

↑
 "Don't throw garbage in our streams or lakes, or in the Tennessee River. Fish and other creatures live there. You wouldn't like it if people dumped garbage in your house."

"It's also important to conserve water. Turn it off while you brush your teeth. For every minute you leave the water running, 4-5 gallons of it are wasted going down the drain!"

"Look for leaky faucets where you live. If you find one, show it to Mom or Dad so it can be fixed. Saving water means saving money."

"Never pour oil or grease, or put food down the kitchen sink. Some cannot be removed from wastewater. Besides that, the sink could clog up and cause a big mess!"

Keep Our Waterways Clean!
 Here's some things you can do to help.

City of Chattanooga
 Stormwater Management Division

**"Remember what
I always say,
CLEAN WATER IS....
THE CLEAR CHOICE!"[®]**

**"Bye For
Now!"**

**"You Can Make A Big Difference In Keeping Our
Local Waterways Clean By Not Polluting Water And
Using Water Wisely."**
