Introduction and Scope of Project

The City of Rancho Santa Margarita is a contract City, servicing approximately 50,000 residents and is located in southern Orange County. The City incorporated in 2000, and is comprised of approximately 13 square miles with a Council-Manager form of government.

The City of Rancho Santa Margarita is seeking the services of an experienced website design firm to re-design, develop, implement, and provide hosting and maintenance information for the City’s website. This project will involve utilizing posted information on the existing website as well as the implementation of new information, products, and features as suggested by the City and the firm selected.

The City’s existing internet website is www.cityofrsm.org which contains general City information including separate pages for City departments, specific events and functions. The City of Rancho Santa Margarita is committed to building a premiere website that is designed upon the ease of use from the view point of our citizens. The City is interested in an innovative design that aids website visitors who generally know what information they need or service they want to secure. The site shall also equally facilitate usage by visitors who may not understand how to find that information or service within the governmental organizations.

In addition, it is the City’s intention to expand the current usefulness of the website, and future needs and functionality should be demonstrated in the proposal. The City is committed to being available to provide information and support to respondents and will be actively involved in providing information and support throughout the re-design process. The successful firm must have substantial experience in website design, development, implementation and maintenance.

Respondents are encouraged to contact the City with any questions or concerns. Final proposals submitted are to be received by the City of Rancho Santa Margarita City Clerk no later than 4:00 p.m. on Monday, May 14, 2007, at the following address:

City of Rancho Santa Margarita
Attn: Debbie Wolff, City Clerk
22112 El Paseo
Rancho Santa Margarita, CA 92688
Website Objectives

The goal of the City’s website is to provide simple electronic access to public services, serve as a public communications tool, reduce transaction costs for the City and citizens, and to streamline business operations. The current site structure and design was developed three to four years ago and requires significant redesign to take advantage of new design elements and growing demand for electronic services. Specifically, the City would like the redesigned site to support e-government transactions such as on-line permits, on-line forms and applications, on-line payments, and a variety of other activities. The redesigned site should have a theme promoting the City with a friendly and professional feel.

The City’s website should provide easy access to City services, be adaptable to current and changing technology, provide content management capability for City Staff and be used as a public communications tool. The website shall meet the following criteria:

- Visually appealing – The site must have an attractive mix of text, photos and graphics.
- Provide easy electronic access to public information for use by the target audience.
- Easily updated, with a content management system (CMS). Respondent should list the software that would be used to create the site including all graphics software and recommend software and licenses that the City will need to purchase for the continued maintenance of the website.
- Provide the public with an alternative means of communicating with City Officials and staff.
- Enhance delivery and awareness of public services and facilitate a clearly accessible process for public inquiry.
- Common Theme/Consistent Design. Each section of the site should have a common look/theme. The City logo should be on every page as well as a common header. All font types and basic layout should be used throughout the site.
- Provide a 24-hour City Hall, and the ability to conduct secure financial transactions online.
- Provide pages for all City programs, services, and functions.
- Meet ADA Priority 1 requirements.
  See Example: [www.ada.gov/websites2_prnt.pdf](http://www.ada.gov/websites2_prnt.pdf)
- Be easily upgradeable/portable.

The information on the City website should be directed towards the City’s citizens, businesses, visitors, prospective businesses, prospective residents, other government agencies, civic groups, associations, youth and senior citizen groups, developers, and any person or agency seeking to conduct business with, or obtain information about, the City of Rancho Santa Margarita.

Special Provisions

Internet Provider Services are not part of this contract. The City already has an ISP, therefore these services are not part of this RFP process. However, hosting and maintenance service options should be presented as options to facilitate the design and maintenance of this site. Hosting providers located within the City will be given preference and must be included as hosting options.

General and Desired Enhancements:

A. Re-create and greatly enhance the City’s existing website to be resourceful, informative, and serve as a marketing asset that provides a citizen/business friendly environment which emphasizes access to City services, departments and business opportunities.

B. Develop a highly beneficial, cost-effective, easy to use, interactive and architecturally sound website that is flexible enough to support the City’s internet for a minimum of three to five years.

C. The City’s preferred website model calls for authorized City staff to have some ability to perform routine content management related to routine information such as the posting of meeting dates, agendas, minutes, departmental events, removing old and outdated information and general noticing. A Staff webmaster(s) should have more comprehensive ability to provide quality control and the ability to update non-routine information. Therefore, a system needs to be structured for maintenance and updating capabilities by non-technical staff. The City is interested in a content management process and is open to ideas on how best to accomplish this aspect of the website.

D. Create a consistent and standardized format and enhanced graphical look for all pages; thereby establishing a unified theme throughout the City’s website. However, the established theme should also provide the flexibility to allow for different City functions and some level of individuality and/or functionality between City functions and departments.
E. For ease of use, the City’s website must provide consistent orientation and navigational aids, such as hierarchical menus that tell users how deep they are into a topic or subtopic as well as a homepage link or icon on each page in the same position.

F. The City anticipates future expansion of its e-government use, and the re-design should facilitate future capability of online transactions such as permit fee payments, recreation class registration, secure credit card payments, business license applications, building permit applications, employment applications, and Geographical Information Systems functions.

G. Allow for interactivity. Include e-mail response, surveys, feedback, forms, online payments, and access to various City calendars. The designer must incorporate the ability for users to complete interactive on-line forms for such tasks as employment, business license, and building permit applications.

H. Graphic files should be relative to site. Design with simplicity to allow for quickest loading. Web pages should be tested at both 28K and 56K dial-up modem speeds to ensure each webpage can be accessed timely.

I. Allow for search capabilities. Use existing search engines and/or create City database within home site.

J. Track page hits per City function. Locate hit counter unobtrusively at bottom of each page. Maintenance software which includes reporting functions would be valuable.

K. Form Printing. A number of static forms will be available for printing. Website must have links or embedded plug-ins such as Java and Adobe for opening and viewing these documents.

L. Although the City has some specific requirements, we are also interested in your ideas for content, and more specifically, your approach in re-designing the style of the City’s website. We encourage respondents to consider and propose alternative solutions, recommendations and improvements.

**Services to be Provided**

A. The website must provide for high-speed upload/download response times for both low and high speed computers that are used by the average citizen.

B. As per the Americans with Disabilities Act, the City must provide the same level of service to individuals with visual, hearing, motor, or cognitive disability that we do to the general public. The City expects respondents to offer suggestions regarding accessibility.
C. The site should be developed to minimize loading times for analog dial-up customers.

D. The site must be designed to function effectively with common versions of software and hardware, which must be identified in your proposal.

E. All documents, including maps and tables, should be in HTML, Portable Document Format (pdf), or in a format approved by the City to provide ease of viewing, printing, and downloading, and in alternate ADA acceptable download formats.

F. Include links for citizens to download any browser plug-in products, such as Acrobat Reader, that are necessary to view information on the site.

G. The site must be compatible with current versions of commonly used Internet browsers. Please identify proposed compatibility with your response.

H. The site should take into consideration the City’s future desire to include e-government capabilities, enabling secure on-line credit card purchases, verifications, fulfillment, and acceptance, and the City’s ability to conduct e-government transactions such as on-line permitting, park and facility reservations, class registrations and other interactive forms.

**Other requirements and features:**

A. Cross-reference information should be hyperlinked from page to page within the website with the Home Page link always visible.

B. Information currently provided on the website must be included in the proposal.

C. The proposal should include a comprehensive timeline for each phase of the website re-design, including meetings with City staff, re-design, development, draft presentation, implementation, hosting and training.

D. Graphical files should be relative to the site and provide for quickest loading, with little use of cartoons or caricatures.

E. The site must be designed for continuous operation 24 hours a day, 7 days a week with exception for times of scheduled maintenance.
