TITLE 18

WATER AND SEWERS

CHAPTER
1. WATER AND SEWER SERVICE.
2. SEWER USE AND WASTEWATER TREATMENT.
3. CROSS CONNECTIONS, AUXILIARY INTAKES, ETC.
4. SPECIAL ASSESSMENT ZONE.

CHAPTER 1

WATER AND SEWER SERVICE

SECTION
18-102. Definitions.
18-103. Application and contract for service.
18-104. Service charges for temporary service.
18-105. Connection charges.
18-106. Water and sewer main extensions.
18-109. Meter tests.
18-110. Multiple services through a single meter.
18-111. Customer billing and payment policy.
18-112. Termination or refusal of service.
18-113. Termination of service by customer.
18-114. Access to customers' premises.
18-115. Inspections.
18-117. Customer's responsibility for violations.
18-118. Supply and resale of water.
18-119. Unauthorized use of or interference with water supply.
18-120. Limited use of unmetered private fire line.
18-121. Damages to property due to water pressure.
18-122. Liability for cutoff failures.
18-123. Restricted use of water.
18-124. Interruption of service.

1Municipal code references
   Building, utility and housing codes: title 12.
   Refuse disposal: title 17.
18-2

18-125. Schedule of rates.
18-126. Water and sewer service charges.
18-127. Board of mayor and aldermen to perform duties required of the board of waterworks and/or sewerage commissioners.
18-128. Adjustments to water and sewer service charges.

18-101. Application and scope. The provisions of this chapter are a part of all contracts for receiving water and sewer service from the city and shall apply whether the service is based upon contract, agreement, signed application, or otherwise. (1987 Code, § 13-101)

18-102. Definitions. (1) "Customer" means any person, firm, or corporation who receives water and/or sewer service from the city under either an express or implied contract.

(2) "Dwelling" means any single structure, with auxiliary buildings, occupied by one (1) or more persons or households for residential purposes.

(3) "Premise" means any structure or group of structures operated as a single business or enterprise, provided, however, the term "premise" shall not include more than one (1) dwelling.

(4) "Sewer service line" shall consist of the pipe line extending for any sewer main of the city to the customer's premises. The city shall own and be responsible for maintenance of that portion of the service line from the main to the property line or first cleanout if equipped. The customer shall be responsible for that portion of the service line from the property line or first cleanout onto the property and connection to a home, business or other point of use. All private portions of service lines shall be inspected and constructed according to the requirements of the city and Tennessee Department of Environment and Conservation and shall be water tight, exclude all rainwater and stormwater and be equipped with cleanouts as directed by the city. Cleanouts shall be installed where practical within five feet (5') of the property line and within five feet (5') of exiting any building and at any change in direction of the service greater than forty-five degrees (45°). The city reserves the right to use the first cleanout in case of blockages.

(5) "Water service line" shall consist of the pipe line extending from any water main to and connecting to the customer's premises. The city shall own and be responsible for that portion for the service line from the main to and including the water meter and meter box. The customer shall own and be responsible for that portion of the service line beyond the meter which connects the meter to the home, business or other points of customer usage. (1987 Code, § 13-102, as amended by Ord. #2006-2, March 2006)

18-103. Application and contract for service. Each prospective customer desiring water and/or sewer service will be required to sign a standard form contract and pay a connection fee of fifty dollars ($50.00). If the prospective
customer desiring water and/or sewer service is not the owner of record of the specific property, they must submit in addition to the connection fee deposit of one hundred thirty dollars ($130.00). After a request for cancellation of service, the deposit will be refunded less any charges owed.

The receipt of a prospective customer's application for service, shall not obligate the city to render the service applied for. If the service applied for cannot be supplied in accordance with the provisions of this chapter, the liability of the city to the applicant shall be limited to the return of any deposit made by such applicant. (1987 Code, § 13-104)

18-104. Service charges for temporary service. Customers requiring temporary service shall pay all costs for connection and disconnection incidental to the supplying and removing of service in addition to the regular charge for water and/or sewer service. (1987 Code, § 13-104)

18-105. Connection charges. Service lines will be laid by the city from its mains to the property line at the expense of the applicant for service. The location of such lines will be determined by the city.

Before a new water or sewer service line will be laid by the city, the applicant shall pay a nonrefundable connection charge of one thousand two hundred dollars ($1,200.00). In addition, a fee of one hundred fifty dollars ($150.00) will be assessed if it is necessary for the city to bore underneath a street or road in order to make the connection. For sewer connections a ten dollar ($10.00) inspection fee is also charged.

Once a tap is connected, the customer will be billed monthly according to the city's water and sewer rates. In addition, to the connection charge, the applicant for service will be responsible for any costs associated with boring underneath a State of Tennessee road or highway in order to make the connection.

When a service line is completed, the city shall be responsible for the maintenance and upkeep of such service line from the main to and including the meter and meter box, and such portion of the service line shall belong to the city. The remaining portion of the service line beyond the meter box (or property line, in the case of sewers) shall belong to and be the responsibility of the customer. (Ord. #2007-7, Sept. 2007)

18-106. Water and sewer main extensions. Persons desiring water and/or sewer main extensions must pay all of the cost of making such extensions.

---

1Municipal code reference
Construction of building sewers: title 8, chapter 3.
All such extensions shall be installed either by city forces or by other forces working directly under the supervision of the city in accordance with plans and specifications prepared by an engineer registered with the State of Tennessee.

Upon completion of such extensions and their approval by the city, such water and/or sewer mains shall become the property of the city. The persons paying the cost of constructing such mains shall execute any written instruments requested by the city to provide evidence of the city's title to such mains. In consideration of such mains being transferred to it, the city shall incorporate said mains as an integral part of the municipal water and sewer systems and shall furnish water and sewer service therefrom in accordance with these rules and regulations, subject always to such limitations as may exist because of the size and elevation of the mains. (1987 Code, § 13-106)

18-107. Water and sewer main extension variances. Whenever the board of mayor and aldermen is of the opinion that it is to the best interest of the city and its inhabitants to construct a water and/or sewer main extension without requiring strict compliance with the preceding section, such extension may be constructed upon such terms and conditions as shall be approved by the board of mayor and aldermen.

The authority to make water and/or sewer main extensions under the preceding section is permissive only and nothing contained therein shall be construed as requiring the city to make such extensions or to furnish service to any person or persons. (1987 Code, § 13-107)

18-108. Meters. All meters shall be installed, tested, repaired, and removed only by the city.

No one shall do anything which will in any way interfere with or prevent the operation of a meter. No one shall tamper with or work on a water meter without the written permission of the city. No one shall install any pipe or other device which will cause water to pass through or around a meter without the passage of such water being registered fully by the meter. (1987 Code, § 13-108)

18-109. Meter tests. The city will, at its own expense, make routine tests of meters when it considers such tests desirable.

In testing meters, the water passing through a meter will be weighed or measured at various rates of discharge and under varying pressures. To be considered accurate, the meter registration shall check with the weighed or measured amounts of water within the percentage shown in the following table:
The city will also make tests or inspections of its meters at the request of the customer.  (1987 Code, § 18-109)

18-110. **Multiple services through a single meter.** No customer shall supply water service to more than one (1) dwelling or premise from a single service line and meter without first obtaining the written permission of the city.

Where the city allows more than one (1) dwelling or premise to be served through a single service line and meter, the amount of water used by all the dwellings and premises served through a single service line and meter shall be allocated to each separate dwelling or premise served. The water and charges for each such dwelling or premise thus served shall be computed just as if each such dwelling or premise had received through a separately metered service the amount of water so allocated to it, such computation to be made at the city's applicable water schedule, including the provisions as to minimum bills. The separate charges for each dwelling or premise served through a single service line and meter shall then be added together, and the sum thereof shall be billed to the customer in whose name the service is supplied.  (1987 Code, § 13-110)

18-111. **Customer billing and payment policy.** Water and sewer bills shall be rendered monthly and shall designate a standard net payment period for all members of not less than ten (10) days after the date of the bill. Failure to receive a bill will not release a customer from payment obligation. There is established for all members a late payment charge not to exceed ten percent (10%) for any portion of the bill paid after the net payment period.

Payment must be received in the water and sewer department no later than 4:30 P.M. on the due date. If the due date falls on Saturday, Sunday, or a holiday, net payment will be accepted if paid on the next business day no later than 4:30 P.M.

If a meter fails to register properly, or if a meter is removed to be tested or repaired, or if water is received other than through a meter, the city reserves the right to render an estimated bill based on the best information available.  (1987 Code, § 13-111)

18-112. **Termination or refusal of service.** (1) Basis of termination or refusal. The city shall have the right to discontinue water and sewer service or to refuse to connect service for a violation of, or a failure to comply with, any of the following:
(a) These rules and regulations, including the nonpayment of bills.
(b) The customer's application for service.
(c) The customer's contract for service.

The right to discontinue service shall apply to all water and sewer services received through collective single connections or services, even though more than one (1) customer or tenant is furnished services therefrom, and even though the delinquency or violation is limited to only one (1) such customer or tenant.

2 Termination of service.  (a) If bill remains unpaid ten (10) days after the gross amount due date, service will be discontinued without further notice.
(b) In the case of termination for nonpayment of bills, the employee carrying out the termination procedure will attempt before disconnecting service to contact the customer at the premises in a final effort to collect payment and avoid termination.
(c) A customer may request a hearing to resolve any disputes they may have about the bill including the payment schedule. The request must be made to the city business office any time during regular business hours, and must be made prior to the termination of service. Once the city staff has resolved the dispute, or provided an explanation for the billing, the bill will be considered due and payable. The fact that a customer may continue to dispute the bill does not relieve them of the payment obligation.
(d) Service termination for any reason shall be reconnected only after the payment of all charges due or satisfactory arrangements for payment have been made, or the correction of the problem that resulted in the termination of the service in a manner satisfactory to the water and sewer department, plus the payment of a reconnection charge of seventy-five dollars ($75.00).
(e) Reconnection of the service shall be normally made only during the regular business hours of the City of Baxter. Reconnection of the service outside of regular business hours will be subject to additional charges. (1987 Code, § 13-112, as amended by Ord. #2005-8, Sept. 2005)

18-113. Termination of service by customer. Customers who have fulfilled their contract terms and wish to discontinue service must give at least three (3) days written notice to that effect unless the contract specifies otherwise. Notice to discontinue service prior to the expiration of a contract term will not relieve the customer from any minimum or guaranteed payment under such contract or applicable rate schedule.

When service is being furnished to an occupant of premises under a contract not in the occupant's name, the city reserves the right to impose the
following conditions on the right of the customer to discontinue service under such a contract:

(1) Written notice of the customer's desire for such service to be discontinued may be required; and the city shall have the right to continue such service for a period not to exceed ten (10) days after receipt of such written notice, during which time the customer shall be responsible for all charges for such service. If the city should continue service after such ten (10) day period subsequent to the receipt of the customer's written notice to discontinue service, the customer shall not be responsible for charges for any service furnished after the expiration of the ten (10) day period.

(2) During the ten (10) day period, the occupant of premises to which service has been ordered discontinued by a customer other than such occupant, may be allowed by the city to enter into a contract for service in the occupant's own name upon the occupant's complying with these rules and regulations with respect to a new application for service. (1987 Code, § 13-113)

18-114. Access to customers' premises. The city's identified representatives and employees shall be granted access to all customers' premises at all reasonable times for the purpose of reading meters, for testing, inspecting, repairing, removing, and replacing all equipment belonging to the city, and for inspecting customers' plumbing and premises generally in order to secure compliance with these rules and regulations. (1987 Code, § 13-114)

18-115. Inspections. The city shall have the right, but shall not be obligated, to inspect any installation or plumbing system before water and/or sewer service is furnished or at any later time. The city reserves the right to refuse service or to discontinue service to any premises not in compliance with any special contract, these rules and regulations, or other requirements of the city.

Any failure to inspect or reject a customer's installation or plumbing system shall not render the city liable or responsible for any loss or damage which might have been avoided had such inspection or rejection been made. (1987 Code, § 13-115)

18-116. Customer's responsibility for system's property. Except as herein elsewhere expressly provided, all meters, service connections, and other equipment furnished by or for the city shall be and remain the property of the city. Each customer shall provide space for and exercise proper care to protect the property of the city on his premises. In the event of loss or damage to such property arising from the neglect of a customer to care for it properly, the cost of necessary repairs or replacements shall be paid by the customer. (1987 Code, § 13-116)
18-117. **Customer's responsibility for violations.** Where the city furnishes water and/or sewer service to a customer, such customer shall be responsible for all violations of these rules and regulations which occur on the premises so served. Personal participation by the customer in any such violations shall not be necessary to impose such personal responsibility on him. (1987 Code, § 13-117)

18-118. **Supply and resale of water.** All water shall be supplied within the city exclusively by the city, and no customer shall, directly or indirectly, sell, sublet, assign, or otherwise dispose of the water or any part thereof except with written permission from the city. (1987 Code, § 13-118)

18-119. **Unauthorized use of or interference with water supply.** No person shall turn on or turn off any of the city's stop cocks, valves, hydrants, spigots, or fire plugs without permission or authority from the city. (1987 Code, § 13-119)

18-120. **Limited use of unmetered private fire line.** Where a private fire line is not metered, no water shall be used from such line or from any fire hydrant thereon, except to fight fire or except when being inspected in the presence of an authorized agent of the city.

   All private fire hydrants shall be sealed by the city, and shall be inspected at regular intervals to see that they are in proper condition and that no water is being used therefrom in violation of these rules and regulations. When the seal is broken on account of fire, or for any other reason, the customer taking such service shall immediately give the city a written notice of such occurrence. (1987 Code, § 13-120)

18-121. **Damages to property due to water pressure.** The city shall not be liable to any customer for damages caused to his plumbing or property by high pressure, low pressure, or fluctuations in pressure in the city's water mains. (1987 Code, § 13-121)

18-122. **Liability for cutoff failures.** The city's liability shall be limited to the forfeiture of the right to charge a customer for water that is not used but is received from a service line under any of the following circumstances:

   (1) After receipt of at least ten (10) days' written notice to cut off water service, the city has failed to cut off such service.

   (2) The city has attempted to cut off a service but such service has not been completely cut off.

   (3) The city has completely cut off a service but subsequently the cutoff develops a leak or is turned on again so that water enters the customer's pipes from the city's main.
Except to the extent stated above, the city shall not be liable for any loss or damage resulting from cutoff failures. If a customer wishes to avoid possible damage for cutoff failures, the customer shall rely exclusively on privately-owned cutoffs and not on the city's cutoff. Also, the customer (and not the city) shall be responsible for seeing that his plumbing is properly drained and is kept properly drained, after his water service has been cut off. (1987 Code, § 13-122)

18-123. **Restricted use of water.** In times of emergencies or in times of water shortage, the city reserves the right to restrict the purposes for which water may be used by a customer and the amount of water which a customer may use. (1987 Code, § 13-123)

18-124. **Interruption of service.** The city will endeavor to furnish continuous water and sewer service, but does not guarantee to the customer any fixed pressure or continuous service. The city shall not be liable for any damages for any interruption of service whatsoever.

In connection with the operation, maintenance, repair, and extension of the municipal water and sewer systems, the water supply may be shut off without notice when necessary or desirable, and each customer must be prepared for such emergencies. The city shall not be liable for any damages from such interruption of service or for damages from the resumption of service without notice after any such interruption. (1987 Code, § 13-124)

18-125. **Schedule of rates.** (1) **Water service rates.** The following shall be the schedule of monthly charges for water service furnished within the corporate limits of the City of Baxter by its waterworks system:

<table>
<thead>
<tr>
<th>Gallons metered</th>
<th>Water rates inside city</th>
</tr>
</thead>
<tbody>
<tr>
<td>First 2,000</td>
<td>$14.70 (minimum)</td>
</tr>
<tr>
<td>2,000 and after</td>
<td>$5.35 per thousand gallon</td>
</tr>
</tbody>
</table>

The established water rates for customers served by the City of Baxter, Tennessee municipal water system outside the city limits (except West Putnam area) are as follow:

<table>
<thead>
<tr>
<th>Gallons metered</th>
<th>Water rates outside city</th>
</tr>
</thead>
<tbody>
<tr>
<td>First 2,000</td>
<td>$22.79 (minimum)</td>
</tr>
<tr>
<td>2,000 and after</td>
<td>$7.15 per thousand gallons</td>
</tr>
<tr>
<td>Gallons metered</td>
<td>West Putnam area</td>
</tr>
</tbody>
</table>
Gallons metered | Water rates outside city
---|---
First 2,000 | $24.12 (minimum)
2,000 and after | $7.65 per thousand gallons

The following schedule shall be used for public carwashes and laundry mats:

Gallons metered

First $2,000 | $14.70 minimum
2,000 and after* | $4.10 per thousand gallons

*This rate shall only apply if fifteen thousand (15,000) gallons are used. If fifteen thousand (15,000) gallons are not used, the water service rate of fourteen dollars and seventy cents ($14.70) will apply.

A three dollar ($3.00) per month administrative service charge will be applied to each customer's water bill.

(2) **Sewer service rate.** Sewer service rates shall be based on actual water meter reading. Each service customer will pay a charge based on a minimum sewer charge of fourteen dollars and seventy cents ($14.70) for two thousand (2,000) gallons and then six dollars and fifty-five cents ($6.55) for each one thousand (1,000) gallons over two thousand (2,000) gallons.

(3) The water rate for all other utility districts served by the City of Baxter water system will be six dollars fifty cents ($6.50) per one thousand (1,000) gallons of water metered. (Ord. #2008-23, Feb. 2009, modified)

**18-126. Water and sewer service charges.** The Board of Mayor and Aldermen of the City of Baxter hereby make the following service charges.

(1) If bills are not paid by cutoff date, there will be a seventy-five dollar ($75.00) reconnection fee. This reconnection fee may be waived once per calendar year per water customer upon completion of a signed waiver form acknowledging that they will receive only one (1) waiver of the reconnection fee per calendar year.

(2) The meters will be pulled when inactive. There will be service charge of twenty-five dollars ($25.00) to reinstall the meter.

(3) There will be a service charge for all returned checks. This charge will be the maximum amount allowable by state law with the current charge in force posted at the business office.

(4) There will be a one thousand two hundred dollar ($1,200.00) charge for a water tap and a one thousand two hundred dollar ($1,200.00) charge for a sewer tap. This fee is applicable in such a case as the city performs the tap and
installs the service line from the transmission main to the meter and/or the collection line to the clean-out.

In cases where approved subdivisions, defined as divided tracks of ten (10) or more building lots, that require the construction of new water transmission mains and/or sewer collection lines by either the City of Baxter or Putnam County Planning Commission(s):

(a) The developer shall be required to install the water service connection from the main to each lot service meter location to include all materials, labor, and equipment constructed to the City of Baxter specifications, except the service meter as located, inspected, and approved by the City of Baxter Water Department. In this case the water service connection fee shall be six hundred dollars ($600.00).

(b) The developer shall be required to install the sewer service lateral from the main to each lot clean-out location to include all materials, labor, and equipment constructed to the City of Baxter specifications as located, inspected, and approved by the City of Baxter Sewer Department. In this case the sewer service connection fee shall be six hundred dollars ($600.00). (Ord. #2005-8, Sept. 2005, as amended by Ord. #2007-7, Sept. 2007, Ord. #2008-1, July 2008, and Ord. #2010-9, July 2010, modified)

18-127. Board of mayor and aldermen to perform duties required of the board of waterworks and/or sewerage commissioners. Pursuant to Tennessee Code Annotated, § 7-35-406, and it being in the best interests of the City of Baxter, Tennessee, the board of mayor and aldermen hereby elect to perform the duties required of the board of waterworks and/or sewerage commissioners under the ordinances of this city and the laws of the State of Tennessee. The board of mayor and aldermen shall have all the powers, duties and responsibilities otherwise imposed upon the board of waterworks and/or sewerage commissioners, and all references to such board shall refer to the board of mayor and aldermen acting in the capacity of the board of waterworks and/or sewerage commissioners. (1987 Code, § 13-127)

18-128. Adjustments to water and sewer service charges. Any Baxter Utility Department customer who has a water leak on their side of the water meter is responsible for the water loss. A customer may request in writing an adjustment to his/her water and/or sewer service charge and the Baxter Water Board may make adjustments to those charges based upon the following:

No customer may be granted more than one (1) adjustment in any twelve (12) month period. (1987 Code, § 13-128)
CHAPTER 2

SEWER USE AND WASTEWATER TREATMENT

SECTION
18-201. Purpose and policy.
18-203. Connection to public sewers.
18-204. Private domestic wastewater disposal.
18-205. Regulation of holding tank waste disposal.
18-206. Application for domestic wastewater discharge and industrial wastewater discharge permits.
18-207. Discharge regulations.
18-208. Fats, oils and grease traps and interceptors.
18-209. Industrial user monitoring, inspection reports, records access, and safety.
18-210. Enforcement and abatement.
18-211. Penalties; costs.
18-212. Fees and billing.

18-201. Purpose and policy. This chapter sets forth uniform requirements for the disposal of wastewater in the service area of the City of Baxter, Tennessee, wastewater treatment system. The objectives of this chapter are:

(1) To protect the public health;
(2) To provide problem free wastewater collection and treatment service;
(3) To prevent the introduction of pollutants into the municipal wastewater treatment system, which will interfere with the system operation, which will cause the system discharge to violate its National Pollutant Discharge Elimination System (NPDES) permit or other applicable state requirements, or which will cause physical damage to the wastewater treatment system facilities;
(4) To provide for full and equitable distribution of the cost of the wastewater treatment system;
(5) To enable the City of Baxter to comply with the provisions of the Federal Water Pollution Control Act, the General Pretreatment Regulations (40 CFR, part 403), and other applicable federal, state laws and regulations;
(6) To improve the opportunity to recycle and reclaim wastewaters and sludges from the wastewater treatment system.

In meeting these objectives, this chapter provides that all persons in the service area of the City of Baxter must have adequate wastewater treatment either in the form of a connection to the municipal wastewater treatment system.
or, where the system is not available, an appropriate private disposal system. The chapter also provides for the issuance of permits to system users, for the regulations of wastewater discharge volume and characteristics, for monitoring and enforcement activities; and for the setting of fees for the full and equitable distribution of costs resulting from the operation, maintenance, and capital recovery of the wastewater treatment system and from other activities required by the enforcement and administrative program established herein.

This chapter shall apply to the City of Baxter, Tennessee, and to persons outside the city who are, by contract or agreement with the city users of the municipal wastewater treatment system. Except as otherwise provided herein, the Board of Mayor and Aldermen of the City of Baxter shall administer, implement, and enforce the provisions of this chapter. (1987 Code, § 8-301)

18-202. Definitions. Unless the context specifically indicates otherwise, the following terms and phrases, as used in this chapter, shall have the meanings hereinafter designated:

(1) "Act or the act." The Federal Water Pollution Control Act, also known as the Clean Water Act, as amended 33 USC § 1251, et seq.

(2) "Approval authority." The director in an NPDES state with an approved state pretreatment program and the administrator of the EPA in a non-NPDES state or NPDES state without an approved state pretreatment program.

(3) "Authorized representative of industrial user." An authorized representative of an industrial user may be:
   (a) A principal executive officer of at least the level of vice-president, if the industrial user is a corporation;
   (b) A general partner or proprietor if the industrial user is a partnership or proprietorship, respectively;
   (c) A duly authorized representative of the individual designated above if such representative is responsible for the overall operation of the facilities from which the indirect discharge originates.

(4) "Biochemical Oxygen Demand (BOD)." The quantity of oxygen utilized in the biochemical oxidation of organic matter under standard laboratory procedure for five (5) days at 20 degrees (20°) centigrade expressed in terms of weight and concentration (milligrams per liter (mg/L)).

(5) "Building sewer." A sewer conveying wastewater from the premises of a user to the POTW.

(6) "Categorical standards." The national categorical pretreatment standards or pretreatment standard.

(7) "Compatible pollutant." Shall mean BOD, suspended solids, pH, fecal coliform bacteria, and such additional pollutants as are now or may in the future be specified and controlled in the city's NPDES permit for its wastewater treatment works where sewer works have been designed and used to reduce or remove such pollutants.
(8) "Cooling water." The water discharge from any use such as air conditioning, cooling, or refrigeration, or to which the only pollutant added is heat.

(9) "Control authority." The term "control authority" shall refer to the "approval authority," defined hereinabove; or the board of mayor and aldermen if the city has an approved pretreatment program under the provisions of 40 CFR 403.11.

(10) "Customer." Means any individual, partnership, corporation, association, or group who receives sewer service from the city under either an express or implied contract requiring payment to the city for such service.

(11) "Direct discharge." The discharge of treated or untreated wastewater directly to the waters of the State of Tennessee.

(12) "Domestic wastewater." Wastewater that is generated by a single family, apartment or other dwelling unit or dwelling unit equivalent or commercial establishment containing sanitary facilities for the disposal of wastewater and used for residential or commercial purposes only.

(13) "Environmental Protection Agency, or EPA." The U.S. Environmental Protection Agency, or where appropriate, the term may also be used as a designation for the administrator or other duly authorized official of the said agency.

(14) "Garbage." Shall mean solid wastes generated from any domestic, commercial or industrial source.

(15) "Grab sample." A sample which is taken from a waste stream on a one (1) time basis with no regard to the flow in the waste stream and without consideration of time.

(16) "Holding tank waste." Any waste from holding tanks such as vessels, chemical toilets, campers, trailers, septic tanks, and vacuum-pump tank trucks.

(17) "Incompatible pollutant." Shall mean any pollutant which is not a "compatible pollutant" as defined in this section.

(18) "Indirect discharge." The discharge or the introduction of non-domestic pollutants from any source regulated under § 307(b) or (c) of the Act, (33 USC § 1317), into the POTW (including holding tank waste discharged into the system).

(19) "Industrial user." A source of indirect discharge which does not constitute a "discharge of pollutants" under regulations issued pursuant to § 402, of the Act (33 USC § 1342).

(20) "Interference." The inhibition or disruption of the municipal wastewater processes or operations which contributes to a violation of any requirement of the city's NPDES permit. The term includes prevention of sewage sludge use or disposal by the POTW in accordance with § 405 of the Act, (33 USC § 1345) or any criteria, guidelines, or regulations developed pursuant to the Solid Waste Disposal Act (SWDA), the Clean Air Act, the Toxic Substances Control Act, or more stringent state criteria (including those
contained in any state sludge management plan prepared pursuant to title IV of SWDA) applicable to the method of disposal or use employed by the municipal wastewater treatment system.

(21) "National categorical pretreatment standard or pretreatment standard." Any regulation containing pollutant discharge limits promulgated by the EPA in accordance with § 307(b) and (c) of the Act (33 USC § 1347) which applies to a specific category of industrial users.

(22) "NPDES (National Pollution Discharge Elimination System.)" Shall mean the program for issuing, conditioning, and denying permits for the discharge of pollutants from point sources into navigable waters, the contiguous zone, and the oceans pursuant to § 402 of the Federal Water Pollution Control Act as amended.

(23) "New source." Any source, the construction of which is commenced after the publication of proposed regulations prescribing a § 307(c) (33 USC § 1317) categorical pretreatment standard which will be applicable to such source, if such standard if thereafter promulgated within one hundred twenty (120) days of proposal in the Federal Register. Where the standard is promulgated later than one hundred twenty (120) days after proposal, a new source means any source, the construction of which is commenced after the date of promulgation of the standard.

(24) "Person." Any individual, partnership, co-partnership, firm, company, corporation, association, joint stock company, trust, estate, governmental entity or any other legal entity, or their legal representatives, agents, or assigns. The masculine gender shall include the feminine and the singular shall include the plural where indicated by the context.

(25) "pH." The logarithm (base ten (10)) of the reciprocal of the concentration of hydrogen ions expressed in grams per liter of solution.

(26) "Pollution." The man-made or man-induced alteration of the chemical, physical, biological, and radiological integrity of water.

(27) "Pollutant." Any dredged spoil, solid waste, incinerator residue, sewage, garbage, sewage sludge, munitions, chemical wastes, biological materials, radioactive materials, heat, wrecked or discharged equipment, rock, sand, cellar dirt, and industrial, municipal, and agricultural waste discharge into water.

(28) "Pretreatment or treatment." The reduction of the amount of pollutants, the elimination of pollutants, or the alteration of the nature of pollutant properties in wastewater to a less harmful state prior to or in lieu of discharging or otherwise introducing such pollutants into a POTW. The reduction or alteration can be obtained by physical, chemical, biological processes, or process changes or other means, except as prohibited by 40 CFR § 40.36(d).

(29) "Pretreatment requirements." Any substantive or procedural requirement related to pretreatment other than a national pretreatment standard imposed on an industrial user.
(30) "Publicly Owned Treatment Works (POTW)." A treatment works as defined by § 212 of the Act, (33 USC § 1292) which is owned in this instance by the city. This definition includes any sewers that convey wastewater to the POTW treatment plant, but does not include pipes, sewers or other conveyances not connected to a facility providing treatment. For the purposes of this chapter, "POTW" shall also include any sewers that convey wastewaters to the POTW from persons outside the City of Baxter who are, by contract or agreement with the City of Baxter users of the city's POTW.

(31) "POTW treatment plant." That portion of the POTW designed to provide treatment to wastewater.

(32) "Shall" is mandatory; "may" is permissive.

(33) "Slug." Shall mean any discharge of water, sewage, or industrial waste which in concentration of any given constituent or in quantity of flow exceeds for any period of duration longer than fifteen (15) minutes more than five (5) times the average twenty-four (24) hour concentrations of flows during normal operation or any discharge of whatever duration that causes the sewer to overflow or back up in an objectionable way or any discharge of whatever duration that interferes with the proper operation of the wastewater treatment facilities or pumping stations.

(34) "State." The State of Tennessee.

(36) "Storm water." Any flow occurring during or following any form of natural precipitation and resulting therefrom.

(37) "Storm sewer or storm drain." Shall mean a pipe or conduit which carries storm and surface waters and drainage, but excludes sewage and industrial wastes. It may, however, carry cooling waters and unpolluted waters, upon approval of the city.

(38) "Suspended solids." The total suspended matter that floats on the surface of, or is suspended in, water, wastewater, or other liquids and that is removable by laboratory filtering.

(39) "Superintendent." The person designated by the board of mayor and aldermen to supervise the operation of the publicly owned treatment works and who is charged with certain duties and responsibilities by this chapter, or his duly authorized representative.

(40) "Town." The Town of Baxter or the Board of Mayor and Aldermen, Town of Baxter, Tennessee.

(41) "Toxic pollutant." Any pollutant or combination of pollutants listed as toxic in regulations published by the administrator of the Environmental Protection Agency under the provision of Clean Water Act 307(a) or other Acts.

(42) "Twenty-four (24) hour flow proportional composite sample." A sample consisting of several sample portions collected during a twenty-four (24)
hour period in which the portions of a sample are proportioned to the flow and combined to form a representative sample.

(43) "User." Any person who contributes, causes or permits the contribution of wastewater into the city's POTW.

(44) "Wastewater." The liquid and water-carried industrial or domestic wastes from dwellings, commercial buildings, industrial facilities, and institutions, whether treated or untreated, which is contributed into or permitted to enter the POTW.

(45) "Wastewater treatment systems." Defined the same as POTW.

(46) "Waters of the state." All streams, lakes, ponds, marshes, watercourses, waterways, wells, springs, reservoirs, aquifers, irrigation systems, drainage systems, and other bodies of accumulation of water, surface or underground, natural or artificial, public or private, that are contained within, flow through, or border upon the state or any portion thereof. (1987 Code, § 8-302)

18-203. Connection to public sewers. (1) Requirements for proper wastewater disposal. (a) It shall be unlawful for any person to place, deposit, or permit to be deposited in any unsanitary manner on public or private property within the service area of the City of Baxter, any human or animal excrement, garbage, or other objectionable waste.

(b) It shall be unlawful to discharge to any waters of the state within the service area of the city any sewage or other polluted waters, except where suitable treatment has been provided in accordance with provisions of this chapter.

(c) Except as herein provided, it shall be unlawful to construct or maintain any privy, privy vault, septic tank, cesspool, or other facility intended or used for the disposal of sewage.

(d) Except as provided in § 18-203(1)(e) below, the owner of all houses, buildings, or properties used for human occupancy, employment, recreation, or other purposes situated within the service area in which there is now located or may in the future be located a public sanitary sewer, is hereby required at his expense to install suitable toilet facilities therein, and to connect such facilities directly with the proper public sewer in accordance with the provisions of the chapter, within sixty (60) days after date of official notice to do so, provided that said public sewer is within five hundred feet (500') of the property line over public access.

(e) The owner of a manufacturing facility may discharge wastewater to the waters of the state provided that he obtains an NPDES permit and meets all requirements of the Federal Clean Water Act, the NPDES permit, and any other applicable local, state, or federal statutes and regulations.

(f) Where a public sanitary sewer is not available under the provisions of § 18-203(1)(d) above, the building sewer shall be connected
to a private sewage disposal system complying with the provisions of § 18-204 of this chapter.

(2) **Physical connection public sewer.** (a) No person shall uncover, make any connections with or opening into, use, alter, or disturb any public sewer or appurtenance thereof. The city shall make all connections to the public sewer upon the property owner first obtaining a written permit from the city as required by § 18-206 of this chapter.

The permit application shall be supplemented by any plans, specifications or other information considered pertinent in the judgment of the board of mayor and aldermen. A connection fee shall be paid to the city at the time the application is filed.

(b) All costs and expenses incident to the installation, connection, and inspection of the building sewer shall be borne by the owner. The owner shall indemnify the city from any loss or damage that may directly or indirectly be occasioned by the installation of the building sewer.

(c) A separate and independent building sewer shall be provided for every building; except where one building stands at the rear of another on an interior lot and no private sewer is available or can be constructed to the rear building through an adjoining alley, court, yard, or driveway, the building sewer from the front building may be extended to the rear building and the whole considered as one (1) building sewer.

(d) Old building sewers may be used in connection with new buildings only when they are found, on examination and tested by the city to meet all requirements of this chapter. All others may be sealed to the specifications of the city.

(e) Building sewers shall conform to the following requirements:

(i) The minimum size of a building sewer shall be as follows:

   - Conventional sewer system - four inches (4").
   - Small diameter gravity sewer - two inches (2").
   - Septic tank effluent pump - one and one-quarter inches (1 1/4").

   Where the septic tanks becomes an integral part of the collection and treatment system, the minimum size influent line shall be four inches (4") and the minimum size of septic tank shall be one thousand (1,000) gallons. Septic tanks shall be constructed of polyethylene and protected from flotation. The city shall have the right, privilege, and authority to locate, inspect, operate, and maintain septic tanks which are an integral part of the collection and treatment system.

(ii) The minimum depth of a building sewer shall be eighteen inches (18").
(iii) Building sewers shall be laid on the following grades:
Four inch (4") sewers - one-eighth inch (1/8") per foot.
Two inch (2") sewers - three-eighths inch (3/8") per foot.

Larger building sewers shall be laid on a grade that will produce a velocity. When flowing full of at least two feet (2') per second.

(iv) Slope and alignment of all building sewers shall be neat and regular.

(v) Building sewers shall be constructed only of ductile iron pipe class 50 or above or polyvinyl chloride pipe SDR-35 for gravity sewers and SDR-21 for pressure sewers. Joints shall be rubber or neoprene "o" ring compression joints. No other joints shall be acceptable.

(vi) A cleanout shall be located five feet (5') outside of the building, one (1) as it crosses the property line and one (1) at each change of direction of the building sewer which is greater than forty-five degrees (45°). Additional cleanouts shall be placed not more than seventy-five feet (75') apart in horizontal building sewers of six inch (6") nominal diameter and not more than one hundred feet (100') apart for larger pipes. Cleanouts shall be extended to or above the finished grade level directly above the place where the cleanout is installed. A "Y" (wye) and one-eighth (1/8) bend shall be used for the cleanout base. Cleanouts shall not be smaller than four inches (4").

(vii) Connections of building sewers to the public sewer system shall be made only by the city and shall be made at the appropriate existing wyes or tee branch using compression type couplings or collar type rubber joint with stainless steel bands. Where existing wye or tee branches are not available, connections of building services shall be made by either removing a length of pipe and replacing it with a wye or tee fitting using flexible neoprene adapters with stainless steel bands of a type approved by the city. All such connections shall be made gastight and watertight.

(viii) The building sewer may be brought into the building below the basement floor when gravity flow from the building to the sanitary sewer is at a grade of one-eighth inch (1/8") per foot or more if possible. In cases where basement or floor levels are lower than the ground elevation at the point of connection to the sewer, adequate precautions by installation of check valves or other backflow prevention devices to protect against flooding shall be provided by the owner. In all buildings in which any building drain is too low to permit gravity flow to the public sewer, sanitary
sewage carried by such building drain shall be lifted by a pump and discharged to the building sewer at the expense of the owner.  

(ix) The methods to be used in excavating, placing of pipe, jointing, testing, backfilling the trench, or other activities in the construction of a building sewer which have not been described above shall conform to the requirements of the building and plumbing code or other applicable rules and regulations of the city or to the procedures set forth in appropriate specifications of the ASTM and Water Pollution Control Federal Manual of Practice No. 9. Any deviation from the prescribed procedures and materials must be approved by the city before installation.  

(x) An installed building sewer shall be gastight and watertight.

(f) All excavations for building sewer installation shall be adequately guarded with barricades and lights so as to protect the public from hazard. Streets, sidewalks, parkways, and other public property disturbed in the course of the work shall be restored in a manner satisfactory to the city.  

(g) No person shall make connection of roof downspouts, exterior foundation drains, areaway drains, basement drains, or other sources of surface runoff or groundwater to a building directly or indirectly to a public sanitary sewer.

(3) Inspection of connections. (a) The sewer connection and all building sewers from the building to the public sewer main line shall be inspected before the underground portion is covered, by the board of mayor and aldermen or its authorized representative.

(b) The applicant for discharge shall notify the city when the building sewer is ready for inspection and connection to the public sewer. The connection shall be made under the supervision of the board of mayor and aldermen or its representative.

(4) Maintenance of building sewers. Each individual property owner or user of the POTW shall be entirely responsible for the maintenance which will include repair or replacement of the building sewer as deemed necessary by the board of mayor and aldermen to meet specifications of the city. (1987 Code, § 8-303)

18-204. Private domestic wastewater disposal. (1) Availability.

(a) Where a public sanitary sewer is not available under the provisions of § 18-203(1)(d), the building sewer shall be connected to a private wastewater disposal system complying with the provisions of this section.

(b) Any residence, office, recreational facility, or other establishment used for human occupancy where the building drain is below the elevation to obtain a grade equivalent to one-eighth inch (1/8")
per foot in the building sewer but is otherwise accessible to a public sewer as provided in § 18-203, the owner shall provide a private sewage pumping station as provided in § 18-203(2)(e)(viii).

(c) Where a public sewer becomes available, the building sewer shall be connected to said sewer within sixty (60) days after date of official notice from the city to do so.

(2) **Requirements.** (a) A private domestic wastewater disposal system may not be constructed within the service area unless and until a certificate is obtained from the city stating that a public sewer is not accessible to the property and no such sewer is proposed for construction in the immediate future. No certificate shall be issued for any private domestic wastewater disposal system employing subsurface soil absorption facilities where the area of the lot is less than that specified by the Putnam County Health Department.

(b) Before commencement of construction of a private sewage disposal system the owner shall first obtain written permission from the City of Baxter and the Putnam County Health Department. The owner shall supply any plans, specifications, and other information as are deemed necessary by the City of Baxter and the Putnam County Health Department.

(c) A private sewage disposal system shall not be placed in operation until the installation is completed to the satisfaction of the City of Baxter and the Putnam County Health Department. They shall be allowed to inspect the work at any stage of construction and the owner shall notify the City of Baxter and the Putnam County Health Department when the work is ready for final inspection, before any underground portions are covered. The inspection shall be made within a reasonable period of time after the receipt of notice by the City of Baxter and the Putnam County Health Department.

(d) The type, capacity, location, and layout of a private sewage disposal system shall comply with all recommendations of the Department of Health and Environment of the State of Tennessee, the City of Baxter, and the Putnam County Health Department. No septic tank or cesspool shall be permitted to discharge to waters of Tennessee.

(e) The owner shall operate and maintain the private sewage disposal facilities in a sanitary manner at all times, at no expense to the city. When the public sewer becomes available, the building sewer, or the septic tank effluent line shall be connected to the public sewer within sixty (60) days of the date of availability and the private sewage disposal system should be cleaned of sludge and if no longer used as a part of the city's treatment system, filled with suitable material.

(f) No statement contained in this chapter shall be construed to interfere with any additional or future requirements that may be
imposed by the City of Baxter and the Putnam County Health Department. (1987 Code, § 8-304)

18-205. Regulation of holding tank waste disposal. (1) Permit. No person, firm, association or corporation shall clean out, drain, or flush any septic tank or any other type of wastewater or excreta disposal system, unless such person, firm, association, or corporation obtains a permit from the city to perform such acts or services.

Any person, firm, association, or corporation desiring a permit to perform such services shall file an application on the prescribed form. Upon any such application, said permit shall be issued by the city when the conditions of this chapter have been met and providing the city is satisfied the applicant has adequate and proper equipment to perform the services contemplated in a safe and competent manner. Such permits shall be limited to the discharge of domestic sewage waste containing no industrial waste.

(2) Fees. For each permit issued under the provisions of this chapter the applicant shall agree in writing by the provisions of this section and pay an annual service charge to the city to be set as specified in § 18-212. Any such permit granted shall be for one (1) fiscal year or fraction of the fiscal year, and shall continue in full force and effect from the time issued until the ending of the fiscal year, unless sooner revoked, and shall be nontransferable. The number of the permit granted hereunder shall be plainly painted three inch (3") permanent letters on each side of each motor vehicle used in the conduct of the business permitted hereunder.

(3) Designated disposal locations. The city shall designate approved locations for the emptying and cleansing of all equipment used in the performance of the services rendered under the permit herein provided for, and it shall be a violation hereof for any person, firm, association or corporation to empty or clean such equipment at any place other than a place so designated. The city may refuse to accept any truckload of waste at his absolute discretion where it appears that the waste could interfere with the operation of the POTW.

(4) Revocation of permit. Failure to comply with all the provisions of this chapter shall be sufficient cause for the revocation of such permit by the city. The possession within the service area by any person of any motor vehicle equipped with a body type and accessories of a nature and design capable of serving a septic tank of wastewater or excreta disposal system cleaning unit shall be prima facie evidence that such person is engaged in the business of cleaning, draining, or flushing septic tanks or other wastewater or excreta disposal systems within the service area of the City of Baxter. (1987 Code, § 8-305)

18-206. Applications for domestic wastewater discharge and industrial wastewater discharge permits. (1) Applications for discharge of domestic wastewater. All users or prospective users which generate domestic
wastewater shall make application to the city for written authorization to discharge to the municipal wastewater treatment system. Applications shall be required from all new dischargers as well as for any existing discharger desiring additional service. Connection to the city sewer shall not be made until the application is received and approved by the city, the building sewer is installed in accordance with this chapter and an inspection has been performed by the board of mayor and aldermen or its representative.

The receipt by the city of a prospective customer's application for service shall not obligate the city to render the service. If the service applied for cannot be supplied in accordance with this chapter and the city's rules and regulations and general practice, the connection charge will be refunded in full, and there shall be no liability of the city to the applicant for such service.

(2) Industrial wastewater discharge permits

(a) General requirements. All industrial users proposing to connect to or contribute to the POTW shall obtain a wastewater discharge permit before connecting to or contributing to the POTW. All existing industrial users connected to or contributing to the POTW within one hundred eighty (180) days after the effective date of this chapter.

(b) Applications. Applications for wastewater discharge permits shall be required as follows:

(i) Users required to obtain a wastewater discharge permit shall complete and file with the city, an application on a prescribed form accompanied by the appropriate fee. Existing users shall apply for a wastewater contribution permit within sixty (60) days after the effective date of this chapter, and proposed new users shall apply at least sixty (60) days prior to connecting to or contributing to the POTW.

(ii) The application shall be in the prescribed form of the city and shall include, but not be limited to the following information: name, address, and SIC number of applicant; wastewater volume; wastewater constituents and characteristic, including but not limited to those mentioned in § 18-207(1) and (2) discharge variations -- daily, monthly, seasonal and thirty (30) minute peaks; a description of all chemicals handled on the premises, each produce produced by type, amount, process or processes and rate of production, type and amount of raw materials, number and type of employees, hours of operation, site plans, floor plans, mechanical and plumbing plans and details showing all sewers and appurtenances by size, location and elevation; a description of existing and proposed pretreatment and/or equalization facilities and any other information deemed necessary by the city.

(iii) Any user who elects or is required to construct new or additional facilities for pretreatment shall as part of the
application for wastewater discharge permit submit plans, specifications and other pertinent information relative to the proposed construction to the city for approval. Plans and specifications submitted for approval must bear the seal of a professional engineer registered to practice engineering in the State of Tennessee. A wastewater discharge permit shall not be issued until such plans and specifications are approved. Approval of such plans and specifications shall in no way relieve the user from the responsibility of modifying the facility as necessary to produce an effluent acceptable to the city under the provisions of this chapter.

(iv) If additional pretreatment and/or O&M will be required to meet the pretreatment standards, the application shall include the shortest schedule by which the user will provide such additional pretreatment. The completion date in this schedule shall not be later than the compliance date established for the applicable pretreatment standard. For the purpose of this paragraph, "pretreatment standard," shall include either a national pretreatment standard or a pretreatment standard imposed by § 18-207 of this chapter.

(v) The city will evaluate the data furnished by the user and may require additional information. After evaluation and acceptance of the data furnished, the city may issue a wastewater discharge permit subject to terms and conditions provided herein.

(vi) The receipt by the city of a prospective customer's application for wastewater discharge permit shall not obligate the city to render the wastewater collection and treatment service. If the service applied for cannot be supplied in accordance with this chapter or the city's rules and regulations and general practice, the application shall be rejected and there shall be no liability of the city to the applicant of such service.

(vii) The city will act only on applications containing all the information required in this section. Persons who have filed incomplete applications will be notified by the city that the application is deficient and the nature of such deficiency and will be given thirty (30) days to correct the deficiency. If the deficiency is not corrected within thirty (30) days or within such extended period as allowed by the city, the city shall deny the application and notify the applicant in writing of such action.

(c) Permit conditions. Wastewater discharge permits shall be expressly subject to all provisions of this chapter and all other applicable regulations, user charges and fees established by the city. Permits may contain the following:
(i) The unit charge or schedule of user charges and fees for the wastewater to be discharged to a community sewer;
(ii) Limits on the average and maximum rate and time of discharge or requirements and equalization.
(iii) Requirements for installation and maintenance of inspections and sampling facilities;
(iv) Specifications for monitoring programs which may include sampling locations, frequency of sampling, number, types, and standards for tests and reporting schedule;
(v) Compliance schedules;
(vi) Requirements for submission of technical reports or discharge reports;
(vii) Requirements for maintaining and retaining plant records relating to wastewater discharge as specified by the city, and affording city access thereto;
(viii) Requirements for notification of the city of any new introduction of wastewater constituents or any substantial change in the volume or character of the wastewater constituents being introduced into the wastewater treatment system.
(ix) Requirements for notification of slug discharged;
(x) Other conditions as deemed appropriate by the city to ensure compliance with this chapter.
(d) Permit modifications. Within nine (9) months of the promulgation of a national categorical pretreatment standard, the wastewater discharge permit of users subject to such standards shall be revised to require compliance with such standard within the time frame prescribed by such standard. A user with an existing wastewater discharge permit shall submit to the city within one hundred eighty (180) days after the promulgation of an applicable federal categorical pretreatment standard the information required by §§ 18-206(2)(b)(ii) and (3). The terms and conditions of the permit may be subject to modification by the city during the term of the permit as limitations or requirements are modified or other just cause exists. The user shall be informed of any proposed changes in this permit at least thirty (30) days prior to the effective date of change. Any changes or new conditions in the permit shall include a reasonable time schedule for compliance.
(e) Permits duration. Permits shall be issued for a specified time period, not to exceed five (5) years. A permit may be issued for a period less than a year or may be stated to expire on a specific date. The user shall apply for permit reissuance a minimum of one hundred eighty (180) days prior to the expiration of the user's existing permit.
(f) Permit transfer. Wastewater discharge permits are issued to a specific user for a specific operation. A wastewater discharge permit shall not be reassigned or transferred or sold to a new owner, new user,
different premises, or a new or changed operation without the approval of the city. Any succeeding owner or user shall also comply with the terms and conditions of the existing permit.

(g) Revocation of permit. Any permit issued under the provisions of the chapter is subject to be modified suspended, or revoked in whole or in part during its term for cause including, but not limited to, the following:

(i) Violation of any terms or conditions of the wastewater discharge permit or other applicable federal, state, or local law or regulation.

(ii) Obtaining a permit by misrepresentation or failure to disclose fully all relevant facts.

(iii) A change in any condition that requires either a temporary or permanent reduction or elimination of the permitted discharge.

(iv) Intentional failure of a user to accurately report the discharge constituents and characteristics or to report significant changes in plant operations or wastewater characteristics.

(3) Confidential information. All information and data on a user obtained from reports, questionnaire, permit application, permits and monitoring programs and from inspection shall be available to the public or any governmental agency without restriction unless the user specifically requests and is able to demonstrate to the satisfaction of the city that the release of such information would divulge information, processes, or methods of production entitled to protection as trade secrets of the users.

When requested by the person furnishing the report, the portions of a report which might disclose trade secrets or secret processes shall not be made available for inspection by the public, but shall be made available to governmental agencies for use; related to this chapter or the city's or user's NPDES permit. Provided, however, that such portions of a report shall be available for use by the state or any state agency in judicial review or enforcement proceedings involving the person furnishing the report. Wastewater constituents and characteristics will not be recognized as confidential information.

Information accepted by the city as confidential shall not be transmitted to any governmental agency or to the general public by the city until and unless prior and adequate notification is given to the user. (1987 Code, § 8-306)

18-207. Discharge regulations. (1) General discharge prohibitions. No user shall contribute or cause to be contributed, directly or indirectly, any pollutant or wastewater which will interfere with the operation and performance of the POTW. These general prohibitions apply to all such users of a POTW whether or not the user is subject to national categorical pretreatment standards or any other national, state, or local pretreatment
standards or requirements. A user may not contribute the following substances to any POTW:

(a) Any liquids, solids, or gases which by reason of their nature or quantity are, or may be, sufficient either alone or by interaction with other substances to cause fire or explosion or be injurious in any other way to the POTW or to the operation of the POTW. At no time, shall two (2) successive readings on an explosion hazard meter, at the point of discharge into the system (or at any point in the system) be more than five percent (5%) nor any single reading over ten percent (10%) of the Lower Explosive Limit (LEL) of the meter. Prohibited materials include, but are not limited to, gasoline, kerosene, naphtha, benzene, toluene, xylene, ethers, alcohols, ketones, aldehydes, peroxides, chlorates, perchlorates, bromate, carbides, hydrides and sulfides and any other substances which the city, the state or EPA has notified the user is a fire hazard or a hazard to the system.

(b) Solid or viscous substances which may cause obstruction to the flow in a sewer or other interference with the operation of the wastewater treatment facilities but not limited to: grease, garbage with particles greater than one-half inch (1/2") in any dimension, paunch manure, bones, hair, hides, or fleshings, entrails, whole blood, feathers, ashes, cinders, sand, spent lime, stone or marble dust, metal, glass, straw, shavings, grass clippings, rags, spent grains, spent hops, waste paper, wood, plastics, gas, tar, asphalt residues from refining, or processing of fuel or lubricating oil, mud, or glass grinding or polishing wastes.

(c) Any wastewater having a pH less than 5.5 or higher than 9.5 or wastewater having any other corrosive property capable of causing damage or hazard to structures, equipment, and/or personnel of the POTW.

(d) Any wastewater containing any toxic pollutants, chemical elements, or compounds in sufficient quantity, either singly or by interaction with other pollutants, to injure or interfere with any wastewater treatment process, constitute a hazard to humans or animals, create a toxic effect in the receiving waters of the POTW, or to exceed the limitation set forth in a categorical pretreatment standard. A toxic pollutant shall include but not be limited to any pollutant identified pursuant to § 307(a) of the Act.

(e) Any noxious or malodorous liquids, gases, or solids which either singly or by interaction with other wastes are sufficient to create a public nuisance, hazard to life, are sufficient to prevent entry into the sewers for maintenance and repair.

(f) Any substance which may cause the POTW's effluent or any other product of the POTW such as residues, sludges, or scums, to be unsuitable for reclamation and reuse or to interfere with the reclamation
process. In no case, shall a substance discharged to the POTW cause the POTW to be in non-compliance with sludge use or under § 405 of the Act; any criteria, guidelines, or regulations affecting sludge use or disposal developed pursuant to the Solid Waste Disposal Act, the Clean Air Act, the Toxic Substances Control Act, or state criteria applicable to the sludge management method being used.

(g) Any substances which will cause the POTW to violate its NPDES permit or the receiving water quality standards.

(h) Any wastewater causing discoloration of the wastewater treatment plant effluent to the extent that the receiving stream water quality requirements would be violated, such as, but not limited to, dye wastes and vegetable tanning solutions.

(i) Any wastewater having a temperature which will inhibit biological activity in the POTW treatment plant resulting in interference, but in no case wastewater with a temperature at the introduction into the sewer system which exceeds sixty-five degrees Celsius (65° C or one hundred fifty degrees (150°) Fahrenheit) or causes the influent at the wastewater plant to exceed forty degrees Celsius (40° C or one hundred four degrees (104°) Fahrenheit).

(j) Any pollutants, including oxygen demanding pollutants (BOD, etc.) released at a flow rate and/or pollutant concentration which a user knows or has reason to know will cause interference to the POTW.

(k) Any waters or wastes causing an unusual volume of flow or concentration of waste constituting "slug" as defined herein.

(l) Any waters containing any radioactive wastes or isotopes of such half-life or concentration as may exceed limits established by the city in compliance with applicable state or federal regulations.

(m) Any wastewater which causes a hazard to human life or creates a public nuisance.

(n) Any waters or wastes containing fats, wax, grease, or oil, whether emulsified or not, in excess of one hundred (100) mg/L or containing substances which may solidify or become viscous at temperature between thirty-two (32°) or one hundred fifty (150°) degrees Fahrenheit (zero degrees (0°) and sixty-five degrees (65°) Celsius).

(o) Any stormwater, surface water, groundwater, roof runoff, subsurface drainage, uncontaminated cooling water, or unpolluted industrial process waters to any sanitary sewer. Stormwater and all other unpolluted drainage shall be discharged to such sewers as are specifically designated as storm sewers, or to a natural outlet approved by the city and the Tennessee Department of Health and Environment. Industrial cooling water or unpolluted process waters may be discharged on approval of the city and the Tennessee Department of Health and Environment, to a storm sewer or natural outlet.
(2) **Restrictions on wastewater strength.** No person or user shall discharge wastewater which exceeds the following set of standards (Table A - User Discharge Restrictions) unless an exception is permitted as provided in this chapter. Dilution of any wastewater discharge for the purpose of satisfying these requirements shall be considered in violation of this chapter.

(3) **Protection of treatment plant influent.** The city shall monitor the treatment works influent for each parameter in the following table. (Table B - Plant Protection Criteria). Industrial users shall be subject to reporting and monitoring requirements regarding these parameters as set forth in this chapter. In the event that the influent at the POTW reaches or exceeds
the levels established by this table, the city shall initiate technical studies to
determine the cause of the influent violation and shall recommend to the city
the necessary remedial measures, including, but not limited to, recommending
the establishment of new or revised pre-treatment levels for these parameters.
The city shall also recommend changes to any of these criteria in the event that:
the POTW effluent standards are changed, there are changes in any applicable
law or regulation affecting same, or changes are needed for more effective
operation of the POTW.

BDL = Below Detectable Limits

(4) **Federal categorical pretreatment standards.** Upon the promulgation of the federal categorical pretreatment standards for a particular industrial subcategory, the federal standard, if more stringent than limitations imposed under this chapter for sources in that subcategory, shall immediately supersede the limitations imposed under this chapter. The city shall notify all affected users of the applicable reporting requirements under 40 CFR, § 403.12.

(5) **Right to establish more restrictive criteria.** No statement in this chapter is intended or may be construed to prohibit the city from establishing specific wastewater discharge criteria more restrictive where wastes are determined to be harmful or destructive to the facilities of the POTW or to create a public nuisance, or to cause the discharge of the POTW to violate effluent or stream quality standards, or to interfere with the use or handling of sludge, or to pass through the POTW resulting in a violation of the NPDES permit, or to exceed industrial pretreatment standards for discharge to municipal wastewater treatment systems as imposed or as may be imposed by the Tennessee Department of Health and Environment and/or the United States Environmental Protection Agency.
(6) **Accidental discharges.** (a) Protection from accidental discharge. All industrial users shall provide such facilities and institute such procedures as are reasonably necessary to prevent or minimize the potential for accidental discharge into the POTW of waste regulated by this chapter from liquid or raw material storage areas, from truck and rail car loading and unloading areas, from in-plant transfer or processing and materials handling areas, and from like areas or holding ponds of any waste regulated by this chapter. Detailed plans showing the facilities and operating procedures shall be submitted to the city before the facility is constructed.

The review and approval of such plans and operating procedures will in no way relieve the user from the responsibility of modifying the facility to provide the protection necessary to meet the requirements of this chapter.

(b) Notification of accidental discharge. Any person causing or suffering from any accidental discharge shall immediately notify the board of mayor and aldermen (or designated official) in person, by the telephone to enable countermeasures to be taken by the city to minimize damage to the POTW, the health and welfare of the public, and the environment.

This notification shall be followed, within five (5) days of the date of occurrence, by a detailed written statement describing the cause of the accidental discharge and the measures being taken to prevent future occurrence.

Such notification shall not relieve the user of liability for any expense, loss, or damage to the POTW, fish kills, or any other damage to person or property; nor shall such notification relieve the user of any fines, civil penalties, or other liability which may be imposed by this chapter or state or federal law.

(c) Notice to employees. A notice shall be permanently posted on the user's bulletin board or other prominent place advising employees whom to call in the event of a dangerous discharge. Employers shall ensure that all employees who may cause or suffer such a dangerous discharge to occur are advised of the emergency notification procedure. In lieu of placing notices on bulletin boards, the users may submit an approved SPIC. Each user shall annually certify to the city compliance with this paragraph. (1987 Code, § 8-307)

18-208. **Fats, oils and grease traps and interceptors.** (1) Fat, oil, and grease (FOG), waste food, and sand interceptors. FOG, waste food and sand interceptors shall be provided when, in the opinion of the superintendent, they are necessary for the proper handling of liquid wastes containing fats, oils, and grease, any flammable wastes, ground food waste, sand, soil, and solids, or other harmful ingredients in excessive amount which impact the wastewater collection system. Such interceptors shall not be required for single family residences, but
may be required on multiple family residences. All interceptors shall be of a type and capacity approved by the superintendent, and shall be located as to be readily and easily accessible for cleaning and inspection.

(2) **Fat, oil, grease, and waste food.** (a) New construction and renovation. Upon construction or renovation, all restaurants, cafeterias, hotels, motels, hospitals, nursing homes, schools, grocery stores, prisons, jails, churches, camps, caterers, manufacturing plants and any other sewer users who discharge applicable waste shall submit a FOG and food waste control plan that will effectively control the discharge of FOG and food waste.

(b) Existing structures. All existing restaurants, cafeterias, hotels, motels, hospitals, nursing homes, schools, grocery stores, prisons, jails, churches, camps, caterers, manufacturing plants and any other sewer users who discharge applicable waste shall be required to submit a plan for control of FOG and food waste, if and when the superintendent determines that FOG and food waste are causing excessive loading, plugging, damage or potential problems to structures or equipment in the public sewer system.

(c) Implementation of plan. After approval of the FOG plan by the superintendent the sewer user must:

   (i) Implement the plan within a reasonable amount of time;

   (ii) Service and maintain the equipment in order to prevent adverse impact upon the sewer collection system and treatment facility. If in the opinion of the superintendent the user continues to impact the collection system and treatment plan, additional pretreatment may be required, including a requirement to meet numeric limits and have surcharges applied.

(3) **Sand, soil, and oil interceptors.** All car washes, truck washes, garages, service stations and other sources of sand, soil, and oil shall install effective sand, soil, and oil interceptors. These interceptors shall be sized to effectively remove sand, soil, and oil at the expected flow rates. The interceptors shall be cleaned on a regular basis to prevent impact upon the wastewater collection and treatment system. Owners whose interceptors are deemed to be ineffective by the superintendent may be asked to change the cleaning frequency or to increase the size of the interceptors. Owners or operators of washing facilities will prevent the inflow of rainwater into the sanitary sewers.

(4) **Laundries.** Commercial laundries shall be equipped with an interceptor with a wire basket or similar device, removable for cleaning, that prevents passage into the sewer system of solids inch (1/2") or larger in size such as strings, rags, buttons, or other solids detrimental to the system.

(5) **Control equipment.** The equipment of facilities installed to control FOG, food waste, sand and soil, must be designed in accordance with the plumbing code currently enforced by the City of Baxter and Tennessee.
Department of Environment and Conservation engineering standards. Underground equipment shall be tightly sealed to prevent inflow of rainwater and easily accessible to allow regular maintenance. Control equipment shall be maintained by the owner or operator of the facility so as to prevent a stoppage of the public sewer, and the accumulation of FOG in the lines, pump stations and treatment plant. If the city is required to clean out the public sewer lines as a result of a stoppage resulting from poorly maintained control equipment, the property owner shall be required to refund the labor, equipment, materials and overhead costs to the city. Nothing in this subsection shall be construed to prohibit or restrict any other remedy the city has under this chapter, or state or federal law.

The city retains the right to inspect and approve installation of control equipment.

(6) The superintendent may use industrial wastewater discharge permits under § 18-206 to regulate the discharge of fat, oil and grease. (Ord. #2004-2, Feb. 2004)

18-209. Industrial user monitoring, inspection reports, records access, and safety. (1) Monitoring facilities. The installation of a monitoring facility shall be required for all industrial users. A monitoring facility shall be a manhole or other suitable facility approved by the city.

When in the judgment of the city, there is a significant difference in wastewater constituents and characteristics produced by different operations of a single user the city may require that separate monitoring facilities be installed for each separate source of discharge.

Monitoring facilities that are required to be installed shall be constructed and maintained at the user's expense. The purpose of the facility is to enable inspection, sampling and flow measurement of wastewater produced by a user. If sampling or metering equipment is also required by the city, it shall be provided and installed at the user's expense.

The monitoring facility will normally be required to be located on the user's premises outside of the building. The city may, however, when such a location would be impractical or cause undue hardship on the user, allow the facility to be constructed in the public street right-of-way with the approval of the public agency having jurisdiction of that right-of-way and located so that it will not be obstructed by landscaping or parked vehicles.

There shall be ample room in or near such sampling manhole or facility to allow accurate sampling and preparation of samples for analysis. The facility, sampling, and measuring equipment shall be maintained at all times in a safe and proper operating condition at the expenses of the user.

(2) Inspection and sampling. The city shall inspect the facilities of any user to ascertain whether the purpose of this chapter is being met and all requirements are being complied with. Persons or occupants of premises where wastewater is created or discharged shall allow the city or their representative
ready access at all reasonable times to all parts of the premises for the purpose of inspection, sampling, records examination or in the performance of any of their duties. The city, approval authority and EPA shall have the right to set up on the user's property such devices as are necessary to conduct sampling inspection, compliance monitoring and/or metering operations. Where a user has security measures in force which would require proper identification and clearance before entry into their premises, the user shall make necessary arrangements with their security guards so that upon presentation of suitable identification, personnel from the city, approval authority and EPA will be permitted to enter, without delay, for the purposes of perform in their specific responsibility.

(3) Compliance date report. Within one hundred eighty (180) days following the date for final compliance with applicable pretreatment standards or, in the case of a new source, following commencement of the introduction of wastewater into the POTW, any user subject to pretreatment standards and requirements shall submit to the city a report indicating the nature and concentration of all pollutants in the discharge from the regulated process which are limited by pretreatment standards and requirements and the average and maximum daily flow for these process units in the user facility which are limited by such pretreatment standards or requirements. The report shall state whether the applicable pretreatment standards or requirements are being met on a consistent basis and, if not, what additional O&M and/or pretreatment is necessary to bring the user into compliance with the applicable pretreatment standards or requirements. This statement shall be signed by an authorized representative of the industrial user, and certified to by a professional engineer registered to practice engineering in Tennessee.

(4) Periodic compliance reports. (a) Any user subject to a pretreatment standard, after the compliance date of such pretreatment standard, or, in the case of a new source, after commencement of the discharge into the POTW, shall submit to the city during the months of June and December, unless required more frequently in the pretreatment standard or by the city, a report indicating the nature and concentration of pollutants in the effluent which are limited by such pretreatment standards and requirements.

In addition, this report shall include a record of all daily flows which during the reporting period exceeded the average daily flow. At the discretion of the city and in consideration of such factors as local high or low flow rates, holidays, budget cycles, etc., the city may agree to alter the months during which the above reports are to be submitted.

(b) The city may impose mass limitations on users where the imposition of mass limitations are appropriate. In such cases, the report required by subparagraph (a) of this paragraph shall indicate the mass of pollutants regulated by pretreatment standards in the effluent of the user.

(c) The reports required by this section shall contain the results of sampling and analysis of the discharge, including the flow and the
nature and concentration or production and mass where requested by the city of pollutants contained therein which are limited by the applicable pretreatment standards. The frequency of monitoring shall be prescribed in the wastewater discharge permit or the pretreatment standard. All analysis shall be performed in accordance with procedures established by the administrator pursuant to § 304(g) of the Act and contained in 40 CFR, and amendments thereto. Sampling shall be performed in accordance with techniques approved by the administrator.

(5) Maintenance of records. Any industrial user subject to the reporting requirements established in this section shall maintain records of all information resulting from any monitoring activities required by this section. Such records shall include for all samples:
   (a) The date, exact place, method, and time of sampling and the names of the persons taking the samples;
   (b) The dates analyses were performed;
   (c) Who performed the analyses;
   (d) The analytical techniques/methods used; and
   (e) The results of such analyses.

Any industrial user subject to the reporting requirement established in this section shall be required to retain for a minimum of three (3) years all records of monitoring activities and results (whether or not such monitoring activities are required by this section) and shall make such records available for inspection and copying by the city, director of the division of water quality control, Tennessee Department of Health and Environment or the Environmental Protection Agency. This period of retention shall be extended during the course of any unresolved litigation regarding the industrial user or when requested by the city, the approval authority, or the Environmental Protection Agency.

(6) Safety. While performing the necessary work on private properties, duly authorized employees of the city shall observe all safety rules applicable to the premises established by the company and the company shall be held harmless for injury or death to the city employees and the city shall indemnify the company against loss or damage to its property by city employees and against liability claims and demands for personal injury or property damage asserted against the company and growing out of the monitoring and sampling operation, except as such may be caused by negligence or failure of the company to maintain safe conditions. (1987 Code, § 8-308)

18-210. Enforcement and abatement. (1) Issuance of cease and desist orders. When the city finds that a discharge of wastewater has taken place in violation of prohibitions or limitations of this chapter, or the provisions of a wastewater discharge permit, the city shall issue an order to cease and desist, and direct that these persons not complying with such prohibitions, limits requirements, or provisions to:
   (a) Comply immediately;
(b) Comply in accordance with a time schedule set forth by the city;
(c) Take appropriate remedial or preventive action in the event of a threatened violation; or
(d) Surrender the applicable user's permit if ordered to do so after a show cause hearing.

Failure of the city to issue a cease and desist order to a violating user shall not in any way relieve the user from any consequences of a wrongful or illegal discharge.

(2) Submission of time schedule. When the city finds that a discharge of wastewater has been taking place in violation of prohibitions or limitations prescribed in this chapter, or wastewater source control requirements, effluent limitations of pretreatment standards, or the provisions of a wastewater discharge permit, the city shall require the user to submit for approval, with such modifications as it deems necessary, a detailed time schedule of specific actions which the user shall take in order to prevent or correct a violation of requirements. Such schedule shall be submitted to the city within thirty (30) days of the issuance of the cease and desist order.

(3) Show cause hearing. (a) The city may order any user who causes or allows an unauthorized discharge to enter the POTW to show cause before the board of mayor and aldermen why the proposed enforcement action should not be taken. A notice shall be served on the user specifying the time and place of a hearing to be held by the board of mayor and aldermen regarding the violation, the reasons why the action is to be taken, the proposed enforcement action, and directing the user to show cause before the board of mayor and aldermen why the proposed enforcement action should not be taken. The notice of the hearing shall be served personally or by registered or certified mail (return receipt requested) at least ten (10) days before the hearing.

(b) The board of mayor and aldermen may itself conduct the hearing and take the evidence, or the board of mayor and aldermen may appoint a person to:

(i) Issue in the name of the board of mayor and aldermen notice of hearings requesting the attendance and testimony of witnesses and the production of evidence relevant to any matter involved in such hearings;
(ii) Take the evidence;
(iii) Transmit a report of the evidence and hearing, including transcripts and other evidence, together with recommendations to the board of mayor and aldermen for action thereon.

(c) At any hearing held pursuant to this chapter, testimony taken must be under oath and recorded. The transcript, so recorded, will be
made available to any member of the public or any party to the hearing upon payment of reproduction costs.

(d) After the board of mayor and aldermen or the appointed persons have reviewed the evidence, it/they may issue an order to the user responsible for the discharge directing that, following a specified time period, the sewer service be discontinued unless adequate treatment facilities, devices or other related appurtenances shall have been installed on existing treatment facilities, and that these devices or other related appurtenances are properly operated. Further orders and directives as are necessary and appropriate may be issued.

(4) **Legal action.** If any person discharges sewage, industrial wastes, or other wastes into the city's wastewater disposal system contrary to the provisions of this chapter, federal or state pretreatment requirements, or any order of the city, the city attorney may commence an action for appropriate legal and/or equitable relief in a court of competent jurisdiction.

(5) **Emergency termination of service.** The city may suspend the wastewater treatment service and/or wastewater contribution permit when such suspension is necessary, in the opinion of the city, in order to stop an actual or threatened discharge which presents or may present an imminent or substantial endangerment to the health or welfare of persons, to the environment, causes interference to the POTW or causes the city to violate any condition of its NPDES permit.

Any person notified of a suspension of the wastewater treatment service and/or the wastewater contribution permit shall immediately stop or eliminate the contribution. In the event of a failure of the person to comply voluntarily with the suspension order, the city shall take such steps as deemed necessary including immediate severance of the sewer connection, to prevent or minimize damage to the POTW system or endangerment to any individuals. The city shall reinstate the wastewater contribution permit and/or the wastewater treatment service upon proof of the elimination of the non-complying discharge. A detailed written statement submitted by the user describing the causes of the harmful contribution and the measures taken to prevent any future occurrence shall be submitted to the city within fifteen (15) days of the date of occurrence.

(6) **Public nuisance.** Discharges or wastewater in any manner in violation of this chapter or of any order issued by the board of mayor and aldermen or its designated representative as authorized by this chapter is hereby declared a public nuisance and shall be corrected or abated as directed by the board of mayor and aldermen. Any person creating a public nuisance shall be subject to the provisions of the city code of ordinances governing such nuisance.

(7) **Correction of violation and collection of costs.** In order to enforce the provisions of this chapter, the city shall correct any violation hereof. The cost of such correction shall be added to any sewer service charge payable by the person violating this chapter or the owner or tenant of the property upon which the
violation occurs, and the city shall have such remedies for the collection of such costs as it has for the collection of sewer service charges.

(8) **Damage to facilities.** When a discharge of wastes causes an obstruction, damage, or any other physical or operational impairment to facilities, the city shall assess a charge against the user for the work required to clean or repair the facility and add such charge to the user's sewer service charge.

(9) **Civil liabilities.** Any person or user who intentionally or negligently violates any provision of this chapter, requirements, or conditions set forth in permit duly issued, or who discharges wastewater which causes pollution or violates any cease and desist order, prohibition, effluent limitation, national standard or performance, pretreatment, or toxicity standard, shall be liable civilly.

The City of Baxter shall sue for such damage in any court of competent jurisdiction. (1987 Code, § 8-309)

18-211. **Penalties; costs.** Civil penalties. Any user who is found to have violated an order of the board of mayor and aldermen or its designated representative, or who willfully or negligently failed to comply with any provision of this chapter, and the order, rules, regulations and permits issued hereunder, shall be fined not less than fifty dollars ($50.00) for each offense. Each day of which a violation shall occur or continue shall be deemed a separate and distinct offense. In addition to the penalties provided herein, the city may recover reasonable attorney's fees, engineering fees, court costs, court reporters' fees and other expenses of litigation by appropriate suit at law against the person found to have violated this chapter or the person found to have violated this chapter or the orders, rules, regulations, and permits issued hereunder. (1987 Code, § 8-310)

18-212. **Fees and billing.** (1) **Purpose.** It is the purpose of this chapter to provide for the equitable recovery of costs from users of the city's wastewater treatment system including costs of operation, maintenance, administration, bond service costs, capital improvements, depreciation, and equitable cost recovery of EPA administered federal wastewater grants.

(2) **Types of charges and fees.** The charges and fees as established in the city's schedule of charges and fees may include but are not limited to:
   (a) Inspection fee and tapping fee;
   (b) Fees for applications for discharge;
   (c) Sewer use charges;
   (d) Surcharge fees;
   (e) Industrial wastewater discharge permit fees;
   (f) Fees for industrial discharge monitoring; and
   (g) Other fees as the city may deem necessary.
(3) **Fees for application for discharge.** A fee may be charged when a user or prospective user makes application for discharge as required by § 18-206 of this chapter.

(4) **Inspection fee and tapping fee.** An inspection fee and tapping fee for a building sewer installation shall be paid to the city's sewer department at the time the application is filed.

(5) **Sewer user charges.** The board of mayor and aldermen shall establish monthly rates and charges for the use of the wastewater system and for the services supplied by the wastewater system.

(6) **Industrial wastewater discharge permit fees.** A fee may be charged for the issuance of an industrial wastewater discharge fee in accordance with § 18-206 of this chapter.

(7) **Fees for industrial discharge monitoring.** Fees may be collected from industrial user's having pretreatment or other discharge requirements to compensate the city for the necessary compliance monitoring and other administrative duties of the pretreatment program. (1987 Code, § 8-311)

18-213. **Validity.** This chapter and its provisions shall be valid for all service areas, regions, and sewage works under the jurisdiction of the City of Baxter, Tennessee. (1987 Code, § 8-312)

---

\(^1\)Such rates are reflected in administrative ordinances or resolutions, which are of record in the office of the city recorder.
CHAPTER 3

CROSS CONNECTIONS, AUXILIARY INTAKES, ETC.

SECTION
18-301. Definitions.
18-304. Statement required.
18-305. Inspections.
18-306. Correction of violations.
18-307. Required protective device.
18-308. Non-potable supplies.
18-309. Provision applicable.
18-310. Penalty.

18-301. Definitions. The following definitions and terms shall apply in the interpretation and enforcement of this chapter.

(1) "Auxiliary intake." Any piping connection or other device whereby water may be secured from a source other than that normally used.

(2) "Bypass." Any system of piping or other arrangement whereby the water may be diverted around any part or portion of a water purification plant.

(3) "Cross connection." Any physical arrangement whereby a public water system is connected, directly or indirectly, with any other water supply system, sewer, drain, conduit, pool, storage reservoir, plumbing fixture, or other device which contains, or may contain, contaminated water, sewage, or other waste or liquid of unknown or unsafe quality which may be capable of imparting contamination to the public water system as a result of backflow. Bypass arrangements, jumper connections, removable sections, swivel or changeover devices through which, or because of which, backflow could occur are considered to be cross connections.

(4) "Interconnection." Any system of piping or other arrangement whereby the public water system is connected directly with a sewer, drain, conduit, pool, storage reservoir, or other device which does or may contain sewage or other waste or liquid which would be capable of imparting contamination to the public water system.

(5) "Person." Any individual, corporation, company, association, partnership, state, municipality, utility district, water cooperative, or federal agency.

(6) "Public water system." The waterworks system which furnishes water to Baxter and certain surrounding areas of general use and which is recognized as a public water system by the Tennessee Department of Health and Environment.

(7) "Superintendent." That person in charge of the operation of the Baxter water system or the authorized representative of that person. (Ord. #2007-3, March 2007)

18-302. Compliance with Tennessee Code Annotated. The Baxter public water system is to comply with Tennessee Code Annotated, §§ 68-13-701 through 68-13-719, as well as the rules and regulations for public water systems, legally adopted in accordance with this code, which pertains to cross connections, auxiliary intakes, bypasses, and interconnections, and establish an effective on-going program to control these undesirable water uses. (Ord. #2007-3, March 2007)

18-303. Regulated. It shall be unlawful for any person to cause a cross connection to be made, or allow one to exist for any purpose whatsoever unless the construction and operation of same have been approved by the Tennessee Department of Health and Environment, and the operation of such cross connection, auxiliary intake, bypass, or interconnection is at all time under the direct supervision of the superintendent of the such as manager of the Baxter public water system.¹ (Ord. #2007-3, March 2007)

18-304. Statement required. Any person whose premises are supplied with water from the public water supply, and who also has on the same premises a separate source of water supply or stores water in an uncovered or unsanitary storage reservoir from which the water stored therein is circulated through a piping system, shall file with the superintendent a statement of the non-existence of unapproved or unauthorized cross connections, auxiliary intakes, bypasses, or interconnections. Such statement shall also contain an agreement that no cross connection, auxiliary intake, bypass, or in interconnection will be permitted upon the premises. (Ord. #2007-3, March 2007)

18-305. Inspections. The superintendent shall inspect all properties served by the public water supply where cross connections with the public water supply are deemed possible. The frequency of inspections and re-inspections based on potential health hazards involved shall be established by the superintendent in accordance with guidelines acceptable to Tennessee Department of Health and Environment.

The superintendent or authorized representative shall have the right to enter at any reasonable time any property served by a connection to the Baxter public water system for the purpose of inspecting the piping system therein for

¹The "Cross Connection Control Plan for Baxter, Tennessee" adopted with Ord. #2007-3, March 2007, is available for inspection in the office of the city recorder.
cross connections, auxiliary intakes, bypasses or interconnections. On request, the owner, lessee, or occupant of any property so served shall furnish any pertinent information regarding the piping system on such property. The refusal of such information or refusal of access, when requested, shall be deemed evidence of the presence of cross connections. (Ord. #2007-3, March 2007)

18-306. Correction of violations. Any person who now has cross connections, auxiliary intakes, bypasses, or interconnections in violation of the provisions of this chapter shall be allowed a reasonable time within which to comply with provisions of this chapter. After a thorough investigation of existing conditions and an appraisal of time required to complete the work, the amount of time shall be designated by the superintendent.

The failure to correct conditions threatening the safety of the public water system as prohibited by this chapter and Tennessee Code Annotated, § 68-13-711, within the time limits set by the Baxter public water system, shall be grounds for denial of water service. If proper protection has not been provided after a reasonable time, the superintendent shall give the customer legal notification that water service is to be discontinued, and physically separate the public water system from the customer's on-site piping system in such a manner that the two systems cannot again be connected by an unauthorized person.

Where cross connections, interconnections, auxiliary intakes, or bypasses are found that constitute an extreme hazard of immediate concern of contaminating the public water system, the superintendent of the water system shall require that immediate corrective action be taken to eliminate the threat to the public water system. Immediate steps shall be taken to disconnect the public water system from the on-site piping system unless the imminent hazard is corrected immediately. (Ord. #2007-3, March 2007)

18-307. Required protective device. Where the nature of use of the water supplied a premises by the water system is such that it is deemed:

(1) Impractical to provide an effective air-gap separation.
(2) The owner and/or occupant of the premises cannot, or is not willing, to demonstrate to the superintendent or his designated representative that the water use and protective features of the plumbing are such as to pose no threat to the safety or potability of the water.
(3) The nature and mode of operation within a premises are such that frequent alterations are made to the plumbing.
(4) There is a likelihood that protective measures may be subverted, altered, or disconnected. Then the superintendent shall require the use of an approved protective device on the service line serving the premises to assure that any contamination that may originate in the customer's premise is contained therein. The protective devices shall be reduced pressure zone type backflow preventers approved by the Tennessee Department of Health and Environment as to manufacture, model, and size. The method of installation of backflow
protective devices shall be approved by the superintendent prior to installation and shall comply with the criteria set forth by the Tennessee Department of Health and Environment. The installation shall be at the expense of the owner or occupant of the premises.

Personnel of the Baxter Public Water System shall have the right to inspect and test the device on an annual basis or whenever deemed necessary by the superintendent.

Water service shall not be disrupted to test the device without the knowledge of the occupant of the premises.

Where the use of water is critical to the continuance of normal operations or protection of life, property, or equipment, duplicate units shall be provided to avoid the necessity of discontinuing water service to test or repair the protective device. Where it is found that only one (1) unit has been installed and the continuance of service is critical, the superintendent shall notify, in writing the occupant of the premises of plans to discontinue water service and arrange for a mutually acceptable time to test or repair the device. The water system shall require the occupant of the premises to make all repairs indicated promptly, and to keep any protective device working properly. The expense of such repairs shall be borne by the owner or occupant of the premises. Repairs shall be made by qualified personnel, acceptable to the superintendent.

The failure to maintain a backflow prevention device in proper working order shall be grounds for discontinuing water service to a premises. Likewise the removal, bypassing, or altering protective device or the installation thereof so as to render a device ineffective shall constitute grounds for discontinuance of water service. Water service to such premises shall not be restored until the customer has corrected or eliminated such conditions or defects to the satisfaction of the superintendent. (Ord. #2007-3, March 2007)

18-308. Non-potable supplies. The potable water system made available to premises served by the public water system shall be protected from possible contamination as specified herein. Any water outlet which could be used for potable or domestic purposes and which is not supplied by the potable system must be labeled in a conspicuous manner as:

WATER UNSAFE
FOR DRINKING

Minimum acceptable sign shall have black letters at least one inch (1") high located on a red background. (Ord. #2007-3, March 2007)

18-309. Provision applicable. The requirements contained herein shall apply to all premises served by the Baxter public water system whether located inside or outside the corporate limits and are hereby made a part of the conditions required to be met for the city to provide water services to any
premises. Such action, being essential for the protection of the water distribution system against the entrance of contamination which may render the water unsafe health-wise, or otherwise undesirable, shall be enforced rigidly without regard to location of the premises, whether inside or outside the Baxter corporate limits. (Ord. #2007-3, March 2007)

18-310. **Penalty.** Any person who neglects or refuses to comply with any of the provisions of this chapter shall be deemed guilty of a misdemeanor and, upon conviction therefor, shall be fined not less than ten dollars ($10.00) not more than fifty dollars ($50.00), and each day of continued violation shall constitute a separate offense. (Ord. #2007-3, March 2007)
CHAPTER 4

SPECIAL ASSESSMENT ZONE

SECTION
18-401. Definition.
18-402. Use of fees collected.
18-403. Future upgrades.
18-404. Fees assessed: residential connections.
18-405. Fees assessed: commercial connections.
18-406. Application.
18-408. Amendment: notice.

18-401. **Definition.** The "special assessment zone," shall be defined as the area within the City of Baxter wastewater service area located east of Highway 56 and south of I-40 and as shown in the "special assessment zone map" on file in the city recorder's office. (Ord. #2008-22, Feb. 2009, modified)

18-402. **Use of fees collected.** The collection of the "special assessment fee" shall be used for the repayment of funds and/or indebtedness, interest, and projected depreciation incurred for the expansion of the described extension of wastewater services only into the expansion of the described extension of wastewater services only into the "special assessment zone" as well as any necessary wastewater system future upgrades specifically necessary to support growth as needed within the "special assessment zone" and/or the conveyance system directly to the Waste Water Treatment Plant (WWTP) and/or the expansion or upgrade of said WWTP. (Ord. #2008-22, Feb. 2009)

18-403. **Future upgrades.** Said future upgrades being acknowledged by the Mayor and Board of Aldermen of the City of Baxter, and known to be necessary when the daily flows within the defined "special assessment zone" combined with the peak daily flows of the collection system and pump station defined as "Baxter Junction/Love's Pump Station" exceed one hundred fifty thousand (150,000) gallons per day. Future upgrades to be determined based upon the most cost effective and timely alternative as upgrades of gravity collections along 1st Ave., force main directly to the WWTP, and/or expansion/upgrade of the WWTP as necessary. (Ord. #2008-22, Feb. 2009)

18-404. **Fees assessed: residential connections.** The "Special Assessment Fee" (SAF) shall be one thousand six hundred twenty dollars ($1,620.00) per Standard Residential Unit (SRU). A standard residential unit shall be defined as the average daily demand of two hundred fifty (250) gallons per day (gpd) for a typical (three (3) bedroom) single family dwelling, and shall
be the minimum fee unit. Any connection or demand that exceeds one (1) SRU shall be a direct multiplier of the SAF x the equivalent number of SRUs. (see example below)

- 3 BR House = 1 SRU x $1,620.00 = $1,620.00
- 4 BR House = 1.33 SRU x $1,620.00 = $2,154.60
- 6 BR House = 2 SRU x $1,620.00 = $3,240.00
- Business (2,500 gpd/ 250 gpd = 10 SRU x $1,620.00 = $16,200.00)

(Ord. #2008-22, Feb. 2009)

18-405. **Fees assessed: commercial connections.** In the case of commercial, industrial, retail, or other connections the equivalent number of SRUs that shall be the multiplier of the SAF shall be defined by the customer or customer's agent and approved by the City of Baxter or Baxter's engineer based upon the required peak daily flow demand as defined by either Tennessee Department of Environment and Conservation for fixture counts and type of facility use, sample data from a similar size and use facility in another location, or other method of calculation of peak daily flow demand to be approved by the City of Baxter and/or Baxter's engineer. (Ord. #2008-22, Feb. 2009)

18-406. **Application.** The SAF is for the recovery of funds and indebtedness as described herein, and this chapter shall have no impact on the standard connection fees or service rates that are defined and published for all sewer service customers. Customers within the "special assessment zone" shall be subject to all other standard connection fees and service rates as applicable. (Ord. #2008-22, Feb. 2009)

18-407. **Payment by developer: calculation.** The SAF is due and payable to the City of Baxter by the developer at the time of application for service and shall be paid prior to connection to the wastewater collection system. The City of Baxter agrees to provide service for the peak daily capacity as defined in the special assessment fee. Since the equivalent number of SRUs cannot be determined for unsold lots, the SAF will initially be based upon one (1) SRU per half (1/2) acre of each lot. If the area of a lot exceeds any half (1/2) acre increment, the acreage will be rounded to the next subsequent half (1/2) acre. (See example below)

(1.62 acres rounded to 2 acres x 1 SRU per half acre = 4 SRUs x $1,620.00 = $6,480.00)
(1.03 acres rounded to 1.5 acres x 1 SRU per half acre = 3 SRUs x $1,620.00 = $4,860.00)

When a lot sells and a use is determined and approved for that lot, the peak daily flow demand will be calculated as provided in § 18-404. At that time, if the number of SRUs exceeds one (1) per half (1/2) acre as determined above, the
additional SRUs will be paid for by the Baxter utility department customer before a sewer tap can be purchased for that lot. (Ord. #2008-22, Feb. 2009)

18-408. Amendment: notice. The City of Baxter reserves the right to amend the special assessment zone to recover any future cost or indebtedness, but prior to any amendment of this chapter or amendment to the system of establishing the "special assessment fee" or the description of the "special assessment zone," the City of Baxter shall publish notice of the proposed amendment in accordance with standard practices. (Ord. #2008-22, Feb. 2009)
