installed in the new addition; or

(D) Have an automatic fire sprinkler system installed in the entire facility, both the new addition and the existing building.

The term "automatic fire sprinkler system" means a system meeting the requirements of the latest edition of the application National Fire Protection Association standard for the installation of sprinkler systems.

(v) Fire sprinkler systems shall be installed when required by the City of Oak Ridge Standard Construction Requirements and Details, specifically section 602(2), Adequate Fire Protection, which is reprinted here:

In any one or more of the conditions listed below, the developer or builder shall provide a means for adequate fire protection including but not limited to the installation of a domestic sprinkler system complying with applicable codes, the installation of an additional fire hydrant capable of supplying adequate flow, or the installation of a booster pump to increase flow to an acceptable level at the structure.

(A) Any part of the building is more than five hundred feet (500') from a hydrant measured along an accessible roadway; or

(B) The nearest hydrant provides a water supply of less than five hundred (500) gpm in residential areas of one-thousand (1,000) gpm in non-residential areas at twenty
(20) pounds per square inch residual pressure at periods of peak demand.

(C) The elevation difference between the highest floor of the referenced structure and the nearest hydrant prevents adequate water flow and pressure for fire protection at that structure.

(vi) Detection system or sprinkler system for smaller buildings. Except where more stringent requirements are stipulated in the building code, all buildings of greater than five thousand (5,000) square feet hereafter constructed shall be equipped with an automatic fire detection system, approved by the fire chief, using UL listed equipment, and monitored through an approved central station facility, or an approved automatic sprinkler system monitored as outlined above, except where four-hour non-penetrated fire walls divide the building into units of less than five thousand (5,000) square feet.

(vii) Open parking garages, exception to sprinkler requirement.

(A) Open parking garage shall mean a structure, or portion thereof, that is used for the parking or storage of private motor vehicles with openings described as follows:

(1) For natural ventilation purposes, the exterior side of the structure shall have uniformly distributed openings on two (2) or more sides. The area of such openings in exterior walls on a tier must be at least twenty percent (20%) of the total perimeter wall area of each tier. The aggregate length of the openings considered to be providing natural ventilation shall constitute a minimum of forty percent (40%) of the perimeter of the tier. Interior walls shall be at least twenty percent (20%) open with uniformly distributed openings.

(2) Exception. Openings are not required to be distributed over forty percent (40%) of the building perimeter where the required openings are uniformly distributed over two (2) opposing sides of the building.

(B) An open parking garage shall not be required to be equipped with an approved automatic fire sprinkler system provided the following requirements are met:

(1) The open parking garage is above ground;

(2) No space for human occupancy shall be located below, within or above the open parking
garage except as ancillary to the operation of the open parking garage;

(3) Two (2) or more sides of the open parking garage shall be open and accessible to aerial fire apparatus;

(4) Attached structure(s) shall be separated from the open parking garage by a wall with a minimum of a two-hour fire rating certified by a competent engineer;

(5) A standpipe system, meeting the requirements of NFPA 14, shall be provided with outlets no more than one hundred thirty feet (130') from any point within the open parking garage;

(6) A fire hydrant shall be provided within one hundred feet (100') of the fire department supply connection to the standpipe system; and

(7) The open parking garage shall comply with all applicable requirements of the model codes adopted by the city.

(C) Exception. If a model code adopted by the city requires the open parking garage to be equipped with an approved automatic sprinkler system, the provisions of this section shall not apply and the open parking garage shall be equipped with an approved automatic sprinkler system.

(13) Section 1013.2. Where required. Section 1013.2 is amended by deleting the first sentence and replacing it with the following sentence:
Guards shall be located along open-sided walking surfaces or ground surfaces, mezzanines, industrial equipment platforms, retaining walls, stairways, ramps, landings and any other locations that are located more than thirty inches (30") (762mm) above the floor or grade below.

(16) Section 3410.2. Applicability. Section 3410.2 is hereby amended by inserting the required date as "the date of the adoption of the first building code regulations in the City of Oak Ridge, Tennessee."

This pressure shall be held without introduction of additional air for a period of at least fifteen (15) minutes.

(6) **Final testing methods.** The final test of the completed drainage and vent system shall be visual and in sufficient detail to ensure that the provisions of the plumbing code have been complied with; provided, however, for cause, the plumber may be required to subject the plumbing to either a smoke
or peppermint test. Where the smoke test is preferred, it shall be made by filling all traps with water and then introducing into the entire system a pungent, thick smoke produced by one or more smoke machines. When the smoke appears at stack openings on the roof they shall be closed and a pressure equivalent to a one-inch water column shall be built and maintained for fifteen (15) minutes before inspection starts. When the peppermint test is preferred, two (2) ounces of oil of peppermint shall be introduced for each line or stack. (1969 Code, § 9-133)

12-715. Testing water supply system. Upon completion of a section or of the entire water supply system, it shall be tested and proved tight under air or water pressure test. The water used for tests shall be obtained from a potable source of supply. (1969 Code, § 9-134)

(1969 Code, § 9-139)

12-720. Stop work orders. (1969 Code, § 9-142)

12-723. **Appeals from decisions of city manager.** (1) Whenever the city manager or his or her designee shall reject or refuse to approve the mode or manner of construction proposed to be followed, or materials to be used, or when it is claimed that the provisions of the plumbing code do not apply, or than an equally good or more desirable form of construction can be employed in any specific case, or when it is claimed that the true intent and meaning of the plumbing code or any of the regulations thereunder have been misconstrued or wrongly interpreted, the owner of such building or structure, or his or her duly authorized agent, may appeal from the decision of the city manager or his or her designee to the board of building code appeals. The board shall establish such other written rules and regulation for Its own procedure not inconsistent with the provisions of ORMPC and a copy shall be kept on file with the City Clerk.

(g) All hearings before the board shall be open to the public. The appellant, the appellant's representative, the City Manager or his/her duly authorized designee and any person whose interests are affected shall be given the opportunity to be heard.

(h) Any reference in any provision of the Code of Ordinance, City of Oak Ridge, Tennessee to the board of building code appeals or the board of housing code appeals shall be deemed to refer to the Board of Building and Housing Code Appeals.

The board shall hear all City of Oak Ridge Property Maintenance Code appeals submitted by any person directly affected by a decision of the City Manager or his/her duly authorized designee or a notice or order issued under this code shall have the right to appeal to the board in accordance to Section 111.6 of this code.

(a) Board of Building and Housing Code Appeals shall meet monthly or as needed to hear all cases of structures unfit for human occupation or use and shall hear all appeals of notices for housing violations, if any have been filed, but in any event shall meet within fifteen (15) business days after receipt of an application or notice of appeal if so requested by the City Manager or his/her duly authorized designee or by the Appellant.

(b) At such hearings, the board shall hear and receive such relevant testimony and evidence as presented by the City Manager or his/her duly authorized designee or by the Appellant.

(c) The board shall determine whether the structure is unfit for human occupation or use, whether an appealed violation exists, whether the City Manager or his/her duly authorized designee's notice of violation is proper and/or whether a request for an extension of time or waiver shall be granted.
Extensions of time may be granted only upon a showing of undue hardship, or that such is necessary to complete the abatement of violation, and shall not exceed ninety (90) calendar days from the date the board's decision. After a hearing, additional extensions may be granted, not to exceed a total of ninety (90) calendar days, if they are requested at least fifteen (15) business days prior to the expiration of the current order, provided such extension shall only be granted where the appellant/owner shows that he or she has been making a good faith effort and progress toward completing the abatement of violation(s), and that such additional time is necessary.

Anything herein to the contrary notwithstanding, no more than one thirty (30) calendar days extension of time may be granted to complete board ordered repairs or demolition to any structure that constitutes an imminent or immediate threat or danger to the health, safety or general welfare of any person or to the public. As a condition of granting such extension, the board may impose restrictions on the appellant/owner to secure the property or to take other measures to protect the health, safety and general welfare of the public.

Upon application, the board is empowered to grant a waiver from specific minimum requirements of this ordinance, provided however, waivers shall be granted only for unique or special conditions of the dwelling or structure or that imposition of the minimum requirement to the applicant would impose an extreme and undue hardship; and that waiver of the particular requirement would not endanger the health, safety or welfare of the occupants or the general public, or would not cause or threaten an imminent deterioration of property values in the area in which such property/structure is located. It is the Intent of this provision that waivers are not to be liberally granted, but rather are intended only for purposes specifically enumerated herein. Economic hardship alone shall be insufficient reason for granting of a waiver.

Appeals of notice and orders (other than Imminent Danger notices per Section 109 of this code) shall stay the enforcement of the notice and order until the appeal is heard by the board.

(c) In any case where the structure is abandoned or in such a condition as to make it dangerous to the health, safety or general welfare of its occupants or the general public, it shall also be ordered vacated and the BB HCA may additionally order the structure and the property to be secured in such a manner to protect the health, safety or general welfare of the public or persons on the property until such repairs or demolition has been completed, or may order other immediate actions reasonably necessary.

Section 111.5 Duties of the City Manager or his/her duly authorized designee.

(a) Whenever a petition is filed with the city manager by at least five (5) residents of the city that a structure is unfit for human
occupation or use or is in violation of the Oak Ridge Property Maintenance Code, or whenever it appears to the city manager (upon the city managers own motion) that a structure is unfit for human occupation or use, the city manager shall, if the city managers preliminary investigation discloses a basis for such charges, issue and cause to be served upon the owner and parties in interest of such structure a complaint stating the specific charge(s) and containing a notice that a hearing will be held before the BBHCA at a place fixed therein, no less than ten (10) calendar days and no more than thirty (30) calendar days after serving the notice; provided that by mutual agreement the time for the hearing may be lessened or extended. Such notice shall state that:

(c) If the owner fails to comply with an order or to vacate and close the structure, the BBHCA may cause such structure to be repaired or to be vacated and closed and shall cause to be posted at the main entrance to the structure so closed a placard stating: "This building is unfit for human occupation or use. The use or occupation of this building for human occupation or use is prohibited and unlawful."

(d) If the owner fails to comply with an order to demolish or remove the structure, the city manager may cause such structure to be demolished or removed.

(e) For any structure that has been ordered vacated during the repairs or demolition of the structure, the owner of the structure shall cause to be posted at the main entrance to the structure a placard stating: "This structure has been found to be unfit for human occupation or use. This notice is to remain posted conspicuously on the property until the structure is repaired or demolished."

If the owner has undertaken in good faith to correct the violation as set forth in the notice, the owner may request an extension of time to complete the cleanup, repairs or demolition provided the owner files such a request with the city manager or his/her duly authorized designee at least ten (10) business days prior to the date such cleanup, repairs or demolition where ordered to be completed. While the board may waive this ten (10) calendar day requirement for good cause shown, no request for an extension of time shall be filed after the expiration of the time of completion set forth in the notice. The decision made by the community development department will be final and the extension of time will not be granted.

Residential rental inspection districts are those geographic areas designated by city council, by ordinance, that are found to meet the following criteria:

   (a) There is a need to protect the public health, safety and welfare of the occupants of dwelling units inside the geographic area;
   (b) The residential rental dwelling units within the geographic area are either deteriorated or in the process of deteriorating or the residential rental dwelling units are in the need of inspection by the city to prevent deterioration, taking into account the number, age and condition of residential rental dwelling units inside the geographic area; and

Nothing in this subsection shall be construed to authorize a city-wide residential rental inspection district and the boundaries of the residential rental inspection district shall be limited to such areas that meet the criteria set forth in this subsection.

   (2) The city hereby declares the following geographic area(s) to be residential rental inspection districts based upon the findings outlined above in § 13-504(1):

The director shall not require that the written notification from the owner or party in interest of a dwelling unit subject to this chapter be provided to the director in less than sixty (60) days after the adoption of an ordinance establishing a residential rental inspection district. However, there shall be no penalty for the failure of an owner or party in interest of a residential rental dwelling unit to comply with the provisions of this subsection, unless and until the director provides actual or written notice to the property owner or party in interest. Notice sent by regular first class mail to the last known address of the owner or party in interest shall be deemed compliance with this subsection. (as added by Ord. #1-07, Jan. 2007)

(as added by Ord. #1-07, Jan. 2007)

deteriorating, and provided that there are no violations of applicable codes and ordinances, or such violations are remedied in a timely manner, the director shall provide to the owner or party in interest of such residential rental dwelling unit an exemption from this chapter for a minimum of four (4) years. For the purposes of this section, timely manner shall be construed to mean less than ninety (90) days after the owner has been given notice of violation. If a residential rental dwelling unit has been issued a certificate of occupancy within the last four (4) years, an exemption shall be granted for a minimum period of four (4) years from the date of the issuance of the certificate of occupancy by the city. (1969 Code, § 9-303)

14-04. Interpretation of boundaries. Where interpretation is needed as to the exact location of the boundaries of special flood hazard, the Oak Ridge City Manager or his authorized representative shall make the necessary interpretation. (1969 Code, § 9-304)
14-405. **Appeals and variances.** (1) The board of zoning appeals is hereby designated to hear and decide appeals and requests for variances from the requirements of this chapter. In passing upon such appeals or variance requests, the board of zoning appeals shall consider all technical evaluations, relevant factors and standards; danger that materials may be swept onto other lands to the injury of others; danger to life and property due to flooding or erosion damage; any alternative locations, not subject to flooding, for the proposed use; susceptibility of the proposed use to flooding or erosion damage; safety of access at all times for ordinary and emergency vehicles; compatibility of the proposed use with other city plans, the floodplain management program or existing or proposed development; costs of providing governmental services during and after flood conditions; and such other flood-related factors as the board may deem relevant.

(2) Variances may be approved only if the variance would not result in increased flood levels or in additional threats to public safety, extraordinary public expense, create nuisances, cause fraud to or victimization of the public, or conflict with existing local laws or ordinances.

(3) Records shall be kept and procedures followed as with the requirements for other actions of the board of zoning appeals. (1969 Code, § 9-305)

14-406. **Conflicting provisions.** Whenever provisions of this chapter are in conflict with those of another city ordinance or code, the more strict provision shall govern. (1969 Code, § 9-306)

14-407. **Liability not created.** The degree of flood protection required by this chapter and other city ordinances and regulations is considered reasonable for regulatory purposes and is based on scientific and engineering considerations. Larger floods can and will occur on rare occasions. Flood heights may be increased by human-made or natural causes. This chapter and other city ordinances and regulations do not imply that land outside areas of special flood hazard or uses permitted within such areas will be free from flooding or flood damages. These ordinances and regulations shall not create liability on the part of the City of Oak Ridge or by any officer or employee thereof for any flood damages that result from reliance on these ordinances or any administrative decision lawfully made thereunder. (1969 Code, § 9-307)

(c) Allow the city to exercise the powers granted in Tennessee Code Annotated, § 68-221-1105, which provides that, among other powers cities have with respect to stormwater facilities, is the power by ordinance or resolution to:

(i) Exercise general regulation over the planning, location, construction, and operation and maintenance of
stormwater facilities in the city, whether or not owned and operated by the city;

(ii) Adopt any rules and regulations deemed necessary to accomplish the purposes of this statute, including the adoption of a system of fees for services and permits;

BMPs also include treatment requirements, operating procedures, and practices to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw material storage.

(4) "Borrow pit" is an excavation from which erodible material (typically soil) is removed to be fill for another site. There is no processing or separation of erodible material conducted at the site. Given the nature of activity and pollutants present at such excavation, a borrow pit is considered a construction activity for the purpose of this permit.

(5) "Buffer zone" means a strip of dense undisturbed perennial native vegetation, either original or reestablished, that borders each bank of a stream, river, pond, lake, wetland, etc. Buffer zones are established for the purpose of slowing water runoff, enhancing water infiltration, and minimizing the risk of any potential nutrients or pollutants from leaving the upland area and reaching surface waters. Buffer zones are primarily established for the purpose of protecting water quality and maintaining a healthy aquatic ecosystem in receiving waters.

(41) "Stormwater pollution prevention plan" (SWPPP) means a written plan that includes site map(s), an identification of construction/contractor activities that could cause pollutants in the stormwater, and a description of measures or practices to control these pollutants. It must be prepared and approved before construction begins. In order to effectively reduce erosion and sedimentation impacts, Best Management Practices (BMPs) must be designed, installed, and maintained during land disturbing activities. The SWPPP should be prepared in accordance with the current Tennessee Erosion and Sediment Control Handbook. The handbook is intended for use during the design and construction of projects that require erosion and sediment controls to protect waters of the state. It also aids in the development of SWPPPs and other
reports, plans, or specifications required when participating in Tennessee's water quality regulations. All SWPPPs shall be prepared and updated in accordance with section 3 of the General NPDES Permit for Discharges of Stormwater Associated with Construction Activities.

(53) "Wetland(s)" means those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support a prevalence of vegetation typically adapted to life in saturated soil conditions. Wetlands include, but are not limited to, swamps, marshes, bogs, and similar areas.

(54) "Wet weather conveyances" are man-made or natural watercourses, including natural watercourses that have been modified by channelization, that flow only in direct response to precipitation runoff in their immediate locality and whose channels are above the groundwater table and are not suitable for
drinking water supplies; and in which hydrological and biological analyses indicate that, under normal weather conditions, due to naturally occurring ephemeral or low flow, there is not sufficient water to support fish or multiple populations of obligate lotic aquatic organisms whose life cycle includes an aquatic phase of at least two (2) months. (Rules and Regulations of the State of Tennessee, chapter 1 200-4-3-.04(3)). (Ord. #7-98, Feb. 1998, § 2, as replaced by Ord. #1-2016, March 2016)

14-503. Land disturbance permits. (1) When required. Every person will be required to obtain a land disturbance permit from the city Manager or the city manager's designee in the following cases:

(a) Land disturbing activity that disturbs one (1) or more acres of land;

(b) Land disturbing activity of less than one (1) acre of land if such activity is part of a larger common plan of development that affects one (1) or more acre of land;

(c) Land disturbing activity of less than one (1) acre of land, as provided below, or if in the discretion of the city manager or the city manager's designee such activity poses a unique threat to water, or public health or safety. Projects or developments of less than one (1) acre of total land disturbance may also be required to obtain authorization under this permit if:

(i) The city manager or the city manager's designee has determined that the stormwater discharge from a site is causing, contributing to or is likely to contribute to a violation of a state water quality violation.

(ii) The city manager or the city manager's designee has determined that a stormwater discharge is, or is likely to be a significant contributor of pollutants to waters of the state.

(iii) Changes in state or federal rules require sites of less than one (1) acre that are not part of a larger common plan of development or sale to obtain a stormwater permit.

(iv) Any new development or redevelopment, regardless of size, that is defined by the city manager or the city manager's designee to be a hot spot land use.

(d) The creation and use of borrow pits where material is excavated and relocated offsite, and fill sites where materials or earth is deposited by mechanized methods resulting in an increase elevation or grade.

(e) Land disturbance for single or duplex residential lots of any size are required to obtain a land disturbance permit. As determined by the city manager or the city manager's designee, lots that have karst features, adjoining lakes or streams, slopes exceeding fifteen percent (15%), floodplains or streams to cross are required to submit an erosion
control and stormwater management plan. Depending on site specific conditions the requirement that the plan be developed by a qualified licensed professional engineer or architect may be waived by the city manager or the city manager's designee. Minimal plan requirements shall include pre- and post-stormwater runoff directions, construction access, erosion/sediment control measures, roof downspout direction and termination, swales and temporary and/or permanent soil stabilization.

(f) Land disturbance activities in a city floodway zoning districts require a permit and shall provide evidence of obtaining appropriate licenses/permits that may be required by federal or state laws and regulations, or written waiver from such permits and licenses prior to the issuance of a land disturbance permit by the city manager or the city manager's designee.

(g) If the city manager or the city manager's designee determines that construction activity is ongoing, but is not permitted, the city manager or the city manager's designee must notify TDEC of this situation by supplying the following information to the Knoxville Environmental Field Office:

(i) Construction project or industrial facility location.
(ii) Name of the operator or owner.
(iii) Estimated construction project or size or type industrial activity (including the Standard Industrial Classification (SIC) code, if known).
(iv) Records of communications with the owner or operator.

(2) Existing areas with soil erosion problems. Upon written notification from the city manager or the city manager's designee, the owner of any parcel of land which exhibits unstable or eroding soil conditions and impacts downstream properties or any stream shall correct the problem within a sixty (60) calendar day period. Upon written request to the city manager or the city manager's designee, the period for construction may be extended upon request if seasonal conditions warrant and temporary control measures are installed. Slopes which are found to be eroding excessively shall be provided stabilizing measures until the problem is corrected. Minimum corrective measures may include stabilizing slopes and revegetating all exposed soil surfaces. Before commencing corrective measures, the owner shall consult with the city manager or the city manager's designee to determine an acceptable method of correction. A plan for soil erosion control shall be submitted to the city manager or the city manager's designee for final review and approval prior to initiation of corrective measures.

(3) Building permit. No building permit shall be issued until the applicant has obtained a land disturbance permit where the same is required by this ordinance.
(4) **Exemptions.** The following activities are exempt from the permit requirement:

(a) Any emergency activity that is immediately necessary for the protection of life, property, or natural resources.
(b) Any installation, maintenance or repair of any underground public utility provided that all erosion control and stormwater management requirements of this ordinance are met.
(c) Existing nursery and agricultural operations conducted as a permitted main or accessory use.
(d) Any logging or agricultural activity that is consistent with an approved farm conservation plan or a timber management plan prepared or approved by the appropriate federal or state agency.
(e) The owner or developer whose land disturbing activity has been exempted from requirements for registration shall nevertheless be responsible for otherwise conducting such activity in accordance with the provisions of this ordinance and other applicable laws including responsibility for controlling erosions and sedimentation.
(f) Any construction of foundation drains, french drains, extension of roof drains and minor building additions if not otherwise required in this section and unless the possibility of erosion, stream siltation or impact to downstream properties is such to necessitate a permit as determined by the city manager or the city manager's designee.
(g) Any home gardens, home landscaping, or land preparation unless the possibility of erosion or stream siltation is such to necessitate a permit as determined by the city manager or the city manager's designee.

(5) **Limitations.** The city manager or the city manager's designee shall not grant land disturbance coverage for discharges into waters that are designated by the water quality control board as "Outstanding National Resource Waters" (ONRW). An individual permit is required for land disturbance activities and is available from TDEC.

(6) **Application for a land disturbance permit.** Each application shall include the following:

(a) Name of applicant;
(b) Business or residence address of applicant;
(c) Name, address and telephone number of the owner of the property of record in the office of the assessor of property;
(d) Address and legal description of subject property including the tax reference number and parcel number of the subject property;
(e) Name, address and telephone number of the contractor and any subcontractor(s) who shall perform the land disturbing activity and who shall implement the erosion and sediment control plan;
(f) A statement indicating the nature, extent and purpose of the land disturbing activity including the size of the area for which the
permit shall be applicable and a schedule for the starting and completion
dates of the land disturbing activity;

(g) Where the property includes a sinkhole, the applicant shall
obtain appropriate permits from the TDEC;

(h) The applicant shall obtain from any other state or federal
agency any other appropriate environmental permits that pertain to the
property. If Aquatic Resource Alteration Permits (ARAP) are required for
a site in areas proposed for active construction, the Notice of Coverage
(NOC) will not be issued until ARAP application(s) are submitted and
deemed by TDEC to be complete. The treatment and disposal of
wastewater (including, but not limited to sanitary wastewater) generated
during and after the construction must also be addressed. The issuance
of the Notice of Coverage (NOC) may be delayed until adequate
wastewater treatment and accompanying permits are issued. The
inclusion of any such permits in the application shall not prevent the city
from imposing additional development requirements and regulations of
the city on the development of property covered by those permits; however,
the inclusion of those permits in the application shall not
prevent the city manager or the city manager's designee from imposing
additional development requirements and conditions, commensurate with
this ordinance, on the development of property covered by those permits; and

(i) Each application shall be accompanied by:

(i) A commercial or residential land disturbance permit
application.

(ii) A sediment and erosion control plan that meets the
criteria set forth by this ordinance and/or the city manager or the
city manager's designee. Single family or duplex residential land
disturbance of less than one (1) acre is exempt from submission of
the sediment and erosion control plan unless otherwise required
in this ordinance.

(iii) A stormwater management plan approved by the city
manager or the city manager's designee.

(iv) Each application for a land disturbance permit shall
be accompanied by payment of land disturbance permit and other
stormwater management fees, which shall be set by the city
manager or the city manager's designee as provided for under city
code §1-203. No permit or amendment to a permit shall be valid
until such fees have been paid.

(7) Review and approval of application. (a) The city manager or the
city manager's designee, within a reasonable amount of time after receipt,
will review each application for a land disturbance permit to determine
its conformance with the provisions of this ordinance. After the review of
an application, the city manager or the city manager's designee shall provide one (1) of the following responses:

(i) Approval of the permit application;

(ii) Conditional approval of the permit application, subject to such reasonable conditions as may be necessary to secure substantially the objectives of this ordinance, and issue the permit subject to these conditions; or

(iii) Denial of the permit application, indicating the reason(s) for the denial.

(b) If the city manager or the city manager's designee has granted conditional approval of the permit, the applicant shall submit a revised plan that conforms to the conditions established by the city manager or the city manager's designee. The applicant may be allowed to proceed with his land disturbing activity so long as it conforms to conditions established by the city manager or the city manager's designee.

(c) No development plans will be released until the land disturbance permit has been approved.

(d) Disclaimer of liability. Neither the submission of a plan under the provisions herein, nor compliance with the provisions of these regulations shall relieve any person from responsibility for damages to any person or property otherwise imposed by law, nor impose any liability upon the City of Oak Ridge or its representatives for damages to any person or property.

(8) Permit duration. Every land disturbance permit may expire and become null and void if in the judgment of the city manager or the city manager's designee substantial work authorized by such permit has not commenced within one-hundred eighty (180) calendar days of issuance, or has not been completed within an amount of time deemed reasonable by the city manager or the city manager's designee.

(9) Notice of construction. The applicant must notify the city manager or the city manager's designee at least three (3) working days in advance of the commencement of construction.

(10) Performance bonds. (a) The city manager or the city manager's designee may require the submittal of a performance security or performance bond, if greater than two and one-half (2.5) acres of land disturbance, prior to issuance of a permit in order to ensure that the stormwater practices are installed and maintained by the permit holder as required by the approved stormwater management plan. The bond provider shall be responsible to keep the bond in effect until such time the bond is released by the city manager or the city manager's designee. In the event the bond provider allows the bond to expire, the bond provider shall be responsible for the cost of completion of the work required by the permit and be responsible for any damages resulting from non-completion
of the work. The amount of the installation performance security or performance bond shall be the total estimated construction cost for the structural BMPs and associated maintenance cost for the duration of the project, approved under the permit plus any reasonably foreseeable additional related costs, e.g., for damages or enforcement (or plus a certain percentage of the total estimated costs). The performance security shall contain forfeiture provisions for failure to complete work specified in the stormwater management plan. The applicant shall provide an itemized construction cost estimate complete with unit prices which shall be subject to acceptance, amendment or rejection by the city manager or the city manager's designee. Alternately, the city manager or the city manager's designee shall have the right to require that a professional engineer prepare the cost or to calculate the cost estimates.

(b) The performance security or performance bond shall be released in full only upon approval of the city manager or the city manager's designee. Submission of as-built plans and written certification by a registered professional engineer licensed to practice in Tennessee that the structural BMP has been installed in accordance with the approved plan and other applicable provisions of this ordinance may be required at the discretion of the city manager or the city manager's designee. The city manager or the city manager's designee may make a final inspection of the structural BMP to ensure that it is in compliance with the approved plan and the provisions of this ordinance. Provisions for a partial pro-rata release of the performance security or performance bond based on the completion of various development stages may be made at the discretion of the city manager or the city manager's designee. It shall be the responsibility of the applicant to secure and renew the bond as necessary. Failure to obtain a timely renewal of bond shall result in revocation of the permit and/or the issuance of a stop work order.

(11) Transfer of ownership. (a) Some construction projects are subdivided, such as residential or commercial subdivisions and/or developments or industrial parks. Subdivided lots are sometimes sold to new owners prior to completion of construction. The site-wide developer/owner must describe erosion control and sediment prevention measures implemented at those lots. Once the property is sold, the new operator must obtain coverage under this permit.

(b) If the transfer of ownership is due to foreclosure or a permittee filing for bankruptcy proceedings, the new owner (including but not limited to a lending institution) must obtain permit coverage if the property is inactive, but is not stabilized sufficiently. If the property is sufficiently stabilized permit coverage may not be necessary, unless and until construction activity at the site resumes.

(12) Inspections. (a) The permit holder shall perform inspections of erosion prevention and sediment control practices on all construction
sites as indicated by the current, "NPDES Permit for Discharges Associated with Construction Activities" twice weekly and at least seventy-two (72) hours apart (3.5.8.2). This standard is the same for "priority construction sites." Based on the results of the inspections, any inadequate control measures or control measures in disrepair shall be replaced or modified, or repaired as necessary, before the next rain event if possible. Inspections should be documented. Quality assurance of erosion prevention and sediment controls shall be done by performing site assessment at a construction site. The site assessment shall be conducted at each outfall involving drainage totaling ten (10) acres or more (of disturbed and undisturbed acreage combined) or five (5) or more acres if draining to impaired or exceptional quality waters, within one (1) month of construction commencing. The site assessment shall be performed by individuals with one (1) or more of the following qualifications:

(i) A licensed professional engineer or landscape architect;
(ii) A Certified Professional in Erosion and Sediment Control (CPESC); or
(iii) A person that has successfully completed the "Level II Design Principles for Erosion Prevention and Sediment Control for Construction Sites" course.

As a minimum, a site assessment should be performed to verify the installation, functionality and performance of the erosion prevention and sediment control measures described in the SWPPP. The site assessment findings shall be documented and the documentation kept with the SWPPP on site. The site assessment should be performed with the site inspector, and should include a review and update (if applicable) of the SWPPP. Modifications of plans and specifications for any building or structure, including the design of sediment basin or other sediment controls involving structural, hydraulic, hydrologic or other engineering calculations shall be performed by a licensed engineer or landscape architect and stamped and certified in accordance with state law. The site assessment can take the place of one of the twice weekly inspections.

(b) The city manager or the city manager's designee shall perform inspections on priority construction sites, and other construction sites as warranted by site location and complaints. If the city manager or the city manager's designee finds that the permit holder has failed to properly install, maintain, or use proper structural and/or vegetative erosion and sediment control practices as specified in the erosion and sediment control plan and the post construction design and maintenance plan, the permit holder may be subject to a notice of violation order or additional penalties as set forth in this chapter.

(c) The city manager or the city manager's designee may require an inspection by a registered engineer licensed in the State of
Tennessee, if deemed necessary, for any erosion and sediment control measure or post construction stormwater management facility to ensure they meet the design standards as described in the construction site and post construction site plans.

(d) If the city manager or the city manager's designee determines that significant erosion and/or sedimentation is occurring on a graded site despite approved structural and/or vegetative erosion and sediment control practices, the city manager or the city manager's designee shall require the permit holder to take additional corrective action to protect the adversely affected area. The additional corrective action required shall be part of an amended erosion and sediment control plan.

(e) Where sites or portions of construction sites have been temporarily stabilized, or runoff is unlikely due to winter conditions (e.g., site covered with snow or ice) or due to extreme drought, such inspection only has to be conducted one (1) per month until thawing or precipitation results in runoff or construction activity resumes. Inspection requirements do not apply to definable areas that have been finally stabilized.

(f) Inspections and maintenance for post construction stormwater facilities shall be performed as required in § 14-506 for permanent construction design and maintenance. (Ord. #7-98, Feb. 1998, § 3, and replaced by Ord. #1-2016, March 2016)

14-504. Waivers. (1) General. No waivers will be granted any construction or site work project. All construction and site work shall provide for stormwater management as required by this ordinance. However, alternatives to the 2010 NPDES General Permit for Discharges from MS4s primary requirement for onsite permanent stormwater management may be considered, if:

(a) Management measures cannot be designed, built and maintained to infiltrate, evapotranspire, harvest and/or use, at a minimum, the first inch of every rainfall event preceded by seventy-two (72) hours of no measurable precipitation. This first inch of rainfall must be one-hundred percent (100%) managed with no discharge to surface waters.

(b) It can be demonstrated that the proposed development is not likely to impair attainment of the objectives of this chapter. Alternative minimum requirements for onsite management of stormwater discharges have been established in a stormwater management plan that has been approved by the city manager or the city manager's designee.

(2) Downstream damage, etc. prohibited. In order to receive consideration, the applicant must demonstrate to the satisfaction of the city
manager or the city manager's designee that the proposed alternative will not lead to any of the following conditions downstream:

(a) Deterioration of existing culverts, bridges, dams, and other structures;
(b) Degradation of biological functions or habitat;
(c) Accelerated streambank or streambed erosion or siltation;
and
(d) Increased threat of flood damage to public health, life or property.

(3) Grading permit not to be issued where alternatives requested. No grading permit shall be issued where an alternative has been requested until the alternative is approved. If no alternative is approved, the plans must be resubmitted with a stormwater management plan that meets the primary requirement for onsite stormwater management. (Ord. #7-98, Feb. 1998, § 4, as replaced by 1-2016, March 2016)

14-505. Stormwater system design; construction and permanent stormwater management. (1) MS4 stormwater design or BMP manuals.

(a) Adoption. The city adopts as its MS4 stormwater design and best management practices (BMP) manuals for stormwater management, construction and permanent, the following publications, which are incorporated by reference in this ordinance as if fully set out herein:

(iii) This manual includes a list of acceptable BMPs including the specific design performance criteria and operation and maintenance requirements for each stormwater practice. These include city approved BMPs for permanent stormwater management including green infrastructure BMPs.

(b) The city manual(s) may be updated and expanded from time to time, at the discretion of the governing body of the city, upon the recommendation of the city manager or the city manager's designee, based on improvements in engineering, science, monitoring and local maintenance experience, or changes in federal or state law or regulation.

(c) Stormwater facilities that are designed, constructed and maintained in accordance with these BMP criteria will be presumed to meet the minimum water quality performance standards.

(2) Submittal of a copy of the NOC, SWPPP and notice of termination to the city manager or the city manager's designee. Permittees who discharge stormwater through an NPDES-permitted municipal separate storm sewer system (MS4) who are not exempted in section 1.4.5 (Permit Coverage through Qualifying Local Program) of the Construction General Permit (CGP) must
provide proof of coverage under the Construction General Permit (CGP); submit a copy of the Notice of Coverage (NOC); submit a copy of the Stormwater Pollution Prevention Plan (SWPPP); and at project completion, a copy of the signed notice of termination to the city manager or the city manager's designee. Permitting status of all permittees covered (or previously covered) under this general permit as well as the most current list of all MS4 permits is available at the TDEC's data viewer web site. Copies of additional applicable local, state or federal permits (i.e.: ARAP, etc.) must also be provided upon request. If requested, these permits must be provided before the issuance of any land disturbance permit or the equivalent.

(3) Stormwater Pollution Prevention Plan (SWPPP) for construction stormwater management. The applicant must prepare a stormwater pollution prevention plan for all construction activities that complies with subsection (4) below. The purpose of this plan is to identify construction/contractor activities that could cause pollutants in the stormwater, and to describe measures or practices to control these pollutants during project construction.

(4) Stormwater Pollution Prevention Plan (SWPPP) requirements. The erosion prevention and sediment control plan component of the SWPPP shall accurately describe the potential for soil erosion and sedimentation problems resulting from land disturbing activity and shall explain and illustrate the measures that are to be taken to control these problems. The length and complexity of the plan is to be commensurate with the size of the project, severity of the site condition, and potential for off-site damage. If necessary, the plan shall be phased so that changes to the site during construction that alter drainage patterns or characteristics will be addressed by an appropriate phase of the plan. The plan shall be sealed by a registered professional engineer or landscape architect licensed in the State of Tennessee. The plan shall also conform to the requirements found in the most current TDEC Erosion Prevention and Sediment Control Handbook, and shall include at least the following:

(a) Project description - Briefly describe the intended project and proposed land disturbing activity including number of units and structures to be constructed and infrastructure required.

(b) A topographic map with contour intervals of five feet (5') or less showing present conditions and proposed contours resulting from land disturbing activity.

(c) The plan shall be at a minimal scale of one inch equals one-hundred feet (1" = 100').

(d) All existing drainage ways, including intermittent and wet-weather. Include any designated floodways or flood plains.

(e) A general description of existing land cover. Individual trees and shrubs do not need to be identified.

(f) Stands of existing trees as they are to be preserved upon project completion, specifying their general location on the property.
Differentiation shall be made between existing trees to be preserved, trees to be removed and proposed planted trees. Tree protection measures must be identified, and the diameter of the area involved must also be identified on the plan and shown to scale. Information shall be supplied concerning the proposed destruction of exceptional and historic trees in setbacks and buffer strips, where they exist. Complete landscape plans may be submitted separately. The plan must include the sequence of implementation for tree protection measures.

(g) Approximate limits of proposed clearing, grading and filling.
(h) Approximate flows of existing stormwater leaving any portion of the site.
(i) A general description of existing soil types and characteristics and any anticipated soil erosion and sedimentation problems resulting from existing characteristics.
(j) Location, size and layout of proposed stormwater and sedimentation control improvements.
(k) Existing and proposed drainage network including land depressions and sinkholes.
(l) Proposed drain tile or waterway sizes. All swales, roads, etc., shall be designed to prevent flood damage to nearby buildings and other structures by being overtopped during a 24-hour duration storm of a 100-year frequency or to structurally carry the equivalent storm event.
(m) Approximate flows leaving site after construction and incorporating water run-off mitigation measures. The evaluation must include projected effects on property adjoining the site and on existing drainage facilities and systems. The plan must address the adequacy of outfalls from the development: when water is concentrated, what is the capacity of waterways, if any, accepting stormwater offsite; and what measures, including infiltration, sheeting into buffers, etc., are going to be used to prevent the scouring of waterways and drainage areas offsite, etc.
(n) The projected sequence of work represented by the grading, drainage and sedimentation and erosion control plans as related to other major items of construction, beginning with the initiation of excavation and including the construction of any sediment basins or retention/detention facilities or any other structural BMPs.
(o) Specific remediation measures to prevent erosion and sedimentation run-off. Plans shall include detailed drawings of all control measures used; stabilization measures including vegetation and non-vegetation measures, both temporary and permanent, will be detailed. Detailed construction notes and a maintenance schedule shall be included for all control measures in the plan.
(p) Specific details for:
(i) The construction of stabilized construction entrance/exits, concrete washouts, and sediment basins for controlling erosion; road access points;
(ii) Eliminating or keeping soil, sediment, and debris on streets and public ways at a level acceptable to the city. Soil, sediment, and debris brought onto streets and public ways must be removed by the end of the work day to the satisfaction of the city. Failure to remove the sediment, soil or debris shall be deemed a violation of this ordinance.
(q) Proposed structures: location and identification of any proposed additional buildings, structures or development on the site.
(r) A description of onsite measures to be taken to recharge surface water into the ground water system through runoff reduction practices.
(s) Specific details for construction waste management: Construction site operators shall control waste such as discarded building materials, concrete truck washout, petroleum products and petroleum related products, chemicals, litter, and sanitary waste at the construction site that may cause adverse impacts to water quality. When the material is erodible, such as soil, the site must be treated as a construction site.
(t) The plan shall include detailed drawings of all structural and non-structural controls and stabilization measures which shall be designed to minimize erosion and maximize sediment removal resulting in storm discharge associated with the 2-year, 24-hour design storm event as a minimum, from total rainfall in the designed period. These specific details for constructing stabilized construction entrance/exits, concrete washouts, sediment basins for controlling erosion, and road access points should be designed to eliminate or keep soils, sediment, and/or debris to a minimum.
(u) When land disturbance activities are proposed along 303(d) listed streams impaired for siltation or a known high quality waterway, the erosion and sediment control plan shall be designed at a minimum to control the discharge of a 5-year 24-hour storm event along with other additional minimum standards outlined in the current Tennessee construction general permit.
(5) Development near karst features. Development that has or is near karst features shall include in the land disturbance permit plan or comply with the following:
(a) Pre-development natural drainage courses shall be maintained as much as feasible.
(b) No structures shall be built with the contour line within the post-development contour line calculated for each sinkhole present on the property for a 24-hour rain event duration storm of the 100-year frequency as if the sinkhole was completely filled.
(c) Removal of overburden in areas with karst features shall be minimized.

(d) Existing healthy mature trees whose drip line canopy covers a karst feature should be protected during grading whenever possible. Removal of trees should be replaced in kind by trees in the same locale and maintained as required to ensure healthy growth.

(e) Changes to terrain, including the remediation of a sinkhole shall not move this 100-year contour line onto adjacent property nor increase stormwater runoff onto adjacent properties without written permission from the relevant adjacent property owner(s).

(f) All exposed karst features exposed by cutting of overburden must be examined by a qualified licensed professional for appropriate mitigation procedures and the erosion and control and stormwater management plan shall be amended accordingly.

(6) Development within city floodway zoning districts. Land may be filled within the 100-year flood boundary limits provided such fill extends twenty-five feet (25') beyond all limits of any structures erected. If such fill areas occur, then the 100-year flood elevation contour shall be established on finished contours. No fill shall be placed in established buffer area as defined in by this ordinance.

(7) General design performance criteria for permanent stormwater management. The following performance criteria shall be addressed for permanent stormwater management at all development sites:

(a) Site design standards for all new and redevelopment require, in combination or alone, management measures that are designed, built and maintained to infiltrate, evapotranspire, harvest and/or use, at a minimum, the first inch of every rainfall event preceded by seventy-two (72) hours of no measurable precipitation. This first inch of rainfall must be one-hundred percent (100%) managed with no discharge to surface waters.

(b) Limitations to the application of runoff reduction requirements include, but are not limited to:

(i) Where a potential for introducing pollutants into the groundwater exists, unless pretreatment is provided;

(ii) Where pre-existing soil contamination is present in areas subject to contact with infiltrated runoff;

(iii) Presence of sinkholes or other karst features.

(c) Pre-development infiltrative capacity of soils at the site must be taken into account in selection of runoff reduction management measures.

(d) Incentive standards for re-developed sites: a ten percent (10%) reduction in the volume of rainfall to be managed for any of the following types of development. Such credits are additive such that a
maximum reduction of fifty percent (50%) of the standard in the paragraph above is possible for a project that meets all five (5) criteria:

(i) Redevelopment;
(ii) Brownfield redevelopment;
(iii) High density (>7 units per acre);
(iv) Vertical density, (Floor to Area Ratio (FAR) of 2 or >18 units per acre); and
(v) Mixed use and transit oriented development (within one half (1/2) mile of transit).

(e) For projects that cannot meet one-hundred percent (100%) of the runoff reduction requirement unless subject to the incentive standards, the remainder of the stipulated amount of rainfall must be treated prior to discharge with a technology documented to remove eighty percent (80%) Total Suspended Solids (TSS) unless an alternative provided under this ordinance is approved. The treatment technology must be designed, installed and maintained to continue to meet this performance standard.

(f) For projects that cannot meet one-hundred percent (100%) of the runoff reduction requirements, the city manager or the city manager's designee may allow runoff reduction measures to be implemented at another location within the same USGS twelve (12) digit Hydrologic Unit Code (HUC) as the original project. Off-site mitigation must be a minimum of one and one half (1.5) times the amount of water not managed on site. The off-site mitigation location (or alternative location outside the twelve (12) digit HUC) and runoff reduction measures must be approved by the city manager or the city manager's designee. The city manager or the city manager's designee shall identify priority areas within the watershed in which mitigation projects can be completed. The city manager or the city manager's designee must create an inventory of appropriate mitigation projects, and develop appropriate institutional standards and management systems to value, evaluate and track transactions. Mitigation can be used for retrofit or redevelopment projects, but should be avoided in areas of new development.

(g) To protect stream channels from degradation, specific channel protection criteria shall be provided as prescribed in the MS4 BMP manual.

(h) Stormwater discharges to critical areas with sensitive resources (i.e., cold water fisheries, shellfish beds, swimming beaches, recharge areas, water supply reservoirs) may be subject to additional performance criteria, or may need to utilize or restrict certain stormwater management practices.

(i) Stormwater discharges from hot spots may require the application of specific structural BMPs and pollution prevention
practices. In addition, stormwater from a hot spot land use may not be infiltrated.

(j) Prior to or during the site design process, applicants for land disturbance permits shall consult with the city manager or the city manager's designee to determine if they are subject to additional stormwater design requirements.

(k) The calculations for determining peak flows shall be used for sizing all stormwater facilities.

(8) Minimum volume control requirements. In accordance with § 14-501(1)(c)(iii) the city manager or the city manager's designee may establish standards to regulate the quantity of stormwater discharged, therefore:

(a) Stormwater designs shall meet the multi-stage storm frequency storage requirements to control the peak flow rates of stormwater discharge associated with the 1-year, 2-year, 5-year, 10-year, and 25-year type II 24-hour design storm frequency in accordance with rainfall standards used for most construction projects in the United States (US) as established by the US Department of Agriculture Natural Resources Conservation Service (NRCS). Post construction stormwater generated runoff must be reduced to pre-construction levels. These practices should seek to utilize pervious areas for stormwater treatment and to infiltrate stormwater runoff from driveways, sidewalks, rooftops, parking lots, and landscaped areas to the maximum extent practical to provide treatment for both water quality and quantity.

(b) Whenever detention or retention ponds are employed as part of a stormwater management system, then such ponds and related stormwater management equipment and facilities shall be maintained in perpetuity as requires by this ordinance.

(c) If hydrologic or topographic conditions warrant greater control than that provided by the minimum control requirements, the city manager or the city manager's designee may impose any and all additional requirements deemed necessary to control the volume, timing, and rate of runoff.

(d) All stormwater design assumptions, calculation and analysis results shall be summarized in an executive summary attached to the site plan submission.

(9) Permanent stormwater management plan requirements. The stormwater management plan shall include sufficient information to allow the city manager or the city manager's designee to evaluate the environmental characteristics of the project site, the potential impacts of all proposed development of the site, both present and future, on the water resources, and the effectiveness and acceptability of the measures proposed for managing stormwater generated at the project site. To accomplish this goal the stormwater management plan shall include the following:
(a) Topographic base map: Topographic base map of the site which extends a minimum of one-hundred feet (100') beyond the limits of the proposed development and indicates:
   (i) Existing surface water drainage including streams, ponds, culverts, ditches, sink holes, wetlands; and the type, size, elevation, etc., of nearest upstream and downstream drainage structures;
   (ii) Current land use including all existing structures, locations of utilities, roads, and easements;
   (iii) All other existing significant natural and artificial features; and
   (iv) Proposed land use with tabulation of the percentage of surface area to be adapted to various uses; drainage patterns; locations of utilities, roads and easements; the limits of clearing and grading.
(b) Proposed structural and non-structural BMPs;
(c) A written description of the site plan and justification of proposed changes in natural conditions may also be required;
(d) Calculations: Hydrologic and hydraulic design calculations for the pre-development and post-development conditions for the design storms specified in this ordinance. These calculations must show that the proposed stormwater management measures are capable of controlling runoff from the site in compliance with this chapter and the guidelines of this manual. Such calculations shall include:
   (i) A description of the design storm frequency, duration, and intensity where applicable;
   (ii) Time of concentration;
   (iii) Soil curve numbers or runoff coefficients including assumed soil moisture conditions;
   (iv) Peak runoff rates and total runoff volumes for each watershed area;
   (v) Infiltration rates, where applicable;
   (vi) Culvert, stormwater sewer, ditch and/or other stormwater conveyance capacities;
   (vii) Flow velocities;
   (viii) Data on the increase in rate and volume of runoff for the design storms; and
   (ix) Documentation of sources for all computation methods and field test results.
(e) Soils information: If a stormwater management control measure depends on the hydrologic properties of soils (e.g., infiltration basins), then a soils report shall be submitted. The soils report shall be based on on-site boring logs or soil pit profiles and soil survey reports. The number and location of required soil borings or soil pits shall be
determined based on what is needed to determine the suitability and
distribution of soil types present at the location of the control measure.

(10) Maintenance and repair plan. The design and planning of all
permanent stormwater management facilities shall include detailed
maintenance and repair procedures to ensure their continued performance.
These plans will identify the parts or components of a stormwater management
facility that need to be maintained and the equipment and skills or training
necessary. Provisions for the periodic review and evaluation of the effectiveness
of the maintenance program and the need for revisions or additional
maintenance procedures shall be included in the plan.

(11) Buffers and buffer zones. "Buffer zone" means a setback from the
top of water body's bank of undisturbed vegetation, including trees, shrubs and
herbaceous vegetation; enhanced or restored vegetation; or the re-establishment
of native vegetation bordering streams, ponds, wetlands, springs, reservoirs or
lakes, which exists or is established to protect those water bodies. The goal of
the water quality buffer is to preserve undisturbed vegetation that is native to
the streamside habitat in the area of the project. Vegetated, preferably native,
water quality buffers protect water bodies by providing structural integrity and
canopy cover, as well as stormwater infiltration, filtration and
evapotranspiration.

(12) Buffer zone requirements. (a) "Construction" applies to all streams
adjacent to construction sites, with an exception for streams designated
as impaired or exceptional Tennessee waters, as designated by the
Tennessee Department of Environment and Conservation. A thirty foot
(30') natural riparian buffer zone adjacent to all streams at the
construction site shall be preserved, to the maximum extent practicable,
during construction activities at the site. The water quality buffer zone
is required to protect waters of the state located within or immediately
adjacent to the boundaries of the project, as identified using methodology
from Standard Operating Procedures for Hydrologic Determinations (see
rules to implement a certification program for qualified hydrologic
professionals, TN Rules chapter 0400-40-17). Buffer zones are not
primary sediment control measures and should not be relied on as such.
Rehabilitation and enhancement of a natural buffer zone is allowed, if
necessary, for improvement of its effectiveness of protection of the waters
of the state. The buffer zone requirement only applies to new construction
sites. The riparian buffer zone should be preserved between the top of
stream bank and the disturbed construction area. The thirty feet (30')
criterion for the width of the buffer zone can be established on an average
width basis at a project, as long as the minimum width of the buffer zone
is more than fifteen feet (15') at any measured location.

(b) Buffer zone requirements for discharges into impaired or
exceptional waters: A sixty foot (60') natural riparian buffer zone adjacent
to the receiving stream designated as impaired or exceptional waters
shall be preserved, to the maximum extent practicable, during construction activities at the site. The water quality buffer zone is required to protect waters of the state (e.g. perennial and intermittent streams, rivers, lakes, wetlands) located within or immediately adjacent to the boundaries of the project, as identified on a 7.5-minute USGS quadrangle map, or as determined by the director. Buffer zones are not sediment control measures and should not be relied upon as primary sediment control measures. Rehabilitation and enhancement of a natural buffer zone is allowed, if necessary, for improvement of its effectiveness of protection of the waters of the state. The buffer zone requirement only applies to new construction sites. The riparian buffer zone should be established between the top of stream bank and the disturbed construction area. The sixty feet (60') criterion for the width of the buffer zone can be established on an average width basis at a project, as long as the minimum width of the buffer zone is more than thirty feet (30') at any measured location.

(c) "Permanent" new development and significant redevelopment sites are required to preserve water quality buffers along waters within the city. Buffers shall be clearly marked on site development plans, grading permit applications, and/or concept plans. Buffer width depends on the size of a drainage area. Streams or other waters with drainage areas less than 1 (one) square mile will require buffer widths of thirty feet (30') minimum. Streams or other waters with drainage areas greater than one (1) square mile will require buffer widths of sixty feet (60') minimum. The sixty feet (60') criterion for the width of the buffer zone can be established on an average width basis at a project, as long as the minimum width of the buffer zone is more than thirty feet (30') at any measured location. The city manager or the city manager's designee shall develop and apply criteria for determining the circumstances under which these averages will be available. A determination that standards cannot be met may not be based solely on the difficulty or cost associated with implementation. Every attempt should be made for development and redevelopment activities not to take place within the buffer zone. If water quality buffer widths as defined above cannot be fully accomplished on-site, the city manager or the city manager's designee shall determine the circumstances under which alternative buffer widths will be available. A determination that water quality buffer widths cannot be met on site may not be based solely on the difficulty or cost of implementing measures, but must include multiple criteria, such as: type of project, existing land use and physical conditions that preclude use of these practices. (Ord. #7-98, Feb. 1998, § 5, as replaced by Ord. #1-2016, March 2016)
14-506. Permanent stormwater management: operation, maintenance, and inspection. (1) As built plans. All applicants are required to submit actual as built plans for any structures located on-site after final construction is completed. The plan must show the final design specifications for all stormwater management facilities and must be sealed by a registered professional engineer licensed to practice in Tennessee. A final inspection by the city is required before any performance security or performance bond will be released. The city shall have the discretion to adopt provisions for a partial pro-rata release of the performance security or performance bond on the completion of various stages of development. In addition, occupation permits shall not be granted until corrections to all BMPs have been made and accepted by the city.

(2) Landscaping and stabilization requirements. (a) Any area of land from which the natural vegetative cover has been either partially or wholly cleared by development activities shall be stabilized. Stabilization measures shall be initiated as soon as possible in portions of the site where construction activities have temporarily or permanently ceased. Temporary or permanent soil stabilization at the construction site (or a phase of the project) must be completed not later than fifteen (15) days after the construction activity in that portion of the site has temporarily or permanently ceased. In the following situations, temporary stabilization measures are not required:

(i) Where the initiation of stabilization measures is precluded by snow cover or frozen ground conditions or adverse soggy ground conditions, stabilization measures shall be initiated as soon as practicable; or

(ii) Where construction activity on a portion of the site is temporarily ceased, and earth disturbing activities will be resumed within fifteen (15) days.

(b) Permanent stabilization with perennial vegetation (using native herbaceous and woody plants where practicable) or other permanently stable, non-eroding surface shall replace any temporary measures as soon as practicable. Unpacked gravel containing fines (silt and clay sized particles) or crusher runs will not be considered a non-eroding surface.

(c) The following criteria shall apply to revegetation efforts:

(i) Reseeding must be done with an annual or perennial cover crop accompanied by placement of straw mulch or its equivalent of sufficient coverage to control erosion until such time as the cover crop is established over ninety percent (90%) of the seeded area.

(ii) Replanting with native woody and herbaceous vegetation must be accompanied by placement of straw mulch or
its equivalent of sufficient coverage to control erosion until the plantings are established and are capable of controlling erosion.

(iii) Any area of revegetation must exhibit survival of a minimum of seventy-five percent (75%) of the cover crop throughout the year immediately following revegetation. Revegetation must be repeated in successive years until the minimum seventy-five percent (75%) survival for one (1) year is achieved.

(iv) In addition to the above requirements, a landscaping plan must be submitted with the final design describing the vegetative stabilization and management techniques to be used at a site after construction is completed. This plan will explain not only how the site will be stabilized after construction, but who will be responsible for the maintenance of vegetation at the site and what practices will be employed to ensure that adequate vegetative cover is preserved.

(3) Inspection of stormwater management facilities. Periodic inspections of facilities shall be performed, documented, and reported in accordance with this chapter, as detailed in § 14-506.

(4) Records of installation and maintenance activities. Parties responsible for the operation and maintenance of a stormwater management facility shall make records of the installation of the stormwater facility, and of all maintenance and repairs to the facility, and shall retain the records for at least three (3) years. These records shall be made available to the city during inspection of the facility and at other reasonable times upon request.

(5) Failure to meet or maintain design or maintenance standards. If a responsible party fails or refuses to meet the design or maintenance standards required for stormwater facilities under this chapter, the city, after reasonable notice, may correct a violation of the design standards or maintenance needs by performing all necessary work to place the facility in proper working condition. In the event that the stormwater management facility becomes a danger to public safety or public health, the city shall notify in writing the party responsible for maintenance of the stormwater management facility. Upon receipt of that notice, the responsible person shall have thirty (30) days to effect maintenance and repair of the facility in an approved manner. In the event that corrective action is not undertaken within that time, the city may take necessary corrective action. The cost of any action by the city under this section shall be charged to the responsible party. (1969 Code, § 9-410, as replaced by Ord. #1-2016, March 2016)

14-507. Existing locations and ongoing developments. (1) On-site stormwater management facilities maintenance agreement. (a) Where the stormwater facility is located on property that is subject to a development agreement, and the development agreement provides for a permanent
stormwater maintenance agreement that runs with the land, the owners of property must execute an inspection and maintenance agreement that shall operate as a deed restriction binding on the current property owners and all subsequent property owners and their lessees and assigns, including but not limited to, homeowner associations or other groups or entities.

(b) The maintenance agreement shall:

(i) Assign responsibility for the maintenance and repair of the stormwater facility to the owners of the property upon which the facility is located and be recorded as such on the plat for the property by appropriate notation.

(ii) Provide for a periodic inspection by the property owners in accordance with the requirements of below for the purpose of documenting maintenance and repair needs and to ensure compliance with the requirements of this ordinance. The property owners will arrange for this inspection to be conducted by a registered professional engineer licensed to practice in the State of Tennessee, who will submit a signed written report of the inspection to the city manager or the city manager's designee. It shall also grant permission to the city to enter the property at reasonable times and to inspect the stormwater facility to ensure that it is being properly maintained.

(iii) Provide that the minimum maintenance and repair needs include, but are not limited to: the removal of silt, litter and other debris, the cutting of grass, cutting and vegetation removal, and the replacement of landscape vegetation, in detention and retention basins, and inlets and drainage pipes and any other stormwater facilities. It shall also provide that the property owners shall be responsible for additional maintenance and repair needs consistent with the needs and standards outlined in the MS4 BMP manual.

(iv) Provide that maintenance needs must be addressed in a timely manner, on a schedule to be determined by the city manager or the city manager's designee.

(v) Provide that if the property is not maintained or repaired within the prescribed schedule, the city shall perform the maintenance and repair at its expense, and bill the same to the property owner. The maintenance agreement shall also provide that the city's cost of performing the maintenance shall be a lien against the property.

(2) Existing problem locations - no maintenance agreement. (a) The city manager or the city manager's designee shall, in writing, notify the owners of existing locations and developments of specific drainage, erosion or sediment problems affecting or caused by such locations and
developments, and the specific actions required to correct those problems. The notice shall also specify a reasonable time for compliance. Discharges from existing BMPs that have not been maintained and/or inspected in accordance with this ordinance shall be regarded as illicit.

(b) Inspection of existing facilities. The city may, to the extent authorized by state and federal law, enter and inspect private property for the purpose of determining if there are illicit non-stormwater discharges, and to establish inspection programs to verify that all stormwater management facilities are functioning within design limits. These inspection programs may be established on any reasonable basis, including but not limited to:

(i) Routine inspections;
(ii) Random inspections;
(iii) Inspections based upon complaints or other notice of possible violations;
(iv) Inspection of drainage basins or areas identified as higher than typical sources of sediment or other contaminants or pollutants;
(v) Inspections of businesses or industries of a type associated with higher than usual discharges of contaminants or pollutants or with discharges of a type which are more likely than the typical discharge to cause violations of the city's NPDES stormwater permit; and

14-508. Illicit discharges. (1)  Scope. This section shall apply to all water generated on developed or undeveloped land entering the city's separate storm sewer system.

(2)  Prohibition of illicit discharges. No person shall introduce or cause to be introduced into the municipal separate storm sewer system any discharge that is not composed entirely of stormwater or any discharge that flows from stormwater facility that is not inspected in accordance with § 14-507 shall be an illicit discharge. Non-stormwater discharges shall include, but shall not be limited to, sanitary wastewater, car wash wastewater, radiator flushing disposal, spills from roadway accidents, carpet cleaning wastewater, effluent from septic tanks, improper oil disposal, laundry wastewater/gray water, improper disposal of auto and household toxics. The commencement, conduct or continuance of any non-stormwater discharge to the municipal separate storm sewer system is prohibited except as described as follows:

(a)  Uncontaminated discharges from the following sources:
   (i)  Water line flushing or other potable water sources;
   (ii)  Landscape irrigation or lawn watering with potable water;

This prohibition expressly includes, without limitation, illicit connections made in the past, regardless of whether the connection was permissible under law or practices applicable or prevailing at the time of connection.

(4) Reduction of stormwater pollutants by the use of best management practices. Any person responsible for a property or premises, which is, or may be, the source of an illicit discharge, may be required to implement, at the person's expense, the BMPs necessary to prevent the further discharge of pollutants to the municipal separate storm sewer system. Compliance with all terms and conditions of a valid NPDES permit authorizing the discharge of stormwater associated with industrial activity, to the extent practicable, shall be deemed in compliance with the provisions of this section. Discharges from existing BMPs that have not been maintained and/or inspected in accordance with this ordinance shall be regarded as illicit.
(5) **Notification of spills.** Notwithstanding other requirements of law, as soon as any person responsible for a facility or operation, or responsible for emergency response for a facility or operation, has information of any known or suspected release of materials which are resulting in, or may result in, illicit discharges or pollutants discharging into the municipal separate storm sewer system, the person shall take all necessary steps to ensure the discovery, containment, and cleanup of such release. In the event of such a release of hazardous materials, the person shall immediately notify emergency response agencies of the occurrence via emergency dispatch services. In the event of a release of nonhazardous materials, the person shall notify the city in person or by telephone, fax, or email, no later than the next business day. Notifications in person or by telephone shall be confirmed by written notice addressed and mailed to the city within three (3) business days of the telephone notice. If the discharge of prohibited materials emanates from a commercial or industrial establishment, the owner or operator of such establishment shall also retain an on-site written record of the discharge and the actions taken to prevent its recurrence. Such records shall be retained for at least three (3) years.

(6) **No illegal dumping allowed.** No person shall dump or otherwise deposit outside an authorized landfill, convenience center or other authorized garbage or trash collection point, any trash or garbage of any kind or description on any private or public property, occupied or unoccupied, inside the city. (a) **Verbal warnings** - At a minimum, verbal warnings must specify the nature of the violation and required corrective action.

(b) **Written notices** - Written notices must stipulate the nature of the violation and the required corrective action, with deadlines for taking such action.

(c) **Citations with administrative penalties** - The city manager or the city manager's designee has the authority to assess monetary penalties, which may include civil and administrative penalties.

(d) **Stop work orders** - Stop work orders that require construction activities to be halted, except for those activities directed at cleaning up, abating discharge, and installing appropriate control measures.

(e) **Withholding of plan approvals or other authorizations** - where a facility is in noncompliance, the city manager or the city manager's designee's own approval process affecting the facility's ability to discharge to the MS4 can be used to abate the violation.

(f) **Additional measures** - The city manager or the city manager's designee may also use other escalated measures provided
under local legal authorities. The city manager or the city manager's
designee may perform work necessary to improve erosion control
measures and collect the funds from the responsible party in an
appropriate manner, such as collecting against the project's bond or
directly billing the responsible party to pay for work and materials.

(2) Notification of violation. (a) Verbal warning - Verbal warning may
be given at the discretion of the inspector when it appears the condition
can be corrected by the violator within a reasonable time, which time
shall be approved by the inspector.

(b) Written notice - Whenever the city finds that any permittee
or any other person discharging stormwater has violated or is violating
this ordinance or a permit or order issued hereunder, the city manager or
the city manager's designee may serve upon such person written notice
of the violation. Within ten (10) days of this notice, an explanation of the
violation and a plan for the satisfactory correction and prevention thereof,
to include specific required actions, shall be submitted to the city
manager or the city manager's designee. Submission of this plan in no
way relieves the discharger of liability for any violations occurring before
or after receipt of the notice of violation.

(c) Consent orders - The city is empowered to enter into consent
orders, assurances of voluntary compliance, or other similar documents
establishing an agreement with the person responsible for the
noncompliance. Such orders will include specific action to be taken by the
person to correct the noncompliance within a time period also specified
by the order. Consent orders shall have the same force and effect as
administrative orders issued pursuant to paragraphs (d) and (e) below.

(d) Show cause hearing - The city may order any person who
violates this chapter or permit or order issued hereunder, to show cause
why a proposed enforcement action should not be taken. Notice shall be
served on the person specifying the time and place for the meeting, the
proposed enforcement action and the reasons for such action, and a
request that the violator show cause why this proposed enforcement
action should not be taken. The notice of the meeting shall be served
personally or by registered or certified mail (return receipt requested) at
least ten (10) days prior to the hearing.

(e) Compliance order - When the city finds that any person has
violated or continues to violate this chapter or a permit or order issued
thereunder, he may issue an order to the violator directing that, following
a specific time period, adequate structures or devices be installed and/or
procedures implemented and properly operated. Orders may also contain
such other requirements as might be reasonably necessary and
appropriate to address the noncompliance, including the construction of
appropriate structures, installation of devices, self-monitoring, and
management practices.
(f) Cease and desist and stop work orders - When the city finds that any person has violated or continues to violate this chapter or any permit or order issued hereunder, the city manager or the city manager's designee may issue a stop work order or an order to cease and desist all such violations and direct those persons in noncompliance to:
   (i) Comply forthwith; or
   (ii) Take such appropriate remedial or preventive action as may be needed to properly address a continuing or threatened violation; including halting operations except for terminating the discharge and installing appropriate control measures.

(g) Suspension, revocation or modification of permit - The city may suspend, revoke or modify the permit authorizing the land development project or any other project of the applicant or other responsible person within the city. A suspended, revoked or modified permit may be reinstated after the applicant or other responsible person has taken the remedial measures set forth in the notice of violation or has otherwise cured the violations described therein, provided such permit may be reinstated upon such conditions as the city manager or the city manager's designee may deem necessary to enable the applicant or other responsible person to take the necessary remedial measures to cure such violations.

(h) Conflicting standards - Whenever there is a conflict between any standard contained in this chapter and in the BMP manual adopted by the city under this ordinance, the strictest standard shall prevail.

(1969 Code, § 9-413, as replaced by Ord. #1-2016, March 2016)

14-510. Penalties

(1) Violations. Any person who shall commit any act declared unlawful under this chapter, who violates any provision of this chapter, who violates the provisions of any permit issued pursuant to this chapter, or who fails or refuses to comply with any lawful communication or notice to abate or take corrective action by the city manager or the city manager's designee, shall be guilty of a civil offense.

(2) Penalties. Under the authority provided in Tennessee Code Annotated, § 68-221-1106, the city declares that any person violating the provisions of this chapter may be assessed a civil penalty by the city of not less than fifty dollars ($50.00) and not more than five thousand dollars ($5,000.00) per day for each day of violation. Each day of violation shall constitute a separate violation.

(3) Measuring civil penalties. Under the authority provided in Tennessee Code Annotated, § 68-221-1106, the following factors may be considered by the city in assessing a civil penalty:
   (a) The harm done to the public health or the environment;
   (b) Whether the civil penalty imposed will be a substantial economic deterrent to the illegal activity;
(c) The economic benefit gained by the violator;
(d) The amount of effort put forth by the violator to remedy this violation;
(e) Any unusual or extraordinary enforcement costs incurred by the city;
(f) The amount of penalty established by ordinance or resolution for specific categories of violations; and
(g) Any equities of the situation which outweigh the benefit of imposing any penalty or damage assessment.

4) Recovery of damages and costs. In addition to the civil penalty in subsection (2) above, the city may recover:
   (a) All damages proximately caused by the violator to the city, which may include any reasonable expenses incurred in investigating violations of, and enforcing compliance with, this chapter, or any other actual damages caused by the violation; and
   (b) The costs of the city's maintenance of stormwater facilities when the user of such facilities fails to maintain them as required by this chapter.

5) Referral to TDEC. Where the city has used progressive enforcement to achieve compliance with this ordinance, and in the judgment of the city has not been successful, the city may refer the violation to TDEC. For the purposes of this provision, "progressive enforcement" shall mean two (2) follow-up inspections and two (2) warning letters. In addition, enforcement referrals to TDEC must include, at a minimum, the following information:
   (a) Construction project or industrial facility location;
   (b) Name of owner or operator;
   (c) Estimated construction project or size or type of industrial activity (including the Standard Industrial Classification (SIC) code, if known); and
   (d) Records of communications with the owner or operator regarding the violation, including at least two (2) follow-up inspections, two (2) warning letters or notices of violation, and any response from the owner or operator.

6) Other remedies. The city may bring legal action to enjoin the continuing violation of this chapter, and the existence of any other remedy, at law or equity, shall be no defense to any such actions.

7) Remedies cumulative. The remedies set forth in this section shall be cumulative, not exclusive, and it shall not be a defense to any action, civil or criminal, that one (1) or more of the remedies set forth herein has been sought or granted. (Ord. #7-98, Feb. 1998, § 6, as replaced by Ord. #1-2016, March 2016)

14-511. Appeals from decisions of city manager or the city manager's designee. (1) When may appeal. Whenever the city manager or the
city manager's designee shall reject or refuse to approve the mode or manner of construction proposed to be followed, or materials to be used, or when it is claimed that the provisions of this ordinance do not apply, or that an equally good or more desirable form of construction can be employed in any specific case, or when it is claimed that the true intent and meaning of this ordinance or any of the regulations thereunder have been misconstrued or wrongly interpreted, the owner of such property or his duly authorize agent, may appeal from the decision of the city manager or the city manager's designee to the board of zoning appeals. Notice of appeal shall be in writing and filed within sixty (60) days after the decision is rendered by the city manager or the city manager's designee. A fee of two hundred dollars ($200.00) shall accompany such notice of appeal which shall be returned to the appellant if successful.

(2) Time for appeal may be limited. In case of a condition which, in the opinion of the city manager or the city manager's designee, is unsafe or dangerous, the city manager or the city manager's designee may, in his order, limit the time for such appeal to a shorter period.

(3) Appeal form. Appeals under this section shall be on forms provided by the city manager or the city manager's designee.

(4) Time frame. The board of zoning appeals shall meet and conduct a hearing on any appeal within thirty (30) days unless the appellant requests or consents to additional time. (Ord. #7-98, Feb. 1998, § 7, as replaced by Ord. #1-2016, March 2016)

14-512. Appeal of damage assessment or civil penalty. Pursuant to Tennessee Code Annotated, § 68-221-1106(d), any person incurring a damage assessment or a civil penalty as provided by this chapter (alleged violator) may appeal the damage assessment or civil penalty to the city's board of zoning appeals.

(1) Appeals to be in writing. The appeal shall be in writing and filed with the community development department within thirty (30) days after the civil penalty and/or damage assessment is served in any manner authorized by law.

(2) appealing decisions of board of zoning appeals. The alleged violator may appeal a decision of the board of zoning appeals pursuant to the provisions of Tennessee Code Annotated, title 27, chapter 8.

(3) Failure to appeal to board of zoning appeals. If the alleged violator does not file an appeal within the time frame set forth above in subsection (1 ), the alleged violator shall be deemed to have consented to the damage assessment or civil penalty and it shall become final. The city may then apply to the appropriate chancery court for a judgment and seek execution of such judgment. The court shall treat the failure to appeal such damage assessment or civil penalty as a confession of judgment. (1969 Code, § 9-440, as replaced by Ord. #1-2016, March 2016)
14-513.–14-515. Deleted. (Ord. #7-98, Feb. 1998, § 8, as deleted by Ord. #1-2016, March 2016)

If the court is satisfied that compliance was in effect at the time of the violation and it is the person's second or subsequent offense, the charge of failure to provide evidence of financial responsibility may be dismissed without costs.
(3) A person who did not have financial responsibility that was in effect at the time of being charged with a violation of this section shall not have that person's violation dismissed. (as added by Ord. #21-06, Dec. 2006, and amended by Ord. #25-08, Aug. 2008, and Ord. #16-09, Sept. 2009)

No state or local litigation taxes are applicable to a case prosecuted under this section.

(6) A traffic citation that is based solely upon a violation of this section is a nonmoving traffic violation and no points shall be added to a driver record for the violation. (1969 Code, § 24-85, as deleted by Ord. #5-07, April 2007, and added by Ord. #2-2018, March 2018)

15-302. Duty to drive on right side of roadway. (1) Upon all roadways of sufficient width, a vehicle shall be driven upon the right half of the roadway, except as follows:

(a) When overtaking and passing another vehicle proceeding in the same direction under the rules governing such movement.

(b) When the right half of a roadway is closed to traffic while under construction and repair.

(c) Upon a roadway divided into three (3) marked lanes for traffic under the rules applicable thereon.

(d) Upon a roadway designated and signposted for one-way traffic.

(2) Upon all roadways, any vehicle proceeding at less than normal speed of traffic at the time and place and under the conditions then existing shall be driven in the right-hand lane then available for traffic, or as close as practicable to the right-hand curb or edge of the roadway, except when overtaking and passing another vehicle proceeding in the same direction or
when preparing for a left turn at an intersection or into a private road or driveway. (1969 Code, § 24-86)

15-303. **Certain trucks to be operated in outer lanes of streets.** No person shall operate a truck of a load capacity in excess of one and one-half (1½) tons on any street in the city except upon and within the lane adjacent to and nearest to the outside of the street. (1969 Code, § 24-87)

15-304. **Blocking intersections prohibited.** No person shall drive, park or stop a vehicle in an intersection in such a manner that the rightful use of such intersection is prevented. (1969 Code, § 24-88)

15-305. **Passing vehicles proceeding in opposite direction.** Drivers of vehicles proceeding in opposite directions shall pass each other to the right, and upon roadways having width for not more than one (1) line of traffic in each direction, each driver shall give to the other at least one-half (½) of the main-traveled portion of the roadway as nearly as possible. (1969 Code, § 24-89)

15-306. **Passing vehicle proceeding in same direction—generally.**

1. Except as otherwise provided in § 15-307, the driver of a vehicle overtaking another vehicle proceeding in the same direction shall pass to the left thereof at a safe distance and shall not again drive to the right side of the roadway until safely clear of the overtaken vehicle.

2. No vehicle shall be driven to the left side of the center of the roadway in overtaking and passing another vehicle proceeding in the same direction, unless such left side is clearly visible and is free from oncoming traffic for a sufficient distance ahead to permit such overtaking and passing to be completely made without interfering with the safe operation of any vehicle approaching from the opposite direction or any vehicle overtaken. In every event, the overtaking vehicle must return to the right-hand side of the roadway before coming within one hundred (100) feet of any vehicle approaching from the opposite direction.

3. No vehicle shall at any time to be driven to the left side of the roadway under the following conditions:
   
   a. When approaching the crest of a grade or upon a curve in the street where the driver's view is obstructed within three hundred (300) feet for such distance as to create a hazard in the event another vehicle might approach from the opposite direction.
   
   b. When approaching within one hundred (100) feet of or traversing any intersection or railroad grade crossing.

   c. When the view is obstructed upon approaching within one hundred (100) feet of any bridge, viaduct or tunnel.

The foregoing limitations of subsection (3) shall not apply upon a one-way roadway.

4. When traveling within a school zone during recess, or while children are going to or leaving school during its opening or closing hours or during its lunch hours, while children are going to or leaving school grounds
during opening and closing hours of a school-sponsored after school program or before school program, or at any time while the lights are flashing indicating a speed limit of 15 m.p.h. (1969 Code, § 24-90, as amended by Ord. #9-02, May 2002)

15-307. **Passing vehicle proceeding in same direction--on right side.** (1) The driver of a vehicle may overtake and pass upon the right of another vehicle only under the following conditions:

(a) When the vehicle overtaken is making or about to make a left turn.

(b) Upon a street or highway with unobstructed pavement not occupied by parked vehicles of sufficient width for two (2) or more lines of moving vehicles in each direction.

(c) Upon a one-way street, or upon any roadway on which traffic is restricted to one (1) direction of movement, where the roadway is free from obstructions and of sufficient width for two (2) or more lines of moving vehicles.

(2) The driver of a vehicle may overtake and pass another vehicle upon the right only under conditions permitting such movement in safety. In no event shall such movement be made by driving off the pavement or main-traveled portion of the roadway.

(3) The driver of a vehicle may not overtake and pass upon the right of another vehicle when traveling within a school zone during recess, or while children are going to or leaving school during its opening or closing hours or during its lunch hours, while children are going to or leaving school grounds during opening and closing hours of a school-sponsored after school program or before school program, or at any time while the lights are flashing indicating a speed limit of 15 m.p.h. (1969 Code, § 24-91, as amended by Ord. #9-02, May 2002)

15-308. **Passing vehicle proceeding in same direction--duty of driver of overtaken vehicle.** Except when overtaking and passing on the right is permitted, the driver of an overtaken vehicle shall give way to the right in favor of the overtaking vehicle, on audible signal, and shall not increase the speed of his or her vehicle until completely passed by the overtaking vehicle. (1969 Code, § 24-92)

15-309. **No-passing zone.** The city manager is hereby authorized to determine those portions of any street where overtaking and passing or driving to the left of the roadway would be especially hazardous and may, by appropriate signs or markings on the roadway, indicate the beginning and end of such zones. When such signs or markings are in place and clearly visible to
an ordinarily observant person, every driver of a vehicle shall obey the
directions thereof. (1969 Code, § 24-93)

15-310. One-way streets--designation. The city manager may
designate any street or separate roadway for one-way traffic and shall erect
appropriate signs giving notice thereof. (1969 Code, § 24-94)

15-311. One-way streets--vehicles to be driven only in designated
direction. Upon a roadway designated and signposted for one-way traffic, a
vehicle shall be driven only in the direction designated. (1969 Code, § 24-95)

15-312. Driving around rotary traffic island. A vehicle passing
around a rotary traffic island shall be driven only to the right of such island.
(1969 Code, § 24-96)

15-313. Driving on roadways laned for traffic. Whenever any
roadway has been divided into two (2) or more clearly marked lanes for traffic,
the following rules, in addition to all others consistent herewith, shall apply:
(1) A vehicle shall be driven as nearly as practicable entirely within
a single lane and shall not be moved from such lane until the driver has first
ascertained that such movement can be made with safety.
(2) Upon a roadway which is divided into three (3) lanes, a vehicle
shall not be driven in the center lane except when overtaking and passing
another vehicle where the roadway is clearly visible and such center lane is
clear of traffic within a safe distance, or in preparation for a left turn, or where
such center lane is, at the time, allocated exclusively to traffic moving in the
direction the vehicle is proceeding and is signposted to give notice of such
allocation.
(3) Official signs may be erected by the city manager directing slow-
moving traffic to use a designated lane or designating those lanes to be used by
traffic moving in a particular direction, regardless of the center of the roadway,
and drivers of vehicles shall obey the directions of every such sign. (1969 Code,
§ 24-97)

15-314. Driving on divided streets. Whenever any street has been
divided into two (2) roadways by leaving an intervening space or by a physical
barrier or clearly indicated dividing section so constructed as to impede
vehicular traffic, every vehicle shall be driven only upon the right-hand roadway
and no vehicle shall be driven over, across, or within any such dividing space,
barrier or section, except through an opening in such physical barrier or dividing
section or space or at a cross-over or intersection established for that purpose.
(1969 Code, § 24-98)
15-315. **Right-of-way at uncontrolled intersections.** The driver of a vehicle approaching an intersection not controlled by a traffic sign or signal shall yield the right-of-way to a vehicle which has entered the intersection from a different street. When two (2) vehicles enter such an intersection from different streets at approximately the same time, the driver of the vehicle on the left shall yield the right-of-way to the vehicle on the right. (1969 Code, § 24-99)

15-316. **Stop intersections.** (1) The city manager is hereby authorized to designate through streets and to have stop signs erected at intersections requiring drivers to stop when approaching such through streets. The city manager is hereby further authorized to designate stop intersections and to have stop signs erected at one or more entrances thereto, although not a part of a designated through street.

(2) The driver of a vehicle approaching a stop sign erected pursuant to this section shall stop such vehicle before entering the crosswalk on the near side of the intersection or, in the event there is no crosswalk, at a clearly marked stop line, but if none, then at the point nearest the intersecting roadway where the driver has a view of approaching traffic on the intersecting roadway, before entering the intersection, except when directed to proceed by a police officer or traffic-control signal.

(3) The driver of a vehicle who has stopped in accord with this section shall yield the right-of-way to other vehicles which have entered the intersection or which are approaching so closely as to constitute an immediate hazard, but such driver, having so yielded, may proceed and the drivers of all other vehicles approaching the intersection on the intersecting street shall yield the right-of-way to the vehicle proceeding into or across such street.

(4) Nothing in this code or the ordinance adopting this code shall be deemed to affect the validity of any ordinance heretofore passed designating any through street. (1969 Code, § 24-100)

15-317. **Yield intersections.** The city manager is hereby authorized to designate, by appropriate signs, intersections at which the drivers of vehicles shall yield the right-of-way to other vehicle approaching on another street. Whenever a "yield right-of-way" sign has been erected pursuant to this section, all drivers approaching such sign shall proceed with caution, slowing down or stopping, if necessary, so as not to interfere with traffic moving on the intersecting street, and such drivers shall not proceed into the intersecting street until such movement can be made with safety. (1969 Code, § 24-101)

15-318. **Entering street from alley, building or private road or driveway.** (1) The driver of a vehicle about to enter or cross a street from a private road or driveway shall yield the right-of-way to all vehicles approaching on the street.
The driver of a vehicle within a business or residence district emerging from an alley, driveway or building shall stop such vehicle immediately prior to driving onto a sidewalk or onto the sidewalk area extending across any alleyway or driveway, and shall yield the right-of-way to any pedestrian as may be necessary to avoid collision, and upon entering the roadway, shall yield the right-of-way to all vehicles approaching on the roadway. (1969 Code, § 24-102)

15-319. Turning movements generally. (1) No person shall turn a vehicle at an intersection unless the vehicle is in proper position upon the roadway as required by § 15-320, or turn a vehicle to enter a private road or driveway, or otherwise turn a vehicle from a direct course or move right or left upon a roadway, unless and until such movement can be made with reasonable safety.

(2) Turning on curve or crest of grade prohibited. No vehicle shall be turned so as to proceed in the opposite direction upon any curve, or upon the approach to or near the crest of a grade, where such vehicle cannot be seen by the driver of any other vehicle approaching from either direction within five hundred feet (500'). (1969 Code, § 24-103, as amended by Ord. #21-06, Dec. 2006)

15-320. Required position and method of turning at intersections. Except as otherwise provided in § 15-321, the driver of a vehicle intending to turn at an intersection shall do so as follows:

(1) Right turns. Both the approach for a right turn and a right turn shall be made as close as practicable to the right-hand curb or edge of the roadway.

(2) Left turns on two-way roadways. At any intersection where traffic is permitted to move in both directions on each roadway entering the intersection, an approach for a left turn shall be made in that portion of the right half of the roadway nearest the center line thereof and by passing to the right of such center line where it enters the intersection and, after entering the intersection, the left turn shall be made so as to leave the intersection to the right of the center line of the roadway being entered. Whenever practicable, the left turn shall be made in that portion of the intersection to the left of the center of the intersection.

(3) Left turns on other than two-way roadways. At any intersection where traffic is restricted to one direction on one or more of the roadways, the driver of a vehicle intending to turn left at any such intersection shall approach the intersection in the extreme left-hand lane lawfully available to traffic moving in the direction of travel of such vehicle and, after entering the

1State law reference
Tennessee Code Annotated, § 55-8-141.
intersection, as nearly as practicable, in the left-hand lane lawfully available to traffic moving in such direction upon the roadway being entered.

(4) **Two-way left turn lanes.** Where a special lane for making left turns by drivers proceeding in opposite directions has been established:
   
   (a) A left turn shall not be made from any other lane unless a vehicle cannot safely enter the turn lane;
   
   (b) A vehicle shall not be driven in the left turn lane except when preparing for or making a left turn from or into the roadway;
   
   (c) A vehicle shall not use the left turn lane solely for the purpose of passing another vehicle;
   
   (d) A vehicle shall not enter a left turn lane more than a safe distance from the point of the intended turn;
   
   (e) When any vehicle enters the turn lane, no other vehicle proceeding in an opposite direction shall enter the turn lane if such entrance would prohibit the vehicle already in the lane from making the intended turn; and
   
   (f) When vehicles enter the turn lane proceeding in opposite directions, the first vehicle to enter the lane shall have the right-of-way.

15-321. **Markers, buttons or signs, regulating turns.** The city manager may cause markers, buttons or signs to be placed within or adjacent to intersections and thereby require and direct that a different course from that specified in § 15-320 be traveled by vehicles turning at an intersection and, when markers, buttons or signs are so placed, no driver of a vehicle shall turn a vehicle at an intersection other than as directed and required by such markers, buttons or signs. (1969 Code, § 24-105)

15-322. **Right-of-way when turning left at intersection.** The driver of a vehicle within an intersection intending to turn to the left shall yield the right-of-way to any vehicle approaching from the opposite direction which is within the intersection or so close thereto as to constitute an immediate hazard, but such driver, having so yielded and having given a signal when and as required by this chapter, may make such left turn and the drivers of all other vehicles approaching the intersection from the opposite direction shall yield the right-of-way to the vehicle making the left turn. (1969 Code, § 24-106)

15-323. **Limitations on turning around.** No vehicle shall be turned so as to proceed in the opposite direction upon any curve, or upon the approach to or near the crest of a grade, where such vehicle cannot be seen by the driver

of any other vehicle approaching from either direction within five hundred (500) feet. (1969 Code, § 24-107)

15-324. Starting, stopping and turning signals—generally. Every driver of a vehicle who intends to start, stop or turn, or partly turn from a direct line, shall first see that such movement can be made in safety and, whenever the operation of any other vehicle may be affected by such movement, shall give a signal, plainly visible to the driver of such other vehicle, of his or her intention to make such movement. Such signal shall be given continuously for a distance of at least fifty (50) feet before stopping, turning, partly turning, or materially altering the course of the vehicle. The signal herein required shall be given by means of the hand and arm, or by some mechanical or electrical device approved by the state department of safety; provided, however, that any motor vehicle in use on a street shall be equipped with, and the required signal shall be given by, a signal lamp or lamps or mechanical signal device approved by the state department of safety, when the distance from the center of the top of the steering post to the left outside limit of the body, cab or load of such motor vehicle exceeds twenty-four (24) inches, or when the distance from the center of the top of the steering post to the rear limit of the body or load thereof exceeds fourteen (14) feet. The latter measurement shall apply to any single vehicle and also to any combination of vehicles. (1969 Code, § 24-108)

15-325. Starting, stopping and turning signals—method of giving with hand and arm. Whenever the signal required by § 15-324 is given by means of the hand and arm, the driver shall indicate his or her intention to start, stop, or turn, or partly turn, by extending the hand and arm from and beyond the left side of the vehicle in the following manner:

(1) Left turn. For a left turn, or to pull to the left, the arm shall be extended in a horizontal position straight from and level with the shoulder.

(2) Right turn. For a right turn, or to pull to the right, the arm shall be extended upward.

(3) Slowing down or stopping. For slowing down or to stop, the arm shall be extended downward.

(4) Starting. Drivers of vehicles standing or stopped at the curb or edge, before moving such vehicles, shall give signals of their intention to move into traffic, as hereinbefore provided, before turning in the direction the vehicle shall proceed from the curb. (1969 Code, § 24-109)

15-326. Starting, stopping and turning signals—change of direction after signal given. Drivers having once given a hand, electrical or mechanical device signal, must continue the course thus indicated, unless they alter the original signal and take care that drivers of vehicles and pedestrians have seen and are aware of the change. (1969 Code, § 24-110)
15-327. Starting, stopping and turning signals—duty of drivers receiving signal. Drivers receiving a signal from another driver shall keep their vehicles under complete control and shall be able to avoid an accident resulting from a misunderstanding of such signal. (1969 Code, § 24-111)

15-328. Duty to stop at railroad crossing upon approach of train.
(1) Whenever any person driving a vehicle approaches a railroad grade crossing under any of the circumstances stated in this section, the driver of such vehicle shall stop within fifty (50) feet but not less than fifteen (15) feet from the nearest rail of such railroad, and shall not proceed until he or she can do so safely. The foregoing requirements shall apply when:
   (a) A clearly visible electric or mechanical signal device gives warning of the immediate approach of a railroad train.
   (b) A crossing gate is lowered or when a human flagperson gives or continues to give a signal of the approach or passage of a railroad train.
   (c) A railroad train approaching within approximately one thousand five hundred (1,500) feet of the street crossing emits a signal audible from such distance and such railroad train, by reason of its speed or nearness to such crossing, is an immediate hazard.
   (d) An approaching railroad train is plainly visible and is in hazardous proximity to such crossing.
(2) No person shall drive any vehicle through, around or under any crossing gate or barrier at a railroad crossing while such gate or barrier is closed or is being opened or closed. (1969 Code, § 24-112)

15-329. Duty to stop at designated dangerous railroad crossings. The city manager, with the approval of the state department of highways and public works, is hereby authorized to designate particularly dangerous street grade crossings of railroads and to erect stop signs thereat. When such stop signs are erected, the driver of any vehicle shall stop within fifty (50) feet but not less than fifteen (15) feet from the nearest rail of such railroad and shall proceed only upon exercising due care. (1969 Code, § 24-113)

15-331. Sections 15-328, 15-329, and 15-330 do not affect rights in damage suits. None of the provisions of §§ 15-328, 15-329, and 15-330 shall be construed as abridging or in any way affecting the common law right of recovery of litigants in damage suits that may be pending or brought against any railroad company or other common carrier. (1969 Code, § 24-115)

15-332. Moving heavy equipment at railroad grade crossings.
(1) No person shall operate or move any crawler-type tractor, steam shovel, derrick, roller, or any equipment or structure having a normal operating speed of ten (10) or less miles per hour or a vertical body or load clearance of less than one-half (½) inch per foot of the distance between any two (2) adjacent axles or in any event of less than nine (9) inches, measured above the level surface of a railroad, upon or across any tracks at a railroad grade crossing without first complying with this section.

(2) Before making any such crossing, the person operating or moving any such vehicle or equipment shall first stop the same not less than fifteen (15) feet nor more than fifty (50) feet from the nearest rail of such railroad and, while so stopped shall listen and look in both directions along such track for any approaching train and for signals indicating the approach of a train, and shall not proceed until the crossing can be made safely.

(3) No such crossing shall be made when warning is given by automatic signal or crossing gates or a flagperson or otherwise of the immediate approach of a railroad train or car. If a flagperson is provided by the railroad, movement over the crossing shall be made under his or her direction. (1969 Code, § 24-116)

15-333. Limitations on backing. The driver of a vehicle shall not back the same unless such movement can be made with reasonable safety and without interfering with other traffic. (1969 Code, § 24-117)

15-334. Coasting prohibited. (1) The driver of any motor vehicle, when traveling upon a downgrade, shall not coast with the gears of such vehicle in neutral.

(2) The driver of a commercial motor vehicle, when traveling upon a downgrade, shall not coast with the clutch disengaged. (1969 Code, § 24-118)

15-335. Overtaking and passing church bus; discharging passengers. (1) The driver of a vehicle on a public roadway upon meeting or overtaking from either direction any church bus which has stopped on the public roadway for the purpose of receiving or discharging passengers shall stop the vehicle before reaching such church bus, and the driver shall not proceed until such church bus resumes motion or is signaled by the church bus driver to proceed or the visual signals on the bus are no longer actuated. In order for this section to apply, the church bus shall be equipped with the same type of safety equipment indicating the bus has stopped as is required by state law\(^1\) for school buses.

\(^1\)State law reference

Tennessee Code Annotated, § 55-8-151.
(2) All motor vehicles used in transporting passengers to and from churches in this state are required to be distinctly marked "Church Bus" on the front and rear thereof in letters of not less than six inches (6") in height and so plainly written or printed and so arranged as to be legible to persons approaching such church bus, whether traveling in the same or the opposite direction.

(3) The driver of a vehicle upon a public roadway with separate roadways need not stop upon meeting or passing a church bus which is on a different roadway or when upon a controlled access highway and the church bus is stopped in a loading zone which is a part of or adjacent to such public roadway and where pedestrians are not permitted to cross the roadway. For the purposes of this subsection, "separate roadways" means roadways divided by an intervening space which is not suitable to vehicular traffic.

(4) The church bus driver is required to stop such church bus on the right-hand side of the public roadway, and the driver shall cause the bus to remain stationary and the visual stop signs on the bus actuated until all passengers who should be discharged from the bus have been so discharged and until all passengers whose destination causes them to cross the public roadway at that place have negotiated such crossing. (1969 Code, § 24-119, as deleted by Ord. #17-06, Sept. 2006, and replaced by Ord. #21-06, Dec. 2006)

15-336. Overtaking and passing youth bus; discharging passengers. (1) The driver of a vehicle on a public roadway upon meeting or overtaking from either direction any youth bus which has stopped on the public roadway for the purpose of receiving or discharging passengers shall stop the vehicle before reaching such youth bus, and the driver shall not proceed until such youth bus resumes motion or is signaled by the youth bus driver to proceed or the visual signals on the bus are no longer actuated. In order for this section to apply, the youth bus shall be equipped with the same type of safety equipment indicating the bus has stopped as is required by state law\(^1\) for school buses. For the purposes of this section, "youth bus" means a motor vehicle designed for carrying not less than fifteen (15) passengers and used for the transportation of persons.

(2) All motor vehicles owned by corporations or organizations used in transporting child passengers to and from child care centers in this state or to and from the activities of religious, charitable, scientific, educational, youth service or athletic institutions or organizations are required to be distinctly marked "Youth Bus" on the front and rear thereof in letters of not less than six inches (6") in height and so plainly written or printed and so arranged as to be

\(^1\)State law reference

Tennessee Code Annotated, § 55-8-151.
legible to persons approaching such youth bus, whether traveling in the same or the opposite direction.

(3) The driver of a vehicle upon a public roadway with separate roadways needs not stop upon meeting or passing a youth bus which is on a different roadway or when upon a controlled access highway and the youth bus is stopped in a loading zone which is a part of or adjacent to such public roadway and where pedestrians are not permitted to cross the roadway. For the purposes of this subsection, "separate roadways" means roadways divided by an intervening space which is not suitable to vehicular traffic.

(4) The youth bus driver is required to stop such youth bus on the right-hand side of the public roadway, and the driver shall cause the bus to remain stationary and the visual stop signs on the bus actuated until all passengers who should be discharged from the bus have been so discharged and until all passengers whose destination causes them to cross the public roadway at that place have negotiated such crossing. (1969 Code, § 24-120, as deleted by Ord. #17-06, and replaced by Ord. #21-06, Dec. 2006)

15-337. **Duties of driver of school bus when receiving or discharging passengers.** A school bus driver is required to stop such school bus on the right-hand side of the road or street, and such driver shall cause the bus to remain stationary and the visual stop signs on the bus actuated until all schoolchildren who should be discharged from or received into the bus have been so discharged or received and until all children whose destination causes them to cross the road or street at that place have negotiated such crossing. (1969 Code, § 24-121)

15-338. **Following too closely.** (1) The driver of a motor vehicle shall not follow another vehicle more closely than is reasonable and prudent, having due regard for the speed of such vehicles and the traffic upon and the condition of the street.

(2) The driver of any motor truck or motor vehicle drawing another vehicle, when traveling upon a roadway outside of a business or residence district, and which is following another motor truck or motor vehicle drawing another vehicle shall, whenever conditions permit, leave sufficient space so that an overtaking vehicle may enter and occupy such space without danger, except that this shall not prevent a motor truck or motor vehicle drawing another vehicle from overtaking and passing any like vehicle or other vehicle.

(3) Motor vehicles being driven upon any roadway outside of a business or residence district in a caravan or motorcade, whether or not towing other vehicles, shall be so operated as to allow sufficient space between each vehicle or combination of vehicles so as to enable any other vehicle to enter and occupy such space without danger. This provision shall not apply to funeral processions. (1969 Code, § 24-122)
15-339. **Following fire apparatus or driving near fire.** The driver of a vehicle, other than one on official business, shall not follow any fire apparatus traveling in response to a fire alarm closer than five hundred (500) feet or drive or park such vehicle within five hundred (500) feet of any place where fire apparatus has stopped in answer to a fire alarm. (1969 Code, § 24-123)

15-340. **Driving over fire hose.** No vehicle shall be driven over any unprotected hose of a fire department when laid down on any street or private driveway, to be used at any fire or alarm of fire, without the consent of the fire department official in command. (1969 Code, § 24-124)

15-341. **Driving when view or control obstructed.** (1) No person shall drive a vehicle when it is so loaded, or when there are in the front seat such a number of persons, exceeding four (4), as to obstruct the view of the driver to the front or sides of the vehicles or as to interfere with the driver's control over the driving mechanism of the vehicle.

(2) No passenger in a vehicle shall ride in such position as to interfere with the driver's view ahead or to the sides, or to interfere with his or her control over the driving mechanism of the vehicle. (1969 Code, § 24-125)

15-342. **Use of mobile telephone by school bus drivers.**¹ (1) No driver shall operate a school bus on a public roadway while using a hand held mobile telephone while such vehicle is in motion and such vehicle is transporting children; provided, however, that this section shall not apply to mobile telephone or two-way radio communications made to and from a central dispatch, school transportation department or its equivalent. For the purposes of this section, unless the context otherwise requires, "mobile telephone" means a cellular, analog, wireless or digital telephone.

(2) A violation of this section is punishable only by a fine of fifty dollars ($50.00).

(3) It is an affirmative defense to prosecution under this section, which must be proven by a preponderance of the evidence, that the driver's use of a mobile telephone was necessitated by a bona fide emergency. (1969 Code, § 24-126, as deleted by Ord. #17-06, Sept. 2006, and replaced by Ord. #21-06, Dec. 2006)

15-343. **Driving without due caution; drivers to exercise due caution.** (1) It shall be unlawful for any person to operate a motor vehicle upon any public street in the city without due caution, at a speed and in a manner to

¹State law reference

Tennessee Code Annotated, § 55-8-192.
endanger any person or property, taking into consideration traffic and road conditions.

(2) Notwithstanding any speed limit or zone in effect at the time, or right-of-way rules that may be applicable, every driver of a motor vehicle shall exercise due care to avoid colliding with any other motor vehicle, either being driven or legally parked, upon any roadway, or any road sign, guard rail or any fixed object legally placed within or beside the right-of-way, by operating such motor vehicle at a safe speed, by maintaining a safe outlook, by keeping such motor vehicle under proper control and by devoting full time and attention to operating such motor vehicle, under the existing circumstances to avoid endangering life, limb or property. \(^1\) (1969 Code, § 24-127, as amended by Ord. #21-06, Dec. 2006)

15-344. Through truck traffic on residential streets prohibited; exceptions. (1) The city manager is hereby authorized to prohibit through truck traffic on city residential streets or portions thereof subject to the provisions hereof. CHAPTER 4

TRAFFIC CONTROL DEVICES

SECTION
15-401. Obedience to devices; leaving roadway in order to avoid compliance. (1) The drivers of vehicles and pedestrians shall obey the instructions of any official traffic-control device applicable thereto placed in accordance with the provisions of this chapter, unless otherwise directed by a traffic or police officer, subject to the exceptions granted the driver of an authorized emergency vehicle in this chapter.

(2) It shall be unlawful for the operator of any vehicle to leave the roadway and travel across private property, or public property devoted to other than highway use, to avoid compliance with an official traffic signal or an official traffic sign or for the purpose of avoiding obedience to directions given by a police officer or any traffic regulation or ordinance. (Ord. #2-95, Feb. 1995, § 1)

15-402. When signs required. No provisions of this chapter for which signs are required shall be enforced against an alleged violator if, at the time and place of the alleged violation, an official sign is not in proper position and sufficiently legible to be seen by an ordinarily observant person. When a particular section does not state that signs are required, such section shall be effective even though no signs are erected or in place. (1969 Code, § 24-140)

15-403. Requirements for stop signs. (1) Every stop sign shall bear the word "stop" in letters not less than eight (8) inches in height and such sign shall, at nighttime, be rendered luminous by steady or flashing internal illumination, or by a fixed floodlight projected on the face of the sign, or by efficient reflecting elements on the face of the sign.

(2) Every stop sign shall be erected as near as practicable to the nearest line of the crosswalk on the near side of the intersection or, if there is no crosswalk, then as close as practicable to the nearest line of the roadway. (1969 Code, § 24-141)

15-404. Traffic-control signal legend generally. Whenever traffic is controlled by traffic-control signals exhibiting the words "Go," "Caution" or
"Stop," or exhibiting different colored lights successively one at a time, or with arrows, the following colors only shall be used and such terms and lights shall indicate and apply to drivers or vehicles and pedestrians as follows:

1. **Green alone or "Go."**
   a. Vehicular traffic facing the signal may proceed straight through or turn right or left, unless a sign at such place prohibits either such turn, but vehicular traffic, including vehicles turning right and left, shall yield the right-of-way to other vehicles and to pedestrians lawfully within the intersection or an adjacent crosswalk at the time such signal is exhibited.
   b. Pedestrians facing the signal may proceed across the roadway within any marked or unmarked crosswalk.

2. **Yellow alone or "Caution" when shown following the green or "Go" signal.**
   a. Vehicular traffic facing the signal is thereby warned that the red or "Stop" signal will be exhibited immediately thereafter and such vehicular traffic shall not enter or cross the intersection when the red or "Stop" signal is exhibited.
   b. Pedestrians facing such signal are thereby advised that there is insufficient time to cross the roadway, and any pedestrian then starting to cross shall yield the right-of-way to all vehicles.

3. **Red alone or "Stop."**
   a. Vehicular traffic facing the signal shall stop before entering the crosswalk on the near side of the intersection or, if none, then before entering the intersection, and shall remain standing until green or "Go" is shown alone.
   b. No pedestrian facing such signal shall enter the roadway unless he or she can do so safely and without interfering with any vehicular traffic.

4. **Red with green arrow.**
   a. Vehicular traffic facing such signal may cautiously enter the intersection only to make the movement indicated by such arrow, but shall yield the right-of-way to pedestrians lawfully within a crosswalk and to other traffic lawfully using the intersection.
   b. No pedestrian facing such signal shall enter the roadway unless he or she can do so safely and without interfering with any vehicular traffic.

In the event an official traffic-control signal is erected and maintained at a place other than an intersection, the provisions of this section shall be applicable except as to those provisions which, by their nature, can have no application. Any stop required shall be made at a sign or marking on the pavement indicating where the stop shall be made, but in the absence of any such sign or marking the stop shall be made at the signal. (1969 Code, § 24-142)

**15-405. Flashing signals.** (1) Whenever an illuminated flashing red or yellow signal is used in a traffic sign or signal, it shall require obedience by vehicular traffic as follows:
(a) **Flash red (stop signal).** When a red lens is illuminated with rapid intermittent flashes, and such light is clearly visible for a sufficient distance ahead to permit such stopping, drivers of vehicles shall stop before entering the nearest crosswalk at an intersection or at a limit line when marked, or, if none, then before entering the intersection, and the right to proceed shall be subject to the rules applicable after making a stop at a stop sign.

(b) **Flash yellow (caution signal).** When a yellow lens is illuminated with rapid intermittent flashes, drivers of vehicles may proceed through the intersection or past such signal only with caution.

(2) This section shall not apply at railroad grade crossings. The conduct of drivers of vehicles approaching railroad grade crossings shall be governed by the rules set forth in chapter 3 of this title. (1969 Code, § 24-143)

**15-406 Unauthorized signs, signals, etc.** (1) No person shall place, maintain or display, upon or in view of any street, any unauthorized sign, signal, marking or device which purports to be or is an imitation of or resembles an official traffic-control device or railroad sign or signal, or which attempts to direct the movements of traffic or which hides from view or interferes with the effectiveness of any official traffic-control device or any railroad sign or signal, and no person shall place or maintain nor shall any public authority permit on any street any traffic sign or signal bearing thereon any commercial advertising.

(2) This section shall not be deemed to prohibit the erection, upon private property adjacent to streets, of signs giving useful directional information and of a type which cannot be mistaken for official signs.

(3) Every sign, signal or marking prohibited by this section is hereby declared to be a public nuisance and the city manager is hereby empowered to remove the same, or cause it to be removed, without notice. (1969 Code, § 24-144)

**15-407 Altering, injuring, etc., devices.** No person shall, without lawful authority, attempt to or in fact alter, deface, injure, knock down or remove any official traffic-control device or any railroad sign or signal or any inscription, shield or insignia thereon, or any part thereof. (1969 Code, § 24-145)

(as added by Ord. #13-07, July 2007)

15-514. Maximum speed limits on specific streets – fifteen miles per hour. A maximum speed limit of fifteen (15) miles per hour is hereby
established on the following streets and roads, or parts thereof, and it shall be unlawful for any person to operate a vehicle at a speed in excess thereof:

CHAPTER 6
STOPPING, STANDING AND PARKING

SECTION

15-601. Equal rights to parking spaces for motorized vehicles, exceptions. Unless specifically designated by a city-authorized sign, all persons parking motorized vehicles (except recreational vehicles) have equal rights and privileges to any parking space on all public streets. The parking of recreational vehicles in any parking space on public streets is governed by City Code § 15-617. (1969 Code, § 24-174, as replaced by Ord. #03-2012, April 2012)

15-602. On main-traveled portion of street. (1) No person shall stop, park or leave standing any vehicle, whether attended or unattended, upon the paved or main-traveled part of a street, when it is practicable to stop, park or so leave such vehicle off such part of the street, and in every event, an unobstructed width of the street opposite a standing vehicle of not less than eighteen (18) feet shall be left for the free passage of other vehicles; provided that streets of twenty-two (22) feet in width or less accepted by the city prior to July 1, 1991, must provide a minimum width of sixteen (16) feet for free passage of other vehicles, and a clear view of such stopped vehicle shall be available from a distance of two hundred (200) feet in each direction upon such street.

(2) This section shall not apply to the driver of any vehicle which is disabled while on the paved or main-traveled portion of a street in such manner...
and to such extent that it is impossible to avoid stopping and temporarily leaving such disabled vehicle in such position.

(3) The provisions of this section shall not apply to the driver of any vehicle operating as a carrier of passengers for hire and holding a certificate of convenience and necessity or interstate permit issued by the Tennessee Public Service Commission or any local regulatory transit authority of Tennessee authorizing the operation of such vehicle upon the roads, streets or highways in Tennessee, while taking passengers on such unobstructed lane of travel of the street opposite such standing vehicle shall be left for free passage of other vehicles and a clear view of such stopped vehicle shall be available from a distance of two hundred (200) feet in either direction upon the street. (1969 Code, § 24-175)

15-603. Prohibited in specified places. (1) No person shall stop, stand or park a vehicle within the corporate limits of the city, nor shall any owner allow a vehicle to be parked within the city, except in compliance with law or the directions of a police officer or traffic-control device, in any of the following places:

(a) On any sidewalk or pedestrian walking area located within the right-of-way.
(b) In front of a public or private driveway.
(c) Within fifteen (15) feet of a fire hydrant.
(d) On a crosswalk.
(e) Within twenty (20) feet of a crosswalk at an intersection.
(f) Within thirty (30) feet of flashing beacon, stop sign or traffic control signal located at the side of a roadway.
(g) Between a safety zone and the adjacent curb or within thirty (30) feet of points on the curb immediately opposite the ends of a safety zone, unless a legally constituted traffic authority indicates a different length by signs or markings.
(h) Within fifty (50) feet of the nearest rail of a railroad crossing.
(i) Within twenty (20) feet of the driveway entrance to any fire station and on the side of a street opposite the entrance to any fire station, within seventy-five (75) feet of said entrance when property sign posted.
(j) Alongside or opposite any street excavation or obstruction when stopping, standing or parking would obstruct traffic.
(k) On the roadway side of any vehicle stopped or parked at the edge or curb of a street.
(l) Upon any bridge or other elevated structure upon a highway or within a highway tunnel.
(m) At any place where official signs prohibit stopping, standing or parking.
(n) At any place where official yellow curbings, lines or markings are painted or exhibited on a city road, public street or public parking lot.

(o) In any approved fire lane where the curb has been painted yellow and where approved signs or markings indicate a fire lane. This includes officially designated fire lanes on both public and private property.

(p) On any city or state right-of-way between the roadway curb or edge of pavement, and the edge of the right-of-way.

(q) On private property, other than parking lots or other designated parking areas without the express consent of an owner, tenant, occupant, or other person lawfully entitled to possession of the property.

(r) In a public or private parking lot or other designated parking area, after the driver or registered owner of the vehicle has been notified to remove the vehicle by an owner or authorized agent of the owner of the property on which the parking lot or area is located.

(s) In a public or private parking lot or other designated parking area, for more than twenty-four (24) hours without the express permission of an owner, or authorized agent of the owner of the property on which the parking lot or area is located.

(t) On a public street for the purpose of repair or servicing, except to make repairs necessitated by emergency.

(u) On or over the curb of any public street.

(v) Outside of any marked parking space lines on any public street. This does not preclude the ability to park in unmarked parking spaces provided such parking is allowed, however, it does require a vehicle parked in marked on-street parking to be contained entirely within the marked space (white lines and curbing).

(2) The requirements of this section apply to the entire portion of the vehicle, including but not limited to side mirrors and tailgates, and to any items placed on said vehicle that are not completely contained within said vehicle, including but limited to protruding lumber or other materials. If any portion of the vehicle or any items placed on said vehicle are within any of the prohibited parking areas set forth in subsection (1) above, the vehicle is parked unlawfully. For example, if a vehicle’s side mirrors overhang onto the sidewalk or if materials protrude from the vehicle and overhang the marked parking lines, the vehicle is parked unlawfully. (1969 Code, § 24-176, as amended by Ord. #03-2012, April 2012)

15-604. **Unattended vehicle.** No person driving or in charge of a motor vehicle shall permit it to stand unattended on any street without first stopping the motor, removing the ignition key, and effectively setting the brake thereon.
and, when standing upon any grade, turning the front wheels of such vehicle toward the nearest curb or gutter of the street. (1969 Code, § 24-177)

15-605. **Method of parking.** (1) Every vehicle parked or standing unattended upon any two-way street, road, avenue or other public way within the city shall be so parked or stopped in the direction of the flow of traffic with the right hand wheels parallel to and within twelve inches (12") street side of the right hand curb or edge of the roadway. Every vehicle parked or standing unattended upon any one-way street, road, avenue or other public way within the city shall be so parked or stopped in the direction of the flow of traffic with its right hand wheels parallel to and within twelve inches (12") street side of the right hand curb or edge of the roadway, or its left hand wheels parallel to and within twelve inches (12") street side of the left hand curb or edge of the roadway, whichever is applicable. Where parking stalls or spaces are marked or designated as such on the curbs or pavement, vehicles shall be parked or stopped only within such designated stalls or spaces with the vehicle headed in the direction of the flow of traffic or an angle indicated by appropriate markings.

(2) The city manager is hereby authorized to allow parking against the traffic flow on designated streets if, in the determination of the city manager, a greater traffic hazard is avoided by allowing parking against the flow of traffic. Such designation shall be in writing with one copy filed with the chief of police and one copy filed in the office of the city clerk.

(3) The city manager is hereby authorized to designate portions of rights-of-way for parking if in the determination of the city manager there is a shortage of available on- and off-street parking and the allowance off such parking will not constitute a traffic safety hazard. The city manager can impose such conditions on parking in such areas as reasonable to protect the right-of-way and to ensure the traffic safety. (1969 Code, § 24-178, as amended by Ord. #03-2012, April 2012)

15-606. **Prohibited or limited parking on specific streets.** The city manager is hereby authorized to designate streets or portions of streets where the parking of vehicles is prohibited or limited and to erect signs or other markings giving notice of such prohibition or limitation. It shall be unlawful for any person to park any vehicle in violation of any such sign or marking. (1969 Code, § 24-179)

15-607. **Removal of vehicles obstructing traffic.** If a vehicle obstructing traffic upon any street is unattended, the city manager is hereby authorized to provide for the removal of such vehicle to a garage or other place of safety at the expense of the owner. The owner shall be liable for the costs of towing and storing, notwithstanding that the vehicle was parked by another or that the vehicle was initially parked in a safe manner but subsequently became an obstruction or a hazard. (1969 Code, § 24-180)
15-608. Prohibited parking of nonmotorized vehicles. The city manager shall have the authority to prohibit the parking of nonmotorized vehicles upon the city's streets where limited parking is available upon such streets or where the parking of such vehicles would cause traffic hazard, congestion, and/or undue inconvenience to the operators of motor vehicles seeking places to park their vehicles. (1969 Code, § 24-181)

15-609. Prohibited parking of any motorized or nonmotorized vehicle for sale on city streets or rights-of-way. No person shall park any vehicle, boat, trailer, camper, or other motorized or nonmotorized vehicle upon any city street, right-of-way, or parking space, with any sign affixed thereto or any writing, marking, or other designation upon such vehicle indicating the vehicle is for sale. (1969 Code, § 24-182)

15-610. Reserved parking for disabled persons. (1) The city manager is hereby authorized to designate by the installation of appropriate signs, parking spaces for the exclusive use of disabled drivers in those publicly maintained areas where a significant demand for parking by such persons exists. This may include areas in residential and business, as well as publicly owned parking lots.

(2) Any merchant or owner of a privately-owned parking lot for use by the general public is hereby authorized to designate by the installation of appropriate signs, parking spaces for the exclusive use of disabled drivers.

(3) Where signs bearing the official wheelchair disabled symbol are erected designating reserved parking spaces for disabled drivers, no person except disabled drivers or qualified operators in the presence of and acting under the express direction of a disabled driver shall stand or park a vehicle in any such space, and provided further that only vehicles displaying approved license plates, or placards appropriately displayed on said vehicles shall park in such places. The official wheelchair symbol shall be displayed on a sign located between three (3) feet and six (6) feet from the ground. One sign will be provided for each parking space.

(4) Any violation of § 15-610 shall be punishable by a penalty of one hundred dollars ($100.00). (1969 Code, § 24-183, as amended by Ord. #13-97, Aug. 1997)

15-611. Loading and unloading zones. No person shall park a vehicle for any purpose or period of time other than for the expeditious loading or unloading of passengers or merchandise in any public place marked by the city as a loading zone. (1969 Code, § 24-184)

15-612. Public endangerment or emergency conditions. Upon conditions constituting a danger to the public health, welfare or safety, or when necessary to preserve the peace and order of the city, the city manager may
install temporary traffic control devices and/or remove obstructions from the public right-of-way. (1969 Code, § 24-185)

15-613. Emergency parking signs. Whenever any traffic congestion is likely to result from the holding of public or private assemblages, gatherings or functions, or when necessary to preserve public health, welfare or safety, the city manager is authorized to erect or post temporary signs indicating that the operation, parking or stopping of vehicles is prohibited. Such signs shall remain in place only during the existence of such emergency and shall be removed promptly thereafter.

When signs authorized by the provisions of this section are in place, no person shall operate, park or stop any vehicle contrary to the directions and provisions of such signs. (1969 Code, § 24-186)

15-614. Exemption. The provisions of this chapter regulating the parking or standing of vehicles shall not apply to a vehicle of a city, county or state, or public utility while necessarily in use for construction or repair work on a street or utilities located therein. (1969 Code, § 24-187)

15-615. Registered owner presumption; owner responsibility. In a prosecution of a vehicle owner charging a violation of a restriction of parking, proof that the vehicle at the time of the violation was registered to the defendant shall constitute a presumption that the defendant was then the owner in fact and that the owner was the driver of the vehicle at the time of the violation. This presumption may be rebutted by proof that the vehicle was being used by another without the owner's consent. (1969 Code, § 24-188)

15-616. Parking of junked vehicles in on-street parking spaces prohibited. (1) No person shall park any junked vehicle upon any on-street parking space.

(2) This section shall not apply to any junked vehicle which becomes disabled in such a manner and to such an extent that it is impossible to avoid stopping and temporarily leaving such disabled vehicle in such position, provided however that such disabled vehicle be removed within forty-eight (48) hours. (Ord. #11-02, June 2002)

15-617. Parking or recreational vehicles and utility trailers in marked and unmarked on-street parking spaces. (1) It is unlawful for any person to park or store any recreational vehicle or utility trailer within marked or unmarked on-street parking on any public street. It is also unlawful for the

registered owner of a recreational vehicle or utility trailer to allow another person to park or store such vehicle or trailer within marked or unmarked on-street parking on any public street.

(2) Notwithstanding any provisions to the contrary, an operational recreational vehicle or utility trailer may be temporarily legally parked or stored within marked or unmarked on-street parking on any public street for a period not to exceed seven (7) consecutive days for the purpose of loading, unloading, trip preparation, or minor, routine maintenance and repair. However, vehicles temporarily parked in accordance with this section may not be relocated to another on-street location after the expiration of the allowed temporary parking period, and at no time shall any un-mounted camper enclosure, personal water craft carrier, or boat not mounted on a utility trailer be parked or stored within any designated on-street parking space.

(3) There are no "grandfathered" rights associated with this section.

(4) There shall be a thirty (30) day grace period from the effective date of the ordinance comprising this section to allow city staff time to educate the public on the requirements of the section. (as added by Ord. #01-2012, March 2012)

16-106. **Installation of driveway approaches by city.** Upon request of any owner or occupier of premises adjacent to a street, the city manager is authorized to use city forces and equipment in the removal of curbs and the installation of the approach across the gutter for entry to a driveway, for fee to be paid by the person requesting the work, as established by the city council. (1969 Code, § 20-7)

16-108. **Removal of building materials from gutters.** In the event that any person performing or having work done under a permit issued under this chapter places, in the gutters of the streets, any concrete, asphalt or other road building materials in such a manner as to interfere with the primary function of such gutter in providing surface drainage along the street, it shall be the duty of the city manager to notify the person responsible therefor, in writing, that the same must be removed within ten (10) days and that upon failure so to do, the city manager will bring about the removal of such obstruction and assess the total cost of such removal to the person responsible for such obstruction. (2) Existing streets. Existing residential streets shall be maintained by the city with resurfacing and stabilizing of shoulders as needed at no direct cost to abutting property owners. When the public necessity indicates, as determined by city council upon recommendation of the Oak Ridge Regional Planning Commission, improvement of the street will be made by the city with the construction of curbs and gutters, storm drainage and the proper width and with correction of lines-of-sight at intersections, all as indicated in the subdivision regulations according to the following:
   (a) The city shall pay the entire cost of correcting vertical curves to improve lines-of-sight.
   (b) The costs for curbs and gutters, storm drainage, widening of the street to the prescribed width, and resurfacing are to be shared by the city and the benefitted abutting property owners. The portion of costs to be borne by benefitted abutting property owners shall not exceed fifty percent (50%) of the total costs but this may be decreased by the instrument establishing the assessment district. Within the limits above, the proportion of costs to be borne by each benefitted abutting property owner is to be determined in the manner provided by the state statutes. (1969 Code, § 20-11)

16-112. Development and maintenance–collector streets and thoroughfares. (1) New streets. The cost of these sidewalks is to be borne by the city.

(2) Other areas. New sidewalks in areas other than around community-serving facilities are to be provided for through appropriate proceedings for an assessment district. The cost of these sidewalks is to be borne on a fifty-fifty basis between the city and the property owner, with the city to bear fifty percent (50%) thereof, and fifty percent (50%) charged to any adjoining property owners in the manner provided by the state statutes.

SIGNS IN RIGHTS-OF-WAY

SECTION
16-201. Definition.
16-202. When permitted.
16-203. Removal.

16-201. Definition. A "sign," within the meaning of this chapter, is any structure defined as a "sign" under the zoning code of the city. (1969 Code, § 20-21)

16-202. When permitted. (1) Except as otherwise provided herein, it shall be unlawful for any person to place, maintain or to continue the use of any sign within the public right-of-way of any road or street or other public way within the city. Approved signs erected in sign districts pursuant to permits issued under the provisions of the zoning code of the city will be permitted.

(2) Where the right-of-way reserved, excepted or granted to the city exceeds one hundred fifty (150) feet in width, the city manager, on application, may approve the erection of signs with the right-of-way, provided such approval shall not be granted for any sign within seventy-five (75) feet of the center line of such right-of-way.

(3) This section shall not apply to publicly owned signs such as traffic-control signs. (1969 Code, § 20-22)

16-203. Removal. The city manager is authorized and directed to remove any sign which is being maintained or continued in use in violation of this chapter; provided, however, that no sign shall be removed until the city manager has given the owner or the person having control of the same not less than ten (10) days' notice in writing of his or her intention to remove such sign. (1969 Code, § 20-23)
CHAPTER 3
LINES OF SIGHT AT INTERSECTIONS

SECTION
16-301. Definitions.
16-302. Designated.
16-303. Intersection is hazardous if safe line cannot be established.
16-304. Order to remove obstructions.
16-305. Removal of obstruction by city.

16-301. Definitions. For the purposes of this chapter, the following definitions shall apply:

(1) "Minor street." The term "minor street" means any street upon which the driver of a motor vehicle is required to come to a full stop by a stop sign or other similarly used device before entering the intersection.

(2) "Safe line of sight." A "safe line of sight" is defined as the field of unobstructed vision sufficient to observe clearly any object of a height of four (4) feet which is in any part of the traffic lane, the flow of which is approaching the intersection between the sighting position and the distance specified in § 16-302.

(3) "Traffic way." The term "traffic way" means the entire width between property lines (or boundary lines), of which any part is open to the use of the public for purposes of vehicular traffic as a matter of right or custom. (1969 Code, § 20-34)

16-302. Designated. The line of sight on the intersecting street shall be a distance measured in feet equal to the sum of eight (8) times the posted speed limit on the major street, measured to the left of a projection of the curbline nearest the sighting position on a minor street, and a distance in feet equal to the sum of ten (10) times the speed limit on the major street to the right of such projection. (1969 Code, § 20-35)

16-303. Intersection is hazardous if safe line cannot be established. It is hereby declared that if, at any intersection of two (2) streets, the minor of which from a height of fifty-four (54) inches above ground level, at a sighting position on the pavement eight (8) feet from the right-hand curb to a driver facing the intersection and eight (8) feet from the curbline of the intersecting street (or if either of these streets has no curb, from the edge of the traffic way), a safe line of sight both to his or her right and to his or her left for the driver of a vehicle stopped at that point cannot be established, such intersection shall constitute a hazardous intersection. (1969 Code, § 20-36)

16-304. Order to remove obstructions. The city manager shall have the authority, when hazardous intersections, as designated in this chapter, are
brought to his or her attention, to order the owners, or other persons in charge of the property on which weeds, flowers, trees, fences, outbuildings, earth-banks or other obstructions exist, other than dwelling houses or store buildings, to remove such obstructions within ten (10) days after receipt of such order. If, after a reasonable effort has been made to serve such order of removal, it is found impossible to do so, because the owner or other person in charge of the property has removed from the city, the city manager may mail the order by registered mail to the last known address of such owner or person in charge. After a lapse of twenty (20) days following such mailing, unless the order is returned as unclaimed, the required waiting period shall have expired. In the event that the order is returned by the postal authority as unclaimed, no further waiting period shall be required. (1969 Code, § 20-37)

16-305. **Removal of obstruction by city.** Upon the expiration of the waiting period required by § 16-304, the city manager may, if the order given pursuant to § 16-304 has not been complied with at that time, order the removal of the obstruction by employees of the public works department. The city shall charge the owner or other person in charge of the property involved for the cost of this service. (1969 Code, § 20-38)

(3) Whenever the city manager finds that a situation exists which endangers the public health he or she may, as an emergency measure, correct the same without any notice to the owner or occupant of the premises and, upon completion of the work, he or she shall determine the reasonable cost thereof and bill the owner or tenant therefor. The city, therefore, shall use the following procedures for providing special service to the household of residents with permanent mobility impairment serviced under its refuse collection contract, which special service shall provide back door recycle collection. Upon application, an exception may be granted by the city manager when the following criteria have been established:

holes, pumping stations and treatment, purification and disposal plants. (1969 Code, § 25-1)

18-102. Right of city to own, construct, operate, etc., waterworks and sewerage systems. The city shall acquire and have the right to own, construct, extend, equip, operate and maintain, within or without the corporate limits of the city, a waterworks system and a sewerage system, for the purpose of providing water and sewerage service for the use and benefit of its inhabitants and for the use and benefit of persons, firms and corporations, including municipal corporations and inhabitants thereof, whose residences or places of business are located outside the territorial boundaries of the city. (1969 Code, § 25-2)

18-103. Rules and regulations for operation of waterworks and sewerage systems. The city, by ordinance, shall promulgate and establish rules and regulations governing the operation and maintenance of the waterworks system and the sewerage system. These rules and regulations shall be kept on file, open to the public, at the offices of the municipal utilities office. Nothing in this code or the ordinance adopting this code shall be deemed to affect the validity of any ordinance promulgating rules and regulations for the operation and maintenance of the waterworks system and the sewerage system, and all such ordinances and rules and regulations are hereby recognized as continuing in full force and effect. (1969 Code, § 25-3)

18-104. Rates, fees and charges for water and sewer service. (1) The city by ordinance, shall prescribe, establish and collect rates, fees and charges for the use of the service rendered by the waterworks and sewerage systems to be paid by the beneficiaries of the service. Such rates and charges shall be adjusted so that such systems shall be and always remain self-supporting. The rates, fees, and charges prescribed also shall be such as will produce revenues at least sufficient:

(a) To pay when due all bonds and interest thereon, for the payment of which such revenues are or shall have been pledged, charged or otherwise encumbered, including reserves therefor;

(b) To provide for all expenses of operation and maintenance of such systems, including reserves therefor; and

(c) Reserves for expansion or revision.

(2) Nothing in this code or the ordinance adopting this code shall be deemed to affect the validity of any ordinance establishing or otherwise relating to rates, fees and charges for services rendered by the waterworks and sewerage systems, and all such ordinances are hereby recognized as continuing in full force and effect. (1969 Code, § 25-4)
18-105. **Rules, regulations and rate schedules to be part of contract for and apply to all water and sewer services.** The rules and regulations and the schedule of rates and charges promulgated and established pursuant to this chapter shall constitute a part of all contracts for receiving services from the waterworks and sewerage systems and also shall apply to all such services received from the city, whether the services are based upon the contract, agreement, signed application or otherwise. (1969 Code, § 25-5)

18-106. **Rate schedule to govern in case of conflict with rules and regulations adopted under title.** In case of conflict between any provision of any rate schedule and the rules and regulations promulgated under this title, the rate schedule shall apply. (1969 Code, § 25-6)

18-107. **Water supply cross connections, auxiliary intakes, bypasses or interconnections.** (1) The following definitions and terms shall apply to the interpretation and enforcement of this section:

   (a) **"Public water supply."** The waterworks system furnishing water throughout the City of Oak Ridge for general use and which supply is recognized as the public water supply by the Tennessee Department of Public Health.

   (b) **"Cross-connection."** Any physical connection whereby the public water supply is connected with any other water supply system, whether public or private, either inside or outside of any building or buildings, in such manner that a flow of water into the public water supply is possible either through the manipulation of valves or because of ineffective check or back-pressure valves, or because of any other arrangement.

   (c) **"Auxiliary intake."** Any piping connection or other device whereby water may be secured from a source other than that normally used.

   (d) **"Bypass."** Any system of piping or other arrangement whereby the water may be diverted around any part or portion of a water purification plant, or safety device.

   (e) **"Interconnection."** Any system of piping or other arrangement whereby the public water supply is connected directly with a sewer, drain, conduit, pool, storage reservoir, or other device which does or may contain sewerage or other waste or liquid which would be capable of imparting contamination to the public water supply.

   (f) **"Person."** Any and all persons, natural or artificial, including any individual firm or association, and any municipal or private corporation organized or existing under the laws of this or any other state or country.

   (2) It shall be unlawful for any person to cause a cross-connection, auxiliary intake, bypass, or interconnection to be made, or allow one to exist for
any purpose whatsoever unless the construction and operation of the same have been approved by the city manager or his or her designee and a permit for the same has been received. The operation of such cross-connection, auxiliary intake, bypass or interconnection shall at all times be subject to the provisions of this section, the city cross-connection control plan, and all applicable state laws and regulations.

(3) Any person whose premises are supplied with water from the public water supply, and who also has on the same premises a separate source of water supply or who stores water in an uncovered or unsanitary storage reservoir from which the water stored therein is circulated through a piping system, shall file with the city manager or his or her designee certification that no unapproved or unauthorized cross-connections, auxiliary intakes, bypasses, or interconnections exist nor will exist on the premises.

(4) It shall be the duty of the city manager or his or her designee to inspect all properties served by the public water supply where there is a likelihood, reason or cause to believe cross-connections with the public water supply exist. In the event the city manager or his or her designee shall be refused the right to inspect such properties, such refusal shall be reported to the city attorney or staff attorney who shall prepare and obtain a search warrant for such premises from the city judge.

(5) Any person who has cross-connections, auxiliary intakes, bypasses, or interconnections in violation of the provisions of this section as of the effective date shall comply with the provisions of this section within ninety (90) days after this section becomes effective; provided, however, for good cause shown, the city manager or his or her designee may extend the time for compliance where such extension does not jeopardize the public health, safety and welfare.

(6) Where the use of the water supplied a premises by the city is such that it is deemed:

(a) Impractical to provide an effective air-gap separation, or
(b) Where the owner and/or occupant of the premises cannot or is not willing to demonstrate to the official in charge of the system, or his or her designated representative, that the water use and protective features of the plumbing are such as to pose no threat to the safety or potability of the water supply, or
(c) Where the nature and mode of operation within a premises are such that frequent alterations are made to the plumbing, or
(d) If there is a likelihood that protective measures may be subverted, altered or disconnected, the city manager or his or her designee shall require the use of an approved protective device on the service line serving the premises so as to ensure that any contamination that may originate in the customer's premises is contained therein. The protective device shall be a reduced pressure zone type backflow preventer approved by the Tennessee Department of Public Health as to manufacturer, model and size. The method of installation of backflow
protective devices shall be approved by the city manager or his or her designee prior to installation and shall comply with the criteria set forth by the Tennessee Department of Public Health. The installation shall be at the expense of the owner or occupant of the premises.

The city manager or his or her designee shall have the right to inspect and test the device or devices on an annual basis or at other reasonable times whenever deemed necessary by the city manager or his or her designee.

Where the use of water is critical to the continuance of normal operations or protection of life, property, or equipment, duplicate units shall be provided by the customer to avoid the necessity of discontinuing water service to test or repair the protective device or devices. Where only one unit is installed and the continuance of service is critical, the city manager or his or her designee shall notify, in writing, the occupant of the premises of plans to discontinue water service and arrange for a mutually acceptable time to test and/or repair the device. The water system shall require the occupant of the premises to make all repairs indicated promptly, and the expense of such repairs shall be borne by the owner or occupant of the premises. These repairs shall be made by qualified and duly licensed personnel.

(7) Potable water supplies available on the properties served by the public water supply shall be protected from possible contamination as specified herein. Any water outlet which could be used for potable or domestic purposes and which is not supplied by the potable system must be labeled in a conspicuous manner as: "WATER UNSAFE FOR DRINKING." Minimum acceptable sign shall have black letters one-inch high located on red background.

(8) Any person who fails, neglects or refuses to comply with any of the provisions of this section shall be deemed guilty of a misdemeanor and, upon conviction therefor, shall be subject to a fine of no more than fifty dollars ($50.00) and to ninety (90) days in jail. Each day of continued violation shall constitute a separate offense.

(9) In addition to the fines and penalties provided herein, when any cross-connection, auxiliary intake, bypass, or interconnection is found in violation of this section, and such constitutes an imminent threat to the public health, safety or welfare, the city manager shall immediately disconnect the public water supply to such premises. Where such exists, but does not constitute an imminent threat to the public health, safety or welfare, the city manager shall notify the occupier or water service customer for such premises that unless such condition(s) are removed or corrected within seventy-two (72) hours, connection to the public water supply shall be disconnected. Such notice shall be delivered to the premises where such condition exists and if the occupier or water service customer is not present, it shall be posted on the front door of the premises.

Such notice shall include notification to the occupier or water service customer that he or she may request a hearing before the city manager within the seventy-two (72) hour period, and if such a request is made a hearing shall
be held within seventy-two (72) hours thereafter. At the conclusion of such hearing, the city manager shall issue his or her decision in writing overturning, modifying or sustaining his or her previous notice and a copy shall be delivered to the occupier or water service customer or left at his or her premises if he or she is not there. Anyone whose water has been disconnected because of an imminent threat to public health, safety or welfare shall similarly be entitled to a hearing, provided the water supply shall remain disconnected until the city manager renders his or her decision or is otherwise convinced no imminent threat to the public health, safety, or welfare continues to exist.

(10) That should any part or parts of this section be declared invalid for any reason, no other part, or parts, of this section shall be affected thereby. (1969 Code, § 25-7)

18-108. Deposit of septic tank waste in sewers. (1) It shall be unlawful for any person to remove sludge or other waste materials from septic tanks and deposit the same in the city, except in the sanitary sewer system at a place designated for such purpose by the city manager. The sanitary sewer system will be opened by employees of the city, as directed by the city manager, and waste materials from septic tanks may be deposited therein under the supervision of the city manager or his or her designated representative.

(2) The city manager is authorized and directed to impose and collect a charge in the amount of five dollars ($5.00) for each deposit of sludge or other waste material described in subsection (1) into the sanitary sewer system of the city. All such charges so collected shall be deposited in the city's sanitary sewer fund. (1969 Code, § 25-8)

18-109. Stopping or interfering with flow of surface water—on city property or easements. It shall be unlawful for any person to stop or interfere with the flow of surface waters along or upon terraces, channels, pipes or swale ditches located upon property owned by or easements reserved to the city, by destroying, shifting, damaging or blocking the same. (1969 Code, § 25-9)

18-110. Stopping or interfering with surface water—on private property. It shall be unlawful for any person to stop or interfere with the flow of surface water along or upon a ditch, natural drain, or channel on privately-owned property where the instrument which is the source of title to the land and the plat referred to therein describes a ditch or natural drain and such instrument contains a provision that the grantee therein shall take no action which stops or interferes with the flow of surface water through the same. (1969 Code, § 25-10)

18-111. Shifting or rechanneling ditches, drains, etc., on private property. It shall be unlawful for any person to shift or rechannel any ditch, natural drain, pipe, or terrace located on privately-owned property, where the
same is located on the property by reference to the plat of the same and is referred to in the instrument which is the source of title, unless he or she shall first apply to and obtain from the city a permit authorizing such shift or change. Application for a permit shall be on a form provided by the city manager and must be accompanied by details with respect to the extent of the change or shift. The city manager or his or her authorized representative shall approve the specifications and provide for inspection to insure that the completed work conforms to such specifications. (1969 Code, § 25-11)
CHAPTER 2

WATER AND SEWER EXTENSIONS

SECTION

18-201. Definitions.
18-202. General policies of city and intent of chapter.
18-203. Methods of financing projects providing more than local service.
18-204. Chapter does not affect other laws and regulations.

18-201. Definitions. For the purposes of this chapter, the following definitions apply:
   (1) "Local service sanitary sewer line" means an eight (8) inch sanitary sewer line with utility access holes designed and installed in accordance with state and city standards.
   (2) "Local service waterline" means an eight (8) inch waterline, including fire hydrants, fire hydrant valves and curb stops, designed and installed in accordance with state and city standards. (1969 Code, § 25-22)

18-202. General policies of city and intent of chapter. Any developer developing land within an area served by or to be served by any interceptor sewer system or water system shall finance within the subdivision those costs of a sanitary sewer system that are acceptable by:
   (1) Recognized engineering principles as a normal sanitary sewer system for the subject area in conformity with the state and city requirements, and
   (2) The policies set out in this chapter.

Developers shall, in addition, be liable for that portion of the additional costs incurred by the city in extension of the interceptor sewer system or water main as set forth in subsequent sections of this chapter. It is also the intent of this chapter that charges shall be established so that all recoverable city expenditures shall be recovered within ten (10) years after the start of any sewer or water service project. This ten (10) year period does not mean that the collection of the recoverable expenditures is limited to a ten (10) year period. The time shall be extended until all recoverable costs are collected. Furthermore, it is the intent of the city to establish methods of financing and facilitating the economical extension of the water and sewer lines wherever, in the opinion of the city, such extensions are warranted. Furthermore, it is intended that the authority for timing the construction and financing of any sewer or water systems extension, when it involves city money, shall be reserved for the city. Notwithstanding the timing qualification, it is the intent of the city to participate in and encourage the orderly extension of sewer and water services within the city while assuming such costs as may be determined to properly be the burden of the city. (1969 Code, § 25-23)
18-203. **Methods of financing projects providing more than local service.** The following are three (3) methods for financing sewer and/or water extension projects involving more than local service:

1. A subdivider is required to install all water and sewer lines within the subject subdivision. This includes the engineering and submission for approval of detailed plans and specifications to the city and other agencies required by state statutes or city ordinances. The subdivider is required to finance the total cost of all on-site service lines. When such lines, by city requirements, are larger than local service lines, as defined in this chapter, the extra cost as determined by the city of such lines over and beyond the cost of the local service lines as determined by the city shall be reimbursed from water and sewer fund revenues. The reimbursement shall not begin until after twelve (12) calendar months have passed after this installation has been accepted for maintenance by the city and shall be based on the number of utility customers obtained by the city within the subdivision.

2. When it is determined by the city that the city will construct a sanitary sewer and/or waterline project, and the project would provide more than local service, the city shall recover the cost of the local service from the total area to be served by a calculated fee to be charged against each lot already in existence within the project area or subsequently created. In the case of an existing lot, the charge shall be made at the time of connection to the water or sewer lines. The charge against lots created by subdivision of land within the project area shall be collected from the developer at the time of submission of the subdivision plat for final approval. The calculated fee shall be such as to permit the recovery of the city's funds when a predetermined portion of the serviced area shall have been developed. Even though the city has recovered all of the local service costs, all lots subsequently platted shall be charged the same fee as lots previously platted. The money so collected will be distributed at the end of the city's fiscal year to all lot owners of record within the serviced area on an equal basis, provided such lot owner shall have previously paid the established fee. In the event that the payment per lot would be less than ten dollars ($10.00), the money shall not be distributed but shall be carried over into the next fiscal year.

3. When a developer or other party, with permission of the city, extends or constructs a city sanitary sewer line and/or waterline, regardless of size, and such extended or constructed sanitary sewer and/or waterline provides sewer and/or water service to an area or areas other than the developer's property or project that was not previously provided such service, the city is authorized to enter into an agreement with the developer or other party, on such terms as the parties may agree, to reimburse the developer or other party all or a portion of the cost of the extension or construction of such project. In such event, or in the event the city has extended a sanitary sewer line and/or waterline, regardless of size, the city is additionally authorized to recover all or a portion of the city-incurred cost, including reimbursement cost, from charges
against the total area to be served from such sewer or waterline service. Such agreement and charges for recovery of cost shall be subject to approval of city council.

The charges provided for herein shall be such as to permit the recovery of city-incurred costs when a predetermined portion of the service area shall have been developed. Recovery of city-incurred costs from a lot already in existence at the time of the construction or extension or the sewer and/or waterline shall be a charge made at the time of connection to the water or sewer lines. The charge against lots created by subdivision of land within the project area shall be collected from the owner or developer at the time of submission of the subdivision plat for final approval. Even though the city has recovered all city-incurred costs, all lots subsequently platted within the service area shall be charged the same fee as lots previously platted. The money so collected will be distributed at the end of the city's fiscal year to all lot owners of record within the service area on an equal basis, provided the charge shall have been previously paid for such lot. In the event the payment per lot would have been less than ten dollars ($10.00), the money shall not be distributed but shall be carried over into the fiscal year.

The provisions of this subsection are permissive, and nothing herein shall require the city to enter into any agreement, to require payment to the developer or other party, to require charges against lots, nor to authorize the extension of any city sewer or waterline without permission of the city. (1969 Code, § 25-24)

18-204. **Chapter does not affect other laws and regulations.** This chapter shall not be interpreted to supersede or modify in any way the subdivision regulations of the city or state regulations or the construction methods prescribed in other regulations dealing with the subject matter.

The provisions of this chapter shall be cumulative and nothing shall mean that the rules and regulations of the planning commission for subdivision improvements, including water and sewer lines, are waived. All engineering permits, inspections and state requirements provided for in other regulations and state statutes remain in effect. (1969 Code, § 25-25)
CHAPTER 3

(13) "Daily maximum" means the arithmetic average of all effluent samples for a pollutant (except pH) collected during a calendar day.

(14) "Daily maximum limit" means the maximum allowable discharge limit of a pollutant during a calendar day. Where daily maximum limits are expressed in units of mass, the daily discharge is the total mass discharged over the course of the day. Where daily maximum limits are expressed in terms of a concentration, the daily discharge is the arithmetic average measurement of the pollutant concentration derived from all measurements taken that day.

(15) "Garbage" means solid wastes from the preparation, cooking and dispensing of food and from the handling, storage and sale of produce.

(16) "Grab sample" means a sample that is taken from a wastestream without regard to the flow in the wastestream and over a period of time not to exceed fifteen (15) minutes.

(20) "Industrial wastewater" means the wastewater from industrial processes, trade, or business as distinct from domestic or sanitary wastes.

(21) "Instantaneous limit" means the maximum concentration of a pollutant allowed to be discharged at any time, determined from the analysis of any discrete or composited sample collected, independent of the industrial flow rate and the duration of the sampling event.

(22) "Interference" means a discharge that, alone or in conjunction with a discharge or discharges from other sources, inhibits or disrupts the POTW, its treatment processes or operations or its sludge processes, use or disposal; or exceeds the design capacity of the treatment works or the collection system.

(i) The building, structure facility, or installation is constructed at a site at which no other source is located; or

(ii) The building, structure, facility, or installation totally replaces the process or production equipment that causes the discharge of pollutants at an existing source; or

(iii) The production of wastewater generating processes of the building, structure, facility, or installation are substantially independent of an existing source at the same site. In determining where these are substantially independent, factors such as the extent to which the new facility is integrated with the existing plant, and the extent to which the new facility is engaged in the same general type of activity as the existing source, should be considered.

(b) Construction on a site at which an existing source is located results in a modification rather than a new source if the construction does not create a new building, structure, facility, or installation meeting the
criteria of (a)(ii) or (a)(iii) above but otherwise alters, replaces, or adds to existing process or production equipment.

(c) Construction of a new source as defined under this section has commenced if the owner or operator has:

(36) "Pretreatment" means the reduction of the amount of pollutants, the elimination of pollutants, or the alteration of the nature of pollutant properties in wastewater prior to, or in lieu of, introducing such pollutants into the POTW. This reduction or alteration can be obtained by physical, chemical,
or biological processes; by process changes; or by other means, except by diluting
the concentration of the pollutants unless allowed by an applicable pretreatment
standard.

(37) "Pretreatment requirements" means any substantive or procedural
requirement related to pretreatment imposed on a user, other than a
pretreatment standard.

(38) "Pretreatment standards" means all applicable rules and
regulations contained in the code of federal regulations as published in the
federal register, under section 307 of Public Law 92-500 and in the Tennessee
Pretreatment Requirements, chapter 1200-4-14.

(39) "Publicly Owned Treatment Works or POTW" means a treatment
works as defined by section 212 of the Act, which is owned in this instance by
the City of Oak Ridge. This definition includes any sewer that conveys
wastewater to the treatment works.

(40) "Sewage" means a combination of the water-carried wastes from
residences, business buildings, institutions and industrial establishments,
together with such ground, surface and storm water as may be present.

(41) "Shall" is mandatory.

(42) "Significant industrial user" means: (a) A significant industrial
user means:

(A) Discharges an average of twenty-five thousand
(25,000) gpd or more of process wastewater to the POTW
(excluding sanitary, noncontact cooling and boiler blowdown
wastewater);

(B) Contributes a process wastestream which
makes up five percent (5%) or more of the average dry
weather hydraulic or organic capacity of the POTW
treatment plant; or

(C) Is designated as such by the city on the basis
that it has a reasonable potential for adversely affecting the
POTW's operation or for violating any pretreatment
standard or requirement.

(b) The city may determine that an industrial user subject to
categorical pretreatment standards is a non-significant categorical
industrial user rather than a significant industrial user on a finding that
the industrial user never discharges more than one hundred (100) gallons
per day (gpd) of total categorical wastewater (excluding sanitary,
non-contact cooling and boiler blowdown wastewater, unless specifically
included in the pretreatment standard) and the following conditions are
met:
(i) The industrial user, prior to city's finding, has consistently complied with all applicable categorical pretreatment standards and requirements;

(ii) The industrial user annually submits the certification statement required in § 18-313(5)(b) (see Tennessee Rule 1200-4-14-.12(17)], together with any additional information necessary to support the certification statement; and

(iii) The industrial user never discharges any untreated concentrated wastewater.

(c) Upon a finding that a user meeting the criteria in subsection (a)(ii) of this part has no reasonable potential for adversely affecting the POTW's operation or for violating any pretreatment standard or requirement, the city may at any time, on its own initiative or in response to a petition received from an industrial user, and in accordance with procedures in Tennessee Rule 1200-4-14-.08(6)(f), determine that such user should not be considered a significant industrial user.

(43) "Slug load or slug discharge" means any discharge at a flow rate or concentration, which could cause a violation of the prohibited discharge standards in § 18-308 of this ordinance. A slug discharge is any discharge of a non-routine, episodic nature, including but not limited to an accidental spill or a non-customary batch discharge, which has a reasonable potential to cause interference or pass through, or in any other way violate the POTW's regulations, local limits or permit conditions.

18-305. Use of public sewers required. (1) Disposal of waste. It shall be unlawful for any person to place, deposit, or permit to be deposited on public or private property within the City of Oak Ridge any human or animal excrement or other objectionable waste in such a manner to create a public nuisance or to create a threat or danger to the public health and safety. This section shall not apply to the depositing of animal excrement by livestock or through other generally accepted agricultural activities, nor to the depositing of excrement from household pets, provided such excrement is not deposited nor allowed to accumulate to such an extent as to cause a public nuisance or otherwise to constitute a threat or danger to the public health or safety, and provided further that it shall be unlawful to place, deposit, or to permit to be deposited upon the property of another within the City of Oak Ridge human or animal excrement or other objectionable waste in any amount without the permission of the owner of such property.

(2) Direct discharge prohibited. It shall be unlawful to discharge to any natural outlet within the City of Oak Ridge, or any area under the jurisdiction of said city, any sewage or other polluted waters, except where a federal or state discharge permit has been duly issued and is currently valid for such discharge.

(3) New private disposal systems prohibited. Except as hereinafter provided or as otherwise permitted by ordinance or regulation, it shall be unlawful to construct or maintain any privy, privy vault, septic tank, cesspool, or other private facility intended or used for the disposal of sewage.

(4) City's right to require sanitary facilities. The owner, tenant or occupant of all houses, buildings, improvements or properties used for residential, commercial, industrial or recreational and all other human occupancy purposes which abut upon a street, road, right-of-way or other public way containing a public sanitary sewer shall upon demand by the city install suitable toilet facilities therein and connect the same directly with the proper public sewer in accordance with the provisions of this ordinance and shall cease to use any other means for the disposal of sewage, waste, wastewater, and other polluting matter, provided however the city may waive such requirement in specific cases where it has determined that public sewer service to any particular individual user(s) would be unduly difficult or expensive and that alternative measures of disposal would not be hazardous to public health.
(5) **City's right to require sewer hookup.** The owner, tenant or occupant of all houses, buildings, improvements or properties used for residential, commercial, industrial or recreational and all other human occupancy purposes which abut upon a street, road, right-of-way or other public way containing a public sanitary sewer shall upon demand by the city connect such house, building, improvement or property with the proper public sewer in accordance with the provisions of this ordinance and shall cease to use any other means for disposal of sewage, waste, wastewater or other polluting matter, provided however the city may waive such requirements in specific cases where it has determined that public sewer service to any particular individual user(s) would be unduly difficult or expensive and that alternative measures of disposal would not be hazardous to public health.

(6) **Disposal of private waste by truck.** The superintendent shall designate the locations and times where vacuum or "cess pool" trucks may be discharged, and may refuse to accept any truckload of waste in his absolute discretion where it appears that the waste could interfere with the effective operation of the treatment works or any sewer line or appurtenance thereto. The owner or operator of a truck shall upon request, provide manifest to the POTW that states the source of the domestic waste they wish to discharge, the volume of wastewater from each source, and whether any industrial waste is included in the wastewater.

(7) **Holding tanks.** No person shall discharge any other holding tank waste into the POTW unless he shall have applied for and have been issued a permit by the superintendent. Unless otherwise allowed under the terms and conditions of the permit, a separate permit must be secured for each separate discharge. The permit shall state the specific location of discharge, the time of day the discharge is to occur, the volume of the discharge, and shall limit the wastewater constitutes and characteristic of the discharge. Such user shall pay any applicable charges or fees therefore, and shall comply with the conditions of the permit issued by the superintendent. Provided, however, no permit shall be required to discharge domestic waste from a recreational vehicle holding tank provided such discharge is made into an approved facility designed to receive such waste. (1969 Code, § 25-34, as replaced by Ord. #2-09, Jan. 2009, repealed by Ord. #4-09, March 2009, and replaced by Ord. #5-09, March 2009)

18-306. **Private sewage disposal.** The disposal of sewage by means other than the use of the available public sanitary sewage system shall be in accordance with local, county and state law. The disposal of sewage by private disposal systems shall be permissible only in those instances where service from the available public sanitary sewer system is not available, or where such is otherwise permitted by city ordinance or regulations. (1969 Code, § 25-35, as replaced by Ord. #2-09, Jan. 2009, repealed by Ord. #4-09, March 2009, and replaced by Ord. #5-09, March 2009)
18-307. Building sewers and connections. (1) Connections of building sewers to POTW. No unauthorized person shall uncover, make any connections with or opening into, use, alter, or disturb any public sanitary sewer or appurtenance thereof without first obtaining a written permit from the control authority. The owner or his agent shall make application on a special form furnished by the city. The permit application shall be supplemented by any plans, specifications, or other information considered pertinent in the judgment of the control authority.

(2) Cost of installation. All costs and expenses incident to the installation and connection of the building sewer shall be borne by the property owner. The property owner shall indemnify the city from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer.

(3) Separate sewers required. A separate and independent building sewer shall be provided for every building.

(4) Old building sewers. Old building sewers may be used in connection with new buildings only when they are found, upon examination and test by the city, to meet all requirements of this ordinance.

(5) Construction controls for new sewers. The size, slope, alignment, materials of construction of a building sewer, and the methods to be used in excavating, placing of the pipe, jointing, testing, and back filling the trench, shall all conform to the requirements of the building and plumbing code or other applicable rules and regulations of the city. In the absence of code provisions or in amplification thereof, the materials and procedures set forth in appropriate specifications of the International Plumbing Code and the International Residential Code shall apply.

(6) Sewer entrances to private facilities. Whenever possible, the building sewer shall be brought to the building at an elevations below the basement floor. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary sewage carried by such building drain shall be lifted by an approved means and discharged to the building sewer.

(7) Extraneous water prohibited. No person shall make connection of roof down spouts, exterior foundation drains, areaway drains, or other sources of surface runoff or groundwater to a building sewer or building drain which in turn is connected directly or indirectly to a public sanitary sewer. Exceptions may be made only if such connection is approved by the superintendent for purpose of disposal of polluted surface drainage or ground water. Such connections, if approved, will require a wastewater discharge permit.

(8) Quality of construction. All connections to the city system shall be made gas tight and watertight. Any deviations from the prescribed procedures and materials must be approved by the control authority before installation.

(9) Inspection of sewers. The applicant for the building sewer permit shall notify the control authority or his representative when the building sewer
is ready for inspection and connection to the public sewer. The connection shall be made by or under the supervision of the control authority.

(10) **Excavation safety.** All excavations for building sewer installation shall be adequately guarded with barricades and lights so as to protect the public. Property disturbed in the course of the work shall be restored in a manner satisfactory to the city.

(11) **Condition of private sewers.** Users shall be responsible for the integrity of building sewers on his property. If it is determined that these lines are faulty or in a bad state of repair, such that extraneous storm water can enter the POTW, the city may require the customer to repair his pipes. If the pipes are not repaired within the time period allowed by the city, service shall be terminated.

(12) **Grease control equipment.** All food service establishments, including but not limited to cafes, restaurants, motels, hotels, grocery stores, retirement centers, hospitals, mobile food units, prisons, or other commercial food preparation establishments that cook or prepare food are required to comply with the city's Fats, Oils and Grease (FOG) management policy. Food service establishments shall be required to install a grease interceptor, at the owner's expense within ninety (90) days after notification by the city, if and when the city determines that a grease problem exists which is capable of causing damage or operational problems to structures or equipment in the city sewer system, or if such is otherwise required by city ordinance, the FOG management policy, state law, or federal law. The city shall retain the right to inspect and approve installation of the grease interceptor. The grease interceptor must precede the septic tank on the kitchen waste line if a septic tank is used. The grease interceptor must be designed and installed in accordance with the FOG management policy and shall be easily accessible for cleaning. Grease interceptors and grease traps shall be maintained by the owner or operator of the facility as designated in the FOG management policy requirements. If city employees are required to clean out the city sewer lines as a result of a stoppage resulting from a clogged grease trap, the property owner or operator shall be required to pay the costs of the city's labor and materials required to clean out the sewer lines. The installation of grease interceptors and grease traps shall be in accordance with the FOG management policy and this subsection. All grease waste haulers are required to comply with the FOG management policy requirements.

(13) **Alteration to and obstruction to city sewers.** No person shall obstruct entrance to or operation of the city sanitary sewer system. Existing manholes are to be kept uncovered and accessible at all times. In the event that construction involving the filling of an area around a manhole occurs, the owner of the property, or the person causing the construction to be accomplished shall bear all costs associated with the required adjustment of the sewer manholes. Filling or grading of a property such that storm water concentrates at a manhole will not be permitted. The city reserves the right to enter onto its easements at
all times to maintain its system and to remove or cause to be removed all obstructions to said entrance, and furthermore to assess the costs of the removal of obstructions against the owner thereof.

(14) Maintenance of building sewers. The owner of a building sewer is responsible for the maintenance (and replacement, if required) of the building sewer from his building to either:

(a) The tap on the city main sewer lines; or
(b) The point of confluence with flow from buildings owned by another owner; whichever is shorter.

Should the building sewer cross a public right-of-way before entering the main line sewer, the property owner is responsible for maintenance of the line to the main line; however, should city owned facilities, such as sidewalks, curbs, gutters, or streets be disturbed by the repair of the building sewer, the city will repair said improvements as are reasonable disturbed by the work at no cost to the owner of the property. Operations in a public right-of-way require written permission of the city and proper safety provisions including but not limited to traffic control as outlined in the Manual of Uniform Traffic Control adopted by the State of Tennessee. (1969 Code, § 25-36, as replaced by Ord. #2-09, Jan. 2009, repealed by Ord. #4-09, March 2009, replaced by Ord. #5-09, March 2009, and amended by Ord. #9-11, June 2011)

18-308. Prohibitions and limitations on wastewater discharge.

(1) Requirements of wastewater permits. (a) No person shall discharge or cause to be discharged into the City of Oak Ridge POTW any wastewater other than domestic sewage resulting from normal human habitation including food preparation activities unless he holds a wastewater discharge permit as defined in § 18-310 of this ordinance. This section shall not apply to existing sources until they are notified of its requirement in writing.

(b) Persons discharging radionuclides only in addition to domestic sewage are required to obtain a wastewater treatment permit unless:

(i) Material discharged is characterized by a half-life of less than ten (10) days, and a lack of significant alpha activity; and
(ii) At no point along the collection system is activity more than double background levels at the surface with all manholes closed and the system functioning normally; and
(iii) No more than five hundred (500) microcuries of material are discharged per hour measured at the point of discharge into the wastewater collection system to a maximum of three thousand five hundred (3,500) microcuries per day.

It is the responsibility of the discharging party to arrange for verification of these limits within five (5) days of a written request to do so by the city.
(c) The control authority may waive the requirements for a wastewater discharge permit on a case-by-case basis for dischargers whose effluent does not violate the criteria for domestic sewage as established by the controlling agency and who, furthermore, are not categorical users. Notwithstanding the following, existing non-permitted dischargers or dischargers who have had the permit requirement waived may be required to obtain a discharge permit upon sixty (60) days notification by the controlling authority based on the observed character of the user's operations or his waste stream or suspected impact on the POTW or other factors which the control authority may define.

(d) In order to avoid wastewater influent to the treatment plant which creates adverse effects, or interferes with any wastewater treatment or collection processes, or creates any hazard in receiving waters or results in the city being in violation of applicable effluent standards including sludge disposal standards, the control authority shall establish and amend wastewater effluent limits as deemed necessary. Limits for certain parameters are set as protection criteria for the POTW. Discharge limits for industrial users will be set in discharge permits as outlined in § 18-310 of this ordinance. Such limits will be calculated based on the anticipated ability of the plant to absorb specific wastewater constituents without violation of its NPDES permit, safety of the public, and/or disruption of plant operations including sludge disposal; not to exceed, however, federal limits where applicable.

(e) Dilution. No user shall ever increase the use of process water, or in any way attempt to dilute a discharge, as a partial or complete substitute for adequate treatment to achieve compliance with a discharge limitation unless expressly authorized by an applicable pretreatment standard or requirement. The superintendent may impose mass limitations on users who are using dilution to meet applicable pretreatment standards or requirements, or in other cases when the imposition of mass limitations is appropriate.

(2) Prohibitions on wastewater discharge. Regardless of permit status, no person shall discharge or cause to allow to be discharged into the City of Oak Ridge POTW or any connected treatment facilities any waste which contains any of the following:

(a) Oils and grease. Fats, wax, grease or oils of animal or vegetable origin in concentrations of greater than one hundred (100) mg/l, whether emulsified or not, or containing substances which may solidify or become viscous at temperatures between thirty-two (32) degrees and one hundred fifty (150) degrees F (zero (0) degrees and sixty-five (65) degrees C) at the point of discharge into the system.

(b) Explosive mixtures. Liquids, solids, or gases which by reason of their nature or quantity are, or may be, sufficient to cause a fire or explosion hazard or be injurious in any other way to the POTW or to
the operation of the system. At no time shall two (2) successive readings on an explosion hazard meter, at the point of discharge into the sewer system, be more than five percent (5%) nor any single reading over ten percent (10%) of the Lower Explosive Limit (LEL). Wastestreams with a closed cup flashpoint of less than one hundred forty (140) degrees Fahrenheit or sixty (60) degrees Centigrade using the test methods specified in 40 CFR 261.21. Prohibited materials included, but are not limited to, gasoline, kerosene, naphtha, benzene, toluene, xylene, ethers, alcohols, ketones, aldehydes, peroxides, chlorates, perchlorates, bromates, carbides, hydrides and sulfides.

(c) Noxious materials. Noxious or malodorous solids, liquids or gases, which, either singly or by interaction with other wastes, are capable of creating a public nuisance or hazard to life, or are or may be sufficient to prevent entry into a sewer for its maintenance and repair.

(d) Improperly shredded garbage. Garbage that has not been ground or comminuted to such a degree that all particles are one-half inch (1/2") or less in greatest dimension and will be carried freely in suspension under flow conditions normally prevailing in the public sewers.

(e) Radioactive wastes. Radioactive wastes or isotopes of such half-life or concentration that they are in noncompliance with regulations issued by the appropriate authority having control over their use and which will or may cause damage or hazards to the POTW or personnel operating the system.

(f) Solids or viscous wastes. Solid or viscous waters which will or may cause obstruction to the flow in a sewer, or other interference with the proper operation of the POTW. Prohibited materials include, but are not limited to, grease, uncommingled garbage, animal guts or tissues, paunch manure, bones, hair, hides or fleshings, entrails, feathers, ashes, cinders, sand, spent lime, stone or marble dust, metal, glass, straw, shavings, grass clippings, rags, spent grains, spent hops, waste paper, wood, plastic, tar, asphalt residues, residues from refining or processing of fuel or lubricating oil, and similar substances.

(g) Excessive discharge rate. Wastewaters at a flow rate which is excessive relative to the capacity of the treatment works or which could cause a treatment process upset and subsequent loss of treatment efficiency; or wastewaters containing such concentrations or quantities of pollutants that their introduction into the treatment works would cause interference.

(h) Toxic substances. Any toxic substances, chemical elements or compounds, phenols or other taste- or odor-producing substances, or any substances in amounts which may interfere with the biological processes or efficiency of the treatment works, or that will pass through
the treatment works in concentrations which would cause the POTW to exceed its NPDES permit limits.

(i) Unpolluted waters. Storm water, surface water, groundwater, artesian well water, roof runoff, subsurface drainage, swimming pool drainage, condensate, deionized water, noncontact cooling water, and unpolluted wastewater, unless specifically authorized by the superintendent.

(j) Discolored materials. Wastewater which imparts color which cannot be removed by the treatment process, such as, but not limited to, dye wastes and vegetable tanning solutions, which consequently imparts color to the treatment plant's effluent, thereby violating the city's NPDES permit.

(k) Corrosive wastes. Any waste which will cause corrosion or deterioration of the POTW. All wastes discharged to the public sewer system must have a pH value in the range of six to nine (6 – 9). Prohibited materials include, but are not limited to acids, sulfides, concentrated chloride and fluoride compounds and substances which will react with water to form acidic products.

(l) Thermal discharge. Heat in amounts which will inhibit biological activity in or cause damage to the POTW resulting in interference, but in no case heat in such quantities that the temperature at the treatment plant exceeds forty (40)°C (one hundred four (104)°F). Under no conditions may the temperature at the point of discharge exceed one hundred twenty (120)°F.

(m) Human hazard. Any wastewater which caused hazard to human life or creates a public nuisance.

(n) Wastewater causing, alone or in conjunction with other sources, the treatment plant's effluent to fail toxicity test.

(o) Detergents, surface-active agents, or other substances which that might cause excessive foaming in the POTW.

(p) Petroleum oil, non-biodegradable cutting oil, or products of mineral oil origin, in amounts that will cause interference or pass through.

(q) Pollutants which result in the presence of toxic gases, vapors, or fumes within the POTW in a quantity that may cause acute worker health and safety problems.

(3) **Limitation on wastewater discharge.** No person shall discharge or convey or cause to be discharged or conveyed to the public sewer any wastewater containing pollutants of such character or quantity that will:

(a) Not be amenable to treatment or reduction by the wastewater treatment processes employed, or are amenable to treatment only to such degree that the wastewater treatment plant effluent cannot meet the requirements of other agencies having jurisdiction over discharge to the receiving waters.
(b) Constitute a hazard to human or animal life or to the stream or water course receiving the treatment plant effluent.

(c) Exceed limits as set forth in his wastewater discharge permit or violate the federal pretreatment standards.

(d) Cause the treatment plant to violate its NPDES permit, pass-through limits, or other applicable receiving water standards, or cause interference with plant operations.

(e) Contain any water or wastes whose strength or other characteristics exceed the limits for normal wastewater which may be established by the control authority. (1969 Code, § 25-37, as amended by Ord. #2-05, March 2005, replaced by Ord. #2-09, Jan. 2009, repealed by Ord. #4-09, March 2009, and replaced by Ord. #5-09, March 2009)

18-309. Control of prohibited wastes. (1) National categorical pretreatment standards. Users must comply with the categorical pretreatment standards found at 40 CFR chapter I, subchapter N, parts 405 – 471.

(a) Where a categorical pretreatment standard is expressed only in terms of either the mass or the concentration of a pollutant in wastewater, the superintendent may impose equivalent concentration or mass limits in accordance with Tennessee Rule 1200-4-14-.06(3).

(b) When the limits in a categorical pretreatment standard are expressed only in terms of mass of pollutant per unit of production, the superintendent may convert the limits to equivalent limitations expressed either as mass of pollutant discharged per day or effluent concentration for purposes of calculating effluent limitations applicable to individual industrial users.

(c) When wastewater subject to a categorical pretreatment standard is mixed with wastewater not regulated by the same standard, the superintendent shall impose an alternate limit in accordance with Tennessee Rule 1200-4-14-.06(5).

(d) The superintendent may convert the mass limits of the categorical pretreatment standards of 40 CFR parts 414, 419, and 455 to concentration limits for purposes of calculating limitations applicable to individual industrial users. The conversion is at the discretion of the superintendent.

(e) Once included in its permit, the industrial user must comply with the equivalent limitations developed in this § 18-309 in lieu of the promulgated categorical standards from which the equivalent limitations were derived.

(f) Many categorical pretreatment standards specify one (1) limit for calculating maximum daily discharge limitations and a second limit for calculating maximum monthly average, or four (4) day average, limitations. Where such standards are being applied, the same production
or flow figure shall be used in calculating both the average and the maximum equivalent limitation.

(g) Any industrial user operating under a permit incorporating equivalent mass or concentration limits calculated from a production-based standard shall notify the superintendent within two (2) business days after the user has a reasonable basis to know that the production level will significantly change within the next calendar month. Any user not notifying the superintendent of such anticipated change will be required to meet the mass or concentration limits in its permit that were based on the original estimate of the long term average production rate.

(2) **Tennessee Pretreatment Standards.** Users must comply with Tennessee Pretreatment Standards codified at 1200-4-14.

(3) **Regulatory actions.** If wastewaters containing any substances in excess concentrations as described in § 18-308 of this ordinance are discharged or proposed to be discharged into the sewer system of the City of Oak Ridge or to any sewer system tributary thereto, the city shall take any action necessary to:

(a) Prohibit the discharge of such wastewater.

(b) Require a discharger to demonstrate that in-plant modifications will eliminate the discharge of such substances to a degree as to be acceptable to the city.

(c) Require pretreatment, including storage facilities or flow equalization, necessary to reduce or eliminate the objectionable characteristics or substances so that the discharge will not violate these rules and regulations or federal pretreatment standards and any other applicable requirements promulgated by the EPA in accordance with section 307 of the Clean Water Act of 1977.

(d) Require the person or discharger making, causing or allowing the discharge to pay any added cost of handling and treating excess loads imposed on the POTW. Nothing herein authorizes discharge, otherwise prohibited, upon payment of cost therefore.

(e) Discontinue sewer service to the discharger until such time as the problem is corrected.

(f) Take such other remedial action provided by law as may be deemed to be desirable or necessary to achieve the requirements of this ordinance.

(4) **Submission of plans.** (a) Where pretreatment or equalization of wastewater flows prior to discharge into any part of its POTW is required by the City of Oak Ridge; plans, specifications and other pertinent data or information relating to such pretreatment of flow-control facilities shall be submitted to the control authority for review and approval. Approval shall in no way exempt the discharge of such facilities from compliance with any applicable code, ordinance, rule or regulation of any
governmental unit or the city. Any subsequent alterations or additions to such pretreatment or flow-control facilities shall not be made without due notice to, and approval of, the control authority.

(b) The superintendent shall evaluate whether each SIU needs an accidental discharge/slug discharge control plan or other action to control slug discharges. The superintendent may require any user to develop, submit for approval, and implement such a plan or take such other action that may be necessary to control slug discharges. Alternatively, the superintendent may develop such a plan for any user. An accidental discharge/slug discharge control plan shall address, at a minimum, the following:

(i) Description of discharge practices, including nonroutine batch discharges;
(ii) Description of stored chemicals;
(iii) Procedures for immediately notifying the superintendent of any accidental or slug discharge, as required by § 18-309(6) of this ordinance; and
(iv) Procedures to prevent adverse impact from any accidental or slug discharge. Such procedures include, but are not limited to, inspection and maintenance of storage areas, handling and transfer of materials, loading and unloading operations, control of plant site runoff, worker training, building of containment structures or equipment, measures for containing toxic organic pollutants, including solvents, and/or measures and equipment for emergency response.

(5) Pretreatment facilities operations. If pretreatment or control of waste flows is required, such facilities shall be effectively operated and maintained by the user at his or her expense, subject to the requirements of these rules and regulations and all other applicable codes, ordinances and laws.

(6) Reporting of accidental discharges. (a) In the case of any discharge, including, but not limited to, accidental discharges, discharges of a nonroutine, episodic nature, a noncustomary batch discharge, a slug discharge or slug load, that might cause potential problems for the POTW, the user shall immediately telephone and notify the superintendent of the incident. This notification shall include the location of the discharge, type of waste, concentration and volume, if known, and corrective actions taken by the user.

(b) Within five (5) days following such discharge, the user shall, unless waived by the superintendent, submit a detailed written report describing the cause(s) of the discharge and the measures to be taken by the user to prevent similar future occurrences. Such notification shall not relieve the user of any expense, loss, damage, or other liability which might be incurred as a result of damage to the POTW, natural resources, or any other damage to person or property; nor shall such notification
relieve the user of any fines, penalties, or other liability which may be imposed pursuant to this ordinance.

(c) A notice shall be permanently posted on the user's bulletin board or other prominent place advising employees who to call in the event of a discharge described in subsection (6)(a) above. Employers shall ensure that all employees, who could cause such a discharge to occur, are advised of the emergency notification procedure.

(d) Significant industrial users are required to notify the superintendent immediately of any changes at its facility affecting the potential for a slug discharge.

(7) Right of entry. Agents of the City of Oak Ridge, the Tennessee Department of Environment and Conservation (TDEC) and/or EPA upon presentation of credentials shall be permitted to enter all properties of the contributing industry for the purpose of inspection, observation, measurement, sampling, and testing. (1969 Code, § 25-38, as replaced by Ord. #2-09, Jan. 2009, repealed by Ord. #4-09, March 2009, and replaced by Ord. #5-09, March 2009)

18-310. Wastewater discharge permits, generally. (1) Permits required. All persons proposing to connect to or discharge into the sanitary sewer system any material other than normal domestic waste shall be considered an industrial user and must obtain a wastewater discharge permit from the control authority before connecting to or discharging into the sanitary sewer. All existing industrial users connected to or discharging into the city's sanitary sewer must obtain a wastewater discharge permit within sixty (60) days after notice from the city.

(2) Permit application. (a) All users required to obtain an individual wastewater discharge permit must submit a permit application. The superintendent may require users to submit all or some of the following information as part of a permit application:

(i) Identifying information. (A) The name and address of the facility, including the name of the operator and owner.

(B) Contact information, description of activities, facilities, and plant production processes on the premises.

(ii) Environmental permits. A list of any environmental control permits held by or for the facility.

(iii) Description of operations. (A) A brief description of the nature, average rate of production (including each product produced by type, amount, processes, and rate of production), and standard industrial classifications of the operation(s) carried out by such user. This description should include a schematic process diagram, which indicates
points of discharge to the POTW from the regulated processes;

(B) Types of wastes generated, and a list of all raw materials and chemicals used or stored at the facility which are, or could accidentally or intentionally be, discharged to the POTW;

(C) Number and type of employees, hours of operation, and proposed or actual hours of operation;

(D) Type and amount of raw materials processed (average and maximum per day); and

(E) Site plans, floor plans, mechanical and plumbing plans, and details to show all sewers, floor drains, and appurtenances by size, location, and elevation, and all points of discharge.

(iv) Time and duration of discharges.

(v) The location for monitoring all wastes covered by the permit.

(vi) Flow measurement. Information showing the measured average daily and maximum daily flow, in gallons per day, to the POTW from regulated process streams and other streams, as necessary, to allow use of the combined wastestream formula set out in § 18-309(1)(c) (Tennessee Rule 1200-4-14-.06(5)).

(vii) Measurement of pollutants. (A) The categorical pretreatment standards applicable to each regulated process and any new categorically regulated processes for existing sources.

(B) The results of sampling and analysis identifying the nature and concentration, and/or mass, where required by the standard or by the superintendent, of regulated pollutants in the discharge from each regulated process.

(C) Instantaneous, daily maximum, and long-term average concentrations, or mass, where required, shall be reported.

(D) The sample shall be representative of daily operations and shall be analyzed in accordance with procedures set out in § 18-313(1) of this ordinance. Where the standard requires compliance with a pollution prevention alternative, such as the certification alternative in lieu of required monitoring for TTO, the user shall submit documentation as required by the superintendent or the applicable standards to determine compliance with the standard.
(E) Sampling must be performed in accordance with procedures set out in § 18-313(2) of this ordinance.

(viii) Any requests for a monitoring waiver (or a renewal of an approved monitoring waiver) for a pollutant neither present nor expected to be present in the discharge based on § 18-312(4)(b). [See 1200-4-14-.12(5)(b)].

(ix) Any other information as may be deemed necessary by the superintendent to evaluate the permit application.

(b) Application signatories and certifications. (i) All wastewater discharge permit applications, user reports and certification statements must be signed by an authorized representative of the user and contain the certification statement in § 18-313(5)(a).

(ii) If the designation of an authorized representative is no longer accurate because a different individual or position has responsibility for the overall operation of the facility or overall responsibility for environmental matters for the company, a new written authorization satisfying the requirements of this section must be submitted to the superintendent prior to or together with any reports to be signed by an authorized representative.

(iii) A facility determined to be a non-significant categorical industrial user by the superintendent pursuant to § 18-304(42)(b) must annually submit the signed certification statement in § 18-313(5)(b) [Note: See 40 CFR 403.3(v)(2)]

Incomplete or inaccurate applications will not be processed and will be returned to the user for revision.

(3) Permit conditions. An individual wastewater discharge permit shall include such conditions as are deemed reasonably necessary by the superintendent to prevent pass through or interference, protect the quality of the water body receiving the treatment plant's effluent, protect worker health and safety, facilitate sludge management and disposal, and protect against damage to the POTW.

Wastewater discharge permits shall be expressly subject to all provisions of this ordinance and all other regulations, user charges and fees established by the city. The conditions of wastewater discharge permits shall be uniformly enforced by the city in accordance with this ordinance, and applicable state and federal regulations. Permits must contain all items required by federal regulation; and further, may include but not necessarily be limited to the following:

(a) A statement that indicates the wastewater discharge permit issuance date, expiration date and effective date;

(b) Requirements that the industrial user comply with any and all pretreatment standards and requirements either local, state or federal;
(c) A statement of non-transferability without, at a minimum, prior notification to the POTW and provision of a copy of the existing permit to the new owner or operator;

(d) The average and maximum wastewater constituents and characteristics;

(e) Effluent limits, including pollution prevention alternative, based on applicable pretreatment standards;

(f) Self monitoring, sampling, reporting, notification, and record-keeping requirements. These requirements shall include an identification of pollutants (or pollution prevention alternative) to be monitored, sampling location, sampling frequency, and sample type based on federal, state, and local law;

(g) The process for seeking a waiver from monitoring for a pollutant neither present nor expected to be present in the discharge in accordance with § 18-312(4)(b);

(h) A statement of applicable civil and criminal penalties for violation of pretreatment standards and requirements, and any applicable compliance schedule. Such schedule may not extend the time for compliance beyond that required by applicable federal, state, or local law;

(i) Requirements to control slug discharge, if determined by the superintendent to be necessary;

(j) Any grant of the monitoring waiver by the superintendent (§ 18-312(4)(b)) must be included as a condition in the user's permit;

(k) Limits on the average and/or maximum rate of discharge, time of discharge, and/or requirements for flow regulation and equalization;

(l) Requirements for installation of inspection and sampling facilities and schedules for said installation;

(m) Requirements for installation and operation of pretreatment systems or process modifications and schedule for said installations;

(n) Requirements for the development and implementation of spill control plans or other special conditions including management practices necessary to adequately prevent accidental, unanticipated, or nonroutine discharges;

(o) Requirements for maintaining plant records relating to wastewater discharge as specified by the control authority and affording the city access thereto;

(p) Requirements that the city maintain the right to enter onto the premises for inspection of operations including process areas, pretreatment areas, and any such other portions of the premises which may be deemed appropriate by the controlling authority;

(q) A statement that compliance with the individual wastewater discharge permit does not relieve the permittee of responsibility for
compliance with all applicable federal and state pretreatment standards, including those which become effective during the term of the individual wastewater discharge permit; and

(r) Other conditions as deemed appropriate by the control authority to insure compliance with this ordinance and state and federal pretreatment standards and requirements.

(4) Duration of permits. Permits shall be issued for a specified time period, not to exceed five (5) years. A permit may be issued for a period less than a year or may be stated to expire on a specific date. The permittee must apply for a renewal permit not more than ninety (90) days and no less than seventy-five (75) days prior to the expiration of his or her valid permit. If the user is not notified by the control authority of permit expiration, the permit shall be considered extended for thirty (30) days at a time up to a total of one (1) additional year. The terms and conditions of the permit may be subject to modification and change by the control authority during the life of the permit as limitations or requirements as identified hereinbefore are modified and changed. The user shall be informed of any proposed changes in his or her permit at least thirty (30) days prior to the effective, date of change. Any changes or new conditions in the permit shall include a reasonable time schedule for compliance.

(5) Transfer of a permit. Wastewater discharge permits are issued to a specific user for a specific operation. A wastewater discharge permit shall not be reassigned or transferred or sold to a new owner, new user, different premise, or a new or changed operation. (1969 Code, § 25-39, as replaced by Ord. #2-09, Jan. 2009, repealed by Ord. #4-09, March 2009, and replaced by Ord. #5-09, March 2009)

18-311. Wastewater discharge permit revocation. The superintendent may revoke an individual wastewater discharge permit for good cause, including, but not limited to, the following reasons:

(1) Failure to notify the superintendent of significant changes to the wastewater prior to the changed discharge;

(2) Failure to provide prior notification to the superintendent of changed conditions pursuant to § 18-312(5) of this ordinance;

(3) Misrepresentation or failure to fully disclose all relevant facts in the wastewater discharge permit application;

(4) Falsifying self-monitoring reports and certification statements;

(5) Tampering with monitoring equipment;

(6) Refusing to allow the superintendent timely access to the facility premises and records;

(7) Failure to meet effluent limitations;

(8) Failure to pay fines;

(9) Failure to pay sewer charges;

(10) Failure to meet compliance schedules;
(11) Failure to complete a wastewater surveyor the wastewater discharge permit application;
(12) Failure to provide advance notice of the transfer of business ownership of a permitted facility; or
(13) Violation of any pretreatment standard or requirement, or any terms of the wastewater discharge permit or this ordinance.

Individual wastewater discharge permits shall be voidable upon cessation of operations or transfer of business ownership. All individual wastewater discharge permits issued to a user are void upon the issuance of a new individual wastewater discharge permit to that user. (1969 Code, § 25-40, as replaced by Ord. #2-09, Jan. 2009, repealed by Ord. #4-09, March 2009, and replaced by Ord. #5-09, March 2009)

18-312. Reporting requirements. (1) Baseline monitoring reports.
(a) Within either one hundred eighty (180) days after the effective date of a categorical pretreatment standard, or the final administrative decision on a category determination under Tennessee Rule 1200-4-14-.06(1)(d), whichever is later, existing categorical industrial users currently discharging to or scheduled to discharge to the POTW shall submit to the superintendent a report which contains the information listed in subsection (1)(b) below. At least ninety (90) days prior to commencement of their discharge, new sources, and sources that become categorical industrial users subsequent to the promulgation of an applicable categorical standard, shall submit to the superintendent a report which contains the information listed in subsection (1)(b) below. A new source shall report the method of pretreatment it intends to use to meet applicable categorical standards. A new source also shall give estimates of its anticipated flow and quantity of pollutants to be discharged.
(b) Users described above shall submit the information set forth below.

(B) The user shall take a minimum of one (1) representative sample to compile that data necessary to comply with the requirements of this paragraph.
(C) Samples should be taken immediately downstream from pretreatment facilities if such exist or immediately downstream from the regulated process if no pretreatment exists. If other wastewaters are mixed with the regulated wastewater prior to pretreatment the user
should measure the flows and concentrations necessary to allow use of the combined wastestream formula in Tennessee Rule 1200-4-14-.06(5) to evaluate compliance with the pretreatment standards. Where an alternate concentration or mass limit has been calculated in accordance with Tennessee Rule 1200-4-14-.06(5) this adjusted limit along with supporting data shall be submitted to the control authority;

(D) Sampling and analysis shall be performed in accordance with §§ 18-313(1) and 18-313(2);

(1) The superintendent may allow the submission of a baseline report which utilizes only historical data so long as the data provides information sufficient to determine the need for industrial pretreatment measures;

(2) The baseline report shall indicate the time, date and place of sampling and methods of analysis, and shall certify that such sampling and analysis is representative of normal work cycles and expected pollutant discharges to the POTW.

(iii) Compliance certification. A statement, reviewed by the user's authorized representative as defined in § 18-304(3) and certified by a qualified professional, indicating whether pretreatment standards are being met on a consistent basis, and, if not, whether additional operation and maintenance (O&M) and/or additional pretreatment is required to meet the pretreatment standards and requirements.

(iv) Compliance schedule. If additional pretreatment and/or O&M will be required to meet the pretreatment standards, the shortest schedule by which the user will provide such additional pretreatment and/or O&M must be provided. The completion date in this schedule shall not be later than the compliance date established for the applicable pretreatment standard. A compliance schedule pursuant to this section must meet the requirements set out in § 18-312(2) of this ordinance.

(v) Signature and report certification. All baseline monitoring reports must be certified in accordance with § 18-313(5)(a) of this ordinance and signed by an authorized representative as defined in § 18-304(3).

(2) Compliance schedule progress reports. The following conditions shall apply to the compliance schedule required by § 18-312(1)(b)(iv) of this ordinance:

(a) The schedule shall contain progress increments in the form of dates for the commencement and completion of major events leading
to the construction and operation of additional pretreatment required for the user to meet the applicable pretreatment standards (such events include, but are not limited to, hiring an engineer, completing preliminary and final plans, executing contracts for major components, commencing and completing construction, and beginning and conducting routine operation);

(b) No increment referred to above shall exceed nine (9) months;

(c) The user shall submit a progress report to the superintendent no later than fourteen (14) days following each date in the schedule and the final date of compliance including, as a minimum, whether or not it complied with the increment of progress, the reason for any delay, and, if appropriate, the steps being taken by the user to return to the established schedule; and

(d) In no event shall more than nine (9) months elapse between such progress reports to the superintendent.

(3) Reports on compliance with categorical pretreatment standard deadline. Within ninety (90) days following the date for final compliance with applicable categorical pretreatment standards, or in the case of a new source following commencement of the introduction of wastewater into the POTW, any user subject to such pretreatment standards and requirements shall submit to the superintendent a report containing the information described in §§ 18-310(2)(a)(vi), 18-310(2)(a)(vii), and 18-312(1)(b)(ii) of this ordinance. For users subject to equivalent mass or concentration limits established in accordance with the procedures in § 18-309(1), this report shall contain a reasonable measure of the user's long-term production rate. For all other users subject to categorical pretreatment standards expressed in terms of allowable pollutant discharge per unit of production (or other measure of operation), this report shall include the user's actual production during the appropriate sampling period. All compliance reports must be signed and certified in accordance with § 18-313(5)(a) of this ordinance. All sampling will be done in conformance with § 18-313(2).

(4) Periodic compliance reports. (a) All permitted significant industrial users must, at a frequency determined by the superintendent, submit no less than quarterly per year (unless otherwise specified), reports indicating the nature, concentration of pollutants in the discharge which are limited by pretreatment standards and the measured or estimated average and maximum daily flows for the reporting period. In cases where the pretreatment standard requires compliance with a pollution prevention alternative, the user must submit documentation required by the superintendent or the pretreatment standard necessary to determine the compliance status of the user.

(b) The city may authorize an industrial user subject to a categorical pretreatment standard to forego sampling of a pollutant regulated by a categorical pretreatment standard if the industrial user
has demonstrated through sampling and other technical factors that the pollutant is neither present nor expected to be present in the discharge, or is present only at background levels from intake water and without any increase in the pollutant due to activities of the industrial user. [see Tennessee Rule 1200-4-14-.12(5)(b)] This authorization is subject to the following conditions:

(i) The waiver may be authorized where a pollutant is determined to be present solely due to sanitary wastewater discharged from the facility provided that the sanitary wastewater is not regulated by an applicable categorical standard and otherwise includes no process wastewater.

(ii) The monitoring waiver is valid only for the duration of the effective period of the individual wastewater discharge permit, but in no case longer than five (5) years. The user must submit a new request for the waiver before the waiver can be granted for each subsequent individual wastewater discharge permit. See § 18-310(2)(a)(viii).

(iii) In making a demonstration that a pollutant is not present, the industrial user must provide data from at least one (1) sampling of the facility's process wastewater prior to any treatment present at the facility that is representative of all wastewater from all processes.

(iv) The request for a monitoring waiver must be signed in accordance with § 18-304(3), and include the certification statement in § 18-313(5)(a). (See Tennessee Rule 1200-4-14-.06(1)(b2).

(v) Non-detectable sample results may be used only as a demonstration that a pollutant is not present if the EPA approved method from 40 CFR part 136 with the lowest minimum detection level for that pollutant was used in the analysis.

(vi) Any grant of the monitoring waiver by the superintendent must be included as a condition in the user's permit. The reasons supporting the waiver and any information submitted by the user in its request for the waiver must be maintained by the superintendent for three (3) years after expiration of the waiver.

(vii) Upon approval of the monitoring waiver and revision of the user's permit by the superintendent, the industrial user must certify on each report with the statement in § 18-313(5)(c) below, that there has been no increase in the pollutant in its wastestream due to activities of the industrial user.

(viii) In the event that a waived pollutant is found to be present or is expected to be present because of changes that occur in the user's operations, the user must immediately: Comply with
the monitoring requirements of § 18-312(4)(a), or other more frequent monitoring requirements imposed by the superintendent, and notify the superintendent.

(ix) This provision does not supersede certification processes and requirements established in categorical pretreatment standards, except as otherwise specified in the categorical pretreatment standard.

(c) All periodic compliance reports must be signed and certified in accordance with § 18-313(5)(a) of this ordinance.

(d) All wastewater samples must be representative of the user's discharge. Wastewater monitoring and flow measurement facilities shall be properly operated, kept clean, and maintained in good working order at all times. The failure of a user to keep its monitoring facility in good working order shall not be grounds for the user to claim that sample results are unrepresentative of its discharge.

(e) If a user subject to the reporting requirement in this section monitors any regulated pollutant at the appropriate sampling location more frequently than required by the superintendent, using the procedures prescribed in § 18-313(2) of this ordinance, the results of this monitoring shall be included in the report.

(5) Reports of changed conditions. Each user must notify the superintendent of any significant changes to the user's operations or system which might alter the nature, quality, or volume of its wastewater at least thirty (30) days before the change.

(a) The superintendent may require the user to submit such information as may be deemed necessary to evaluate the changed condition, including the submission of a wastewater discharge permit application under § 18-310(2) of this ordinance.

(b) The superintendent may issue an individual wastewater discharge permit under § 18-310 of this ordinance or modify an existing wastewater discharge permit under § 18-310(4) of this ordinance in response to changed conditions or anticipated changed conditions.

(6) Reports of potential problems. (a) In the case of any discharge, including, but not limited to, accidental discharges, discharges of a nonroutine, episodic nature, a noncustomary batch discharge, a slug discharge or slug load, that might cause potential problems for the POTW, the user shall immediately telephone and notify the superintendent of the incident. This notification shall include the location of the discharge, type of waste, concentration and volume, if known, and corrective actions taken by the user.

(b) Within five (5) days following such discharge, the user shall, unless waived by the superintendent, submit a detailed written report describing the cause(s) of the discharge and the measures to be taken by the user to prevent similar future occurrences. Such notification shall not
relieve the user of any expense, loss, damage, or other liability which
might be incurred as a result of damage to the POTW, natural resources,
or any other damage to person or property; nor shall such notification
relieve the user of any fines, penalties, or other liability which may be
imposed pursuant to this ordinance.

(c) A notice shall be permanently posted on the user's bulletin
board or other prominent place advising employees who to call in the
event of a discharge described in paragraph (a), above. Employers shall
ensure that all employees, who could cause such a discharge to occur, are
advised of the emergency notification procedure.

(d) Significant industrial users are required to notify the
superintendent immediately of any changes at its facility affecting the
potential for a slug discharge. (1969 Code, § 25-41, as replaced by
Ord. #2-09, Jan. 2009, repealed by Ord. #4-09, March 2009, and replaced
by Ord. #5-09, March 2009)

18-313. Wastewater sampling and analysis. (1) Analytical
requirements. All pollutant analyses, including sampling techniques, to be
submitted as part of a wastewater discharge permit application or report shall
be performed in accordance with the techniques prescribed in 40 CFR part 136
and amendments thereto, unless otherwise specified in an applicable categorical
pretreatment standard. If 40 CFR part 136 does not contain sampling or
analytical techniques for the pollutant in question, or where the epa determines
that the part 136 sampling and analytical techniques are inappropriate for the
pollutant in question, sampling and analyses shall be performed by using
validated analytical methods or any other applicable sampling and analytical
procedures, including procedures suggested by the superintendent or other
parties approved by EPA.

(2) Sample collection. Samples collected to satisfy reporting
requirements must be based on data obtained through appropriate sampling and
analysis performed during the period covered by the report, based on data that
is representative of conditions occurring during the reporting period:

(a) Except as indicated in subsection (2)(b) and (2)(c) below, the
user must collect wastewater samples using twenty-four (24) hour
flow-proportional composite sampling techniques, unless
time-proportional composite sampling or grab sampling is authorized by
the superintendent. Where time-proportional composite sampling or grab
sampling is authorized by the city, the samples must be representative
of the discharge. Using protocols (including appropriate preservation)
specified in 40 CFR part 136 and appropriate EPA guidance, multiple
grab samples collected during a twenty-four (24) hour period may be
composited prior to the analysis as follows: for cyanide, total phenols,
and sulfides the samples may be composited in the laboratory or in the
field; for volatile organics and oil and grease, the samples may be
composited in the laboratory. Composite samples for other parameters unaffected by the compositing procedures as documented in approved EPA methodologies may be authorized by the city, as appropriate. In addition, grab samples may be required to show compliance with instantaneous limits.

(b) Samples for oil and grease, temperature, pH, cyanide, total phenols, sulfides, and volatile organic compounds must be obtained using grab collection techniques.

(c) For sampling required in support of baseline monitoring and ninety (90) day compliance reports required in §§ 18-312(1) and 18-312(3) [Tennessee Rule 1200-4-14.12(2) and (4)], a minimum of four (4) grab samples must be used for pH, cyanide, total phenols, oil and grease, sulfide and volatile organic compounds for facilities for which historical sampling data do not exist; for facilities for which historical sampling data are available, the superintendent may authorize a lower minimum. For the reports required by paragraphs § 18-312(4) (Tennessee Rule 1200-4-14-.12(5) and (8)), the industrial user is required to collect the number of grab samples necessary to assess and assure compliance by with applicable pretreatment standards and requirements.

(3) Control manhole. When required by the control authority, the owner of any property serviced by a building sewer carrying industrial wastes shall install a suitable control manhole together with such necessary meters and other appurtenances in the building sewer to facilitate observation, sampling and measurement of the wastes. Such manhole shall be accessibly and safely located, and shall be constructed in accordance with plans approved by the control authority. The manhole shall be installed by the user at his expense, and shall be maintained by him so as to be safe and accessible at all times. The control authority shall have access and use of the control manhole as may be required for their monitoring of the industrial discharge.

(4) Recordkeeping. Users subject to the reporting requirements of this ordinance shall retain, and make available for inspection and copying, all records of information obtained pursuant to any monitoring activities required by this ordinance, any additional records of information obtained pursuant to monitoring activities undertaken by the user independent of such requirements. Records shall include the date, exact place, method, and time of sampling, and the name of the person(s) taking the samples; the dates analyses were performed; who performed the analyses; the analytical techniques or methods used; and the results of such analyses. These records shall remain available for a period of at least three (3) years. This period shall be automatically extended for the duration of any litigation concerning the user or the city, or where the user has been specifically notified of a longer retention period by the superintendent.

(5) Certification statements. (a) Certification of permit applications, user reports and initial monitoring waiver. The following certification
statement is required to be signed and submitted by users submitting permit applications in accordance with § 18-310(2)(b); users submitting baseline monitoring reports under § 18-312(1)(b)(v); users submitting reports on compliance with the categorical pretreatment standard deadlines under § 18-312(3); users submitting periodic compliance reports required by § 18-312(4), and users submitting an initial request to forego sampling of a pollutant on the basis of § 18-312(4)(b)(iv). The following certification statement must be signed by an authorized representative as defined in § 18-304(3):

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

(b) Annual certification for non-significant categorical industrial users. A facility determined to be a non-significant categorical industrial user by the superintendent pursuant to §§ 18-304(42)(b) and 18-310(2)(b)(iii) must annually submit the following certification statement signed in accordance with the signatory requirements in § 18-304(3). This certification must accompany an alternative report required by the superintendent:

Based on my inquiry of the person or persons directly responsible for managing compliance with the categorical Pretreatment Standards under 40 CFR__, I certify that, to the best of my knowledge and belief that during the period from _____, ______ to _____, ______ [months, days, year):

(1) The facility described as _______________ [facility name] met the definition of a Non-Significant Categorical Industrial User as described in 18-304(42)(b);

(2) The facility complied with all applicable Pretreatment Standards and requirements during this reporting period; and
(3) The facility never discharged more than 100 gallons of total categorical wastewater on any given day during this reporting period.

This compliance certification is based on the following information.

________________________________________________________________________
________________________________________________________________________

(c) Certification of pollutants not present. Users that have an approved monitoring waiver based on § 18-312(4)(b) must certify on each report with the following statement that there has been no increase in the pollutant in its wastestream due to activities of the user.

Based on my inquiry of the person or persons directly responsible for managing compliance with the Pretreatment Standard for 40 CFR [specify applicable National Pretreatment Standard part(s)], I certify that, to the best of my knowledge and belief, there has been no increase in the level of [list pollutant(s)] in the wastewaters due to the activities at the facility since filing of the last periodic report under Section 18-312(4). (1969 Code, § 25-42, as replaced by Ord. #2-09, Jan. 2009, repealed by Ord. #4-09, March 2009, and replaced by Ord. #5-09, March 2009)

   (a) The monitoring program shall require the discharger to conduct a sampling and analysis program of a frequency and type specified by the control authority to demonstrate compliance with prescribed wastewater discharge limits. The discharger may either:
      (i) Conduct his or her own sampling and analysis program provided he demonstrates to the control authority that he or she has the necessary qualifications and facilities to perform the work; or
      (ii) Engage a private laboratory, approved by the control authority.
   (b) In the event that the control authority suspects that a violation of any part of this ordinance or of the user's wastewater discharge permit is occurring, it may take samples for the purpose of monitoring the discharge. Should this monitoring verify that a violation is occurring, the costs of the monitoring and associated laboratory fees will be borne by the discharger. Should no violation be found, the costs will be at the expense of the control authority.
   (c) Notice of violation/repeat sampling and reporting. If sampling performed by a user indicates a violation, the user must notify
the superintendent within twenty-four (24) hours of becoming aware of the violation. The user shall also repeat the sampling and analysis and submit the results of the repeat analysis to the superintendent within thirty (30) days after becoming aware of the violation. Resampling by the industrial user is not required if the city performs the sampling at the user's facility at least once a month, or if the city performs sampling at the user's facility between the time when the initial sampling was conducted and the time when the user or the city receives the results of this sampling, or if the city has performed the sampling and analysis in lieu of the industrial user.

(2) **Right of entry: inspection and sampling.** The superintendent shall have the right to enter the premises of any user to determine whether the user is complying with all requirements of this ordinance and any individual wastewater discharge permit or order issued hereunder. Users shall allow the superintendent ready access to all parts of the premises for the purposes of inspection, sampling, records examination and copying, and the performance of any additional duties.

(a) Where a user has security measures in force which require proper identification and clearance before entry into its premises, the user shall make necessary arrangements with its security guards so that, upon presentation of suitable identification, the superintendent shall be permitted to enter without delay for the purposes of performing specific responsibilities.

(b) The superintendent shall have the right to set up on the user's property, or require installation of, such devices as are necessary to conduct sampling and/or metering of the user's operations.

(c) The superintendent may require the user to install monitoring equipment as necessary. The facility's sampling and monitoring equipment shall be maintained at all times in a safe and proper operating condition by the user at its own expense. All devices used to measure wastewater flow and quality shall be calibrated quarterly to ensure their accuracy.

(d) Any temporary or permanent obstruction to safe and easy access to the facility to be inspected and/or sampled shall be promptly removed by the user at the written or verbal request of the superintendent and shall not be replaced. The costs of clearing such access shall be born by the user.

(e) Unreasonable delays in allowing the superintendent access to the user's premises shall be a violation of this ordinance.

(3) **Search warrants.** If the superintendent has been refused access to a building, structure, or property, or any part thereof, and is able to demonstrate probable cause to believe that there may be a violation of this ordinance, or that there is a need to inspect and/or sample as part of a routine inspection and sampling program of the city designed to verify compliance with this ordinance
or any permit or order issued hereunder, or to protect the overall public health, safety and welfare of the community, the superintendent may seek issuance of a search warrant from the City Court of Oak Ridge. (as added by Ord. #5-09, March 2009)

18-315. Confidential information. Information and data on a user obtained from reports, surveys, wastewater discharge permit applications, individual wastewater discharge permits, and monitoring programs, and from the superintendent's inspection and sampling activities, shall be available to the public without restriction, unless the user specifically requests, and is able to demonstrate to the satisfaction of the superintendent, that the release of such information would divulge information, processes, or methods of production entitled to protection as trade secrets under applicable state law. Any such request must be asserted at the time of submission of the information or data. When requested and demonstrated by the user furnishing a report that such information should be held confidential, the portions of a report which might disclose trade secrets or secret processes shall not be made available for inspection by the public, but shall be made available immediately upon request to governmental agencies for uses related to the NPDES program or pretreatment program, and in enforcement proceedings involving the person furnishing the report. Wastewater constituents and characteristics and other effluent data, as defined at 40 CFR 2.302 shall not be recognized as confidential information and shall be available to the public without restriction. (as added by Ord. #5-09, March 2009)

18-316. Publication of users in significant noncompliance. The superintendent shall publish annually, in a newspaper of general circulation that provides meaningful public notice within the jurisdictions served by the POTW, a list of the users which, at any time during the previous twelve (12) months, were in significant noncompliance with applicable pretreatment standards and requirements. The term significant noncompliance shall be applicable to all significant industrial users (or any other industrial user that violates paragraphs (3), (4) or (7) of this section) and shall mean:

1. Chronic violations of wastewater discharge limits, defined here as those in which sixty-six percent (66%) or more of all the measurements taken for the same pollutant parameter taken during a six (6) month period exceed (by any magnitude) a numeric pretreatment standard or requirement, including instantaneous limits as defined in §§ 18-308 and 18-309;

2. Technical Review Criteria (TRC) violations, defined here as those in which thirty-three percent (33%) or more of wastewater measurements taken for each pollutant parameter during a six (6) month period equals or exceeds the product of the numeric pretreatment standard or requirement including instantaneous limits, as defined by §§ 18-308 and 18-309 multiplied by the
applicable criteria (1.4 for BOD, TSS, fats, oils and grease, and 1.2 for all other pollutants except pH);

(3) Any other violation of a pretreatment standard or requirement as defined by §§ 18-308 and 18-309 (daily maximum, long-term average, instantaneous limit, or narrative standard) that the superintendent determines has caused, alone or in combination with other discharges, interference or pass through, including endangering the health of POTW personnel or the general public;

(4) Any discharge of a pollutant that has caused imminent endangerment to the public or to the environment, or has resulted in the superintendent's exercise of its emergency authority to halt or prevent such a discharge;

(5) Failure to meet, within ninety (90) days of the scheduled date, a compliance schedule milestone contained in an individual wastewater discharge permit or enforcement order for starting construction, completing construction, or attaining final compliance;

(6) Failure to provide within forty-five (45) days after the due date, any required reports, including baseline monitoring reports, reports on compliance with categorical pretreatment standard deadlines, periodic self-monitoring reports, and reports on compliance with compliance schedules;

(7) Failure to accurately report noncompliance; or

(8) Any other violation(s), which may include a violation of pollution prevention alternatives, which the superintendent determines will adversely affect the operation or implementation of the local pretreatment program. (as added by Ord. #5-09, March 2009)

18-317. Enforcement procedures. (1) Administrative enforcement remedies. (a) Notification of violation. Whenever the superintendent finds that any user has violated or violating this ordinance, or a wastewater permit or order issued hereunder, the superintendent or his agent may serve upon said user written Notice Of the Violation (NOV). If required in the NOV, a written explanation of the violation and a plan for the satisfactory correction and prevention thereof, to include specific required actions, shall be submitted to the superintendent within the time frame specified, not to exceed thirty (30) days. Submission of this plan in no way relieves the user of liability for any violations occurring before or after receipt of the notice of violation. Nothing in this section shall limit the authority of the superintendent to take any action, including emergency actions or any other enforcement action, without first issuing a notice of violation.

(b) Consent orders. The superintendent is hereby empowered to enter into consent orders, assurances of voluntary compliance, or other similar documents establishing an agreement with a user responsible for the noncompliance. Such orders will include specific action to be taken by
the user to correct the noncompliance within a time period also specified by the order. Consent orders shall have the same force and effect as administrative orders issued pursuant to § 18-317(1)(d) below.

(c) Show cause hearing. The superintendent may order any user who is in violation of or causes or contributes to violation of this ordinance or wastewater permit or order issued hereunder, to show cause why a proposed enforcement action should not be taken. Notice shall be served on the user specifying the time and place for the meeting, the proposed enforcement action and the reasons for such action, and a request that the user show cause why this proposed enforcement action should not be taken. The notice of the meeting shall be served personally or by registered or certified mail (return receipt requested). Ten (10) days prior notice shall be given, if practical. Such notice may be served on any principal executive, general partner, corporate officer, site manager, or other person listed in pretreatment documents submitted by the user as a contact. Whether or not a duly notified user appears as noticed, immediate enforcement action may be pursued.

(d) Compliance order. When the superintendent finds that a user has violated or continues to violate the ordinance or a permit or order issued thereunder, he may issue and order to the industrial user responsible for the discharge directing that, following a specified time period, sewer service shall be discontinued or penalties imposed unless adequate treatment facilities, devices, or other related appurtenances have been installed and are properly operated or other improvements as specified are carried out. Orders may also contain such other requirements as might be reasonably necessary and appropriate to address the noncompliance, including the installation of pretreatment technology, additional self-monitoring, disconnection of unauthorized sources of flow, and management practices. A compliance order may not extend the deadline for compliance established for a pretreatment standard or requirement, nor does a compliance order relieve the user of liability for any violation, including any continuing violation. Issuance of a compliance order shall not be a bar against, or a prerequisite for, taking any other action against the user.

(e) Cease and desist orders. When the superintendent finds that a user has violated or continues to violate this ordinance or any permit or order issued hereunder, the superintendent may issue an order to cease and desist all such violations and direct those persons in noncompliance to:

(i) Comply forthwith;

(ii) Take such appropriate remedial or preventive action as may be needed to properly address a continuing or threatened violation, including halting operations and terminating the discharge. Issuance of a cease and desist order shall not be a bar
against, or a prerequisite for, taking any other action against the user.

(f) Administrative penalties. Notwithstanding any other section of this ordinance, any user who is found to have violated any provision of this ordinance, or any permit or order issued hereunder, may be assessed a penalty in an amount not to exceed ten thousand dollars ($10,000.00) per violation. Each day on which noncompliance shall occur or continue shall be deemed a separate and distinct violation. Such assessments may be added to the user's next scheduled sewer service charge and the superintendent shall have such other collection remedies as he has to collect other service charges. Unpaid charges and penalties shall constitute a lien against the individual user's property. Industrial users desiring to dispute such penalties must file a request for the superintendent to reconsider the penalty within ten (10) days of being notified of the fine. Where the superintendent believes a request has merit, he shall convene a hearing on the matter within fifteen (15) days of receiving the request from the industrial user.

(g) Emergency suspensions. (i) The superintendent may suspend the wastewater treatment service and/or wastewater permit of an industrial user whenever such suspension is necessary in order to stop an actual or threatened discharge presenting or causing an imminent or substantial endangerment to the health or welfare of persons, the POTW, or the environment.

(ii) Any user notified of a suspension of the wastewater treatment service and/or the wastewater permit shall immediately stop or eliminate its contribution. In the event of a user's failure to immediately comply voluntarily with the suspension order, the superintendent may take such steps as deemed necessary, including immediate severance of the sewer connection, to prevent or minimize damage to the POTW, its receiving stream, or endangerment to any individuals. The superintendent may allow the user to recommence its discharge when the endangerment has passed, unless termination proceedings are initiated against the user.

(iii) An industrial user who is responsible, in whole or in part, for imminent endangerment shall submit a detailed written statement describing the causes of the harmful contribution and the measures taken to prevent any future occurrence to the superintendent prior to the date of the hearing described in § 18-317(1)(c).

Nothing in this section shall be interpreted as requiring a hearing prior to any emergency suspension under this section.

(h) Revocation of permit. The superintendent may revoke the permit of any user as set forth in § 18-311.
(i) **Appeal of administrative penalties.** Upon issuance of any administrative order or penalty, the user shall be notified that he or she shall be entitled to a hearing upon such order or penalty. Request for such hearing must be made seven (7) days of notification of the administrative action. The hearing will be held before the city manager and shall be heard within seven (7) days of the request for hearing. At the hearing, the public works director or the director's representative shall represent the controlling authority. The controlling authority and the customer shall be entitled to present evidence relevant and material to the penalty and to examine and cross examine witnesses. He may be represented by an attorney, if the user so chooses. The city manager shall render a decision within seven (7) days upholding or overturning the administrative order or penalty. Notwithstanding the following, emergency suspensions as described in § 18-317(1)(g) are effective immediately upon issuance, and right to appeal is contingent on compliance by the user.

(2) **Judicial remedies.** If any person discharges sewage, industrial wastes, or other wastes into the wastewater disposal system contrary to the provisions of this ordinance or any order or permit issued hereunder, the superintendent, through the city attorney, may commence an action for appropriate legal and/or equitable relief in the applicable court.

(a) Injunction relief. Whenever a user has violated or continues to violate the provisions of this ordinance or permit or order issued hereunder, the superintendent, through counsel, may petition the court for the issuance of a preliminary or permanent injunction or both (as may be appropriate) which restrains or compels the activities on the part of the user. The superintendent shall have such remedies to collect these fees as it has to collect other sewer service charges. The superintendent may also seek such other action as is appropriate for legal and/or equitable relief, including a requirement for the user to conduct environmental remediation. A petition for injunctive relief shall not be a bar against, or a prerequisite for, taking any other action against a user.

(b) Civil penalties. (i) Any user who has violated or continues to violate this ordinance or any order or permit issued hereunder, shall be liable to the superintendent for actual damages incurred by the POTW. In addition to damages, the superintendent may recover reasonable attorney's fee, court costs, and other expenses associated with the enforcement activities, including sampling and monitoring expenses.

(ii) The superintendent shall petition the court to impose, assess, and recover such sums. In determining amount of liability, the court shall take into account all relevant circumstances, including, but not limited to, the extent of harm caused by the violation, the magnitude and duration, any economic benefit
gained through the user's violation, corrective actions by the user, the compliance history of the user, and any other factor as justice requires.

(iii) Filing a suit for civil penalties shall not be a bar against, or a prerequisite for, taking any other action against a user.

(3) Criminal actions. (a) Any industrial user who willfully or negligently violates any provision of this ordinance or any orders or permits issued hereunder shall, upon conviction, be guilty of a misdemeanor, punishable by penalty and imprisonment to the full extent allowed by law.

(b) Any industrial user who knowingly makes any false statements, representations or certification in any application, record, report, plan or other document filed or required to be maintained pursuant to this ordinance or waste water permit, or who falsifies, tampers with, or knowingly renders inaccurate any monitoring device or method required under this ordinance shall, upon conviction, be punishable by a penalty and imprisonment to the full extent allowed by law.

(4) Affirmative defenses. (a) Treatment upsets. Any industrial user who experiences an upset in operations that places it in a temporary state of noncompliance, which is not the result of operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation, shall inform the superintendent thereof immediately upon becoming aware of the upset. Where such information is given orally, a written report thereof shall be filed by the user within five (5) days. The report shall contain:

(i) A description of the upset, its cause(s) and impact on the discharger's compliance status.

(ii) The duration of noncompliance, including exact dates and times of noncompliance, and if the noncompliance is continuing, the time by which compliance is reasonably expected to be restored.

(iii) A user who wishes to establish the affirmative defense of upset shall demonstrate, through properly signed, contemporaneous operating logs, or other relevant evidence that:

(A) An upset occurred and the user can identify the cause(s) of the upset;

(B) The facility was at the time being operated in a prudent and workman-like manner and in compliance with applicable operation and maintenance procedures; and

(C) The user has submitted the following information to the superintendent within twenty-four (24) hours of becoming aware of the upset [if this information is
provided orally, a written submission must be provided within five (5) days:

1. A description of the indirect discharge and cause of noncompliance;
2. The period of noncompliance, including exact dates and times or, if not corrected, the anticipated time the noncompliance is expected to continue; and
3. Steps being taken and/or planned to reduce, eliminate, and prevent recurrence of the noncompliance.

(iv) In any enforcement proceeding, the user seeking to establish the occurrence of an upset shall have the burden of proof.

(v) Users shall have the opportunity for a judicial determination on any claim of upset only in an enforcement action brought for noncompliance with categorical pretreatment standards.

(vi) Users shall control production of all discharges to the extent necessary to maintain compliance with categorical pretreatment standards upon reduction, loss, or failure of its treatment facility until the facility is restored or an alternative method of treatment is provided. This requirement applies in the situation where, among other things, the primary source of power of the treatment facility is reduced, lost, or fails.

(b) Treatment bypasses. (i) A bypass of the treatment system is prohibited unless all the following conditions are met:

A. The bypass was unavoidable to prevent loss of life, personal injury, or severe property damage;
B. There was no feasible alternative to the bypass, including the use of auxiliary treatment or retention of the wastewater; and
C. The industrial user properly notified the superintendent as described in § 18-317(4)(b)(ii) below.

(ii) Industrial users must provide immediate notice to the superintendent upon discovery of an unanticipated bypass. If necessary, the superintendent may require the industrial user to submit a written report explaining the cause(s), nature, and duration of the bypass, and the steps being taken to prevent its recurrence.

(iii) An industrial user may allow a bypass to occur which does not cause pretreatment standards or requirements to be violated, only if it is for essential maintenance to ensure efficient operation of the treatment system. Industrial users anticipating a bypass must submit notice to the superintendent at least ten (10)
days in advance. The superintendent may only approve the anticipated bypass if the circumstances satisfy those set forth in § 18-317(4)(b)(i) above.

(5) Remedies nonexclusive. The remedies provided for in this ordinance are not exclusive. The superintendent may take any, all or any combination of these actions against a noncompliant user. Enforcement of pretreatment violations will generally be in accordance with the city's enforcement response plan. However, the superintendent may take other action against any user when the circumstances warrant. Further, the superintendent is empowered to take more than one (1) enforcement action against any noncompliant user. (as added by Ord. #5-09, March 2009)

18-318. **Industrial waste surcharge.** (1) Surcharge based upon strength of wastes. In the event the user discharges industrial wastes to the POTW having an average Biological Oxygen Demand (BOD) content in excess of three hundred (300) mg/l, and/or an average Suspended Solids (SS) content in excess of three hundred (300) mg/l, and/or an average ammonia nitrogen content in excess of thirty (30) mg/l, the user shall pay a surcharge based upon the excess strength of their wastes.

(2) Costs of treatment to be reviewed annually. The costs of treatment for each pound of BOD, SS, and ammonia nitrogen removed by the POTW shall be reviewed at the end of each fiscal year and appropriate surcharge rates applied to the sewer billing. These rates shall be in effect until the next annual rate review. (as added by Ord. #5-09, March 2009)

18-319. **Validity.** (1) Conflict. In case of conflict or inconsistency, the provisions of this ordinance shall supercede and take precedence over any other ordinance or part thereof or any other rules and regulations of the City of Oak Ridge.

(2) Severability. It is hereby declared the intention of city council that sections, paragraphs, sentences, clauses, and words of this ordinance are severable, and if any such section, paragraph, sentence, clause, or word be declared unconstitutional or invalid by valid judgment or decree of any court of competent jurisdiction, such unconstitutionality or invalidity shall not affect any remaining sections, paragraphs, sentences, clauses, or words since the same would have been enacted without the incorporation of the unconstitutional section, paragraph, sentence, clause or word. 20-105. Powers and duties of director—during enemy-caused emergency. In the event of any actual enemy-caused emergency proclaimed as provided in § 20-101, the director of civil defense, with the approval of the mayor or with the approval of the mayor acting through the city manager, may exercise, during such emergency, the power to enforce all rules and regulations relating to civil defense and acting under the authority of this chapter or under the authority of the mayor or the city manager as an agent of the Governor of Tennessee, may take control of all means of transportation and communications, all stocks of fuel, food, clothing, medicines and supplies and all facilities including buildings and plants and exercise all power necessary to secure the safety and protection of the civilian population. The city is authorized to exercise the powers vested under this section and elsewhere in this chapter in the light of exigencies of the extreme emergency situation without regard to time-consuming procedures and formalities prescribed by ordinance or statute (except mandatory constitutional requirements) pertaining to the performance of public work, entering into contracts, the incurring of obligations, the employment of temporary workers, the rental of equipment, the purchase of supplies and materials and levying of taxes and the appropriations and expenditures of public funds. (1969 Code, § 11-7)

20-108. Immunity from liability for civil defense activities. As provided in Tennessee Code Annotated, § 7-630, and in accordance therewith, neither the city nor the agents or representatives of the city shall be liable for personal injury or property damage sustained by any person appointed or acting as a civil defense worker or member of any agency engaged in civil defense activity. The right of any person to receive benefits of compensation to which he or she might otherwise be entitled to under workmen's compensation law or any pension law or any act of Congress, shall not be affected by this section. (1969 Code, § 11-8)

Whenever the federal government or the State of Tennessee or any person shall offer to the city any services, equipment, supplies, materials, or any funds by way of gift, grant or loan for purposes of civil defense, the mayor may accept such offer and may authorize the city manager to receive the same subject to the terms of the offer and the rules and regulations, if any, of the agency making the offer. 21-108. Use of position or authority.
21-110. Ethics complaints.
21-111. Violations.

21-101. **Applicability.** This chapter is the code of ethics for personnel of the city. It applies to all full-time and part-time elected or appointed officials and employees, whether compensated or not, including those of any separate board, commission, committee, authority, corporation, or other instrumentality appointed or created by the city, including but not limited to the Oak Ridge City Schools and its Board of Education. (as added by Ord. #7-07, May 2007)

21-102. **Definition of "personal interest."
The following words, terms and phrases, when used in this chapter, shall have the meanings ascribed to them in this section, except where the context clearly indicates a different meaning:

(1) The word "censure" means an expression of severe criticism or reproach.

(2) The word "complaint" means a written, signed document setting forth the reason(s) for belief of an ethics violation. A complaint must contain the original signature of the complaining party and such person's contact information including but not limited to full name, address, and telephone number. Comments sent by email, facsimile or other electronic means are not original documents and shall not constitute a valid complaint.

(3) The words "employment interest" includes a situation in which an official or employee or a designated family member is negotiating possible employment with a person or organization that is the subject of the vote or that is to be regulated or supervised.
(4) The word "gift" means the transfer of anything of economic value, regardless of form, without reasonable consideration. "Gift" may include a subscription, membership, loan, forgiveness of debt, advance or deposit of money or anything of value, conveyed or transferred. "Gift" does not include political campaign contributions which are solicited or accepted in accordance with applicable laws and regulations.

(5) The word "official" means the members of city council, as well as members appointed thereby to city boards, commissions, committees, authorities, corporations or instrumentalities established by law or by this code. "Official" also includes the city judge.

(6) The words "personal interest" mean: (a) Any financial, ownership, or employment interest in the subject of a vote by a city board not otherwise regulated by state statutes on conflicts of interests; or

(b) Any financial, ownership, or employment interest in a matter to be regulated or supervised; or

(c) Any such financial, ownership, or employment interest of the official's or employee's spouse, parent(s) (including natural, step or adoptive, as well as inlaws), grandparent(s), sibling(s) (including natural, step or adoptive), child(ren) (including natural, step or adoptive, as well as grandchildren and inlaws), and any other individual residing within the employee's household who is a legal dependent of the employee or official for income tax purposes.

In any situation in which a personal interest is also a conflict of interest under state law, the provisions of the state law take precedence over the provisions of this chapter. (as added by Ord. #7-07, May 2007)

21-103. Disclosure of personal interest by official with vote. An official with the responsibility to vote on a measure shall disclose during the meeting at which the vote takes place, before the vote and so it appears in the minutes, any personal interest that affects or that would lead a reasonable person to infer that it affects the official's vote on the measure. In addition, the official may recuse himself or herself from voting on the measure. (as added by Ord. #7-07, May 2007)

21-104. Disclosure of personal interest in nonvoting matters. An official or employee who must exercise discretion relative to any matter, other than casting a vote, and who has a personal interest in the matter that affects or that would lead a reasonable person to infer that it affects the exercise of the discretion shall disclose, before the exercise of the discretion when possible, the interest on a form provided by and filed with the city clerk. Copies of such forms filed with the city clerk shall be provided to the city manager and, in the case of an employee, filed in the employee's personnel file. In addition, the official or employee may, to the extent allowed by law, charter, ordinance, or policy, recuse
himself or herself from the exercise of discretion in the matter. (as added by Ord. #7-07, May 2007)

21-105. Acceptance of gratuities, etc. An official or employee may not accept, directly or indirectly, any money, gift, gratuity, or other consideration or favor of any kind from anyone other than the city:

(1) For the performance of an act, or refraining from performance of an act, that he or she would be expected to perform, or refrain from performing, in the regular course of his or her duties; or

(2) That might reasonably be interpreted as an attempt to influence his or her action, or reward him or her for past action, in executing city business.

This section does not apply to those items that are specifically covered by a separate policy and/or procedure established by the city manager pertaining to gifts and gratuities. (as added by Ord. #7-07, May 2007)

21-106. Use of information. (1) An official or employee may not disclose any information obtained in his or her official capacity or position of employment that is made confidential under state or federal law except as authorized by law.

(2) An official or employee may not use or disclose information obtained in his or her official capacity or position of employment with the intent to result in financial gain for himself or herself or any other person or entity. (as added by Ord. #7-07, May 2007)

21-107. Use of city time, facilities, etc. (1) An official or employee may not use or authorize the use of city time, facilities, equipment or supplies for private gain or advantage to himself or herself.

(2) An official or employee may not use or authorize the use of city time, facilities, equipment or supplies for private gain or advantage to any private person or entity, except as authorized by legitimate contract or lease that is determined by the city manager or city council to be in the best interests of the city or as otherwise permitted by law. (as added by Ord. #7-07, May 2007)

21-108. Use of position of authority. (1) An official or employee may not make or attempt to make private purchases, for cash or otherwise, in the name of the city; provided, however, that this section shall not apply to reasonable amounts paid for:

(a) Food, transportation, lodging and other travel expenses incurred in accordance with the city's travel policy.

(b) Dues, registrations, meals and similar expenses incurred in conjunction with membership or participation in a professional or community organization to which the official or employee belongs in his or her official capacity.
(c) Meals purchased in the course of an official business meeting conducted on the city's behalf.

(2) An official or employee may not use or attempt to use his or her position to secure any privilege or exemption for himself or herself or others that is not authorized by the charter, general law, or ordinance or policy of the city. No officer shall intimidate, threaten, coerce, discriminate against, or give the appearance of or attempt to intimidate, threaten, coerce or discriminate against any employee for the purpose of interfering with that person's freedom of choice in the regular discharge of his or her official duties.

(3) No official or employee shall provide commercial or advertising endorsements in such a manner as to convey the city's approval of any private for-profit enterprise; provided, however, that an official or employee may respond to inquiries seeking information as to the city's experience with a vendor or other private enterprise. (as added by Ord. #7-07, May 2007)

21-109. Outside employment. An official or employee may not accept or continue any outside employment if the work unreasonably inhibits the performance of any affirmative duty of the municipal position or conflicts with any provision of the city's charter or any ordinance or policy. This section does not negate the requirement for employees to obtain prior approval before beginning any outside employment. (as added by Ord. #7-07, May 2007)

21-110. Ethics complaints. (1) The city attorney is designated as the ethics officer of the city. Upon the written request of an official or employee potentially affected by a provision of this chapter, the city attorney may render an oral or written advisory ethics opinion based upon this chapter and other applicable law.

(2) (a) Except as otherwise provided in this subsection, the city attorney shall investigate any credible complaint against an appointed official or employee charging any violation of this chapter, or may undertake an investigation on the city attorney's own initiative when the city attorney acquires information indicating a possible violation and make recommendations for action to end or seek retribution for any activity that, in the attorney's judgment, constitutes a violation of this code of ethics.

(b) The city attorney may request that the city manager or city council hire another attorney, individual, or entity to act as ethics officer when the city attorney has or will have a conflict of interests in a particular matter.

(c) When a complaint of a violation of any provision of this chapter is lodged against the city attorney, the city manager, or a member of city council, city council shall take the following action:
(i) Determine whether the complaint has merit and warrants further investigation, or determine if the complaint is frivolous and without merit.

(ii) If city council determines the complaint has merit and warrants further investigation, city council shall direct that the complaint be investigated by an independent person, group of persons, or firm chosen by the city manager and city attorney when the complaint is against a member of city council, and chosen by city council when the complaint is against the city manager or the city attorney.

(3) The interpretation that a reasonable person in the circumstances would apply shall be used in interpreting and enforcing this code of ethics.

(4) When a violation of this code of ethics also constitutes a violation of a personnel policy, rule, or regulation or a civil service policy, rule, or regulation, the violation shall be dealt with as a violation of the personnel or civil service provisions rather than as a violation of this code of ethics. (as added by Ord. #7-07, May 2007)

21-111. Violations. An elected official or appointed member of a separate city board, commission, committee, authority, corporation, or other instrumentality who violates any provision of this chapter is subject to punishment as provided by the city's charter or other applicable law and in addition is subject to censure by city council. An appointed official or an employee who violates any provision of this chapter is subject to disciplinary action. (as added by Ord. #7-07, May 2007)
ORDINANCE NO. 1-05

TITLE

AN ORDINANCE ADOPTING AND ENACTING A CODIFICATION AND REVISION OF THE ORDINANCES OF THE CITY OF OAK RIDGE, TENNESSEE.

WHEREAS, some of the ordinances of the City of Oak Ridge are obsolete; and

WHEREAS, some of the other ordinances of the city are inconsistent with each other or are otherwise inadequate; and

WHEREAS, the Council of the City of Oak Ridge, Tennessee, has caused its ordinances of a general, continuing, and permanent application or of a penal nature to be codified and revised and the same are embodied in a code of ordinances known as the "Oak Ridge Municipal Code."

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF OAK RIDGE, TENNESSEE:

Section 1. Ordinances codified. The ordinances of the city of a general, continuing, and permanent application or of a penal nature, as codified and revised in the following "titles," namely "titles" 1 to 20, both inclusive, are ordained and adopted as the "Oak Ridge Municipal Code," hereinafter referred to as the "municipal code."

Section 2. Ordinances repealed. All ordinances of a general, continuing, and permanent application or of a penal nature not contained in the municipal code are hereby repealed from and after the effective date of said code, except as hereinafter provided in Section 3 below.

Section 3. Ordinances saved from repeal. The repeal provided for in Section 2 of this ordinance shall not affect: Any offense or act committed or done, or any penalty or forfeiture incurred, or any contract or right established or accruing before the effective date of the municipal code; any ordinance or resolution promising or requiring the payment of money by or to the city or authorizing the issuance of any bonds or other evidence of said city's indebtedness; any appropriation ordinance or ordinance providing for the levy of taxes or any budget ordinance; any contract or obligation assumed by or in favor of said city; any ordinance fixing the salary of any city officer or employee or the amount of any bond required of any officer, employee or agent of the city; any ordinance establishing or authorizing the establishment of a social security system or providing or changing coverage under that system; any administrative ordinances or resolutions not in conflict or inconsistent with the provisions of such code; the portion of any ordinance not in conflict with such code which regulates speed, direction of travel, passing, stopping, yielding, standing, or parking on any specifically named public street or way; any right or franchise granted by the city; any ordinance dedicating, naming, establishing, locating, relocating, opening, paving, widening, vacating, etc., any street or public way; any ordinance establishing and prescribing the grade of any street; any ordinance providing for local improvements and assessing taxes therefor; any ordinance dedicating or accepting any plat or subdivision; any prosecution, suit, or other proceeding pending or any judgment rendered on or prior to the effective date of said code; any ordinance which by its own terms, is effective only for a stated or limited time; any ordinance approving or amending the rules and regulations of any board, commission, department or other agency of the city; any zoning ordinance or amendment thereto or amendment to the zoning map; nor shall such repeal affect any ordinance annexing territory to the city.
Section 4. Continuation of existing provisions. Insofar as the provisions of the municipal code are the same as those of ordinances existing and in force on its effective date, said provisions shall be considered to be continuations thereof and not as new enactments.

Section 5. Penalty clause. Unless otherwise specified in a title, chapter or section of the municipal code, including the codes and ordinances adopted by reference, whenever in the municipal code any act is prohibited or is made or declared to be a civil offense, or whenever in the municipal code the doing of any act is required or the failure to do any act is declared to be a civil offense, the violation of any such provision of the municipal code shall be punished by a civil penalty of not less than two dollars ($2.00) nor more than fifty dollars ($50.00) and costs for each separate violation, or by imprisonment for not more than ninety (90) days, or by both such fine and imprisonment as provided in § 1-107 of the code; provided, however, that the imposition of a civil penalty under the provisions of this municipal code shall not prevent the revocation of any permit or license or the taking of other punitive or remedial action where called for or permitted under the provisions of the municipal code or other applicable law. In any place in the municipal code the term "it shall be a misdemeanor" or "it shall be an offense" or "it shall be unlawful" or similar terms appears in the context of a penalty provision of this municipal code, it shall mean "it shall be a civil offense." Anytime the word "fine" or similar term appears in the context of a penalty provision of this municipal code, it shall mean "a civil penalty."

Each day any violation of the municipal code continues shall constitute a separate civil offense.¹

Section 6. Severability clause. Each section, subsection, paragraph, sentence, and clause of the municipal code, including the codes and ordinances adopted by reference, is hereby declared to be separable and severable. The invalidity of any section, subsection, paragraph, sentence, or clause in the municipal code shall not affect the validity of any other portion of said code, and only any portion declared to be invalid by a court of competent jurisdiction shall be deleted therefrom.

Section 7. Reproduction and amendment of code. The municipal code shall be reproduced in loose-leaf form. The city council, by motion or resolution, shall fix, and change from time to time as considered necessary, the prices to be charged for copies of the municipal code and revisions thereto. After adoption of the municipal code, each ordinance affecting the code shall be adopted as amending, adding, or deleting, by numbers, specific chapters or sections of said code. Any and all additions and amendments to the code, when passed in such form as to indicate the intention of the city council to make the same a part thereof, shall be deemed to be incorporated in the code so that reference to the Oak Ridge Municipal Code shall be understood and intended to include such additions and amendments. Periodically thereafter all affected pages of the municipal code shall be revised to reflect such amended, added, or deleted material and

shall be distributed to city officers and employees having copies of said code and to other persons who have requested and paid for current revisions. Notes shall be inserted at the end of amended or new sections, referring to the numbers of ordinances making the amendments or adding the new provisions, and such references shall be cumulative if a section is amended more than once in order that the current copy of the municipal code will contain references to all ordinances responsible for current provisions.

Section 8. Construction of conflicting provisions. Where any provision of the municipal code is in conflict with any other provision in said code, the provision which establishes the higher standard for the promotion and protection of the public health, safety, and welfare shall prevail.

Section 9. Code available for public use. Three (3) copies of the code shall be kept on file in the office of the city clerk, preserved in looseleaf form or in such other form as the city council may consider most expedient. It shall be the express duty of the city clerk, or someone authorized by the city clerk, to insert in such copies, in their designated places, all amendments or ordinances which indicate the intention of the city council to make the same a part of the code when the same have been printed or reprinted in page form, and to extract from such copies all provisions which may be from time to time repealed by the city council. Such copies of the code shall be available for all persons desiring to examine the same.

Section 10. Unlawful changes to code. It shall be unlawful for any person to change or amend, by additions or deletions, any part or portion of such code, or to insert or delete pages or portions thereof, or to alter or tamper with such code in any manner whatsoever which will cause the law of the City of Oak Ridge to be misrepresented thereby. Any person violating this section shall be punished as provided in section 5 of this ordinance.

Section 11. Date of effect. This ordinance shall take effect ten (10) days after adoption on second reading, the welfare of the City of Oak Ridge requiring it, and the municipal code, including all the codes and ordinances therein adopted by reference, shall be effective on and after that date.
